Claude Kirk are drawing to a close with a record which is puzzling to some, encouraging to others and alarming to yet another group. Any appraisal of this administration is strongly

flavored by the personality of this Republican governor who has been in the headlines-here and nationally—for personal, political and administrative It is puzzling because the rapid march of events

since the day he took the oath of office-having been elected by the Republicans, whose candidate he was, and Democrats who had suffered a bitter intra-party fight and cast their votes for Kirk—has allowed little

time for logical judgments to be formed. His freshman year, marred by inept handling of relationships between a solidly Democratic elected cabinet, a state legislature Itself troubled by new alignments, and an incipient revolt by the teachers,

tion by a Republican who was eager to make the most

But with the energy and ebullience which char-

acterizes his record, Governor Kirk has stridden into

this presidential election year with vigor and an in-

Florida is closely linked with what he had done for

himself in the national political scene. But it has been

major accomplishment that has made a better

Of course, it is the Republican party which has

knowledge of Florida easy for those who should know

our state as it is and as it is developing for the good

been the political beneficiary of the Kirk administra-

tion, so far. This was a penetration into the solid

south where Democratic nominations have meant elec-

What the governor has done for the state of

creasingly purposeful pace.

system in fact could be realized here and now. That it has made long strides is evidenced by the contests now getting underway.

On the Democratic side, the Kirk drive has forced a good deal of re-assessment both of persons and of practices. It has provoked, as well, rivalries which could produce a split in the Democratic party which would do great harm to the state's Democratic majority when the show-down voting is done in Nov-

In Sanford and Seminole County the Kirk image has been blurred. We are small numerically and do not get the attention that large voter communities attract by virtue of numbers. Thus when Kirk actions have been announced,

they have been largely attributed to partisan reasons. This has not endeared him with the Democratic majority. Neither has the rather clumsy way in which

torically it provided the base on which a two-party ford as a city with large numbers wanting to move to Rochester, N. Y. to better their economic positions

> Of course we do not in any way decry the announced purpose of the governor to help in the industrial development of Seminole County. We welcome it. But we would point out that such actions should be based on an intimate knowledge of the problem which, in this case, was lacking.

The next several months will be critical in the history of the Kirk administration. It will cover the presidential campaign, in which the Kirk availability. ity for a vice presidential spot on the GOP ticket will resolved; the national convention of the GOP in Miami, where Kirk's standing with his fellow Republican leaders will be tested; and other events which, by themselves, will indicate the course and the goal

#### To Young Voters

This is addressed to the young Floridians who will cast their first ballots for President of the United States on Nov. 5, 1968.

You have attained your legal majority at a time when you and your peers have grabbed the spotlight all over the world. This is a fact, an event, and, as has been said, "Facts are stubborn things!"

Now on that day in November you can not only be happy with the privileges and rights of American citizenship but you can exercise a basic and essential duty-YOU CAN VOTE! Why this emphasis? Why these, obviously

you may say unnecessary words? Again facts. There are 338,000 young Floridians who will have this first time opportunity this year, You have become 21 since the 1964 presidential election. In that year, the Florida State Chamber of Commerce points out, there were only 163,000 such first-time voters.

But to vote you must be registered. Are you? And, if you are registered, will you vote? Of course, heads will nod, and resolutions made. Yet the horrid historical fact—underlined by the unbelievably bad showing at the First Primary this year-is that only a little more than 50 per cent of the first voters will cast ballots.

In 1960 the percentage of such voters who went to the polls amounted to 50 per cent, in 1964 this had increased to 54 per cent. Now the Chamber hazards a guess that 57 per cent will turn out and vote this November. Remember this the nex time you feel that the

times are "out-of-joint," that changes must be made, that the future is being blocked by others. Because the simple, undebatable fact is that maybe you can bring about the kind of harmony you want by bringing to the polls your young fresh and progressive judgments embodied in ballots.
