Chaude A. Kirk's summe in the annule of Florida is to be semothing of a substantial rather than a spectacular mature.

When elected in 1988 by a vote which was him, the Republican Governor was presented with great opportunities.

His win over a badly split Democratic party did, on the record, allow Florida to hope for the status of a true two-party state. Republican vic-

stories on the state and county levels accompanied the vote; revolt.

Since then, however, political students and
appraisars have watched for signs that Governor
Kirk would bend his considerable energies and
personal appeal towards this unselfish purpose.
But these have been lasking.

Now we see the chief executive engaged in
a program which has allowed his critics to emphasize his apparent especiation on the national political scene as our crisis in public school
education continues.

As the second wask of school closines and

As the second week of school closings and teacher "resignations" rolls along the governor's schedule does not call for any firm step to show that leadership so greatly needed. Of course, he has critics. For instance, the respected Clearwater Sun in a lead editorial

comments on this and states: "Not a single time since he (Kirk) took office has he shown any interest in Florida and its problems." But this could all change if the Governor and his advisors would look soberly and wisely into the present status of the Kirk administra-

tion and where it is headed. True, it is gaining national attention. But it is not the kind that an aspiring governor for national office would ordinarily welcome. But it is possible and we sincerely hope that Governor Kirk will do some sort of heart-searching and dedicate the next years of his administration to the good of Florida and—not incidentally but mportantly—his record in history.
