2236.I Miles

A Startling Nation-Wide Demonstration of Motor Car Stamina, Speed and Econon

Here is an amazing exhibition of motor car stamina, speed and economy—the most magnificent ever given the American public.

For 48 continuous hours, scores of Cleveland Sixes roared over the highways of America -

-participating simultaneously in a National Non-Stop Economy Run-

-- demonstrating clearly and conclusively that the 1925 Cleveland Six is destined to go into history as one of the epoch making cars!

The winner went 2236.1 miles at an average speed of 46.5 m. p. h., averaging 28.3 index to the gallon.

The eight leading entries covered an average of 2117.3 miles in 48 hours at an average speed of 44.1 m. p. h. and averaged 25.5 miles to the gallon.

And all 86 participating cars showed a grand nverage indeage of 1565 for the 48 hours, a grand

average speed of 52 6 m. p. h. and a grand average

economy of 21.4 miles per gallon.

1910NE 17

There have been non-stop runs before but never one like this. Never one so comprehensive in its scope- so free from any suspicion of "stunt" performance - so full of meaty facts.

All entries were standard 1925 Cleveland Sixes -- exactly the cur you see on the street.

Professional racing drivers were barred. Salesmen, executives, mechanics, accountants, newspaper men and even stenographers handled the wheel in various parts of the country.

Every car carried at least one passenger. Every motor ran 48 hours without stopping. Every car was officially observed. Every result was sworn to.

The records were not made on bankels guarded speedways but in every section of country over convenient of read, receivable sort of read, receivery conceivable driving condition.
