It is a favor you do for yourself. Zip makes it possible for postal workers to use faster and more direct routes in carrying and delivering mail. Your mail. With Zip, the Post Office will use its new, space-age electronic machines that "read" Zip numbers and sort mail fifteen times faster than was possible before. So always add Zip Code to every mailing address. When you don't know a Zip number, call your Post Office. Or look it up in their Zip Code Directory. Local Zip Codes can be found on the Zip Map in the business pages of your phone book. Include Zip in your return address, too. Then others can easily Zip their mail to you. Your Post Office wants to give you the fastest, most efficient postal service in the world.

If we all use Zip Code-it's in the bag.

HOW ZIP CODE WORKS Suppose the Zip Code is 60635. The "6" says it goes to the Midwest. The "O6" narrows it down to Chicago. The last two digits-"35"-pinpoint the local post office. This eliminates many handling procedures. The letter is sorted faster, and sent more directly to its destination.
