BIBLE VERSE FOR TODAY

HE MISSED GLORY FOR
GOLD. Then Jesus beholding him
loved him, and said unto him,
One thing thou lackest: go thy
way, sell whatsoever thou hast,
and give it to the poor, and thou
shalt have treasure in heaven;
and come, take up that cross, and
follow me. And he was sad at
that saying, and went away
grieved: for he had great posses-
sions. —Mark 10:21, 22.

Poor Hitler got hit in the
face! Ha Ha Ha!

And just to think, Hitler got
hit with that bouquet after all
Chamberlain had done to save his
face!

Caschs Decide to Play Ball with
Hitler—headline. They better be
careful he doesn't steal the hat
and gloves.

Someone threw a bouquet of
flowers at Hitler and scratched
his face. Unfortunately the dam-
age was not serious.

Karl Lehmann is proud of the
record of his Lake County
Chamber of Commerce during the
past year, and justly so.

America is being besieged by
"isms" of all kinds but most peo-
ple don't know the difference be-
tween fascism and communism.

If you can still remember the
time when you used to think that
a man of forty was an old man,
you are probably nearing that
period in life when a man of thirty
seems like a mere child.

Secretary Wallace has ordered
a shakeup in the Department of
Agriculture. Trying to get some
of that surplus corn to pop, no
doubt.

The only advantage that we
can see to what is happening to
the Caschs is that Germany fits
so much better into the headlines
than Czechoslovakia does.

The government is considering
a plan to "encourage" profit-
sharing by means of taxation. The
best way we know to encourage
profit sharing is to reduce taxes
so that there might be some profit
to share.

Cameleons and lizards are able
to see in two different directions
at the same time. What wonder-
ful politicians they would make.—
Titusville Star Advocate. And
think how easily they would be
able to change their colors.

We see where there is such a
lack of work in some of the
executive departments in Wash-
ington (executive departments,
remember, not judicial) that they
are months behind. What they
need up there is a few more
hundred thousand employees.

Those were pretty bad working
conditions which showed up in
the automobile industry the other
day. CIO members went on a
strike because they had to work
48 hours a week. They struck for
a 40-hour week. Some of our
workers are just beginning to
realize what they are missing.

Senator President Benes has
been offered a professorship at
Columbia University. Benes, who
speaks five different languages,
and who was a college professor
before the World War, is one of
the few politicians of Europe suf-
ficiently well educated to under-
stand what the representative of
his own country is saying. At
least Hitler couldn't understand
Hitler, Benes, or Chamber-
lain. Benes isn't under-
standing Chamberlain, and Chamber-
lain isn't understanding Hitler.
Hitler says he's going to visit
Benes.

Four Amendments

At the general election on November 8 the people of
Florida will be asked to vote upon four important amend-
ments to the State Constitution. As little less
than a month remains before the election, every citizen
who expects to go to the polls should be familiarizing him-
self with these proposed amendments and making up his
mind whether he wants to vote for or against them.

A list of the proposed amendments has been running
in The Herald for the past two months so that the public
should be familiar at least with their legal phraseology.
During the next few weeks we expect to explain more fully
their purposes and the significance. Today we will merely
mention each one of them briefly.

The first amendment listed on the ballot proposes an
extension of the existing Homestead Exemption Amend-
ment. It will be recalled that much of the opposition to
the Homestead Amendment in the first place was based on
the fact that while it provided exemption for certain
classes of our home owners, it did not give exemption to
all of them. Widows, and minors, for instance, who might
have no dependents, were excluded from its benefits. Now
these as well as all others, in whom rests the legal title to
the home in which they reside, would be entitled to home-
stead exemption.

It is also proposed to amend the Constitution so that
all local bills to be passed by the Legislature in the future
must be advertised locally for a period of at least 30 days
before it is presented to the Legislature. The time when
one man, or a small group of men in a given community,
could go to Tallahassee and with the aid of a legisla-
tor, rush through a local bill, without the great majority of
the local people knowing anything about it, will have
passed if this amendment is adopted.

A third amendment provides for the appropriation of
state funds for the maintenance and support of public
schools in this state, as well as for our institutions of
higher learning, and places these appropriations on a basis
of equality with other appropriations made by the Legisla-
ture. This amendment would prevent state officials
holding back school monies while checks to penal institu-
tions and the vast horde of political parasites throughout
the state continue to go out in full.

The last amendment on which the people will vote has
to do with the National Guard and provides that no offi-
cer shall be appointed or removed from office except on
the basis of proficiency as determined by U. S. Army regu-
lations. The purpose of this amendment, as we under-
stand it, is to remove the possibility of politics from the
National Guard.

All of these are important amendments and should
be thoroughly understood by the people before being voted
upon. There should, and undoubtedly will be, considerably
more discussion concerning them, both in the press of the
state, on the platform, and over the back fences, before
election day.

Tax Facts

The Chamber of Commerce of the United States has
recently issued a little booklet entitled "Facts About Taxes
and Public Spending" which contains a good deal of inter-
esting and startling information. Among the more sig-
nificant of these facts, the following may be listed:

1. The annual cost of government—federal, state and
local—amounted from \$8,918,640,000 in 1921 to \$48,900,000,000
in 1937, or from \$79.96 per capita to \$130.75.
2. At the present rate of public spending it would
take the working population of a city of 150,000 inhabi-
tants about 180 years to support the Federal Government
alone for one year.
3. In the last fiscal year the Federal Government
spent more than \$21,000,000 a day.
4. The per capita cost of Federal Government increased
from \$27.95 in 1923 to \$62.91 in 1937.
5. Governments of all types collected in taxes \$7,231,000,000
in 1923. In 1937 they collected \$12,300,000,000.
6. If every dollar of income of persons receiving more
than \$5,000 a year were to be taken in taxes, the sum
would pay the cost of our numerous governments for only
about six months.
7. It would take about 42 cents of every dollar spent
in retail purchases in the United States last year to pay
the cost of all governments.
8. Many business concerns pay more to government in
taxes than they pay to stockholders in dividends. Some
pay more to the tax collector than they pay to employees.
9. During the ten year period 1926-1935 all active cor-
porations paid in taxes three-fifths of their total net in-
come before taxes.
10. In 1937 taxes absorbed 17.6 percent of the national
income. If taxes had been levied to cover all government
expenditures, they would have taken more than 24 percent
of the national income.
11. Government in recent years has spent much more
than it has collected in taxes. In the 8 years 1931-1938
the Federal Government alone spent \$23,777,000,000 more
than it received.
12. The national indebtedness for all classes of gov-
ernment increased from \$5,721,000,000 in 1913 to \$56,579,000,000
in 1937, a per capita increase from \$59.28 to
\$423.95.
13. It is estimated that more than three-fourths of the
direct obligations of the Federal Government are held by
banks, reserve banks, insurance companies and non-fi-
nance corporations.
14. British per capita taxes were \$100.81 in 1937,
compared with American taxes of \$95.16 per capita.
15. The important difference is that government, in
Great Britain, is practically paying its way, while govern-
ment, in the United States is going deeper into debt.

Clothing Course Opens

First there is a fish fry (and we

the eventful visit to Cousin Ed's

of stories have more charm,
more humor, more 'story' to them,
yet are even more genuinely true
chronicles of the colored people
she has known all her life. The
pictures are more numerous than
before, and more amusing, if that
is possible."

News Of The World In Pictures

These two pictures of a demonstration bombing attack at Chattanooga, Tenn., were snapped within a few seconds of each other but the cameraman remembers taking only the first one. Photographer William Davis of the Chattanooga News snapped the picture, left above, of Major Al Williams flying over the target building, quickly changed plates for the next "shot." Davis got the picture of Major Williams' direct hit, right, but he doesn't remember taking it. When the bomb exploded, something struck out in his head. When his brain cleared, Davis found he had made the picture, and the plate had come from the camera and waded two cracks in a mud-splattered liability.

Carrot-topped, nimble-footed J. Donald (Don) Budge set up a record for the ages to shoot at by adding the American tennis crown to his British, French and Australian championships, thus making himself the first in history to hold all these titles at one time. Photo above shows him at Forest Hills, N. Y., as he defeated Gene Mako, 6-3, 6-8, 6-2, 6-1. Smiling Alice Marble, shown winning a victory Louquet, shared tennis honors with Budge by winning the American women's title in the shortest final on record. She defeated Nancy Wynne of Australia 6-0 and 6-3 in 22 minutes.

Wrigley Field, Chicago, scene of the opening world series warfare, Oct. 3, and the starting pitcher Vernes Gomez, left, of the Yankees, and Bill Lee of the Cubs.

Some macabre humorist sought enlistment in the army because, he said, "the safest place in modern war is in the trenches." And these British mothers feared the truth of the grim jest. They feared the terror of air raids and poison gas bombs. They flocked in scores to the gas mask distributing depots, such as this one in a London school, and brought their sons and daughters to be fitted with these symbols of modern horror—"child-sized" gas masks. That's why, when the die was cast for peace, their dread gave way to hysterical joy.

Tackle Dan Rhule of the University of Kansas wears something that looks like a cross between a housewife's apron and a mattress, but actually it is a shock absorber. It is designed to reduce the risk of injury in practice and allow the men to drill more vigorously. Officially known as blocking armor, the equipment is made of heavily-padded white duck. A strap that goes over the wearer's head fastens to the waist in back.

PLAYERS FROM THE New York and Chicago teams helped Umpire Moran wipe the blood from his face in the third game of the series Oct. 8, after being hit by a ball. Gordon threw to Gehrig in the fifth inning and Moran was hit, but stayed in the game after the accident.

THREE NOW, BUT A FOURTH IS GOING UP—University of Florida's entire dormitory facilities are shown in this aerial view, but construction has begun on a fourth dormitory which will give the state university accommodations for an additional 230 students. At the present time the dormitories provide for only 15 percent of the student body of over 3200. Thomas Hall, shown in the upper part of the photograph, was the first building erected on the campus when the state's system of higher education was reorganized and the university opened in 1905. The new dormitory now under construction will parallel the two present dorms, and at the upper end, will project to the east a short distance.

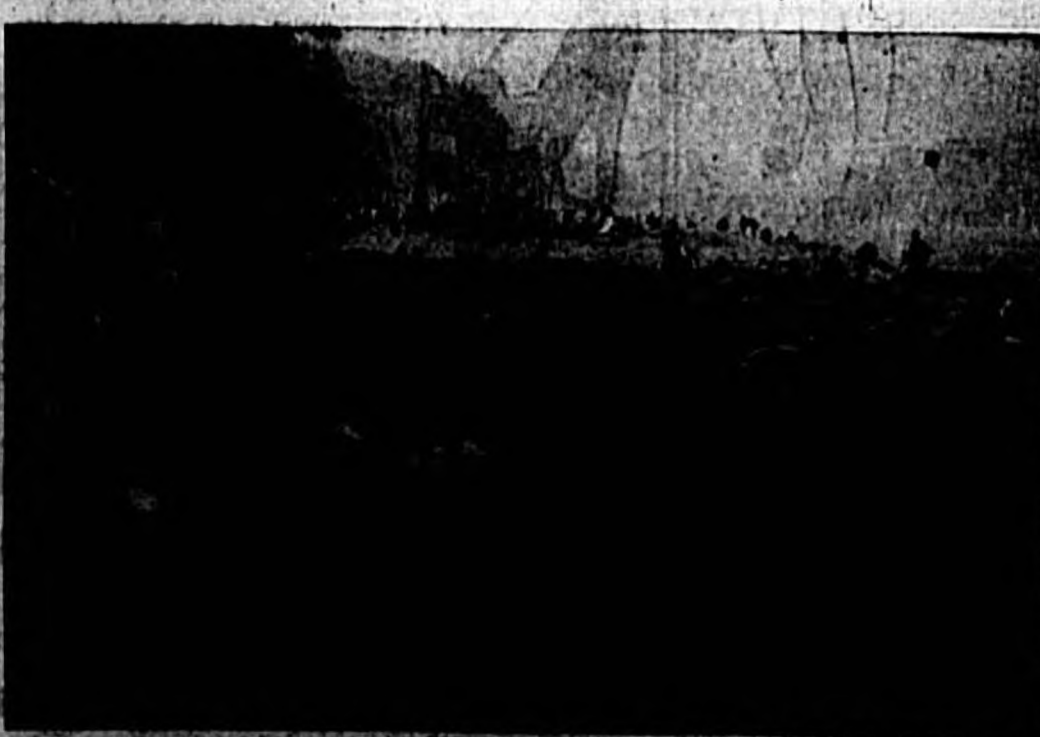

Where Poles Get Slice of Czecho

The Poles have passed the platter and the Czechs have sliced away another part of their fast-diminishing little land, agreeing to withdraw troops from the areas shaded in the map above. An international commission will draw up a new frontier, probably giving to Poland the areas 80 to 90 per cent Polish and leaving Czechoslovakia the rest. Poles are 18 to 20 per cent of the population. Smaller and smaller the country is.

THIS STUDY of Leonard Jacobson was made a "moment" after the 84-year-old brakeman had said, "I only wish I could bring along with any of the dead persons." He assumed full responsibility for the wreck at Tortuga, Ariz., in which 11 persons were killed. Jacobson threw the switch which sent a wreck passenger train hurtling into another passenger train, standing on a siding.

The battle "train" in today's wars is captured in wreckage of the enemy's banking planes. Leonard Jacobson, knowing full well that their carrying capacity would be one of the first objectives when war started, took drastic measures for civilian protection. Pictured above are wreckage from the face of Hyde Park with 100-ton trunks. The trunks were not needed, but Britain will remember their contents and the role of terror.

VIENNA, Oct. 15.—The
 odors Cardinal Innitzer, Roman
 Catholic archbishop of Vienna, as
 held in a press conference by
 Nazi stormtroopers, said, "I
 man authorities promised swift
 prosecution of the responsible
 rable who wrecked his palace
 and attempted to lynch him and
 his priests Saturday night."
 While the 62-year-old card-
 inal celebrated mass in St.
 Stephen's Cathedral under the
 watchful eyes of uniformed
 SS storm troopers who kept
 him from his nearby palace, some
 of his prelates were wounded
 from injuries inflicted Saturday
 night by a yelling mob of anti-
 anti-Catholic.

One of the rioters, thrown
 from a window by the crowd,
 mob garbed in brown, and
 wearing Nazi emblems, was

 ribs.
 The mob, shouting "Kill

 Nazis, inflamed about the

 many Catholics had complained

Lewis Offers To Resign If Green Will

Proposal Is Made As Move To Pave Way For Peace Between Two Labor Groups

Lewis Blames Green For Row

Green Seeks Re-Election As President A. F. Of L. Friday

HOUSTON, Oct. 11.—(AP)—Delegates to the American Federation of Labor convention voted today to give their executive council blanket authority to devise and present to Congress amendments to the work-hour law. They had voted previously to adopt resolutions urging revision of the law.

WASHINGTON, Oct. 11.—(AP)—John L. Lewis offered today to resign as chairman of the Committee for Industrial Organization if William Green would resign as president of the American Federation of Labor to pave the way for peace between the two organizations.

Lewis told newsmen the suggestion from the federation's Houston convention that Lewis withdraw from the CIO was merely "not a unilateral problem." "Obviously it's bilateral," Lewis said, "and the same suggestion would apply to Mr. Green whose recent ferocity seems to have no bounds."

"In any event I think it worth trying. I advise that I'm willing to resign today or tomorrow or any day thereafter as chairman of the Committee for Industrial Organization if Mr. Green is willing simultaneously to resign as president of the American Federation of Labor."

At the convention in Houston William Green, president of American Federation of Labor, said delegates to the federation's annual convention would "answer" John L. Lewis' offer to resign as CIO chairman if Green would step out as federation president.

Green will seek re-election as AFL president Friday. He has (Continued on Page Two)

40 Cents An Hour To Be Sought For Textile Workers

Andrews Says Wages Statute To Be Reasonably Enforced

WASHINGTON, Oct. 11.—(AP)—Labor representative on the wage-hour committee for the textile industry said today he would ask for a 40-cent minimum hourly wage for textile workers for the first year's operation of the wage and hour law.

Emil Rieve, president of American Federation of Hosiery Workers, disclosed his intention to make the demand as the textile wage-hour group began its first discussion of minimum pay levels in the industry.

In New York Elmer F. Andrews, administrator of the new Federal wage and hour law which becomes effective Oct. 24, assured the Industrial Council of the State Labor Department that the law will be reasonably enforced and he doesn't expect any violations.

Members of the council are representatives of labor, employers and physicians appointed by the Governor to advise the Industrial Commissioner. Andrews was commissioner before appointment to his present post.

Mark A. Daly, of Buffalo, executive secretary of New York State Industries, Inc., and an employer representative on the council asked what Andrews' attitude would be toward industry in meeting requirements of the law in the absence of official interpretations or in the case of interpretations not yet fully circulated.

"We have a good legal staff," Andrews replied, adding the staff was "getting a lot of things out." "I want to say," he went on, "that we are getting such a fine spirit of co-operation from industry that we don't look for infractions of the law."

The federal department, he said, will often defend in court if necessary, any inadvertent mistake by employers who may be led into error by interpretations or decisions of the administration. "That was the answer I expected you would make but I wanted to hear it," Daly smiled.

Naval Authorities Survey St. Johns As Air Base Site

JACKSONVILLE, Oct. 11.—(AP)—Lieut. Comdr. W. G. Tomlinson, in charge of a Navy air base survey party, said last night he probably would return to Washington today and report to the naval board.

Tomlinson came here yesterday with three navy seaplanes to determine whether conditions along the St. Johns river meet requirements for a naval air base.

The big patrol bombers, which flew here from Miami, made dozens of landings and take-offs in the vicinity of Camp Foster.

The officer declined to comment on his findings but added, "I am impressed with the river."

A statutory board on naval bases last month inspected proposed sites along the river and apparently favored the Camp Foster section.

Tomlinson said the planes would remain here until Wednesday and may make additional test flights today.

British Leftist Is Forbidden Entrance

NEW YORK, Oct. 11.—(AP)—John Strachey, British leftist, today was ordered excluded from the United States.

The order, issued by special board of inquiry of immigration authorities at Ellis Island, closed the lecturer and author as a "non-immigrant not in possession of properly issued passport."

Officials had been notified by the State Department that Strachey's visa had been cancelled a few hours before he left England.

The federal department, he said, will often defend in court if necessary, any inadvertent mistake by employers who may be led into error by interpretations or decisions of the administration.

GMC Workers Join In Request For Hours Reduction

DETROIT, Oct. 11.—(AP)—The chairman of the United Automobile Workers' General Motors negotiating committee announced yesterday that delegates from 60 General Motors plants had joined in a request for a 32-hour work week until all employees have been re-hired.

Elmer Dowell made the announcement on the eve of conference scheduled with General Motors' corporation and Chrysler corporation, on UAW demand for a curtailed working schedule to share the work during the re-hiring period.

Members of the negotiating committee said they had been informed by General Motors officials that a 15 to 20 percent increase in production schedules is planned in 24 plants of the Chevrolet and Fisher divisions.

Union employees of General Motors' large Chevrolet division at Flint were among those demanding a shorter working schedule. Their demand is for a 32-hour week, with 40 hours' pay. "Until all employees with seniority have been re-hired,"

Harry Mangold, chairman of the Chevrolet division of UAW local 156 at Flint, said that at a meeting of 1500 Chevrolet employees Saturday it was decided to refuse to work more than 32 hours. He said between 8,000 and 9,000 persons were working currently at Chevrolet, compared with 15,000 when production was at its peak last year.
