FUTURE FLORIDA JOURNALIST: Newsboy toda ... newsman tomorrow!

Someday soon this boy may be writing columns. news stories, articles and editorials about an ever growing Florida. Just what opportunities are in store for him?

Today in Florida there are approximately 220 newspapers and 60 general magazines. They represent both major political parties, discuss all sides of controversial questions. There are "sensational" papers, dignified papers, small town weeklies, society magazines and countless others. Besides these commercial publications, many firms publish company magazines and

bulletins, as well as booklets for advertising and public relations purposes. To aspiring young journalists, these publications offer unlimited opportunities.

But what about tomorrow? Will this boy he allowed to report and write the truth when he is grown? Who will be his boss . . . his conscience or some bureaucrat? He will be able to give Floridians the whole truth only if we preserve our system of free enterprise, with its principle of Freedom of the Press . . . the greatest force for truth and liberty the world has ever known.

Just as free enterprise has built our great publishing industries, so has it built our great pouer systems. Florida Pouer & Light Company is continuing to push ahead ... building new plants, new substations, new lines to protide more and more electric service so that today, and in the future. there will be more and more power a milable for HAPPIER FLORIDA "LECTRICALLY!

Machines Hoisted Thru Bank Window

A luge crane lifted two 1200 found proof machines from the Park Ave. sidewalk Friday aftersoon and plated them in the second-story window of the Florida State Bank building.

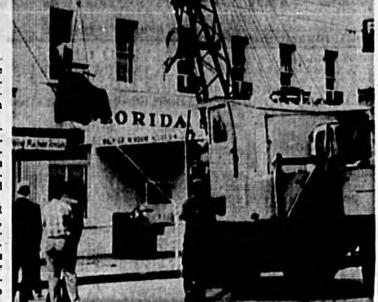

While a large crowd speculated on the chances of the machines being dropped, or not fitting through the window, men from the Allstate Crane Co., Orlaado, officiently maneuvered hem into place.

The two heavy pieces were part of the bookkeeping department, which has been moved to the poond floor. Every piece of important bank material must pasa through them before further transactions can be made, according to bank officials who watched the procedings with lerest.

Offices below the eventual resting place were vacated while the move was on. All turned out well; the machines went up as schedul.

Traffic was rerouted while the mane occupied the middle of Park Ave.

Tunney To Marry

GOING UP - A crans cases a 1,200-pound proof machine toward the second story window of Florida State Bank. This was one of two pieces of heavy equipment lifted from the ground floor into the second story, where the bank's bookkeeping department has moved (Herald Staff Photo)

The County Commission, the County School Board and Mrs. Mary Earle Walker, tax assessor, will meet Feb. 12 to discuss problems of taxation and finance.

This meeting, asked by John Krider, Commission chairman, should lead to a solution to the oft-discussed assessment-millage question in Seminole County.

Members of the two boards and Mrs. Walker are to be what percentage of value on which commended for their decision to get together and discuss assessments must be based. The the problems involved. The Herald believes that such a meeting is necessary; it further believes that the various questions under debate can be settled, fairly and harmonhously, at this meeting.

Officials involved should be prepared to enter the meet- equitably. ing with open minds. There should be a total absence of finger-pointing, charges and counter-charges. The purpose of the meeting should not be to place "blame" or to bring up paign is directed at setting all past defaites and arguments.
