Hootch Hounds Will Be Assisted by Uncle Sam's Navy

MELLON APPROVES OF THE DRY NAVY

And Sub-Chasers Will Dry Up Florida for a Time

(By The Associated Press) WASHINGTON, March 9.—Formation of the prohibition navy for combating rum smugglers along the Florida coast was approved by Secretary Mellon of the treasury, it was stated today. Officials declared the use of the coast guard submarine chasers by prohibition authorities should have marked effect upon the operations of the liquor runners.

STATE'S ATTORNEY G. A. D'COTTES BUSY ON DELAND CASE

BRINGS MRS. SHIELDS AND THE NEGRO FACE TO FACE

(By The Associated Press) DELAND, March 9.—State Attorney George A. DeCottes last night brought Mrs. Shields and Pete Smith face to face to question them about the killing of Mr. Shields. The woman again accused the negro of the killing and Smith stoutly denied any knowledge of the crime. The authorities are marking time in the investigation pending receipt of copies of letters and telegrams from Shields which Mrs. Nettie Lawrence, of Wichita, Kansas, telegraphed yesterday she was forwarding. Mrs. Lawrence Shields is a sister.

Florida to Get Benefits From Drainage Bill

SENATOR TRAMMELL GRATIFIED AT FAVORABLE REPORT BY COMMITTEE.

Senator Park Trammell, in an interview yesterday, expressed gratification over the action of the Senate committee on reclamation in reporting favorably on the McNary bill providing for federal assistance and co-operation in drainage projects as well as arid land projects.

The Senator said that under the provisions of this bill Florida and other Southern states will be benefited as well as the states in the West. He added that the McNary bill covers in the main provisions of the bill which he has been fighting for since he became a member of the Senate.

It will be recalled that when Senator Trammell first advocated this policy before the Senate he received very little support from other Southern senators and was opposed by the senators from many of the Western states. It is due largely to his continued efforts on behalf of this character of legislation that the present measure has been reported favorably as a compromise after several attempts to secure federal aid for the arid lands in the Western states had failed because of the opposition of Mr. Trammell and others who declared that the South must receive recognition through the inclusion of drainage provisions if the measure was to be passed by the Senate.

The present bill, which contains many sections, practically the same as those of the bill first introduced by Florida's senator, was approved by the secretary of the interior before it was recommended by the reclamation committee.

Senator Trammell said it was likely that immediate results would be obtained in Florida through passage of the bill which is now believed to be assured.—Orlando Sentinel.

FORD WILL NOT GET SHOALS FOR YEARS, IF AT ALL

LEGAL ENTANGLEMENTS WOULD PROHIBIT CONGRESS FROM REACHING DECISION.

(By The Associated Press) WASHINGTON, D. C., March 9.—Chairman Kahn of the House military committee yesterday told W. B. Mayo, chief of engineers for Henry Ford, that it would require years to thresh out existing legal entanglements and it was doubtful even then that the Government would be able to accept the Detroit manufacturer's proposed contract for purchase and lease of the nitrate and power projects at Muscle Shoals, Ala.

After the committee adjourned other committee members said the legal barriers to acceptance of the Ford proposal appeared inescapable because of the contracts held by the Alabama Power Company and the Air Nitrates Corporation, which, those concerns claim, give them exclusive rights to purchase the Warrior steam plant and nitrate plant No. 2, respectively. Both units would be delivered to Mr. Ford with free titles in event his proposal was accepted and could not be freed from the contract without prolonged litigation in the courts.

Mr. Kahn said attorneys for the power company and the nitrate corporation had advised him they would insist that the Government discharge the obligations it had assumed when contracts for the construction of the two units were executed with war department officials and options given their clients for exclusive purchase of the two plants in the event the Government ever decided to sell them. Under their separate warnings they would refuse to submit to the disposition of the properties to Mr. Ford and would battle for their rights, from the lowest to the highest courts, Mr. Kahn said, he was unable to see how the Government could enter into the agreement proposed by Mr. Ford, to the extent of delivering the plants to him for immediate development or for future operation if the courts sided with the power company and nitrate corporation in the final decision. Mr. Mayo revealed that it was Mr. Ford's intention to begin work at Muscle Shoals this summer.

HARDING ARRIVES AT JACKSONVILLE AT NOON TODAY

(By The Associated Press) JACKSONVILLE, March 9.—The Harding Special arrived here at twelve forty-four o'clock, after a brief stop to transfer the train from the Atlantic Coast Line to the Florida East Coast tracks, and then will continue to St. Augustine.

PUTNAM LUMBER CO., SAWMILL BURNED TODAY WITH A BIG LOSS

(By The Associated Press) JACKSONVILLE, March 9.—The sawmill of the Putnam Lumber Company on McGirts Creek, six miles from Jacksonville, was destroyed by fire early today, with a loss of one hundred and forty thousand dollars, which was covered by insurance. Officials announced the plant would be rebuilt immediately. Two hundred men were thrown out of work.

ROGER BABSON ON FLORIDA

Florida newspapers have been quoting at length an interview given press representatives at Daytona by the famous statistician, Roger W. Babson, probably the leading authority of the day on economic problems, as relating to the present business situation. Mr. Babson recently spent some time in Florida, gaining first-hand information as to our resources and our future possibilities. He therefore put himself in a position to speak with authority. In the Daytona interview he expressed amazement at the general condition of business in Florida, noting the remarkable growth of the cities he had visited and the general tone of optimism everywhere encountered. Then when he went back to Philadelphia he published a statement, over his own signature, in the Philadelphia Public Ledger that is well worth reading:

"I have traveled these last two weeks," Mr. Babson says in his statement, "from Maryland to Florida, and then westward through Georgia, Alabama and Mississippi.

"Conditions are surely better in the South Atlantic states than they were a year ago. At that time it was pitiful to see the distress among both the rich and the poor. Like an epidemic, the business depression when it struck the South showed no favoritism.

"Rich and poor, young and old, were all hit together. Virginia, North Carolina and Northern Georgia show more improvement than does the rest of the South. The best cities for sales are Richmond, Va.; Greenboro and Charlotte, N. C.; Charleston and Columbia, S. C.; Columbus, Augusta and Atlanta, Ga. Each one of them will show much better business in 1922 than in 1921.

"Florida is not included in the above list as—with the exception of the northern part—there has been no real depression in Florida. If Florida were in the western part of the country, I should say it will surely be hit by the depression wave some time within the next two years. But considering the fact that the present depression started in the East and that the South has already received its blow, the Southern part of Florida may escape this time without being hit.

"This, however, doesn't mean Florida will always be immune from depression. Some day there will be a real estate collapse in Florida just as there has always been in every state after a period of great prosperity.

"I am distinctly bullish on the South. The young man of the North I should advise to go South rather than West. Certainly our South Atlantic states offer agriculturally, industrially and commercially better opportunities to the young man of today than does South America."

DOPE USERS BURGLARIZED THE SOUTHERN DRUG STORE AT JACKSONVILLE LAST NIGHT

Stole \$3,500 Worth of Cocaine, Morphine and \$100 in Cash

JACKSONVILLE, March 9.—Thieves, believed to be drug users, broke into the Southern Drug Manufacturing plant here sometime last night and stole \$3,500 worth of cocaine, morphine, and a hundred dollars in cash, valuable jewelry from employes' lockers, etc. The police said they had several clues and expected to make arrests soon.

AMERICA DECLINES INVITATION TO PARTICIPATE IN CONFERENCE OF GENOA ECONOMIC MEET

Uncle Sam Holds to the Policy of Non-Recognition of Soviet Government

(By The Associated Press) WASHINGTON, March 9.—The United States Government has declined the invitation to participate in the Genoa economic conference.

The decision of the American government was transmitted late yesterday to Senator Ricci, the Italian ambassador here, who, acting for his country and indirectly for the Allied Supreme Council, extended the invitation for American participation.

The position of the American government as set forth in the communication handed Ambassador Ricci is that participation by the United States in any general European economic conference is impossible at this time owing to the complete failure of European nations in the view of the American government to adopt proper measures for remedying the ravages of war and for insuring the stabilization of their economic life.

It is understood that the American government also fails to agree with the European powers as to the participation of Russia and in that connection cites the policy of the United States of non-recognition of the Soviet regime as set forth in the note of last March.

LONDON, March 9.—The news that the United States has declined the invitation to participate in the Genoa conference is extremely disappointing to all the supporters of the Genoa project. The view is held here that the absence of the United States is bound to detract from the usefulness of any decisions adopted at the conference for European economists, are increasingly convinced that the real rehabilitation of Central Europe is possible only with the co-operation of the United States.

California Goblin Will Straighten Out the Tangle

Ku Klux Klan Gets Credit for Doing Everything

(By The Associated Press) LOS ANGELES, March 9.—William S. Coburn, Los Angeles attorney, and Grand Goblin of the Ku Klux Klan, announced today he soon would go to Kern county, California, to investigate troubles there attributed to the Klan and "to expose those who are breaking laws and hiding behind Ku Klux organization. I am tired of this bunk and am going to stop it," he said.

Harding Leaves For Florida to Spend Vacation

WASHINGTON, March 9.—Accompanied by Mrs. Harding and a small party of friends in official life, President Harding left Washington early yesterday evening to spend a week in Florida in rest and recreation.

The President, it was said at the White House, plans to spend most of the time at St. Augustine, the presidential train reaching that city at six o'clock this evening. It was added that the President expects to spend the entire week resting and seeking recreation.

IN REFUSAL TO JOIN THE UNITED STATES SHOWS A PRESSURE FOR ECONOMY

KIWANIS CLUB ENTERTAINED AT MONTEZUMA

MESSRS. DOUGLASS, SMITH AND MANAGER GROSE WERE THE HOSTS

At the invitation of Kiwanians E. A. Douglass and H. P. Smith, owners, and Mr. Grose, manager of the Montezuma Hotel, the Kiwanis Club met and had luncheon at Sanford's new hotel yesterday. Messrs. Douglas, Smith and Grose proved to be most entertaining hosts.

President Connelly called the meeting to order and presented Howard Overlin, the baby Kiwanian, and after John Smith had seated the gentleman in the baby chair he was made to rise and give a speech. Howard was going good when Forest Lake called him down for being too lengthy and also in order to give A. Raffeld a chance to sing Liza Jane for being late.

The regular scheduled speaker, Brax Perkins, failed to show up when called, but sent word that he was suffering with a severe case of mumps, dumb ague and etc. He was promptly fined \$10.00 for the hospital fund and Dr. George Hyman was called on to fill his place as speaker. Dr. Hyman responded with his usual entertaining manner and stated that the eight and one-half years spent in Sanford had made him a Sanford booster that he could not forget and that he would be a Sanford booster, although he is shortly to leave for Tampa.

O. P. Swope, of the county commissioners, was here introduced and properly welcomed. Mr. Swope outlined the plan whereby Seminole county is to have its road system materially strengthened and also whereby a bridge could be obtained for Osteen Ferry. This plan called for the endorsement and carrying of a \$100,000 bond issue, the election for which has been called. After Mr. Swope's address the club unanimously endorsed the project and promised its support of the bond issue.

Prof. McKay was the educational speaker of the day and spoke for ten minutes on the necessity of providing education and recreation of the proper kind for the boys and girls of today—that they might make a better nation of tomorrow.

Wm. Akers, of the King Hardware Co., of Atlanta, brother of our Frank, was a visitor and addressed the club.

At the close of the meeting on motion of Mr. Lillard and Mr. Lake, a rising vote of thanks was tendered to the hosts of the day for the magnificent entertainment.

Dainty folders were at each plate, on which was printed:

- Complimentary Luncheon to the KIWANIS CLUB Sanford Thursday, March 9th, 1922. (Emblem)
- Fruit Cocktail a la Montezuma LUNCHEON
- Hearts of Celery Queen Olives
- Chicken Bouillon, en tasse
- Corn Bread Sticks
- Broiled Filet of Red Snapper
- Sauce Tartare
- Chicken Croquettes en cream with June Peas
- Potatoes Casserole Butter Beets
- Asparagus Salad a la Kiwanis
- Chocolate Ice Cream and Cake

In the Rehabilitation of Europe in Remedying War's Ravages

CONFERENCE WILL PROCEED

Just the Same Without America But They Want Us

(By The Associated Press) WASHINGTON, March 9.—Refusal of the United States to participate in the Genoa conference may be viewed as the first step in the campaign of tactful pressure to promote economic rehabilitation of Europe, it was said today by high officials of the government.

LONDON, March 9.—The decision of the United States not to participate in the Genoa conference will not effect the date nor the plans for the conference as far as Great Britain is concerned, it was stated officially today.

COMPTROLLER TO REFUSE FROZEN LOAN

SAYS BONUS CERTIFICATES WOULD BE NO GOOD AND THE BANKS COULDN'T USE 'EM

(By The Associated Press) WASHINGTON, March 9.—Comptroller of the Currency Crisinger announced today in the event of the enactment of the soldiers' bonus legislation providing for the payments by adjusted service certificates he would advise national banks to decline to accept certificates as security for loans. Crisinger described the proposed plan of issuing adjusted service certificates for use by soldiers if desired, as collateral for loans to 80 per cent of their face value as "the worst kind of frozen credit" and declared while he would be without authority to order national banks to refuse to accept them as security he would strongly advise against their acceptance.

PRESIDENT IS ON THE WAY TO FLORIDA

(By The Associated Press) ON BOARD PRESIDENT HARDING'S SPECIAL TRAIN, March 9.—Refreshed by a good night's sleep President Harding was looking forward enthusiastically to his first day's vacation when he arose this morning aboard the special carrying him and his party to Florida for a week's rest. The special early today was skirting the lower South Carolina coast. It is scheduled to arrive at St. Augustine at two o'clock this afternoon. President intended to go out for a round of golf this afternoon. While the vacation plans for the week were not announced it was understood that Harding might take a trip down the coast as the guest of Edward M. McLean, publisher of the Washington Post, on the latter's houseboat. Elaborate precautions are being taken by the Atlantic Coast Line officials to protect the special. Every yard of track is inspected by a pilot train running ahead of the special. No train is permitted to be operated or any switch turned in the track between the special and the pilot train. Picked crews of trainmen are handling the special.

Harry T. Starnes

The most marvelous of all programs upon the Chautauqua and Lyceum platform is that presented by Mr. Starnes under the title

WONDERS OF ELECTRICITY

Mr. Starnes carries with him an elaborate equipment of dynamos, generators, motors and electrical and chemical apparatus which have cost thousands of dollars. He has had many years experience as a scientific demonstrator for many of the most important Chautauqua Systems, at present being associated with the Ellison-White System of Portland, Oregon.

A few of these demonstrations are as follows:

CHEMICAL ACTION—As a source of electricity, with a number of beautiful chemical experiments in illustration.

MAGNETISM—As a source of electricity. Experiments with powerful electro magnets.

THE STATIC MACHINE—Some curious experiments.

WIRELESS TELEGRAPHY—Besides sending messages across the hall a number of applications will be made, such as the firing of a mine and blowing up a miniature battleship at a distance.

TESLA'S WONDERFUL APPARATUS—Experiments with currents of high potential and high frequency.

X-Ray, Ultraviolet Ray. Miniature Lightning. Spectacular discharges from terminals.

A ladder of fire. "Horn" lightning arrester illustrated. Taking a discharge of hundreds of thousands of volts through the body.

Lighting a 16 c. p. 110 volt lamp with current passing through the body.

COLLECTIVE BARGAINING NOW LEGAL FOR FARMERS

The Capper-Volstead Bill which recently passed the United States Senate and was signed by the President is being widely heralded in the daily press as an act of Congress which legalizes cooperative marketing.

Discussions of the bill in the agricultural press vary considerably. Most agricultural editors are inclined to believe it an excellent thing; but appreciate that with or without it the major portion of the established cooperative marketing associations for farm products would have continued their progress and growth.

The main feature of the bill is that it permits of collective bargaining by farmers and growers. That is, farmers' cooperative marketing associations now legally may set a price upon the pooled product of members without violating the Sherman anti-trust law.

Beyond this authorizing of collective bargaining by farmers, the Capper-Volstead bill really grants no powers to cooperative marketing associations that were not previously granted by the state laws of the more enlightened states.

Mr. J. A. White Says "If You Have An Automobile, Keep Rat-Snap"

"If I know about RAT-SNAP last winter, would have saved \$120. My car was in the garage for a few weeks during bad weather; when I went to take it out, found that rats had eaten great holes in two new tires. Got them later with RAT-SNAP."

CABBAGE MARKET SICK

Cabbage growers and buyers in Central Florida have been jolted by excessive freight rates, over-production and low northern markets, according to leading operators.

"Cabbage is a drug on the market at all points in the North. Prices received even on low f. o. b. cost hardly cover freight and handling charges at this end. Buyers are able to secure stock at practically their own figures, and cannot get out whole. The crop—a large share of it, at least—is going to waste in the fields."

CURED BY ADVERTISING

Advertising during periods of lessened demand has proved to be one of the chief means of reducing seasonal unemployment, today a most serious handicap to American industry.

A Cleveland firm manufacturing men's clothing, in which the styles fluctuate by seasons, has kept up continuous production by standardizing

ing its products and advertising inducements to retailers for accepting deliveries over an extended period, instead of only at the opening of the season.

Another Ohio corporation which makes women's clothing has achieved the same results. It makes models according to carefully laid plans, and by advertising has inspired retailers confidence in its judgment as to the goods and the seasonal demand for them.

A Rochester men's clothing factory fills in dull periods between seasons by making a stock of conservative models, and advertising mid-season sales at prices which cover overhead but leave no profit.

Pennsylvania manufacturers of glass formerly a very intermittent industry, have stabilized considerably by lowering prices of goods ordered at certain seasons, and advertising this reduction. Customers have taken advantage of this cut, thus spreading work over the entire year and enabling the makers to keep on their employees.

In Brooklyn a shoe corporation employing thousands now advertises throughout the year instead of only in season, and has induced its customers to cooperate by placing orders when the firm most needs them. They also advertise a staple shoe not subject to seasonal demand, which helps the retailers, as well.

NO FIGHT ON THE RAILROADS.

A few simps here wanting to curry favor with the railroads for some reason or other take exceptions to the "ship by water" movement on the ground that it is a fight against the railroads. As far as the Central Florida Water Traffic League knows there are no railroads and the railroads probably know nothing about the league and care nothing.

THE BOYS AS "RAW MATERIAL"

In these days there is very considerable discussion of the matter of raw material necessary for industrial purposes. Government agency, corporate and individual and organized efforts are put forth for the most practical and the most economical use of raw material entering into manufactured products and into the supplies required by mankind.

GUN MEN ACTIVE IN BELFAST AGAIN MAN SHOT DEAD

BELFAST, March 7.—Gunmen were active in the early morning hours today, increasing the tension here in spite of efforts by police and soldiers. One man was shot dead on Perry Hill while on his way to work, and John Hoddy, a news dealer, had part of his arm shot off.

ial" are exhausted. Thus it is evident that boys are a constant and continuing subject for study, for attention and help on their way to manhood.

It is just as true today as it ever was that "As the twig is inclined so will be the tree." Families, churches and schools are doing a vast amount of good work in direction of giving the boys proper inclination, a love for home, for righteousness, for knowledge—all of a character that will enable them to grow into men of the right sort and type—honorable men, of whom the world never has an over-supply.

Everywhere in this country of ours, that manifests so much of practical interest in humanity, boys are receiving attention that has for its most worthy object their proper training leading, we would prefer to say, in order that they may develop into splendid manhood.

Club work in the country sections, Boy Scout organizations, Y. M. C. A., and other similar development work is going on, with the ultimate man of real worth as the object of attainment. Is not this work well worth all the time, energy and money employed? Assuredly it is.

It is, therefore, most commendable to give the boys of today that attention which their importance, their intrinsic value, demands. Whether in the home, the church and the school, or through the agencies already referred to, and to those represented by Rotary and Kiwanis, and kindred organizations of men, this work with and for boys is of the utmost importance. As it is practical so will be the measure of its success.—Times-Union.

"Can anyone," asked the teacher, "give a sentence using the word 'disarranged'?"

The first three pupils balked. Finally her eyes lighted on little Angelo.

"Angelo, can you give me a sentence?"

"Sure," said Angelo. "My poppa, he gets up dissa morn and he lights da stove. She smoke. He say, 'Damma disa rango!'"

Great Industrial Improvement Shown For This Month

(By The Associated Press) WASHINGTON, March 7.—Forecast of great industrial improvement in the month of March was made yesterday by the United States Employment Bureau, in connection with its monthly report on employment conditions in the United States.

Reports from 231 of the principal industrial centers with but few exceptions show a general improvement in employment conditions. Director Jones of the service announced, "And breathe an enthusiastic spirit of hope and confidence in the future. Weather permitting, March will begin an era of great activity."

Employment conditions showed practically no alteration during February, according to bureau studies, one-half of one per cent more men being on reported payrolls at the month's end than at its beginning. Only the textile and paper industries evidenced increased unemployment, and this was more than made up by additions to working forces in nearly all other lines.

Of sixty-five centers from which statistics are gathered by the department forty-four showed small percentage increase in employment while twenty-one including Manchester, N. H., a textile center with a payroll decrease of 66.3 per cent, reported fewer men on payrolls. New York city reported an increase in employment of 1.9 per cent, while Chicago had a decrease of one-half of one per cent.

Lumber and lumber products mills in North and South Carolina, Georgia and Florida, reported a net decrease in the month of 252 among their employes, while eighty-five fertilizer factories showed a gain of 634. Payroll figures in the textile industry also showed a slight increase but the prevailing sentiment was said to be "uncertain as to future conditions."

Employment reports from Virginia, the report said, "continued to show reductions throughout the state." Textile mills reported a small decrease in the number of employes as compared with the previous month as did Virginia coal mines.

In Georgia the textile outlook was described as "unfavorable," and employment generally "shows little change over last month." Fertilizer plants, however, were declared to be entering the season of greatest activity and probably would increase their payrolls for several months to come.

North Carolina's situation was apparently a duplicate of that obtained in her sister states; textiles and lumber plants showed small changes and fifteen fertilizer factories reported addition of 590 workers to their rolls. Reports from individual towns indicated the surplus of labor was chiefly to be found in the "floating" type, "but Winston-Salem and Wilmington recorded an oversupply in some skillful lines."

Florida recorded unemployment in skilled and unskilled labor connected with phosphate mines and "floating labor" but a spirit of optimism was declared to be evidenced throughout the state.

BEGIN PROBE LOBBY OF INSURANCE TRUST

JACKSON, Miss., March 6.—Hearing will begin today by the special committee of the house of Mississippi legislature appointed recently to investigate charges made by Gov. Lee M. Russell, in a special message to both branches, that fire insurance companies who withdrew from the state a year ago, when anti-trust proceedings were instituted against them had fostered the \$100,000 damage suit brought against him by Miss Francis Birkhead, his former stenographer alleging seduction.

Among other matters to be taken up by the committee include further charges made by the governor that the same companies were maintaining a lobby in Jackson to influence friendly legislation.

The committee yesterday informed the governor that he would be permitted to have a personal representative present at the hearings but stated that he would not be allowed to question witnesses.
