

## U. S. Plans Sale Of 3,000 Aircraft Monthly To British

### Morgenthau Declares Planes Will Be In Addition To Orders Already Placed Here

### New Factories Will Be Built

### Britain Will Finance Cost Of Plants As Well As Buyouts

WASHINGTON, July 25.—(AP)—Secretary of Treasury Morgenthau said today that the United States had pledged "every facility" to enable the British to buy 3,000 military airplanes a month in this country, in addition to the huge orders previously placed.

Confirming an announcement in London by Lord Beaverbrook, the treasury head said that a new arrangement in addition to all the previous orders, would require the construction of new factories.

The British have promised to pay for the erection of new factories as well as to buy the output.

Morgenthau asserted that the Treasury, War, and Navy Departments were in complete accord on the commitment, and that William Knudsen had agreed to undertake to work out the details.

LONDON, July 25.—(AP)—Minister of Aircraft Production Lord Beaverbrook last night announced that the United States will approve a plan of production to supply Great Britain with 3,000 airplanes a month.

He said he had just been informed by Morris Wilson, head of the British aircraft purchase mission in Washington, that Secretary of the Treasury Morgenthau reported the government would approve plans for Britain to purchase the planes.

These planes will be in addition to our present American purchasing program. Lord Beaverbrook said that double the number of engines through America will fortify the resistance and strengthen the endurance of these children of the empire, the men and women of the aircraft factories.

In a radio broadcast, Lord Beaverbrook told the British people that "if we are put to trial by fire" they could be assured that the aircraft industry will not fall in the crucial hour.

He announced that 12,115 airplane engines had been purchased from manufacturers in the United States for use in the British fleet.

"Airplane production is at a point now here that will dishearten the enemy," he said. "The rate last week was a record. In July we more than doubled last year's figures for the same period."

Lord Beaverbrook said that despite the heavy drawing on American airplane stocks, Britain depends on always on home production as its real source of supply.

### 270,717 Gallons Of Gasoline Used In Month Of June

Sanford, Fla., in the consumption of gasoline during the month of June, Seville County used 270,717 gallons of the fuel, according to a report released by the Department of Agriculture.

Florida's consumption was considerably below the number of gallons used during May, which was 300,000 gallons, according to the department.

## City Approves Agreement For Postal Colony

### Head Of Postal Organization Must Give Approval To Plans

An agreement for deed which would ultimately transfer title to all property in the Bel-Air subdivision to the National Federation of Postal Clerks, was executed by the City Commission at a special meeting in the City Hall last night.

This morning the agreement was forwarded by Secretary Edward Higgins of the Seminole County Chamber of Commerce to W. G. Wyatt, chairman of the group's home retirement committee, who will in turn forward it to the president of the organization, Leo George, of Washington, D. C.

The action by the Commission last night marked the completion of the first step toward securing the location here of a postal colony to consist ultimately of 500 small homes for the retired members of the organization.

The agreement for deed, signed by the commissioners, meets with the approval of the national president, work is expected to begin immediately in clearing off the property and construction of the first home units is expected to begin about Sept. 10, following the gala Labor Day celebration planned for Sanford when formal presentation of the property to the postal organization will be made.

The agreement stipulates that construction must begin by Oct. 1 of this year and that 100 homes must be completed by Oct. 1, 1941. The City, however, will give a 60-day extension to the completion of the first home unit.

The agreement also provides that the postal organization will be responsible for the maintenance of the property.

## 317 Deaths Attributed To Torrid Spell Which Grips Most Of U. S.

### Mercury Climbs To Season High Here Yesterday

### Records Show 5-Inch Deficit In Rain For Half Of Year

Residents of Sanford suffered under the scorching sun of summer's hottest day yesterday as the mercury climbed to a season peak of 98 degrees.

While the 98-degree reading was the official recording for the day, at several points in the business district the mercury rose to temperatures of 104 and 105 degrees, and it was this street temperature, resulting from the reflection of the heat from the streets and sidewalks, that caused the heat to be felt so acutely.

While the mercury has reached the 90-degree mark or above, every day this month with one exception, the temperature gradually increased to yesterday's season peak as the nationwide heat wave extended into the Southland. Beginning with Sunday's 91-degree reading the mercury rose higher each day, setting a season high on Tuesday with an official 95 degrees, only to exceed this peak the following day by three degrees.

While the heat brought to the minds of many local residents, thoughts of cool mountain vacations, there were no casualties reported as hundreds sought temporary refuge in the county's many lakes and springs.

The temperatures this month have been unusually high, considering that until the past few days there were almost daily showers to cool the atmosphere. Most of the nights, however, have been pleasant, and even last night, after the hottest day in the year, the temperature dropped 21 degrees to 77.

Despite the almost daily rains during the first part of the month, precipitation for the month is 2.13 inches below the normal rainfall, while the precipitation for the first half of 1940 shows a deficiency of 5.68 inches. To date during the month of July, rainfall has totalled 5.44 inches as compared with a normal precipitation of 7.63. Rainfall for the first six months totalled 15.71 inches as compared with a normal of 21.09.

Rainfall by months is as follows:

Month	Actual	Normal
January	2.12	2.35
February	3.82	2.31
March	3.88	2.74
April	3.74	2.21
May	1.19	4.00
June	3.08	7.48
Total	15.71	21.09

### Kiwanis Officials To Hold Boat Cruise

All committee chairman, the officers and directors of the Kiwanis Club will hold a boat trip on the St. Johns River Friday afternoon, Frank Shames, member of the committee in charge of arrangements, said today. He said that the group will board the yacht owned by George A. DeCottes at the Municipal Pier and that the boat will leave promptly at 7:00 o'clock.

The group will discuss plans for the operation of the club during the next six months. Refreshments will be served during the evening. Other members of the committee in charge of arrangements are Lester Terry, and Dr. L. T. Dean.

### Merchandise Is Taken From Altman's Store

Several dollars worth of merchandise was stolen from Altman's store last night, Sheriff C. H. B. reported today.

Deputy Sheriff Jack Hickman, who investigated, said that about 100 pieces of merchandise were taken from the store. It was not known how entry was made.

On the previous night a radio and several pieces of oil were stolen from the store.

### Mercury Climbs To 116 Degrees At Town In Kansas

The prolonged heat wave showed signs of cracking today as a mass of cool air advanced from the northwest.

The cooler air began moving eastward last night, bringing relief to Montana, Wyoming, the Dakotas and parts of Minnesota. Forecasters said the air mass would spread the upper Mississippi valley and the Great Lakes region by tomorrow night and should be felt all way to the Atlantic seaboard by Saturday.

Thunderstorms promised temporary relief today for the middle West and much of the East. Temperatures, however, remained abnormally high from the Rockies to the Atlantic.

At least 317 deaths were attributed directly or indirectly to the torrid spell, more than a week old in some sections. There were 116 heat fatalities, 291 drownings and in addition more than a half dozen persons killed by lightning.

Most of the heat deaths were recorded in the Middle West, where temperatures above 100 were common yesterday. The mercury climbed to 116 degrees at Beloit, Wis., and Long Pine, Neb.

Scorching temperatures continued in Georgia and Florida. The mercury soared to 100 at Savannah, 101 at Macon, 100 at Jacksonville, 99 at Tallahassee, and 94 at Tampa.

Clouds and scattered thunderstorms in some sections of the state were not expected to bring relief today or tomorrow.

Among the new marks for the summer were: Chicago, 101; Milwaukee, 100; Detroit and Springfield, Ill., 98; Indianapolis 96; On Ohio's record-breaking list were: Cincinnati, 97.2; Youngstown, 96; Dayton, 95; Columbus, 94.8 and Toledo 95.

Readings of 104 or more were registered across Nebraska. The mercury column also moved toward the top of thermometers in these places: Athys, Kan., 110; Overton, Neb., 109; Lincoln, Neb., 108; Logan and Clarion, Iowa, 104; Lincoln, Mo., 103; Rockford, Ill., LaPorte, Ind., 100; Sandusky, Ohio, and Des Moines, 100.

A half dozen deaths were reported in Chicago on the sixth consecutive day of temperatures of more than 90 degrees. Citizens there were using nine carloads of lemons and lemons a day. The daily attendance at beaches to 1,000,000. The work was pumped 1,306,950 gallons in a 24-hour period—an all-time peak. Officials urged householders to conserve water.

A fire hazard by reducing further the pressure in the hydrant mains.

Aridity provoked growing concern in some farm areas. Topsoil, checked off its thirty-first day without measurable rainfall. The New Jersey department of agriculture reported that drought had caused serious damage to potatoes, truck and hay crops and pastures. Reports that corn leaves were withering lifted prices of that commodity 1-1/4 to 2-1/4 cents a bushel on the Chicago Board of Trade. Wheat advanced, too.

Thunderstorms were forecast for the Ohio valley, the eastern part of the Dakotas, Minnesota, Wisconsin, but no widespread rain upper Michigan and northern Wisconsin was in sight.

New York, New England and some other sections of the east dropped out of the heat parade and enjoyed temperatures in the 70's and 80's.

Soap Bubble Contest Held At Playground

## Johnson Quits Secretary Of War Position

### Robert P. Patterson Of New York Named Successor To Post, White House Says

WASHINGTON, July 25.—(AP)—The White House today announced the resignation of Louis Johnson, secretary of War, and the nomination of Robert Porter Patterson of New York, judge of the Second United States Circuit Court of Appeals, as his successor.

Stephen Early, assistant secretary, said that "some time ago" Johnson had the right to select his successor and that he had asked the chief executive to name Patterson.

Johnson said that Johnson would continue to serve as secretary of War until the War Department announced that Patterson would take over the post.

Johnson said that Patterson would take over the post of secretary of War on August 1, 1940.

## Kipp Requests More Students For Air School

### Increased Enrollment Would Give Class More Scholarships

Students may still enroll in the CAA sponsored preliminary flight school, conducted four nights weekly at the Sanford Community School, Professor E. K. Kipp, instructor, said today, adding that he "is very much pleased" with the progress the class has made to date.

Pointing out that it will be another two weeks until the enrollment complete their physical examinations, Mr. Kipp said that any number of students may enroll during this period if they make up their work.

It was Kipp's first visit before a congressional committee taking funds for his department since he, a Republican, entered the New Deal cabinet. Heads of the War and Navy departments, including other service officials, will appear before the subcommittee on Friday to submit a picture of the many-voiced defense program as it has developed to date.

Secretary Stimson, and other top officials of the Army urged the House Deficiency Appropriation Committee to expedite approval of the \$4,000,000,000 marked for the Army in the \$1,180,000,000 defense bill pending before it. The remainder of the bill will go to the Navy.

## Foreign Ministers Move To Stamp Out Fifth Columnists

### HAVANA, July 25.—(AP) Foreign ministers to stamp out fifth column activities by foreign diplomats, agents or other persons, the United States government announced today.

Proposals before the peace preservation committee headed by Secretary of State Hull included investigation of diplomatic and consular agents and possible limitation of their immunity privileges.

Simultaneously Cuba went a step further to establish a collective trusteeship over western colonies of European nations in the event they are threatened with acquisition by another non-American state.

Cuba suggested the Pan-American nations issue a declaration warning that "any western hemisphere territory offering itself to any American nation may be occupied by armed American forces."

The United States already has begun investigating foreign consular agents at home and warned the German embassy in Washington in one case that its officials must refrain from public discussion or activity in domestic affairs or leave the country.

Tighter immigration control and close surveillance of aliens within American nations along the lines taken recently in the United States also were believed under consideration.

An example cited was a recent German note to Central American republics to resist any foreign efforts to influence American policies were studied.

## LOCAL WEATHER

Partly cloudy tonight and tomorrow. Scattered thunderstorms in the extreme South and North portions Friday.

### Antarctic Wastes Separate Bands Of Polar Expedition

WASHINGTON, July 25.—(AP)—In the frigid wastes of the Antarctic region, two little bands of men, separated by 1600 miles of uncharted snow and ice, are waiting for the long polar night to end to resume their search for an unknown coast.

The group, headed by Richard E. Byrd, of the department of interior, is waiting at a base 800 miles south of the southernmost tip of South America, at Marguerite bay, in Palmer Land. There are 23 men and 80 dogs at that location.

For 18 years, these ships, their anchors rusting, their bottoms covered with barnacles, have been tied up near New Orleans, a "ghost fleet" that no one thought would sail again. But the sinking of vessels by belligerents in the European war has caused such a demand for freighters that the "ghost" fleet, totaling 43 vessels, has been reconditioned, and will soon again carry the cargoes of commerce.

Across the ice, 1600 miles to the west is the other group of 23 men and a number of dogs. Their camp is at Little America on the Ross barrier—a floating ice sheet several hundred miles long and several feet thick. This is approximately 2000 miles south and west of the Byrd group.

The principal task of these expeditions is to constitute the expedition of the U. S. Antarctic program, headed by Rear Admiral Byrd, to chart the coastline lying between their two bases.

A section in the middle, about 500 miles long, was charted last year, but another 500 miles remains to be mapped.

The group at Marguerite bay is expected to start sooner than the other because it is farther from the pole and hence the ice is thinner. The first part of the trip will be to chart the coast at the Little America base.

When their job is completed, the entire coastline of Antarctica will be known, and this country's claim to a share in Antarctica, when it is made, will be strengthened accordingly.

Each group will use dog sleds and airplanes in making their way across the mountain ranges. The Byrd party probably faces the most difficult job, for in its path lie an ice-covered landscape of jagged peaks and valleys, and a range of mountains some 5000 feet high.

The party's airplane probably will prove the mountain range the most serious difficulty, but it may encounter trouble on the ice and had to make a landing. The situation might be desperate.

The ice would be blocked by the mountain range and perhaps never be able to cross. Black must do a job that will reduce the mountain range.

The mountain and part of the ice which Black's group must cross were seen by the expedition John R. Swinton in 1907 and by the expedition of the U. S. Navy in 1916, but neither of the work was complete, and will not be of great assistance.

Part of the ice has been mapped, and the present ice sheet is getting thinner. The ice sheet will be a permanent low shape while the Antarctic winds sweep across it.

### Japanese Resume Buying Of U. S. Scrap Iron On Enlarged Program

NEW YORK, July 25.—(AP)—Trade sources here reported yesterday that Japan had re-entered the American scrap steel market and placed orders for 200,000 to 300,000 tons of scrap at an average price of \$17 a ton alongside ship for the No. 1 grade.

The orders, it is said, represent the first buying by Japanese interests for some months. The tonnage is substantially larger than past purchases which averaged 150,000 tons a month in the peak year of 1937, when total Japanese purchases in this market were about 1,900,000 tons.

According to the new Japanese program, scrap shipments will be made on the Gulf Coast. In the taken at ports in the East, West East there have been fairly large tonnages of scrap at marine terminals representing purchases by Italy prior to that country's entry into the war, and by France, before the collapse of its armies.

Domestic consumption of iron and steel scrap increased 14 per cent in June to a total of 3,422,000 gross tons (9,240 pounds), according to an estimate issued yesterday by the Institution of Scrap Iron and Steel, Inc., New York.

The institution's comparison of 1945 consumption of scrap was 18,212,000 gross tons, compared with 15,314,000 tons for the period of last year.

Exports of steel scrap for the first half of 1946 averaged 250,467 gross tons a month, compared with 226,969 tons in 1935. Exports this year average one-fourteenth of domestic consumption.

The thermometer sometimes drops to 40 degrees or more below zero, and a quick, deep breath will often freeze a man's lungs, but inside the snow covered buildings it is warm and the food is good and plentiful.

Both camps are in constant communication with the United States and their chief, Admiral Byrd, who is here in Washington. The bases each have 570-watt stations. Broadcasts are picked up here, or in San Francisco, Honolulu and elsewhere, depending upon weather conditions.

In addition, the expeditions, planes, tractors and even dog sleds are equipped with two-way radio to reduce the hazard as much as possible.

### RED CROSS SHIP IN FRANCE

PARIS, July 25.—(AP)—Wayne Chestfield Taylor, European delegate of the American Red Cross, reported that the first American Red Cross ship, the McKeesport, arrived in Marseilles, where its cargo for the aid of war victims would be distributed immediately.

### OLD CANNON FOUND

PORTLAND, Ore., July 25.—(AP)—A 150-year-old cannon that once guarded Fort George outside Astoria, Ore., has been recovered by the U. S. Coast Guard.

The cannon was found in London in 1789 by Edward Sand and sold to the Hudson Bay Fur company.

Length of the original Great Wall of China, built in the third century B. C., was about 2,550 miles.

Organization To Conduct Draft Can Be Formed In Week

WASHINGTON, July 25.—(AP)—Awaiting only the word from Congress, a "shadow" organization of some 450 men, which could be expanded to a million in possibly a week, stands ready to convert American boys into soldiers.

Authorized originally for wartime emergency, the organization would now be used, under the terms of the Burke-Wadsworth bill pending in Congress, to select men for compulsory peacetime service. The bill incorporates the general principles of the organization.

Beginning at the top, it would work this way: A joint army and navy committee, which has been evolving draft plans for many years, would become the nucleus of a national headquarters to which 100 trained reserve officers could be assigned immediately. Under the direction of state governors, some 350 state staff officers would form the nucleus of state organizations.

The governors would appoint a total of 6,500 local selective service boards, about one to each county or other political unit of 30,000 population. In addition, doctors would be appointed as medical examiners, lawyers as appeal agents, etc. A total of about 200,000 administrative officials for the whole country.

To conduct the on-the-spot registration of men of military age, 750,000 registrars would be distributed, mostly from among selected officials, men, reserve and national guard officers who

British Oil Firm Is Taken Over By Pro-Nazi Rumania

BUCHAREST, July 25.—(AP)—Rumania's pro-Nazi government took over operation of the country's largest oil company last night, thereby placing huge stocks of British produced petroleum within reach of Germany's mechanized forces.

Orders placing the \$15,000,000 Astra-Romania corporation under a national oil commission with full powers over production and distribution came a few hours before the departure of Premier Gigurtu and Foreign Minister Manolescu for a conference with Adolf Hitler and his Foreign Minister Von Ribbentrop at Salzburg.

An officially inspired editorial in the government-controlled press today will say that the basic idea of these visits is the "Preservation of peace in the Balkans and Danube basin. Rumania's ties with Germany and Italy will become ever stronger."

An indication that Rumania is moving rapidly to improve relations with Russia before the Salzburg conference was seen in a cable report that the Soviet has agreed to the appointment of Grigore Calenicu as minister to Moscow.

Large quantities of oil in storage will become available to Germany under the new arrangement. Because of previous refusal of British and Dutch companies to ship oil to Germany and because of the closure of the Mediterranean export route by Italy's entrance into the war, vast oil stores have accumulated.

Wishing to get back into jail, John Brown shouted, "I am a German. I am a Nazi spy," in Glasgow, Scotland, but the police knew him and kept the crowd from thrashing him, yet would not put him back behind the bars.

Waiting For a Sail The Modern Merchant Doesn't wait for SALES HE ADVERTISES

Triple Groceteria advertisement listing various food items and prices: 5 lbs. Hershey's Sugar 13c, Georgia Watermelons 23c, RICE 2 1-2 lbs. 19c, GRAPE JUICE 25c, 3 CANS ANY BRAND TALL MILK 13c, 2 BOXES MORTON'S SALT (free balloon) 17c, Baby Beef ROASTS lb. 15c, STEAKS lb. 19c, Eggs 10c, etc.

VERA NICKICH, 5, was on hand with flowers when the former Empress, Zita of Austria and her daughter, the Archduchess Elizabeth (right), arrived in New York by clipper from the Azores. Shown also are Zita's sons, Prince Felix (left) and Archduke Otto, who welcomed their mother to America.
