NUMBER 134.

STORY OF RIFT IN NAVAL MEET DENIED TODAY

MacDonald, U.S. Delegates Brand Report Of Breach As Absolutely Unfounded

LONDON, Mar. 19.—(AP)—Prime Minister MacDonald today denied the truth of a story published by the Daily Express of a breach of harmony in the naval conference connected with the American negotiations.

Through his astute Foreign Office said: "The report is absolutely and gratuitously false."

The American delegation today characterized as "simply foolish" reports by the Daily Express.

In the Express story Prime Minister MacDonald was represented as taking Secretary of State Stimson to task for having allowed an alleged misleading impression to circulate that Tokyo was ready to accept a settlement of the naval differences between the two nations.

LONDON, Mar. 19.—(AP)—Without specifying the source of its information the London Daily Express, today said naval conferences were greatly excited in reports of a sudden breach of harmony developing from disagreement of Prime Minister Birrell MacDonald and Secretary of State Henry L. Stimson.

The story is that when the other delegations met Monday at 10 Downing Street the British Premier took Colonel Stimson to task for allowing an misleading impression to spread that Japan was

Sanford Atlantic Bank Declares Its Quarterly Dividend

The Board of Directors of the Sanford Atlantic National Bank this morning declared a quarterly dividend of \$125 per share on the capital stock of the bank, payable April 1. This dividend is based on the regular rate of \$400 per annum and is paid quarterly on April 1, July 1, Oct. 1, and Jan. 1. The officers of the bank informed their reporters showing deposit as the highest in the history of the institution and the directors expressed themselves as being well pleased at the prospects for the rest of the year.

Thus P. Denman, Vice-Chairman of the Board of the Atlantic National Bank of Sanford, who has been to Sanford for several days discussing with various clients the way in which the Atlantic National Bank can be of assistance to them in the reconstruction of handling wire, cotton-wire and timber-sheds was particularly optimistic on the future growth and development of this community. He expects an early and strong confirmation that there is no other community in the state that has the resources that Sanford County. He stated that all wealth was based fundamentally on agriculture and that he felt confident that this section would be able to solve its problems and develop a substantial and progressive community.

Wilkins Returns To U.S. From Antarctica

NEW YORK, Mar. 19.—(AP)—George Hubert Wilkins, Arctic and Antarctic explorer, returned today from his fourth expedition to Antarctica with the information that he had found only sea where he had been supposed the Antarctic continent extended. With him were his two pilots, Parker Crampton, Penna., and Al Cheeseman of Winnipeg, Canada, and his mechanic, Orville Parke of Detroit.

Sir George said that his next expedition probably would be to the Arctic, by submarine, a project he discussed last year with H. L. Lake, who has the the only privately owned submarine in the world.

TO GO ON TRIAL.

ELDORADO, Ark., Mar. 19.—Charged with poisoning her 21-year-old husband to get his insurance, Mrs. Bertie Gentry will go on trial for first degree murder in circuit court next Tuesday. She was indicted by the Union county grand jury yesterday.

Moulthrop, Lalone
Are Found Guilty

JACKSONVILLE, Fla., Mar. 19.—(AP)—Watson Moulthrop and Roland Lalone were found guilty today by a circuit court jury of the murder of Detective W. D. Smith in a garage in the last January. The verdict, however, entered a recommendation for mercy which automatically fixed a penalty of life imprisonment. The day was one of nearly two hours. Leo Lanier, third member of the trio who occupied room 2006 in the Hotel International here, will be tried later. He was granted a reprieve and is to stand against Moulthrop and Lalone. Verdict in the longest trial in the history of Duval county circuit court, the trial having lasted two weeks and three days.

EARL OF BALFOUR DIES BRINGING TO END USEFUL LIFE

Aged British States-
man Held Esteemed
Place In His Nation

WOKING, SURREY, England, Mar. 19.—(AP)—The Earl of Balfour, veteran British statesman, died here at the home of his brother, the Honorable Gerald Balfour. A window in his bedchamber overlooked one of the most beautiful scenes in Surrey.

The end came peacefully to the statesman, who was at his 82nd year. He had been declining ill for a long time with bronchitis and came here after an improvement in his condition to convalesce. He had several setbacks, however, and was never able to return to his home at Whitlingham, Prestwick, East Lothian.

From the time he entered Parliament in 1874 until the closing years of his life he played an important factor in British politics. He visited America as head of the British commission in 1917 and was a member of the British delegation to the Washington Conference.

Three-Day Storm In California Has Its Climax In Twister

LOS ANGELES, Mar. 19.—(AP)—Reaching its climax in the formation of a waterspout, the three-day storm which has swept all of Southern California and Arizona apparently had spent its force today and the return of fair weather was promised. At 10:30 this morning the barometer showed a reading of 34.2 inches, which is the highest in the history of the institution and the directors expressed themselves as being well pleased at the prospects for the rest of the year.

Thus P. Denman, Vice-Chairman of the Board of the Atlantic National Bank of Sanford, who has been to Sanford for several days discussing with various clients the way in which the Atlantic National Bank can be of assistance to them in the reconstruction of handling wire, cotton-wire and timber-sheds was particularly optimistic on the future growth and development of this community. He expects an early and strong confirmation that there is no other community in the state that has the resources that Sanford County. He stated that all wealth was based fundamentally on agriculture and that he felt confident that this section would be able to solve its problems and develop a substantial and progressive community.

More snow fell in the mountainous area Los Angeles, and electrical displays preceded rain and snow to the summit of Mount Wilson. Reports from Arizona indicated the fury of the storm had subsided somewhat although rain and snow continued to fall in the northern part of the state.

Engineer Is Killed—
In Head-On Collision

CHICAGO, Mar. 19.—(AP)—An engineer was killed and another injured in a head-on collision of the Badger State Limited and a suburban train on the Chicago and North Western Railroad last night near Arlington Heights, a suburb of Chicago. K. J. Kutzner, engineer on the suburban train, was killed by a head-on collision with the engine of the Badger State Limited.

According to dispatches from the Chicago Tribune, the engineer was captured while exploring his car in the rugged country south of Toledo, N. Y. He was at Santa Maria del Rio, N. Y., at the time of the collision.

Light rains were general over Los Angeles and Orange counties throughout the day. The three-day rainfall total in Los Angeles was reported at 3.42 inches, which brought the total to 10.7 inches.

The maximum was the last reported in several months. The rain, intended several inches ago by religious leaders, has caused a great deal of damage.

PAGE THREE

DANIELS BACKS PROHIBITION AT "DRY" HEARING

(Continued from page 1) never been any alternative. There cannot be any other alternative. The whole question must be considered with the absolute purity and certainty." Modification to permit the sale of beer and wine, Daniels said, was advocated in the early days of prohibition and has since been dropped by the wet Government side, he declared, is in opposition to American principles and a course that no Congress would ever approve.

With reference to medical dispensaries he cited the example of South Carolina, and also a project which was begun and abandoned in his own city, Raleigh, North Carolina. There, he said, a group of citizens seeking to promote temperance and separate local politics from the saloon influence, set up a dispensary, which while highly profitable and producing large amounts of money which was devoted to the schools and other municipal causes, was given up because of "the very nature of the product sold and its effect upon the purchasers."

Dr. Haslinger of Vienna has perfected a model that is used for experimental purposes in demonstrating the proper method to perform operations on the larynx. A small bell rings when the operator strikes the right spot in performing the operation.

Turning the light of Truth on false and misleading statements in recent cigarette advertising

WHAT ANOTHER MANUFACTURER of cigarettes chooses to say about his product is not our affair. Even when he sees fit to misrepresent his product and leave false impressions concerning it, that still is his business—not ours.

But—when, in his advertising, he goes beyond his own product and makes false statements or leaves misleading impressions about other cigarettes—then it is time that the truth be told.

Some time ago a manufacturer of cigarettes used the following statements in his advertising:

"The extra secret heating process removes from (—) harmful irritants, corrosive acids, which are present in cigarettes manufactured in the old-fashioned way, and which cause throat irritation and coughing."

"No matter how much or how little you pay for cigarettes you have a choice of only two general classes, and not more than two. In one class you have the billions of cigarettes manufactured in the old-fashioned way and in the other class you have (—), the toasted cigarette, a product of modern science, a cigarette from which harmful irritants have been removed by that extra secret process described by the phrase 'It's Toasted'."

WHEN THESE STATEMENTS were first made, we assumed that they were a casual phase of that manufacturer's advertising and did not represent a deliberate and calculated policy. After making a few such statements, he abandoned this particular form of advertising. However, other statements used in his advertising came to the attention of the Federal Trade Commission on a question of their truthfulness.

As a result of the action of the Federal Trade Commission he was ordered to stop his admitted practice of using in his advertising false testimonials of non-smokers to the effect that they kept slender by smoking his brand of cigarettes, and was further ordered to stop using other fake testimonials and the specious argument that all can keep slender by smoking that brand of cigarettes. He then began to use again the form of statement quoted above or variations of it.

IF ANY MANUFACTURER chooses to say that the tobaccos he uses contain "harmful irritants, corrosive acids, that are injurious to the throat," and then to claim that these things are removed by the heat-treating process, that is his own affair. But when he tries to create the impression that it is general practice to use in cigarettes such rank tobaccos as he describes, we object to the attempted reflection on the industry.

We have never used in our blend those rank tobaccos which can be properly described as containing "harmful irritants, corrosive acids," nor do we believe that they are used by some of the other manufacturers.

If that manufacturer wishes to advertise heat treatment, calling it toasting or what-not, that is his right. But when, in so doing, he tries to create the impression that he is the only maker of cigarettes who treats tobaccos with heat, the truth again needs to be told.

The publication of a fake testimonial is no greater perversion of the truth than to imply

that the heat treatment of tobacco is an exclusive process with any single manufacturer.

THE FACT is that the use of heat treatment in the manufacture of tobacco is about the most commonplace and universally practiced method in the industry. It has long been standard practice.

We use heat treatment in its most modern and scientific application, both in the preparation and in the manufacture of those mild, fragrant, ripe tobaccos that carry their natural goodness into CAMELS.

The first CAMEL Cigarette we ever made was manufactured under the heat-treating process. Every one of the billions of CAMELS produced since has been manufactured under heat treatment. We rely upon heat to the limits of its possibilities to make our good tobaccos better. It cannot make inferior tobaccos good.

WHETHER OR NOT a manufacturer, to have something to talk to the public about, attaches a contrivance to his heat-treating machines to catch, condense and bottle the vapors that come from them can have no more effect toward improving the tobacco than your catching and bottling the vapors that come from your teapot would have toward improving the tea in the pot.

Our own brand, CAMEL, continues to grow, but we are, nevertheless, unwilling to let these far-reaching false statements or impressions regarding the cigarette industry go uncorrected.

Blast In Gas Main Following Flood Is Fatal To 6 Persons

SAN FRANCISCO, Mar. 19—Gas explosion following a flood from a broken 16-inch water main left six persons injured here today and considerable damage in the vicinity of forty-seventh Avenue and Anza Street.

Fire department said damage would total several thousand dollars. The flood caused a break in the land connection of the trans-Pacific cable of the Postal Telegraph and Cable Company, holding up communication with the Orient for several hours.

The flood started early last night when a 16-inch main of the Olympic Salt Water Pumping Company burst with a roar that was heard for blocks. Undermined by the geyser a section of Forty-Seventh Avenue caved in, breaking district mains of the municipal water system, gas mains, and telephone and electric lines. Twisted and broken gas lines leaked a flood of gas over the district, filling houses and adding to the danger from the water. A gas explosion soon followed in the home of Mr. and Mrs. Henry A. Gordes, demolishing the structure and hurling Mr. and Mrs. Gordes into their back yard.

ST. AUGUSTINE—Up-to-date soda fountain equipment installed in St. George Pharmacy.

(Continued From Page One) that Al Capone, recently released from a Pennsylvania penitentiary was enroute to Florida, and an unconfirmed identification of a man that left Valdosta, Ga., at daybreak for Jacksonville as the Chicago gangster, came information that a \$6 birthday cake was ordered today from the Gold Stream Baking Company of Miami Beach for delivery to the Capone estate on Palm Island here.

City and county authorities prepared to the greatest degree to prevent possible gang warfare should Capone reach his home here, maintained their vigilance as they received word of the birthday cake. Their thought that it might be camouflage was based on reports from Chicago that a huge homecoming dinner has awaited the gangster at his home since his release from prison, and they saw no need for more than one welcoming feast. It was possible, they believed, that the cake might have been ordered to throw Capone trail seekers off the track.
