Will Dudley's mighty proud of his big ears! Best crop of corn he's grown since '28, And Will, like so many other farmers, has plenty of reason to be proud of what he raises.

The farmer has always been a keystone in our economic life, and the key to our national well-being. But from where I sit, be's more important now than ever. He's not only feeding America—but friends
of America oversean—building
good will for this country at a time
when friendship for democracy is
most important.

And farmers have willingly shouldered that responsibility. Will spends extra bours in his cornfold ... comes home tired to a temperate glass of beer and early bed, to be ready for the next day's work.

From where I sit, America can be mighty grateful for her five mil-lion farmers . . . for their productivity, hard work, and temperate living — of which Will's moderate glass of beer is proof!
