

VOLUME XV. ASSOCIATED PRESS DISPATCHES SANFORD, FLORIDA, WEDNESDAY, JUNE 24, 1925. PRICE FIVE CENTS

Sanford's New City Hall To Be Formally Opened Tomorrow

Building Was Provided For In Bond Issue Passed Last Summer; Will Facilitate Better Handling of Affairs
Offices Are Large And Well Furnished

Structure Made of Tile and Is Finished in Olive Colored Stucco Style; Has Tile Roof.

Sanford's new municipal hall which will be formally opened on Thursday with an appropriate celebration, sponsored and conducted by the city, was erected and furnished at a cost of approximately \$75,000, the amount appropriated for that purpose in a bond issue passed about a year ago.

The structure, which is finished in olive colored stucco and is of a modified Spanish architectural design, has been declared by a number of contractors and builders of this state to be the finest municipal hall in Florida for a city the size of Sanford.

The building forms an imposing picture from any angle and especially from the front and from the lake, it is pointed out. Many people, including scores of visitors have expressed surprise that this city should have so fine a municipal building.

The main entrance of the building faces Park Avenue. There are also rear and side entrances to the halls and auditorium. Concrete steps at the front entrance lead to an exterior iron grilled gate and then to large double doors opening into a hallway. The floors of the hallways are of red tile, while the floors of the offices, the room of the City Commission and the large auditorium, which is situated on the second floor, are of polished hardwood. Walls and ceilings are finished with white plaster.

City Clerk's Office in Front
The first office on the right upon entering the building is that of the city clerk and the various employees of the city who work under his direction, as well as the office of tax collector. The windows through which business will be transacted with this office are placarded as: Clerk, Building Permits, Paving Assessments, Tax Collector and Permits, respectively.

The furniture and office equipment of this and other offices of the new city hall, such as desks, tables and chairs are of golden quartered oak. There are new file cases for books and papers and vaults adjoining all of the offices handling papers and other articles of value.

Adjoining the office of the city clerk is the office of the city manager. It, as are all of the offices, is large and spacious, being well adapted to the work to be carried on there, it is pointed out. Directly across the hall from the clerk's office is the room in which the City Commission will meet. The whole amount which the commissioners will sit will be placed on the raised platform in the front or east end of the room. A railing separates the commissioner's platform from the audience chamber in which there will be a number of oak chairs.

Utilities Offices in Rear
Next to the commissioner's room and connected by a single door, but having its main entrance in the wing of the hall which runs north and south are the offices of the city utilities department. By looking down the hall directly in front of these offices, one may see the private office of the city engineer at the extreme end and will find on the right of the hall a very large drafting room which is under the supervision of the engineer. On the left and opposite the drafting room are two vacant offices which, it is stated, will not be used at present, and the laboratory of the city chemist where the city's supply of water and milk will be tested from time to time.

The stairway from interior of the building to the auditorium is directly under the tower while the auditorium may also be reached by a flight of stairs from the outside at the southeast corner.

The auditorium will have a seating capacity of exactly 1,000. Approximately 600 of the seats will be stationary while about 400 will be portable. This will make it possible to have a large open space on the main floor of the auditorium when it is desired to have dances and other entertainment.

The auditorium will be lighted by five large multi-colored chandeliers hung from the center of the building and a large number of smaller lights around the balcony. Office lights are all enclosed in white exterior globes, which, it is pointed out, will give an extremely good and diffused light. Each office is equipped with a private lavatory.

GERMANS HEAVY SMOKERS
BERLIN, June 23.—Statistics compiled by the Tobacco Dealers' Association show that during the last year Germans smoked 6,500,000,000 cigars and 25,000,000,000 cigarettes. These cost the smokers a total of \$225,000,000.

OFFICIAL FAMILY OF CITY PLEASED WITH NEW HOME

Heads and Employees of Several Departments Are Glad That City Hall Is Finished; 19 Be Located in Building

Sanford's handsome new city hall, which will house the city's various departments of government, will also be the official home of 19 officers and employees, who compose the city's official family.

Although the City Commissioners will have no private offices of their own, they will hold their regular meetings in a specially provided commissioners' room in which space has been allotted for citizens to attend the meetings. The personnel of the commission includes three of the most prominent business men of the city.

Mayor Forrest Lake, who last year was elected to serve another three year term as commissioner, is now serving his eleventh term as mayor, having first been elected to this office at the age of 21. S. O. Chase, head of Chase & Company and connected with many business interests of the city, is now serving his fifth year as commissioner, having been elected in December, 1923, to serve for another term after holding the office for the three years previous.

Dr. C. J. Marshall, prominent physician of this city, is serving his first term on the commission, having been elected in 1922 for a three year term beginning Jan. 1. His term expires Jan. 1, 1926.

Others who will have offices in the new building are:
L. R. Phillips is city clerk, a position he has filled since Jan. 6, 1920. Mr. Phillips has been a resident of Sanford for many years and his performance of the duties of this office have won for him the praise and friendship of a host of people.

Mr. Phillips has as his assistant and stenographer, his daughter, Miss Marion Phillips, who has been connected with the office for only a short time.
Miss Ellen Hoy, who has been connected with the office of city clerk for several years as deputy tax collector, is now serving as tax collector and assistant in the office of the city manager.

W. B. Williams, the city manager, has served the city of Sanford in that capacity for the past two years and before that time was an engineer of long experience, having had charge of important work not only in this state but in his native state of Illinois.

City Engineer Fred T. Williams has served both the city and county as engineer and during his occupancy of the former position, has had charge of extensive engineering work of the city in the way of street paving and sewer laying.

Mr. Williams has the following assistants on his staff, who will occupy his offices: A. P. Haggard, assistant city engineer; Grant Wilson, in charge of sewer laying; Walter J. Tyler, draftsman; John Hudgens, draftsman; R. E. Tittle, instrument man and W. C. Duke, E. S. McCall is office manager of the city's utilities department, having succeeded N. H. Cobbs, who resigned that position several months ago. Mr. McCall has as his assistants, Miss Velma Wilkey as stenographer and L. V. Duane as meter reader.

Jesse H. Hamilton, city food inspector, who has held that office for the past few months, came to this city from Orlando. His office will have equipment suitable for making examinations of foods and milk. James Moughton, city sanitary inspector and assistant to the city manager, will also have his office in the new building.

Another official, who will occupy an office, is G. P. Paxton, building, electrical and plumbing inspector for the city. Mr. Paxton served for 13 years as fire chief and also did the same work he is now doing. Recently when the duties became so arduous, he gave up his duties as fire chief and now devotes his entire time to inspection work.

Members of the official family are proud of their new quarters and are happy to move in tomorrow, they declare. That the better surroundings and increased facilities will aid materially in their work, is the declaration of the various officials.

Philippines Have 145 Labor Organizations
MANILA, June 24.—There are registered in the Bureau of Labor 145 labor unions in the Philippine Islands with a membership of 89,492, including 87,402 men and 2,090 women. These figures do not include mutual benefit societies, of which there are 107 with a membership of 73,487.

Manila leads in the number of labor unions, a total of 76, or more than half of the total number in the entire archipelago.

Seminole County Grows Twelve-Foot Corn

Corn as it is growing on the farm of T. I. Hawkins on Celery Avenue. Twice the height of a man in many places, many have expressed the opinion that no section of the country is capable of producing a finer or heavier crop.

Increased Crops Secured By Well Known Farmer By Enriching Soil With Muck

Muck Composed Of Decayed Weeds And Grass And Rich Earth, Taken From River At Fifty Cents Each Load
and planting in the summer, of a crop which tends to make the soil better adapted for the growing of more and better celery.

Corn 12 Feet High Is Now Growing On Farm

T. I. Hawkins Came To This City Over 30 Years Ago; Well Known Celery Grower

Convinced that by spreading muck in thin layers over his farm he will enrich his soil, and by so doing will materially increase his crop, T. I. Hawkins, pioneer farmer of Sanford, is employing 16 men in the work of spreading muck on a five acre tract of his farm on Celery Ave.

Several years ago Mr. Hawkins began bringing muck from the lowlands near his 16 acre farm, and spreading it on his tillable land. Such good results were obtained that since then he has been covering a portion of his property with the new soil every year, making it a point to add new soil and new life to the same ground about once every three years.

Cost of the muck according to figures given by Mr. Hawkins, approximates about 50 cents a load and this year 500 loads will be required for the five acre tract.

Content of Muck Given
The muck is composed of settlements that have congregated in the St. Johns river and consist of decayed weeds and grass, as well as exceptionally rich dirt washed down the river by its waters. In some places it is found that this muck lies from four to five feet in depth.

"My experience has been that it is unwise to continue growing celery on land year after year without putting back into the ground that which is taken out of it," Mr. Hawkins said, "unless the farmer comes to realize that the soil needs replenishment of humus to take the place of the humus that disappears, they are bound to suffer from poor crops and a poor grade of celery."

"For several years I have found it advisable to enrich my soil frequently and as a result of the muck I have placed on my farm last year my celery crop increased more than 250 crates to the acre. My records show that I cut 12,800 crates from about 12 1/2 acres and that the grade of celery was far better than any I have grown."

Corn 10 to 12 Feet High
A walk through some of the corn fields on the Hawkins farm will convince anyone of the value of the muck to the soil. The growth of the corn stalks are twice as hardy on the land treated with the muck as on the soil which has been used for several years without being enriched. The stalks are entirely green to the ground, and the height is judged at from 10 to 12 feet, corn growing in many cases entirely out of reach of a six foot man. It is estimated that the corn crop will average more than 100 bushels to the acre.

A little figuring will show the benefits coming from this treatment, which renews the fertility of the land. Mr. Hawkins has increased his crop by more than 250 crates of celery to the acre, which if based on an average price of \$2 per crate, makes his increased yield amount to \$500 for every acre. Last year he cut 1,000 crates of celery to the acre, which according to estimates of many familiar with the celery industry, should bring the grower a net profit of \$1,000 for this crop alone.

Put Apartments On Co-Operative Plan, Miami Man Urges

DETROIT, June 24.—The advantages to that increasing group of people who spend their winters in the south and their summers in the north, of owning co-operative apartments as a Southern home was pointed out by J. N. Ryan, of Miami, who spoke before the Co-operative Apartment Section of the National Association of Real Estate Boards at the annual convention of that body here today.

Mr. Ryan is manager of the co-operative homes department of one of the leading financial firms of Miami.

"Shutting up a home is a heavy responsibility for a nomad and living in a hotel as he fits from place to place shuts him off from a pleasant aspect of family life," said Mr. Ryan. "It is also expensive. But the co-operative apartment is easy to look up or to sublet. It is really homelike and comparatively inexpensive. It is a splendid field for co-operative development, the speaker said, but admitted that there were drawbacks just at present while the speculation in land is so lively in the peninsula state. Many co-operative projects have been started, he said, but were interrupted by offers for the land that were too tempting for the owners to refuse."

and has seen the industry grow to enormous proportions during his 18 years on his present farm.

In addition to being an extensive property owner in Florida, Mr. Hawkins is the owner of a large peach orchard in Georgia, and devotes a part of the summer months to superintending activities there. He is known by many in Sanford as being one of the city's wealthiest citizens and one of the state's foremost farmers.

New Church Of Holy Cross Here Is Among Best In Entire State

OAK HILL SALES REMAINING GOOD, ASSERTS GARNER
Structure Is Of Pure Spanish Architectural Design; Is Finished In White Stucco With A Roof Of Red Tile
Building, Furnishings Cost Nearly \$50,000

Although Sale of Lots In Sub-division Has Not Been Pushed During Summer, Much of Property Is Still Being Sold

Sales of Oak Hill lots have been unusually large thus far during the summer months, according to an announcement Tuesday by N. H. Garner, owner and developer of the property. The sub-division, he pointed out, is ideally located between Mellenville Avenue and the tracks of the Oviedo Branch of the Atlantic Coast Line Railroad Company, just beyond Geneva Avenue.

To date about 100 of the 210 lots in the sub-division have been sold. Fifteen of the lots were sold during last week, he said. Due to a larger number of deals of a larger nature, stated Mr. Garner, these lots have not been pushed during the past two or three months through per-

(Continued on Page Seven)

The new church, according to Episcopal officials, is the outgrowth of a series of meetings held last summer after the entire old plant of the church, consisting of the church, a parish house, the rectory and a bowling alley, was destroyed by fire of unknown origin. At these meetings finances and building committees as well as trustees for the various funds were appointed.

On the finance or subscription (Continued on Page Seven)

Our Substantial City--- SANFORD

Celebrates the opening of the splendid City Hall. The place where in the future many big things will be planned and executed for the well being of its citizens and the general welfare of the public.

WE ARE BUILDING FOR THE FUTURE

And in building this city is looking ahead for many years and not planning buildings that will take care of the business of today. Many things enter into our industrial and commercial life making the whole into a perfect structure.

WHAT DOLLAR YOU SPEND BUYS MORE VALUE?

Utility Service is about the only thing folks get at cost. Our charges simply cover expenses including a mere interest on our investment. Result—service for you at as near its actual cost as in humanly possible.

WHEN A MAN TAKES A JOB IN ANY COMMUNITY

And spends his wages there, buys property there, pays taxes, obeys the laws, pays his bills and helps his neighbors, he is considered a good neighbor and a good citizen.

ALL THESE THINGS THIS COMPANY DOES

Our job is to supply the electric service which is essential to the well being of homes, the efficient conduct of business and the prosperity of the community. Our capital is invested in property here, our revenue pays wages and taxes.

WE WANT THE COOPERATION OF ALL CITIZENS

For it is only by your cooperation and friendly attitude that we can be assured of your support for those greater improvements that will be made here from time to time thus giving this community the efficient service to which it is entitled.

Our Best Wishes For a Greater Sanford

The Southern Utilities Company, C. A. Byrd, Local Mgr.

Bank were indicated in reports for French. The pin is mightier than the sword; the budgetary blue pen, on which further pointed out, is the Government course sought to. Mr. Carrer further pointed out that the Government course sought to. Mr. Carrer further pointed out that the Government course sought to.

One Hundred Dollars Profit can be Made in One Week!

ON Wednesday morning July first—just one week from today—the prices of all unsold lots in Oak Hill will be increased one hundred dollars. Twenty-five dollars invested today will grow in value five times within seven days.

MANY fortunes have been made by buying real estate on a rapidly increasing value and Oak Hill now offers the people of Sanford an opportunity of reaping big dividends for small invested capital.

THERE is no telling how high prices in this development will get by next winter. At the rate property is increasing in price, and at the rate people are buying, it is entirely probable that lots in Oak Hill will be selling for twice what they can be bought for today.

TWENTY-FIVE dollars cash and easy monthly payments puts lots within easy reach of almost any member of the family. And twenty-five dollars used in purchasing well located real estate today will come back to the investor in a day not far distant bringing with it many other good dollars.

IF you really intend to buy property why should you delay longer? You cannot afford to allow opportunities like this one to pass by unheeded. It may mean the foundation of a fortune.

N. H. GARNER

Owner and Developer

110 PARK AVENUE

STEWART'S WASHINGTON LETTER
By CHARLES P. STEWART

WASHINGTON — If Europe, they're saying at the treasury department, would fish out the gold money she has stowed away in old stockings, the sugar bowl, the baby's bank, behind the clock on the mantel, between the mattresses, and elsewhere, and set it to earning something, she could about pay the interest on what she owes to the United States, and never feel it.

idle. In fact, Europe actually would be better off for putting it out at interest and letting the United States have said interest, because then the interest that she isn't paying to this country would not be piling up on her, as at present.

This thought came to the surface following publication of stories of the vast amount of gold which made its appearance in England when the British government proclaimed a return to the gold standard.

Up to that moment there simply hadn't been any gold in circulation from the time the war started, or a few weeks later.

Up to August, 1914, the bulk of England's actual retail business was transacted in actual gold met-

al. There were no bills smaller than 5 pounds, or a little over \$25.

For everything less than that the medium of exchange was sovereign and half sovereign pieces. Respectively about \$5 and \$2.50, with silver, of course, for small change.

(With the war's outbreak all this gold vanished in almost less than no time. The government and the banks grabbed all they could get their hands on and stopped paying any more out, but tons and tons of the stuff remained unaccounted for.

People hid it. They couldn't shin it out of the country but they could and did hang onto it.

But when the gold standard was restored they had no reason for hoarding any longer. If they let go of the gold they had and wanted more they could get it, which they couldn't have done previously.

So, as suddenly as it had disappeared, back into circulation came

oodles of gold again.

Now, the point the treasury department makes is that if this money had been out at 5 per cent interest, it would have earned half as much as the total amount of it, during the 10 years it has been buried, to all intents and purposes.

Well, Britain has uncovered her hoard but France hasn't uncovered hers. It is estimated that she has two billions tucked away, counting gold and silver.

Five per cent on that much for 10 years would have been a billion, which is a quarter as much as the French debt to the United States.

Another thing. The treasury department points out that a gold dollar was good for a gold dollar's worth when its owner hid it in 1914; now it represents only 60 cents' worth.

While recognizing that econo-

my's an excellent thing, the treasury department argues that the economist can overdo it, or at any rate, that he can economize unjudiciously.

Fort Myers Makes Bid For Weather Station

FORT MEYERS, Fla., June 23.—Efforts are now being made by Don Wilkie, secretary of the local chamber of commerce to have a United States meteorological station established in this city. He has just completed a conference with Dr. C. C. Clark, assistant director of the United States Weather Bureau in Washington, and states that the outlook for the establishment of such an office here is promising.

According to Dr. Clark, as quoted by Mr. Wilkie, the 1925 budget has already been made up and Fort Myers was not included for such an office, however, it is thought that some special consideration may be made in view of the growing importance of the city as a center of weather reporting.

THIRD ROAD MEETING

TALLAHASSEE, Fla., June 23.—The state road departments will hold their third quarterly meeting of 1925 here on July 2, it was announced today.

Wakulla County—Sixty thousand dollars to be appropriated for roads in this vicinity.

Ft. Pierce—Contract awarded for 6-story business house.

NEW INVENTION TRIMS RAILS OF MOLTEN STEEL

CHICAGO, June 23.—A new master barber is in the field, he who shaves steel rails.

For many years the manufacturers of rail steel reinforcing bars waited for some genius to devise a machine that would remove the splinters from the rails, a work which heretofore had been done by hand. It is a necessary operation before the rail can be passed through the rolls.

As the rails were removed from the great piles in the storage yards and started on their journey to the furnaces, crews of men with chisels and hammers trimmed off the splinters that car and engine wheels developed along the edges of the rail head.

While the cost of this work was not excessive, as common labor could perform it as well as skilled workmen, it slowed up progress.

It was a Canadian who solved the problem and developed the rail shaver. This machine now is being installed in one of the Chicago mills of the steel products group. Tests have shown that it will do all that is claimed for it.

As the white hot rail tumbles from the furnace it passes forward to the slitting rolls that separate it into head, web and flange. Just as the end is gripped by these rolls, an ingenious arrangement of powerful knives set close to the

rolls, is automatically put into operation. As the rail moves forward these knives shave off all splinters and projections with the ease that a keen razor passes through stubble of beard.

Jacksonville to Have Auto Races on July 4

JACKSONVILLE, June 23.—A free for all open automobile race will be held here on July 4 as part of the celebration being planned by the American Legion. Officials of the local post announce that they anticipate a large number of entries in the race from various sections of Florida and several other states. One entry from Mobile, Ala., and two from Savannah, Ga., have already been received.

Tampa—Methodists building \$200,000 church.

Gross Indebtedness Of Tampa \$7,180,500

TAMPA, Fla., June 23.—A. A. Miller, city comptroller, has announced that the gross bonded indebtedness of the city of Tampa is at present \$7,180,500 and its net indebtedness is now \$6,161,924.80. The latter amount, it was explained, represents the balance after deduction has been made of the cash resources, government, and municipal bonds held by the city.

The comptroller stated however, that a still larger amount could be deducted as there is an act of legislature that provides that the bonds on water works extension and other city improvements to the extent of \$2,695,000 should not be included in the list of liabilities.

Jacksonville—New building to be erected here at cost of \$3,520,000.

Carnivorous Fish Of River Of Doubt Shown On Screen Along With Diamond Mines

RIO DE JANEIRO, Brazil, June 23.—An educational film has been exhibited in Rio de Janeiro showing the wild life and frontier industries in the Brazilian state of Mato Grosso. This is the second largest state in the union, being more than twice the size of Texas. There are plenty of Indians living in Mato Grosso, most of them in the hunting and fishing period of civilization. The men of the Bororo tribe, which was shot for the pictures, use no clothing, but the women have been taught by the Federal Indian service to wear a simple form of dress. The most popular style in necklaces is made by stringing a collection of the teeth of wild jaguars, powerful and dangerous animals of the cat family which kill livestock through a great part of central and northern Brazil. A peculiar custom was filmed, showing the return of a young man with the hide of a jaguar, killed to prove his bravery, a necessary act before the right of marriage is given to a man. Another feature of life in the interior, mentioned by the late Theodore Roosevelt in the account of his trip down the River of Doubt, are the miranhas, the flesh-eating fish which inhabit some of the interior rivers. The operator threw a call into the stream. It was taken with astonishing rapidity by an enormous school of these carnivorous fish. Alligators are numerous. Edges of the forest bordering the rivers are in many places white with herons. The species are famous for their egret-like feathers. There is a law in Mato Grosso preventing the killing of these birds. There is a large trade in the feathers, however, and they are gathered after dropping from the birds. They have a market price of approximately \$150 a pound. Diamond mining seems to be flourishing, the picture showing one village where, it is said, there are more than 3,000 men washing river gravel and sediment by hand. Gold is washed by machinery. The plains are stocked with cattle, one zone having 400,000 head. Much of the meat is prepared for market in the form of jerked beef.

New Architecture Spoils City Beauty, Romans Assert

ROME, June 24.—The vandals who swept down upon Rome in the early centuries of the Christian era, destroying wantonly the great monuments of the empire, and the gentry of the Middle Ages who continued the desecration by tearing down such magnificent structures as the Colosseum to obtain beauty and personality of the city fragments, did less to destroy the than modern architects and builders are doing. This is the lament of hundreds of Italian and foreign artists and lovers of architectural beauty who complain that the curse of standardization has fallen upon modern Italian architecture. The charm of old Rome, they say, will have been sacrificed within a decade to the ill conceived idea of making the city a weak imitation of some bustling unbecoming middle western American town. Scores of ugly apartment houses each like the next, with no architectural distinction, are rapidly being built in the new Prati and Ludovico quarters and in many other sections of the city, while most of the new public buildings are distinguished only by their ugliness. Italians do not object to the construction of houses with modern improvements, but they maintain that some effort should be made in the external decorations to conform with the already existing beautiful examples of medieval and ancient architecture.

Lumber Men Plan To Help In War On Industrial Waste

WASHINGTON, June 24.—General use of short-length lumber, nine feet or less, will save enough forest material, now wasted, to build 300,000 eight-room dwellings annually, according to Arthur T. Upson, lumber technologist of the National Lumber Manufacturers' Association. The association has set up that objective as a part of its contribution to the crusade on industrial waste being waged by Herbert Hoover. Data gathered by the association the United States forest products laboratory at Madison, Wis., and the lumber division of the Department of Commerce now are in the hands of a committee which is considering how to stimulate the public demand for short lengths, which are said to be cheaper and usually, of better quality than long lumber. Mr. Upson said the short-length economy proposed is equivalent in forest conservation to giving the 20,000 lumber mills of the United States an entire year's holiday every tenth year, or about 38,000,000,000 feet of lumber, which would require all the saw-timber on 380,000 acres of land.

Trading At Home Sponsored By New Local Loyalty Body

CHICAGO, June 24.—Believing that national prosperity depends upon local prosperity and that every town's progress rests on the development of its civic and commercial interests, the Local Loyalty League of America, with headquarters here, has inaugurated a movement to stimulate a hearty trade-at-home community spirit throughout the country. Twenty nationally known manufacturers, constituting some of the largest newspaper advertisers, have pledged their cooperation. Material for the program includes newspaper editorials and newspaper advertising, a motion picture production entitled "My Home Town," featuring a popular juvenile movie star, essay contests, billboard posters and radio-casting. "A community is only as good as its citizens make it, and business is the cornerstone on which the community structure stands," said a statement. "Business decisions, brought about by buyers from mail order catalogues and peddlers and frequent shop-

ping visits to big city stores by the people of any town, make 'dead' towns. We desire to combat that and develop a trade-at-home spirit."

English Athletes To Compete Soon in U.S. Have Been Designated

LONDON, June 24.—The team from Cambridge and Oxford universities to compete against Harvard, Yale, Princeton, and Cornell, in a series of track meets in America, July 11-18, is composed of the following: 100 Yards—A. E. Porritt (O.), C. F. N. Harrison (C.). 220 Yards—A. E. Porritt (O.), P. G. Hunter (C.). 440 Yards—W. E. Stevenson (O.), and either D. M. Johnson (O.) or A. G. G. Marshall (C.). 880 Yards—D. G. A. Lowe (C.). R. A. Orchard (C.). Mile—R. S. Starr (C.), D. G. A. Lowe (C.). Two Mile—V. E. Morgan (O.), T. C. Fooks (C.). 120 Yards Hurdles—Lord Burghley (C.), J. H. Flynn (O.). 220 Yards Low Hurdles—Lord Burghley (C.), H. M. Cleaveley (O.). Hig Jump—C. T. Van Geysel

Judge Call Sets July Ninth As Hearing Date For Eustis Injunction

EUSTIS, June 24.—Judge Call of the Southern district federal court of Florida has set July 9 as the date of hearing on the application filed requesting that an injunction be granted preventing the mayor and other officials of the city of Eustis from extending the city limits as authorized by a recent act of the legislature. The papers were filed on June 18 and were signed by 40 applicants, nine of whom reside outside the state of Florida. The petition alleges that the act is unconstitutional because it violates the fifth and fourteenth amendments to the United States constitution which insures to the people the protection of life, property and liberty. The complainants further declare that the act violates the national rights clause. They also object to the \$15,000 bond issue for street improvements because the passage of the issue was made in closed session. It is claimed that the act violates the declaration of rights of the state of Florida. (C.), A. M. Mitchell (O.). Long Jump—C. E. W. Mackintosh (O.), H. K. Bagnell-Oakeley (C.), (V. B. V. Powell (C.) reserve). Pole Jump—R. L. Hyatt (O.), R. H. Bally (C.). Coral Gables—University to be situated here at cost of \$15,000,000.

Chinese Americanize Theater to Meet The Demands of Audience

LOS ANGELES, June 24.—A revolution in the presentation of Oriental dramas has been noted at a Chinese theater here. An American jazz orchestra has replaced an aggregation of native stringed instruments and Chinese girls are chosen to play feminine roles in preference to male impersonators. The little theater on the fringe of Chinatown offers a further innovation prompted by western influence by the installation of real scenery, backdrops and wings, to relieve the strain on the Americanized Oriental's imagination, formerly occasioned by the lack of "atmosphere." (C.), A. M. Mitchell (O.). Long Jump—C. E. W. Mackintosh (O.), H. K. Bagnell-Oakeley (C.), (V. B. V. Powell (C.) reserve). Pole Jump—R. L. Hyatt (O.), R. H. Bally (C.). Coral Gables—University to be situated here at cost of \$15,000,000.

We Extend Our Congratulations---

FRED T. WILLIAMS
City Engineer

E. S. McCALL
City Utilities

W. N. CLEVELAND
Chief of Fire Dept.

ROY G. WILLIAMS
Chief of Police

To the People of Sanford:

About a year ago the citizens of Sanford decided a new municipal building was absolutely essential if the city's affairs were to be handled in an efficient manner. Not having the necessary facilities, and without ample room in which to house the various departments of the city government for a long time it was with a great amount of difficulty that good service was rendered by the various city employees.

A bond election was called and the voters endorsed the project for the new city building by an unusually heavy vote. Without any unnecessary delay the actual work of construction was begun.

Many delays have been experienced in getting everything completed. But now, we are happy to say, we are about to move into our new home and go to work in a still more aggressive manner.

Tomorrow we have planned to hold "open house" in the new city hall. We shall be glad if all our friends will come and inspect the new building. We are proud of it and know you will be

We appreciate the support the people of our city are giving us in every movement for the advancement and the betterment of Sanford, and with the co-operation that is being shown by the citizens we are planning a still more progressive and far-reaching city administration.

It is our hope that the coming months will see the city grow to such proportions as were never dreamed of by the most optimistic person.

FORREST LAKE,
S. O. CHASE,
C. J. MARSHALL
City Commission.

Nearly \$3,000,000.00 in Public Improvements

The City Commission and the present City Administration, with the assistance and council of the Citizens, Chamber of Commerce, City Planning Board and all Civic Organizations, have provided for and built many permanent improvements to the City of Sanford during the past two years as follows:

Public Buildings:	
City Hall	\$ 75,000.00
Public Library	25,000.00
Police headquarters and jail (under construction)	50,000.00
Parks:	
Golf Course	45,000.00
Ball Park	30,000.00
Water Front Improvements:	
Dock and Boat Basin	67,000.00
East Side Bulkhead and fill under construction	200,000.00
Plans are being made for west side bulkhead and fill, and the construction of a paved boulevard five miles along the water front.	
Paving:	
31 miles of sheet asphalt pavement	1,500,000.00
Sewer and Drains:	
Sanitary and storm sewers and drains to every part of the city	300,000.00
Utilities:	
Built modern water works plant, sufficient to supply 25,000 population	375,000.00
Purchases and improved Gas Plant	160,000.00
Opening and Widening Streets:	
Including First Street, Park Ave. and many others	100,000.00
Cemetery:	
Evergreen Municipal Cemetery	10,000.00
Total	\$2,937,000.00

W. B. WILLIAMS
City Manager

THE CITY OF SANFORD

CHINA UPRISING IMPERILS AMERICAN EXPEDITION

ERIE, Pa., June 23.—Threatened with starvation and in constant danger of attack by marauders, a little band of Americans is imperiled by the civil war now raging in China.

Word from the expedition, headed by Roy Chapman Andrews, which represents the American Museum of Natural History, has been received here.

Food is at a premium, towns and villages are being looted and death is being meted out quickly to those who are captured by contending forces.

Upon arrival of the expedition in Urga the entire community was in a "state of disruption." The Minister of War and his chief secretary had been shot to death and, according to Andrews, efforts to get food were unavailing.

Refused Supplies.

"When supplies for the expedition, including two tons of flour, a ton of rice and other articles in proportion, were ordered the natives laughed at us," Andrews reports.

"The day before I had intended to shop our supplies to Kalgan we had word that the city had been looted by soldiers.

"Their punishment was swift and wholesale. The looters had gathered at the top of the Pass waiting to see what would happen.

"Word was sent to them that their sins would be forgiven and they would be sent home if they would surrender. About 450 of them came into Kalgan and gave up their arms.

"The men were put into box cars and told that within a few hours the train would start for Peking. Instead of that they were taken out, half a dozen at a time, searched, and if loot was found on them they were marched to the stone bridge in the center of town and shot.

"At the end of a few hours 450 bodies lay in the dry river bed.

"This is only one example of what has been going on in China almost continuously since last October.

Andrews says that Chinese sol-

diers have confiscated every camel, car and mule for a hundred miles beyond Kalgan, the base from which the expedition started.

It was found necessary to drive their camels far out into the desert to keep them from the soldiers.

Confiscate Mounts.

Andrews reports were made to an Eric man whose financial assistance did much to make the expedition possible. The man, whose name cannot be disclosed, died recently and the reports are being received by others interested in the expedition.

The expedition is conducting a search for dinosaur eggs and traces of human evolution. The plans called for the penetration of the region south of the Altai Mountains, a district which has never before been explored.

"We will work west of Chagan Nor (White Lake), along the northern base of the Altai, as well as to the south. This will bring us to the home of the wild camels and wild horses and I hope we can bring back specimens of both," Andrews says.

Seas Of Distant Countries Send Large Stocks Of Fish To New York City Market

NEW YORK, June 23.—Governor Alfred E. Smith, son of New York's east side, once was asked if he had a college degree, according to a favorite story of the town. He replied gravely that he had and, when asked what it was, said: "F. F. M."

This he translated with a broad smile: "Fulton Fish Market." The governor had worked there as a fish packer in his youth.

Fulton Fish Market, now in its second century, continues as in young "Al" Smith's time to be the country's greatest crossroads from fishing smack to dinner table.

Located in the lee of Brooklyn Bridge, its annual business is estimated at \$30,000,000. It handles from 350 to 400 million pounds of seafood year in and year out, which it receives all the way from the Atlantic to the Pacific, Great Lakes to the Gulf, Bering Sea to the Grand Banks, the fishmongers say.

The market sends this tremen-

dous poundage forth again over a much shorter radius, however, for so dense is the population in the eastern area which Fulton Market supplies, that the bulk of the shipments scarcely get more than 100 miles from East River before it has absorbed, it is said.

When Fulton Market was opened in 1822 its 340 original stands were taken largely by butchers. But early defaults on saw and cleaver leases, together with growing business among the hustling fishermen and oystermen caused the city authorities that October to set aside the east, or Bekman Street, wing "for use of sellers of fish."

Wholesale activity developed, and six years later the fish industry moved to a shed of its own across South Street, opposite the main market, on the water. Ice, then, was unknown commercially, and fish were kept in floating "cars" which were suspended in the slip below, bobbing against

the hulls of the smacks. Today, ice is used in thousands of tons. Save for the period from 1843 to 1867, the same site, with different roofs, has housed the wholesalers to this day.

Much of the deep sea tang of Fulton Fish Market is felt to be lost with the passing of the old time fishing boats. Craft like the old Gloucester smacks have largely disappeared. Power engineering with blasts of gas and smoke carried away the rigging that endured a hundred storms. Magneto and carburetor, throttle and fire-box, have routed the old sinewy heaves on jib and sheet, topsail and staysail. Fleets still follow bluefish from Hatteras to Montauk and mackerel from Cape May to Nova Scotia, and haddock and cod off the Banks. But Fulton Market itself admits they are different fleets.

PRISON TO BE ART HOME

REVAL, June 24.—The old prison tower, referred to in popular parlance as "Big Margarete," and used as a state prison under former Russian governments, is to be converted into a home for artists. It will have a number of studios and exhibition rooms and living quarters for a number of Estonian painters and sculptors.

WHEN you choose from advertised goods you choose from the safest goods known. They are value-true.

We Rejoice With Our Friends---

In the completion of Sanford's great City Hall, which we believe to be the finest in the State.

Sanford people have a right to feel happy and prosperous. Where is there a city in Florida with finer people and with a more progressive spirit?

Co-operation and loyalty is the secret of Sanford's success and as long as this spirit continues we may look for even greater days.

Tourist Travel in Florida Gains But Shows Decrease in California

JACKSONVILLE, Fla., June 23.—Tourist travel in the state of Florida has increased 500 per cent over last year while tourist travel during the past six months last decreased 50 per cent in the state of California, says an announcement issued here by V. D. L. Robinson, business manager of the American Motorist, the official publication of the American Automobile Association. Mr. Robinson is in the city gathering data for a special edition on Florida of the official organ to be soon.

The data gathered on the tourist travel in Florida and California was made from a six months survey conducted by the Chicago Automobile branch of the A.A.A. It was stated that over 500,000 inquiries reached the Chicago office during the past six months relative to Florida. All the inquiries indicated that they would likely make a trip to Florida next winter.

Mr. Robinson stated that he was surprised at the heavy traffic between Miami and Jacksonville at

this time of the year. He said that all indications were that Florida would have its most successful year in 1925. He added that the Florida boom had aided Georgia and the whole southeast, and that these states were all enjoying better business lately.

Customs is Looted

NINGPO, China, June 23.—Anti-foreign movement is rampant here where rioters have damaged and completely looted the Junion customs here last night.

Groveland—New Packing House

to be erected at cost of \$25,000.

Clearwater—Y. W. C. A. to have

\$3,000 auditorium.
