IN THE HEART OF THE WORLD'S GREATEST VEGETABLE SECTION

VOLUME XIII

SANFORD, FLORIDA, FRIDAY, MAY 12, 1922

NUMBER 39

## RUSSIA HANDED REPLY TO ALLIED REPRESENTATIVES AT 11:45 THIS MORNING

Long Looked for Letter Has Finally Come To Light

STRAIN IS OVER

WHAT WILL BE RUSSIANS ATTITUDE TOWARD FOREIGNERS IS THE QUESTION

(By The Associated Press) LONDON, May 11.—Reuter's Genoa correspondent telegraphs that the Russians at 11:45 this morning handed to Foreign Minister Schanzer, of Italy, their reply to the Allied memorandum.

LONDON, May 11.—A dispatch to the Evening Standard from Genoa says if the French and Belgians quit the economic conference Lloyd George will remain "and try to work the ship to port with short-handed crew."

GENOA, May 11.—The economic conference cannot stand many more days of strain such as it has undergone in connection with the framing of the allied memorandum to the Russian delegates and the rumors connected with the Russians' reply, which has been eagerly awaited for three days, but was not presented yesterday.

The great question bearing on the reply is: What will be the attitude of the Russians toward foreigners' property nationalized by the soviet government? Clause seven of the memorandum was drafted and redrafted to meet the objections of the French and Belgians. The Belgians finally refused approval and the French approved it with reservations. Every effort has been made by the allies, and the Germans as well, to have the Russians concessions relative to the restitution of the property of foreigners in order to prevent disruption of the conference.

While the leaders of the "big five" powers were discussing the vatican memorandum today concerning freedom of religious worship and education in Russia and the return of church property, Premier Lloyd George issued a warning that if the conference backed the Roman Catholic church in a demand for restoration it would immediately provide powerful ammunition to the soviet government. Bolsheviki Russia, he declared would certainly reply that the western countries, notably France and England, had confiscated church property in the past—England at the time of the reformation, France at the time of the revolution and during the period of separation of the church and state.

## GERMANY TO MANUFACTURE OUR ZEPPELIN

TO REPLACE ONE ALLOTTED TO THE UNITED STATES BY VERSAILLES

(By The Associated Press) VERSAILLES, May 11.—Germany will manufacture a Zeppelin of 70,000 meters capacity to replace the one allotted the United States by Versailles treaty but destroyed in Germany, under award of Ambassadors Council, which allows America 3,000,000 gold marks in reparation.

NAVY TO SELL THOUSANDS OF VACUUM TUBES

(By The Associated Press) WASHINGTON, May 11.—Thirty thousand radio transmitting vacuum tubes will be sold by the navy department on May 15, it was announced today. Sealed bids, now being received, will be opened on that day. The sales will be made in lots of 10,000 each.

Various restrictions will be placed about the disposal of these tubes by purchasers. In throwing the 30,000 tubes on the market the navy department will ease the present pronounced shortage in this line of radio equipment.

Let us do your Job Printing.

## NEW PROPOSAL FOR THE SHOALS IS SUBMITTED

CONSULTING ENGINEER AND MANUFACTURER AND THEN SOME

(By The Associated Press) WASHINGTON, May 11.—A new proposal for the lease and operation of Muscle Shoals was submitted by L. Stern, consulting engineer and manufacturer, of Baltimore, made public today by Chairman Norris, of the senate agriculture committee. Stern offered to take over the property for operation for a term of twenty-five or fifty years or such other time as agreeable, to complete plants at government cost and repay all expenditures already made at the rate of two per cent annually. Power developed would be used to manufacture fertilizers and for other projects.

## PROHIBITION TRANSFERRED TO ALL JUSTICE

TAKEN FROM TREASURY DEPARTMENT IN GENERAL SHAKE UP

(By The Associated Press) WASHINGTON, May 11.—Transfer of prohibition unit from the treasury to justice department as part of general scheme of governmental reorganization was said today to have received the approval of Secretary Mellon and Attorney General Daugherty.

## CITY JAILS ARE CROWDED WITH LEADERS

IN CHICAGO STRIKE TROUBLES AND BOMBING OF BUILDINGS

(By The Associated Press) CHICAGO, May 11.—Detective bureau and city jails were crowded today with four hundred labor leaders and others held in connection with the murders of two policemen here yesterday and the bombing of two buildings which the police attribute to labor disorders. Rewards totalling \$30,000 offered for the arrest of the slayers.

GOUVERNEUR MORRIS SEEKS DIVORCE

LOS ANGELES, Calif., May 11.—Gouverneur Morris, author, filed a suit for divorce from Elsie Morris, whom he charges with "desertion and abandonment." They were married May 22, 1905, in New York and separated February 15, 1918, according to the complaint. They have two children. The complaint states Mrs. Morris is now employed in a "beauty parlor" in New York.

DECLINES TO DEBATE PROHIBITION

NEW YORK, May 11.—Lady Astor, in a telephone conversation last night with the New York Times from her home at the Langhorne estate in Albemarle county, Virginia, said that she would decline a challenge from Miss Elizabeth Marbury, national Democratic chairman of the women of the state of New York, to a public debate on prohibition.

STANDARD OIL BOOSTS GAS PRICE

(By The Associated Press) NEW YORK, May 11.—The standard oil company of New Jersey yesterday reported a rise of one cent in the price of gasoline by the gallon. The new price is 26 cents. Advances were announced earlier in the week by Sinclair Consolidated Oil Company, Texas company and other independents.

## DO YOUR SHOPPING IN SANFORD WHERE YOUR MONEY GOES FARTHER

The Herald expects to put on bigger editions this summer than we did in the winter. Sanford is not a winter town but an all-the-year-round town and this summer when a half million dollar's worth of business blocks start to build, when a half million dollars worth of bond money will be spent in improvements, when hundreds of new farms will change hands and be cleared up and put in cultivation, when the golf links and country club will be all ready for the summer tourists, when the \$60,000 pier and boat basin is built, when the new million dollar tourist hotel will be started—

Well, can't you see that Sanford in the ten thousand class will come into her own and this summer will be SOME SUMMER? Our merchants are responsible for the continued prosperity of the Daily Herald and the city of Sanford for they believe in having special sales all through the summer and keeping the trade coming in here day by day and it is growing day by day. Read the advertisements in this issue—read the special sales and tell your neighbors and all your friends about them. Sanford is going after the trade of this part of Florida and Sanford will get it. Keep your eye on the Daily Herald and watch us grow.

## ONE DEATH REPORTED FROM HEAT YESTERDAY IN MINNESOTA CITY

Read and Keep Cool You Poor Deluded Floridians—Cooler Here Always

(By The Associated Press) ST. PAUL, Minn., May 11.—One death from heat yesterday was reported here. Today the temperature reached eighty-five.

## SPECIAL TREASURY REPORT MADE ON PUBLIC PRINTING FOLLOWING RECENT SHAKEUP

(By The Associated Press) WASHINGTON, May 11.—Report of a special Treasury committee which made inventory of supplies and equipment of the Bureau of Printing and Engraving following a recent reorganization of the Bureau's personnel was completed today and it is understood to be a substantial vindication of the declaration by treasury officials no material output of illegal bonds, note or stamps issued taken place within recent years. Report will record, however, discrepancy of some fifty sheets found when a check was made of special paper used in the Bureau for printing bonds and notes.

## SEMI-GOVERNMENTAL CORPORATION FOR OPERATING MUSCLE SHOALS TO KEEP HENRY FORD AWAY

Corporation Sharks Are Getting Busy Putting Something Over on the People

(By The Associated Press) WASHINGTON, May 11.—A semi-governmental corporation for completion and operation of the government power and nitrate projects at Muscle Shoals, Ala., probably will be formally proposed to the senate agriculture committee today, it was outlined partially yesterday by James T. Floyd, of Washington, D. C., an attorney and former member of congress from Missouri, who announced later that the proposal would be completed last night and prepared for presentation to the committee probably at its next session.

J. H. Levering, a consulting engineer of Los Angeles, Calif., Mr. Floyd said, had originated the idea and asked him to draft it into the form of a bill for congressional consideration. It was the intention, the witness said, to provide in the bill for co-operation with directing body of seven comprising a representative for each of the departments, war, treasury and agriculture, to lease the projects for fifty years, complete those yet in unfinished stages and at the termination of the lease period, return to the government every penny it had expended at Muscle Shoals.

Henry Ford's proposed contract for lease and purchase of the shoals projects was made the subject of further comment by Chairman Norris, of Nebraska, who requested R. F. Bower, local official of the American Farm Bureau Federation to criticize the senate bill proposing a government owned and operated corporation for Muscle Shoals development.

In reply Mr. Bower said his opinion was that the bill could not be passed by the senate or house. Influences opposed to Mr. Ford's proposed operation at Muscle Shoals, added to those congressmen who were against government participation in business en-

terprises the witness said, would make the bill referred to by Senator Norris a dead one before it was started thru the legislative mills.

Mr. Bower later informed the committee that his "only hope" to get Muscle Shoals developed in a helpful way for agriculture producing cheaper fertilizers for the farmers and renewing fertility of the soils, was in the acceptance by congress of Mr. Ford's contract.

Arguments by officials of the Alabama Power Company, including Thos. W. Martin, president and Horbert Dent, counsel, were heard yesterday and taken under advisement by Attorney General Daugherty as a preliminary procedure to the preparation by him of an opinion regarding the legality of claims made by the power company of exclusive purchase rights of that part of the Gorgas Steam plant a power unit connecting with the Nitrate factories at Muscle Shoals, which was built during the war.

ANOTHER OPERATION IS FACED BY LENINE LONDON, May 11.—The operation upon Nicolai Lenine, head of the Russian soviet government for the removal of a bullet from his body was unsuccessful and he must undergo another operation, said a Copenhagen dispatch to the Daily Telegraph yesterday. The first operation was performed about six weeks ago by a German surgeon. Lenine has suffered from nervousness, headaches and insomnia as a result of an old bullet wound which was inflicted four years ago.

Have you lost or found anything? A Herald Want Ad will help you.

## OUR BUILDING PROGRAM VERY ATTRACTIVE ONE RUNNING TO A MILLION

GIRLS TEAMS PLAYED BALL AT LOS ANGELES

SCORE WAS 66 TO 16 AND GAME DELAYED WHEN GIRL TORE STOCKING

(By The Associated Press) LOS ANGELES, May 11.—A girl's baseball team of the University of Southern California and Occidental College met yesterday in a seven inning game which ended with a score of 66 to 16 in favor of California. At the end of the fifth inning the score was 30 to 7. Home runs were too numerous to tabulate. Contest would have gone regulation nine innings but one player tore hole in stocking and refused to play any more, until damage was repaired. Delay shortened contest to seven frames.

RED CROSS TO SOLICIT CONTRIBUTIONS

FOR FLOOD SUFFERERS IN THE MISSISSIPPI RIVER BOTTOM

(By The Associated Press) WASHINGTON, May 11.—Local chapters of the Red Cross are requested today by John Barton Payne, national chairman, to solicit contributions for the relief of victims in the flooded areas and valleys of the Mississippi, Illinois and Ohio rivers. At least half a million dollars is needed. President Harding has endorsed the appeal.

CROKER'S WILL IS PROBATED IN IRELAND

LOOKS LIKE TRIAL TO PROVE COMPETENCY OF TESTATOR

(By The Associated Press) DUBLIN, May 11.—Solicitors acting on behalf of the late Richard Croker's two sons in the United States served notice upon Mrs. Croker's solicitors today. They were instructed to enter caveat in Irish court against the will of Croker when it was lodged for probate. This, it stated, would mean a trial to prove the will and competency of the testator.

JULIA LUCKENBACH HAS EXPLOSION ONE MAN KILLED

(By The Associated Press) JERSEY CITY, May 11.—One man was burned to death and eleven were injured in an explosion today aboard the steamer Julia Luckenbach at pier here.

METROPOLIS HAD FIRE IN MAILING ROOM WITH SMALL LOSS

(By The Associated Press) JACKSONVILLE, May 11.—There was a fire in the mailing room of the Metropolis shortly after noon today with about one thousand dollars damage. The flames were on the ground floor, but the dense clouds of smoke surging up the stairways forced the employees to leave the building for half an hour.

CLERGYMEN SEND CONGRATULATIONS TO LLOYD GEORGE

WASHINGTON, May 11.—The convention of non-conformist clergymen yesterday received the following message from Premier Lloyd George at Genoa:

"The humanitarian forces of the world are closing their ranks against brute force. The Genoa conference has sounded the tocsin of peace. We shall not rest until we have won."

For quick results, try a want ad.

Business Blocks and Pretentious Dwellings All Over the City

IMPROVEMENTS IN STREETS AND SEWERS, ON LAKEFRONT AND IN SUB-URBAN LOCATIONS

Sanford will have one of the greatest building records of her history this summer when the six-story First National Bank building, the six-story building on the opposite corner is started, the three story Melch building next to the post office, the one or two story Merriweather building on Magnolia, the new theatre on Magnolia, the new theatre on Park avenue and several new buildings on lower Park avenue on the bulkhead totalling in all more than half a million in business blocks alone. In conjunction with all of this new building in the business portion of the city there will be at least one hundred new dwellings started in various parts of the city, there will be new school buildings, new street paving, new sewers, new pier and boat basin, several garage buildings of brick construction, at least two wholesale houses, a new laundry building and many others making in all about a million dollars worth of new buildings of various kinds. If this is not an ambitious building program for Sanford there has never been one. It means that this city will climb into the ten thousand class in another year and into the twenty-five thousand class in less than five years.

Investors have their eyes on Sanford and today this city is the greatest gold mine in the south for the man with money to invest. There is so much building to be done and not nearly enough money to go round.

And the best part of the story about the new buildings is that home people are doing all the building, doing all the financing, building their own city without asking any outside help. If we just had about three millionaires to visit us now there is no telling how many buildings we could put up between now and the next time it rains.

There are more new subdivisions being opened up than ever before and property is moving everywhere.

## TORNADO IN LEXINGTON NEBRASKA

FIVE PERSONS MISSING, MANY ARE INJURED IN BIG BLOW

(By The Associated Press) OMAHA, Nebr., May 11.—Five persons are missing, a score suffering from minor injuries, and large property damage by a tornado at Lexington, Nebraska, last night.

BISHOPS ELECTED FOR LIFE AGAIN IN METHODIST CHURCH

(By The Associated Press) HOT SPRINGS, Ark., May 11.—The Bishops of the Methodist Episcopal Church, South, will continue to be elected for life instead of a specified term of years, the general conference decided today, when a proposed legislation changing tenure of Episcopacy was rejected.

## THE WEATHER

For Florida: Partly cloudy in north and central and probably showers in extreme south portion tonight and Friday.

Denn Turner, Frank Giles and R. J. Holly, of Sanford, were in Orlando yesterday looking over the town. Mr. Turner, who is district treasurer of the Boy Scouts, attended the Y. M. C. A. convention.

Discounting The Count

A Count used to be a man in charge of a count of 500 persons to whom he was a sort of overlord. This is not true today because of altered political conditions. We still have Counts, but the Count business has changed somewhat. Business of all kinds, has undergone something of a revolution. It was not so many years ago that pack peddlers were the sole distributors and transporters of many of the household articles of the day. Their legs set the limits for most distribution problems in those days. Modern transportation, progressive sales methods—and advertising—have broken the shackles of time. They make a speedy job of what used to take years. Through advertising many an article has been introduced simultaneously in stores all over the country. Advertising today is the method used by business to tell you why you should have certain goods and how to identify those goods. The advertisements you find here are a truthful catalog of needed merchandise. Articles of all kinds and for all purposes are presented in a pleasant way through the medium of type and picture. The outstanding requirements of every member of the family are met by offers of good merchandise of proved value. Use the advertisements for guidance and you will be a constant gainer

H. F. Phipps of Tampa is the guest of J. E. Phipps this week.

**COMMISSIONERS OF STATE MEET IN ORLANDO IN 1924**

Session at Tampa Ends With Selection of Tallahassee for Next Meet

TAMPA, May 11.—The selection of Tallahassee as the 1923 meeting place, Orlando for the 1924 sessions and the re-election of President E. C. Wilkinson, of Naples, Lee county, were the principal features of the final session of the State Association of the County Commissioners here last night. Commissioner S. S. Sadler, Tangerine, Orange county, was elected secretary and the following commissioners as vice-president: R. A. Couchman, Miami, Dade county; Charles T. Friend, Tampa, Hillsborough county; J. P. Swope, Oviedo, Seminole county; A. H. St. John, Jacksonville, Duval county, and J. G. Taylor, Moore Haven, Glades county. The selection of the sixth commissioner, to come from West Florida, was left to the discretion of the president.

It was voted unanimously to exert every influence towards having Royal Palm Hammock, south of Port Myers, set aside by the government for a national tropical park. Action was taken in line with a speech made at Tuesday's session by Charles O'Connor, field representative of the American Automobile Association, who stressed the importance of having some spot in Florida designated for this purpose. It was the consensus of opinion among the visiting commissioners that a national park was a great possibility in store.

The secretary was instructed to communicate with the American Automobile Association asking that body to use their means toward having this plot set aside for the stated purpose.

Upon motion of Commissioner Swope the organization voted in favor of reforestation and endorsed the instituting of a state forester in this state. An effort was made on the part of several commissioners to have the body take definite action toward endorsing the no-fence law with a local option. The sentiment of the majority of the commissioners was against the taking of any action in regard to this matter and after a short speech by Commissioner Oscar A. Ayala, Tampa, Hillsborough county, in which he stated that "the association was in session to exchange ideas and not to discuss any political matter" the proposed measure was killed without further discussion.

**STATE NEWS**

(By The Associated Press)  
MIAMI, May 11.—A legitimate liquor carrier came into port here recently and although overworked prohibition officers examined the vessel papers closely not a flaw was to be found.

It was the auxiliary schooner Rogers, out of Cuba for Nassau with 120 barrels of Old Kentucky Rye aboard. The vessel developed engine trouble and put in here for repairs. Captain Miller, commander of the coast

**“111” cigarettes**

They are **Good!** **10¢**

Buy this Cigarette and Save Money

guard Vidette, mistress of the prohibition sleuth hounds in these waters, was attending a liquor hearing in court when word of the Rogers' arrival reached him. He hastened to greet her. It was found that the vessel had furnished a \$20,000 bond with the Cuban Government and \$6,000 with the American government representatives at Havana, to insure that the cargo would not be landed on America's dry shores.

The first test, made two hours earlier, will serve as an alarm clock for early risers.

**FEW FOLKS HAVE GRAY HAIR NOW**

DRUGGIST SAYS LADIES ARE USING RECIPE OF SAGE TEA AND SULPHUR.

ORLANDO, May 11.—Baptist churchmen in this city have decided upon a building program which will give them another edifice here and a material enlargement of the present church.

An addition to the main church will be built where the parsonage now stands. According to the plans it will be a three story auditorium and will be devoted to the Sunday School classes, thus giving more room in the main edifice for regular devotional services. This work will cost approximately \$30,000 and will necessitate also the building of a new parsonage.

The new edifice is planned for the northern section of the city, at the corner of Mills and Wisconsin streets.

All of the work will be financed on the volunteer subscription plan.

ST. PETERSBURG, May 11.—Golfers and fishermen here have induced the fire department to ring the fire bell at 6 a. m., daily to awaken them so they may get up for an early round of golf or start for the bay for an early contest with Spanish mackerel of other fish which may be running at the time. The fire bell for many years has been sounded at 8 a. m., noon and 6 p. m., as a test, and the big gong can be heard in a large part of the city. In future

Hair that loses its color and lustre or when it fades, turns gray, dull and lifeless is caused by a lack of sulphur in the hair. Our grandmother made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only this old-time recipe.

Nowadays we get this famous mixture improved by the addition of other ingredients by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," which darkens the hair so naturally, so evenly that nobody can possibly tell it has been applied. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears; but what delights the ladies with Wyeth's Sage and Sulphur Compound is that, besides beautifully darkening the hair after a few applications, it also brings back the gloss and lustre and gives it an appearance of abundance.—Adv.

**CATES CRATE CO.**

THE BIG NEW FEED STORE  
NOW IN OUR NEW BUILDING

**It Takes Real Horse Power**

It often takes "real horse power" to pull the heavy mud stuck automobile out of a hole. But horses that have been fed right will have the extra power needed for such work.

If you want your horses and mules in the "pink" of condition for any kind of heavy hauling you must feed them right. Then they'll have glossy coats, bright eyes and they'll stand erect and firm. You'll get a full day's work, no lost working time.

Scores of horse and mule owners have found that Purina O-Molene feed produces healthier horses and mules and more work.

It costs no more to feed. Purina O-Molene is made of choice grains specially prepared, and balanced to get more work from work animals.

We'll be glad to tell you more about it. Phone or call.

**ALL PRICES EFFECTIVE AT ONCE FOR CASH**

Purina O-Molene 100-lbs., per sack	\$2.52
Purina Cow Chow, 24% Protein, 100-lbs., per sack	\$3.23
Purina Calf Chow, 25-lbs., per sack	\$1.30

Office: HERALD BUILDING. Phone 116

And with deeper water she will be greater than the greatest.

All those civil wars in China will cause more Americans to come to the United States.

We are almost afraid to look at an heiress these days. It means being deported by the rich papa.

The St. Johns river is our greatest asset. However, it will not deepen itself. It will take the efforts of the people to make it what it should be.

Some people never see any good in anybody or anything, probably because they are so cracked themselves.

So many people here are continually crying about what ought to be done but we note that they have never attended a meeting of the Chamber of Commerce in their lives.

Even the prisoners in the county jails and penitentiaries are becoming dissatisfied and are putting on riots. The Republican administration cannot be held accountable for this, however. The prisoners are simply becoming tired of so much food and such good times and so much attention of the welfare workers. Too much high living will make anyone discontented.

Orlando is assisting in the waterways nobly. And when the St. Johns river is deepened Orlando can easily cut a canal to the river. We said it when we lived in Orlando and we say it yet.

The fire insurance agents of Florida expect to meet in Orlando on May 23rd. The life insurance agents should meet with them and between the two we should devise some sort of safety device that would save us from the fires of hell.

There is so much for our congressmen and senators to do here in Florida in the way of deeper water and better ports and other improvements that we should think they would be rustling around some and going after these big things. There is no project in the United States with greater merit than the St. Johns river and yet the Florida delegation rarely opens up their voices in song about it and we have had nothing in the way of improvements in ten years.

Attorney General Daugherty says the U. S. Senators can spend all the money they want on their candidacy campaign since Senator Newberry has been whitewashed. They can spend all they want in every state except Florida and here they are held down by the Bryan Primary law. Some of them however never needed any Bryan primary law to hold them down in their expenditures. If they ever spent a nickel for a cigar they would have had a fit and jumped into the river. The campaigns now are just like Sunday school picnics with the red lemonade cut out and swimming prohibited. But one thing is sure and certain—the candidates get no more free notices from the newspapers. They pay for what they say now or there is no say and the peanut politicians that formerly rode the newspapers are paying in advance or they get no notices. The editors of Florida have torn their shirts for candidates the last time.

WHAT MOTHER REALLY WANTS

Each succeeding Mother's Day gives one a new vista down the winding years about mother and we come to think that if mother is living she ought to have the flowers instead of waiting until she is dead. Our motors have done so much for mankind that they are entitled to much more than they ever got in this life and it is only when we have children of our own that we begin to realize just what sacrifices mother made for us. Col. Nolan speaking here for the Ku Klux Klan very truthfully said that "he held no brief for the young people of today but what the nation needed was to put grandma back on the pedestal where grandpa placed her many years ago."

This was putting it mildly but putting it in the proper light. We have gotten away from the old time chivalry and respect for women. Grandma, mother and sister are no longer on the pedestal where they were many years ago and where they should be today. The Lakeland Telegram says:

"The saying that a bad man is one who can not speak of a good woman without tears in his eyes is clever because there is a deep truth beneath. This truth is that the worst of men frequently try to atone for their misconduct by a strict attention to sentiment. The unfaithful husband bringing expensive gifts to his wife lives on in cartoon and vaudeville because he lives on in real life.

Mother's Day properly calls forth the expression of much beautiful sentiment toward mother in particular and toward women in general. It is not amiss to ask if we are sincere.

No matter what other countries have been or are—for they have shown that they can be most immoral while most "chivalrous"—in a land where men prey on womanhood, while boasting of the protection and luxuries they give their own family; where thousands of women every year die in childbirth for lack of knowledge or attention; where large numbers of prospective mothers earn by their own manual work the money to pay the expenses of the birth; where thousands of women every year undergo operations made necessary by the results of their husbands' infidelities; in a country like this we can be excused for viewing with a critical eye our Mother's Day sentiments and our talk about our reverence for women. We are not the worst nation in the world, but we have a long way to go.

What mother wants, people of America, is not merely the annual Mother's Day gift and sentiment while she lives and flowers on her grave after her death. She wants such sons and such daughters, as she can, without too much effort, take a pride in. This is her greatest possible happiness. What women in general want from men is—sentiment, no doubt, but, first of all, genuine and sincere protection, and, individually and collectively, a square deal.

INDUSTRIES ADVERTISE YOUR CITY.

The best publicity a city can have is out the advertising of Chamber of Commerce or Boards of Trade, but that of successful industries located there, according to Henry L. Staples, of Richmond, Virginia, chairman of the Southern Council of the American Association of Advertising Agencies.

In responding to an address by the mayor, welcoming the quarterly session of the Council to Winston-Salem, Mr. Staples also emphasized the growth of advertising in the South as indicative of the business development of this section, among other things saying:

"As late as fifteen years ago, a prominent advertising man after traveling for weeks through the South, told me that he found no products good enough to advertise.

"It must be a source of gratification to every southern man to note the changed conditions of today—not only in textiles but in other lines as well

"Sundries, Oranges and Grapefruit—the incomparable gift of Florida's golden groves, greet you on the breakfast table at the Ritz or the Waldorf.

"Carloads of Coen-Cola—that advertising prodigy of Atlanta—are quenching thirst in Kansas City and Seattle.

"Planters of Peanuts—made in Suffolk, Virginia, smile at you from the news stands along the subway as you wait for the South Ferry Express.

"Ivory Garters—made in old New Orleans, are in evidence in the locker rooms at Pine Valley, Woodlawn or Sunset Hills while their owners are enjoying the curl of the creak and melody of the masher.

"V.C. Fertilizers, made out of the fertility that went to nourish the bones of animals in bygone centuries, are being shipped from the South to the corn belt so that fields may stay productive for man and his children's children.

"These products have all outgrown the swaddling clothes of sectional distribution. These manufacturers are not only manufacturing the goods, but they are manufacturing public opinion concerning them.

Each of the products which I have just referred to have been helped by national advertising prepared by members of the Southern Council of the American Association of Advertising Agencies who are meeting here this evening.

"Quantity production was America's first great gift to industry. Quantity selling or advertising was her second. We have discovered the only selling force that can be multiplied as fast as machine-made merchandise, machine-made salesmanship or advertising. Many businesses still suffer because of attempted mass production without mass selling. They need to make an

UNCLE HANK

Now that mothers are naming their newly born sons, "Warren," it's doubly important that our new President makes good.

advertising investment in proportion to the money paid for plants, materials and labor."

DIGGIN' THEIR OWN TATERS.

It is most noticeable this spring that the papers of Florida have refrained from going into ecstasies over candidates for state and county offices.

The Miami Herald noticing it also, very aptly says:

"Florida newspapers are giving every candidate who announces his ambitions before the coming primary a friendly notice, but none of them seem to be taking sides as between those who have announced. The fact is that the newspapers of this state are beginning to realize that, heretofore, they have been something of a catspaw for ambitious politicians and that they have been used to further factionalism, something that is now fast disappearing from the state. Their present attitude seems to be to let candidates do their own electioneering without any material aid from the press."

If the candidates for political office in this state want the newspapers to devote columns and pages to them again, ever, they will have to pay for said columns and pages at the regular rates we would charge any other "gusher," "wild-cattor," or "promoter," to say nothing of the sold business men.

In other words politicians from now on in Florida are going to "Dig taters" instead of standing round braggin' on father, jollyin' mother, kissing baby Sue, and eating the yams after they are roasted.—Tampa Tribune.

GO TO JAIL OR BE SOMEBODY.

The first chapter in the life story of what some day may be called "The Making of Guy Robbins," was ended the other day by Judge Sentel, of Urbana, Ill. He gave Robbins, a farm hand, the alternative of going to prison for 10 years for robbing a store, or agreeing to obey these ten commandments laid down by the court:

Go to church or Sunday school at least once a week.

Give up cigarette smoking for one year.

Stay away from pool halls one year.

Read books selected by the public librarian, and report to the probation officer what he had read.

Keep employed constantly, and keep account of expenditures.

Stay off streets at night except on business.

Keep all laws of state, city, or village.

Drink no intoxicating liquor.

Pay all court costs in \$5 monthly installments.

Report to circuit judge the first day of each court term.

If Robbins lives faithfully to this contract for six months the penitentiary will never get him. It is an interesting experiment, one that the country well might watch.—Copper's Weekly.

WHERE THE STATE ROAD MONEY IS GOING

The Tampa Times is compiling some valuable statistics about the road building in Florida and showing that the bulk of our money—South Florida money—is going for roads west of the Suwannee river and show the truth of these assertions by the following statistics:

"On state Road No. 1, from Jacksonville to Pensacola, on 134 miles of the project the department estimated that there would be expended by the department or under its supervision \$3,382,900, of which the federal government was to provide \$1,541,720, the state \$1,212,930 and the counties thru which the road is to be built \$628,250. This is distinctly a north and west Florida project, and represents more than one-third of all the work undertaken by the department since its organization. The physical shape of Florida is largely north and south, and the travel into and out of the state is principally in those directions. Road

No. 1 is in large measure a local project—and will not serve a general purpose.

"Road No. 2, from the Georgia-Florida line to Fort Myers, a distance of 146 miles; comprehends expenditures of \$2,460,400, of which the federal government is to pay \$800,769, the state \$573,302 and the counties through which it will be built \$1,026,337.

"Note the disparity: on road No. 1—an east and west project—to cost \$3,382,900, the counties pay \$283,388 while on road No. 2, a north and south project, facilitating travel in and out of the state, of the total cost of \$2,400,400, the counties pay \$1,026,337.

"Road No. 3, Jacksonville to DeLeon Springs, is to cost \$780,831, the federal government to pay \$227,305, the state \$288,357 and the counties \$265,108.

"On state road No. 4, along the east coast, the projects approved by the road department are almost entirely in St. Johns county and north. They are estimated to cost \$1,694,211 of which the federal government will pay \$399,904, the state \$608,667, and the counties \$695,740.

"On road No. 5, from High Springs down the west coast through Tampa, extending to Fort Myers and thence following the Tamiami Trail, projects which have been approved by the department are located only in Levy, Hillsborough and Manatee counties. These projects are estimated to cost \$663,819, of which the federal government will pay \$199,924, the state \$344,553 and the counties \$122,370. It should be borne in mind, however, that this does not include the large amount of money spent by Hillsborough county to build this road from the Pasco county line to the Manatee county line, the only state aid given being \$175,000—\$100,000 of which has not yet been paid, though long past due—and the cost of two bridges, approximately \$100,000.

"Road No. 6, in Calhoun county, from Port St. Joe to the Jackson county line, a distance of 65 miles, is to cost \$195,000, on which the state will pay \$113,000 and the county \$82,000.

"Road No. 7 in Escambia county will cost, it is estimated, \$334,203, the cost to be shared by the federal government, and the county.

"Road No. 8 in Highlands and Okechobee counties will cost \$314,933, of which the state will pay \$53,034 and the counties \$261,899.

"The Hernando, Pasco and Pinellas

state aid road, No. 105, is to cost \$800,518, the counties paying \$60,140, and the state \$240,378. This project includes two bridges in Pinellas county to cost about \$200,000.

"The estimated cost of all projects approved by the state road department aggregates \$10,529,415. The total cost of all projects in the first congressional district as \$1,668,555. This county alone has expended nearly twice that sum, realized from county and district bond issues, in the construction of roads.

"Federal aid allotted to the state on approved projects aggregates \$3,305,682. Of this the first congressional district gets but \$272,823, and the balance of the state \$3,092,859.

"Of state funds used for these projects in the entire state there is allotted \$3,745,504. The first congressional district gets of this sum \$287,034 and the balance of the state \$2,017,570.

"The counties of the state put up as their portion of these projects \$3,418,220. The counties in the first congressional district put up \$507,798, and the counties outside this congressional district \$2,840,431."

WEATHER AND CROP CONDITIONS IN FLORIDA FOR THE WEEK ENDING MAY 9

Temperature: The temperature averaged from 2 to 5 degrees above the seasonal, except in the south and extreme west where it was about the normal.

Rain: Showers occurred over all divisions—least in the lower central and southern counties. Rainfall was locally heavy west of the Suwannee river, especially in Jefferson, Gadsden, Walton, Escambia and adjoining districts. There are areas, however, in the peninsula where drought continues, although relieved to some extent by showers.

Crops: The rain of the current week and that of the last days of the previous week saved a critical situation over much of the peninsula. Corn that was withering generally and apparently beyond recovery, shows much improvement, although the growth is backward and some on highlands was lost; early corn is in market. Cotton is coming up—long delayed by drought, and chopping and first work made progress; plants are small. Tobacco made good progress as did peanuts, cane and minor crops. Melons improved, but growth is

backward; some complaint of premature ripening—result of hot, dry weather. The oat crop is generally poor; some fields were abandoned; harvesting continued under favorable conditions. Sweet potatoes were set out where soil moisture was sufficient, and the harvesting of Irish potatoes continued. Beans, tomatoes, and other truck made fair progress. Citrus trees, as a whole, improved, but there are areas where the rainfall was entirely insufficient, and the dropping of young fruit continued. The last week or ten days were the most favorable in the peninsula since crop development began, but more rain is needed in all divisions.

NOTED EDITOR SUFFERED FOR FIFTEEN YEARS

Frank E. Dacons, Editor of "American Youth," Chicago, Tells of Physical Inability to Help His Severe and Complicated Intestinal Trouble. Ferraline Brought Relief.

Business and professional men find Ferraline to be of peculiar value in restoring strength, relieving run down condition and building up the system. Mr. Frank E. Dacons recently sent us the following interesting statement:

"Having suffered for 15 years with a severe and complicated case of intestinal trouble and having tried numerous physicians and remedies, I was induced to try FERRALINE, the wonderful Natural Tonic, and found it contained the elements and properties necessary to relieve my suffering, tone up my system and rebuild and invigorate my digestive organs.

I gladly recommend FERRALINE to sufferers from Stomach Troubles, Chronic Diarrhoea, or Intestinal Troubles."

Buy a bottle of Ferraline today. Start on the road to health without delay.—Adv.

You'll Find Cletrac Right For Road Work

CONTRACTORS and engineers in all parts of the country who have used Cletrac are enthusiastic over its remarkable ability to save time and money on every job it tackles.

It's a treat to watch Cletrac putting over a road job. Hauling materials, scraping, grading, filling, ditching—it never lets up till the job is done—it's never stumped by treacherous footing or steep grades.

The sure grip of its broad, tank-type tracks gives Cletrac a steady powerful pull that does the work of half a dozen animals in half the time and at half the cost. It's easy and economical to operate, too.

This honestly built tractor has proved that it can't be equaled as a power unit for stiff hauling jobs and it fits right into the tremendous 1922 road construction campaign which calls for every possible economy. With a Cletrac you will greatly increase your road-building capacity.

We are pushing the Cletrac in this territory because we believe it is the outstanding power unit in the tractor field today. Come in and examine it—let us demonstrate it on any job you say—ask us for actual figures showing how much it saves. Then decide for yourself if Cletrac isn't the tractor for you.

GROWERS SUPPLIES

\$2.53, which, when freight is considered, brings the two bids almost to a level.

There were seven bidders on the Orange county work. There were several on the Pinellas county work. The drop in the average of the bids makes it evident road building costs are down. There is undoubtedly a decrease in the cost of labor, of material, and of construction supervision, and, in some things, there is a material reduction of freight rates. By the time the Hillsborough county contracts are ready to be let, the indications are that a still greater decrease in costs will have come, and the relative drop shown by the average of the Orange county bids and the Pinellas county bids, will at least be duplicated for this county.

The bids for the Orange county project as shown by the county road department engineer's tabulation sent to the bidding contractors, were as follows:

Lasly Bros., and Harvey, \$2.40 per square yard; Fish Bros., \$2.75; J. Y. Wilson, \$2.48; James G. Yeats, \$2.63; F. W. Long & Co., \$2.55; W. H. Kendrick, \$2.50; Georgia Engineering Co., \$2.57.

### NOTHING LIKE HOME INFLUENCES

In these days of jazz, fast cars and fast living, we are getting away from the home influences of the early days fathers and mothers are leaving the children to shift for themselves at night instead of remaining at home to look over them, children cannot study but must attend the movies or the dances or the parties every night in the week and the effect is noticeable in the life of the country. We are living too fast, leaving the home fires, casting off the influences that formerly held the family together. The Jacksonville Metropolis aptly says:

"That was a high note sounded by Ed Arras, international Kiwanis trustee, at the weekly meeting of the local Kiwanis Club when he said 'show me one person that has kept from crime by prison walls and I will show you a thousand that have been kept on the straight and narrow path because of noble principles of living learned at their mothers' knees.'"

Not criticizing present methods for the prevention of crime and the reformation of criminals, Mr. Arras expressed the belief the real salvation of the world lies in the influence of mothers and the homes of which they are the hearts, and he sees a menace to morals in the fact the family altar is not as prominent an institution as it once was, and there is cause for the fear held; for no influence in the world is as abiding or comforting as that spirit of righteousness which only can be inculcated in the youthful mind at the family fireside.

Search the prisons of the world. Explore the underworld. Ask men and women in the highways and hedgerows what influences shaped the destinies of their lives. Then ask, when you were a child did you repeat this prayer at your mother's knee—

Now I lay me down to sleep,  
I pray the Lord my soul to keep;  
If I should die before I wake  
I pray thee Lord my soul to take.

You'll discover that the great majority of those who fell before the onrushing tides of life never repented it, never knew the significance of approaching a mother's knee in the evenings and there receiving the benediction which comes only through the loving touch of her hand.

Oh the solemn influences of the family altar! An one who has bowed within its presence looks back to it—the scene when all the family assembled in the living room, a few chapters were read from the Bible, followed by a paternal prayer—the dignity and everlastingness of the influence is realized in its nobler sense. There is no end to the possibilities of home influence. Nothing that originates there is ever forgotten.

If the world is to approach the finer ideals—the ideals of righteousness and service to others—the approach must be through the principles of Christianity as exemplified in the home. A community is neither better nor worse than its average home. This is also true of a nation and the world.

The best way to save mankind and to set its feet on the upward path is to teach it the fundamental truths of worth while living in its infancy. There are no substitutes for the home."

### SUMMER TOURISTS ARE COMING

The announcement of the leading railway lines of the south, east and central west that summer tourist rates would be effective this summer for Florida has already had its effect, and local real estate men are receiving many inquiries from other states for cottages and apartments.

As a matter of fact few people have ever looked upon Florida as a summer resort state, and the railroad announcement of rates is the first big boost this state has received along that line.

Once the people of the country at large are told of Florida's summer climate and get the inbred idea out of their heads that Florida is excessively hot in summer time this state will become the greatest summer as well as winter playground of the people of the eastern half of the United States.

The same amount expended for advertising Florida's summer attractiveness that is spent to promote winter tourist business would fill this state with summer recreationists. Instead of one big tourist crop, Florida would gather two.

Advertising built up Florida's winter business and advertising will build up Florida's summer business. —Daytona Journal.

### SANFORD LAD GIVEN TRANSPORTATION HOME

The following clipping from a Macon, Georgia, newspaper will be of interest to Sanford readers:

"Benjamin Franklin munched his dry loaf of bread as he strolled up Cherry street yesterday, forgetting all else in his happiness at food once more.

"No'm, I aint hungry, but if you'll just give me the money to go home on, I will sure appreciate it," said Young Ben, whose real name was David Farmer, when he came to the Associated Charities to seek aid.

The Associated Charities is sometimes made to feel that its work is not all in vain when a note of gratitude is received quite unexpectedly from the receiver of some kindness.

David had been visiting his sister at Sparks, Ga., and had no money to get home on. Times are hard and he could not secure enough money to get home. The child was very anxious to see father and mother once more so

# FISK TIRES

## RED-TOP 30 x 3 1/2

Extra Ply of Fabric—Heavy Tread

Price \$17.85

FOR poor roads, for heavy loads, for hard use anywhere the Fisk Red-Top cannot be equaled for small cars. An extra ply of fabric and a heavy tread of extra tough red rubber make a strong tire built to meet exacting conditions.

Time after time one Red-Top has outworn three ordinary tires. Its distinctive looks indicate your selection of a high-grade tire while its extra mileage more than justifies your choice.

There's a Fisk Tire of extra value in every size, for car, truck or speed wagon

### T. J. MILLER BUILDS ANOTHER BUILDING

T. J. Miller, the "town bulder" is putting up another one. He has been building so many buildings during the past six months that it is difficult to keep up with him. His latest is a fine two story building in the rear of his furniture store on Second street and west of his apartment house that fronts on Palmetto. This new building will be a two story brick the first floor to be occupied by Mr. Miller as a mortuary and funeral chapel temporarily and a small warehouse in the rear. The second floor will be a nice five room apartment with all modern conveniences. Mr. Miller will occupy the first floor until such time as he can construct a larger building for his funeral and embalming business at the corner of Commercial avenue and Palmetto in the rear of the postoffice where he owns a fine piece of property. Verily, Sanford is growing and T. J. is doing a man's part in the building.

### COMMENCEMENT EXERCISES OVIEDO HIGH SCHOOL

The commencement season of the Oviedo High School will begin on the evening of Sunday, May 21, when the commencement sermon will be delivered at the Baptist church by Rev. W. F. Blackman, D. D., former president of Rollins College. Special music will be rendered by the choir. On the evening of Thursday, May

25, there will be given at the school house a program of essays, music, songs and drills. The main part of this program will be given by the members of the Senior Class, who will discuss in an interesting way some of the work done by the class during the year.

The eighth grade will also give special work, and diplomas of entrance to the High School will be delivered by Supt. T. W. Lawton to the following members of this grade: Clyde Palmer Argo, Shirley Mary Swope, Evelyn Lenora Wheeler, Charles Johansen, William Robert Williams, John Batts Jones, Jr.

At eight o'clock, Friday, May 26, the following seniors will be graduated from the High School: Wann Winifred Pope, Virginia Burch Wright, Catherine Monterie Young, Walter Lee Carter, Harold Walter Varn.

The commencement address will be delivered by Prof. W. H. Dresch, D. D., of Rollins College. His subject will be, "The Key to Success."

The Diplomas will be presented by Principal M. J. Okerlund.

The Oviedo orchestra under the direction of Mr. E. A. Ball, will furnish the music.

### BRICK PAVING COMES DOWN

Seminole county expects to have more roads paved within the next two years at least and Sanford City will have many new streets paved within the next six months if the bond issues go over as in all likelihood they will. Brick paving has always had first place in the minds of the citizens of this county but in the past two or three years the freight rates on brick have been so high as to be almost prohibitive. The Tampa Tribune sees the rate of brick paving coming down and has the following about it:

"Taking the highest and lowest bids on brick roads received by Pinellas county this week, we find the average to be \$2.56 per square yard for number one brick of a given dimension, asphalt filler. Taking the average of the lowest, the middle, and the highest bids received by Orange county March 15, we got an average bid for the same class of road and identical materials of \$2.03.

When it is considered that freight on brick and other road material will be much greater laid down in Pinellas county than it was in Orlando, these comparative figures are extremely gratifying.

The lowest bid received in the Orange county bidding was \$2.40 per square yard and that bid got the contract for project No. 4. The lowest bid received by Pinellas county was

**"PANAMA" COMFORT COVERALLS**  
UNION-MADE

A new work garment so designed that the drop-seat will not show. Buttons are invisible and placed so as not to stick in wearer's back when lying down.

**LONG WEARING**  
COMFORT COVERALLS are made from best materials and guaranteed to wear. Goods are shrunk before the garments are made up.

Insist on "PANAMA" Brand  
Kahn Mfg. Co., Mobile, Ala.

### PAVING ECONOMY FOR FLORIDA TAXPAYERS

A SIX-YEAR RECORD

Representative Maintenance and Repair Costs of Florida Brick Pavements—

#### ORANGE COUNTY—

Road No. 1; Built, 1915;

Length, 7.2 miles;

Cost for maintenance and repair per mile each year: \$4.08.

#### SEMINOLE COUNTY—

Road No. 1; Built, 1916;

Length, 8.4 miles;

Cost for maintenance and repair per mile each year: \$5.50.

#### VOLUSIA COUNTY—

Road adjacent to DeLand

Built, 1916; Length 14.6 miles;

Cost for maintenance and repair per mile each year: \$6.63.

Average Cost per mile per year for these 30 miles: \$5.56.

THE TOTAL maintenance and repair cost for thirty miles of vitrified brick paving in three Florida counties has been only \$168 over a six year period—a rate of cost less than \$6 a mile a year.

## VITRIFIED Brick PAVEMENTS

are low-cost pavements per year of service, as all public records testify. Considering their long life when well-built, they are the least expensive pavements any community—your community—can build.

## UPSALA AND GRAPEVILLE

Mr. and Mrs. Andrew Bertleson entertained guests from Sanford on Sunday.

Miss Bright Laney was a visitor over Sunday of Miss Margaret Ericson.

Mr. Thompson was a dinner guest Saturday of Mr. and Mrs. Charles Cramer, who later carried him home going on as usual down to see their aunt, Mrs. Collier who is still at Formosa, Vernon accompanying them.

Mr. and Mrs. Henderson of near Monroe were Sunday guests at the home of his son, Will, who has not yet recovered from the influenza, as the doctor calls it.

John Miller tells us he has had electric lights placed in his home and they are expecting more out soon. We are sure glad to see the places filling up and new homes being built and old ones painted and repaired.

Forrest West is also adding on an extension to his kitchen and back porch. Charley Cramer has been helping for a few days.

Let us not forget the preaching next Sunday at the Lutheran Church at 11, in Swedish and English, at evening, with Sunday school as usual at the Presbyterian at 2 P. M.

Rev. J. S. Clark gave us an extra good sermon last Sunday showing that we now in the church age are under the period of a place of truth.

We are pleased to have with us Mr. and Mrs. Dunn and family as well as Miss Icehour. Sorry there is no way for the pastor to get over for the mid week meeting.

Mrs. Cooper of New Smyrna a cousin of Mrs. Volle Williams and Charles Miller of Owensburg, Kentucky, was here to attend the funeral of her father, Mr. Wm. Miller.

They took the uncle over to New Smyrna and on Sunday to his late brothers home near Orlando; later in the day he left to return home.

Mr. and Mrs. Yewell, the former a childhood chum of the deceased were also present, lately having come to reside in Orlando from Kentucky.

Mr. and Mrs. Harold Haskins were visitors Sunday at the home of their sister Mrs. Niece and father, Mr. Malm.

Mr. and Mrs. E. F. Lundquist and children spent Sunday at the home of her parents, Mr. and Mrs. August Swanson, while Archie had as his guest, C. E. Bergquist from Sanford.

Mr. Tyners is expecting relatives from Windermere next Sunday and Emil Magnuson.

Some of the roads around the Cameron City neighborhood are miserable. We do not know if these roads have been made county roads or not but from the looks of them they evidently do not belong to any county or state. There are plenty of good farms in that neighborhood and it is difficult for the people to get in or out just now on account of the heavy sand. It would be well for the county commissioners to give all the people of the thickly settled portions of the county better roads as soon as possible after the new bonds are sold.

Drilling for petroleum and natural gas in Hungary so far has been unsuccessful although some wells have been bored to a depth of 600 metres.

### Everyone Should Drink Hot Water in the Morning

Wash away all stomach, liver, and bowel poisons before breakfast.

To feel your best day in and day out, to feel clean inside; no sour bile to coat your tongue and sicken your breath or dull your head; no constipation, bilious attacks, sick headache, colds, rheumatism or gassy, acid stomach, you must bathe on the inside like you bathe outside. This is vastly more important, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

To keep these poisons and toxins well flushed from the stomach, liver, kidneys and bowels, drink before breakfast each day, glass of hot water with a teaspoonful of limestone phosphate in it. This will cleanse, purify and freshen the entire alimentary tract before eating more food.

Get a quarter pound of limestone phosphate from your pharmacist. It is inexpensive and almost tasteless. Drink phosphate hot water every morning to rid your system of these vile poisons and toxins; also to prevent their formation.—Adv.

The safest and surest way back to health, strength and happiness is by the Tanlac route. Union Pharmacy.—Adv.

## ALL BUSINESS AND TRADE CONDITIONS SHOW ADVANCE THROUGHOUT UNITED STATES

### Thirty Thousand Manufacturers Make Report as "Stable, Sane and Continuous Advance"

(By The Associated Press)  
NEW YORK, May 10.—Business and trade conditions throughout the United States as reported by thirty thousand manufacturers to John H. Edgerton, president of the National Association of Manufacturers today, show "Stable, sane, definite and continuing advance," summary issued by Edgerton declared.

### PRESIDENT MAY FAVOR SALES TAX FOR BONUS

(By The Associated Press)  
WASHINGTON, May 10.—Views of the president on the soldier bonus legislation declared at the White House today as unchanged, will be transmitted during the next two days to Chairman McCumber and Republican members of the Senate finance committee.

The president's ideas on the subject will be presented to the majority committee members as a result of the visit of Chairman McCumber and several of his associates to the white house recently, at which time the outline of the bill approved by the

committee majority was laid before Mr. Harding. The bill differs only slightly from the measure passed by the house.

The president's position on the soldier bonus was outlined in a letter to Chairman Fordney of the House ways and means committee when the matter was pending before that body and which was to the effect that either a sales tax to raise the funds for paying the bonus should be enacted or some other effective means should be.

WEST PALM BEACH, May 11.—Chief Matthews, after confiscating twenty-four quarts of liquor here one night last week had the evidence

stolen from his automobile, parked in front of the jail under the nose of a policeman. It happened that about seventy-five negroes were congregated about the jail to see the police lock up twenty others who had been arrested in a raid on a dice game. Someone in the crowd noticed the whiskey in the car shouted, "Liquor," the spectators gathered around the machine and that was the last seen of the evidence. No arrests were made for the crowd scattered, and it was not known who was guilty, but the Chief is confident there was a joyous party in "Reno," the negro quarter, later in the evening.

**WE, the growers who compose the Florida Citrus Exchange, take justifiable pride in this, our Sealdsweet trademark.**

## of FLORIDA— by FLORIDA— for FLORIDA

### Consider These Points

The history, aims and purposes of the Florida Citrus Exchange may not be told in a few words.

They are identical with those of the citrus industry in Florida. The two cannot be intelligently separated.

After more than a dozen years of successful operation, the Florida Citrus Exchange today typifies the success of co-operative marketing carried on with the true co-operative spirit.

It is co-operative marketing that all the producers of the United States today are turning and everywhere the Florida Citrus Exchange is regarded as a model of efficient service to members.

Whatever the problems of the future they must be the problems of the growers—those who own the land and the trees which produce citrus fruits—and only the organized growers successfully may solve them.

The expansion of carlot markets for Florida oranges and grapefruit has been due to the efforts of the growers' own co-operative organization. Future expansion of such markets must be made by the growers.

The first commercial introduction of regular supplies of grapefruit into Great Britain, with accompanying educational work, is but a single one of the achievements of the Florida Citrus Exchange during the current marketing season.

### Remember These Facts

Sealdsweet oranges and grapefruit are accepted by the trade as nationally advertised products. And they are distinctly Florida products. Likewise distinctly citrus.

Hundreds of thousands of housewives who demand Sealdsweet from their grocers associate the name only with oranges and grapefruit—from Florida.

While the Florida Citrus Exchange preserves most cordial relations with co-operative marketing organizations everywhere, it has no entangling alliances.

A freeze in California or a drought in New York State for this reason may only bring the benefits of better prices to members of this organization.

Any member of the Florida Citrus Exchange always is in a position to obtain the "high dollar" for his fruit whenever there is a market upturn. Nothing could demonstrate this better than events of last ninety days.

In number of members, acreage and volume of fruit, the Florida Citrus Exchange shows constant and consistent gain. There must be reasons for these facts. Investigate and you will readily find what are these reasons.

**IT is ours. It belongs to no one else. It cannot be taken away from us. Its value increases from season to season. That value and its increase, belong solely to us.**

We are constantly working to upbuild the good-will value of our Sealdsweet trademark by advertising to consumers and to dealers; by consistent grading and packing practices; by intelligent co-operation with the trade.

We do this secure in the knowledge that the Sealdsweet trademark must remain a distinct asset to the citrus industry of Florida, and to Florida alone. It cannot be adversely affected by association with the products of any other section, or with other than citrus fruits.

During this last season we have made an increase of forty per cent in the private-sale, carlot markets in which Sealdsweet oranges and grapefruit have been sold, as compared with any previous year in the history of our organization. This is indicative of the progress which this co-operative body has been making, and is making, in every department of its operation.

The close of the season will find the Florida Citrus Exchange in the strongest position that ever it has occupied, having marketed successfully the largest volume of fruit in its history; and having made every possible preparation for the greater tasks which lie before it in protecting the interests of Florida producers, who must look to it, and to it alone for the solution of their problems, as citrus production further increases in the groves of the state.

In the ranks of the hundred-and-one associations of this organization there is room for every grower who has the ability to co-operate—"to conduct yourself that others may work with you." For detailed information consult the manager of the nearest Association or of the sub-Exchange in your territory; or write to the Business Manager of the Florida Citrus Exchange, Tampa, Florida.

Remember, there is no capital stock; there are no initiation fees; there are no membership dues.
