## 'Forced Retirement' Could Bring Benefits

WASHINGTON (AP) — Many retirees who draw pensions also are able to get full unemployment benefits as long as they can show they were "forced" to retire and that they are seeking another job.

The nation's financially ailing unemployment insurance system paid out \$187 million to an estimated 161,000 pensioners in 1974, an Associated Press analysis of a Census Bureau survey shows.

An estimated 90,000 federal, state and local government pensioners and 71,000 retirees from private business received checks from public unemployment funds in 1974, according to a computer analysis.

## FBI Burglaries Exposed

WASHINGTON (AP) — In potted darkness on a deserted New York City street, an FBI agent broke into an office, rifled the file, photographed several hundred pages and left as stealthily as he had come.

That scene happened as often as twice a month from 1960 to 1968 as FBI agents carried out 92 burglaries at the New York offices of the Socialist Workers party and the Young Socialist Alliance.

Two other burglaries in 1960 were conducted at the Los Angeles home of a Socialist Workers party leader and the Hamden, Conn., home of a man the FBI said was linked to the party.

The burglaries were described in 264 pages of FBI files obtained by the party in its \$22-million suit accusing the FBI and other government agencies of unconstitutional harassment of legal political activities.

## Academy Awards Tonight

LOS ANGELES (AP) — Director Miles Forman, whose "One Flew Over the Cuckoo's Nest" is favored to be the big winner at the Academy Awards tonight, will have a pair of special guests at the ceremonies — the twin sons he has not seen for five years.

Peter and Matej Forman, 11, arrived Sunday from Prague to join their father as the award winner on what may be the height of his career as a film maker: the Oscar for best direction of a motion picture in 1975.

His competitors are Robert Altman for "Nashville," Sidney Lumet for "Dog Day Afternoon," Federico Fellini for "Amarcord" and Stanley Kubrick for "Barry Lyndon."

## Congress In Session

WASHINGTON (AP) — Congress this week takes up legislation that would extend U.S. fishing jurisdiction to 200 miles at sea, change federal election laws and set up a nationwide system of no-fault auto insurance.

The Senate today takes up a compromise 200-mile limit bill that would be effective March 1, 1977. The measure would limit the catch of commercial species of fish, with priority given to U.S. fishermen.

Permits for foreign fishing within the 200-mile zone would be denied unless a surplus is determined to exist beyond the capacity of the U.S. fishing fleet.

# WORLD IN BRIEF

## Moslems Close To Victory; Christians Fleeing Beirut

BEIRUT, Lebanon (AP) — Leftist Moslem forces have completed their conquest of Beirut's downtown hotel area with the capture of the unfinished Hilton and two neighboring hotels.

The Moslem advance on Sunday threatened the Christians' last two major holdings in the heart of Beirut, the port area and the Astrafria quarter.

Pierre Gemayel, whose Phalangist party militia is the largest unit among the Christian forces, made a radio appeal to moderate Moslem leaders for a "decisive, speedy" peace initiative and said the Christians are ready to agree to political reforms giving the Moslem majority more power.

But Kamal Jumblatt, the Socialist who is the country's most influential Moslem leader, was reported insisting on the resignation of Christian President Suleiman Franjeh and more power for the Moslems than the 50-50 division the Christians have agreed to.

## Argentina To Get New Leader

BUENOS AIRES, Argentina (AP) — Gen. Jorge Videla, the leader of the junta that overthrew President Isabel Peron, was to be sworn in today as Argentina's new president. But another key member of the military regime is Jose Martinez de Hoz, president of the giant Acindar steel mill, who has been named economy minister. Mrs. Peron was reported confined to her room at the El Messidor mountain resort in southern Argentina with a guard of 500 soldiers to prevent guerrillas from killing or kidnapping her.

## Truckers Talks Deadlocked

VICTORIA, B.C. (AP) — Negotiations in a week-long trucking strike-lockout have been suspended and no date was set for another meeting between the Teamsters Union and Transport Labor Relations which represents 97 companies.

Union representatives for the 4,500 drivers and the TLR began talks Friday with a mediator appointed by the provincial government.

## Rezoning Request Tops Agenda In Altamonte

ALTAMONTE SPRINGS — City commissioners are to consider the requested rezoning of lots on the east side of Boston Avenue from residential to planned unit development at its 4:30 p.m. meeting Tuesday at City Hall.

Planning heavily that week requested the change and commissioners voted to table the matter for one week while the requirements of the city's planned unit development (PUD) ordinance were researched.

The advisory planning and zoning board previously turned

TV star Hal Linden and Mayor Norman Floyd of Altamonte Springs take pledges at Easter Seal Telethon Sunday. (Herald Photo by Jane Casselberry)

# Barney Miller Hosts Easter Seal Telethon

By JANE CASSELBERRY  
Herald Staff Writer  
ALTAMONTE SPRINGS — Television's Barney Miller — actor Hal Linden — was host for the Florida segments of the National Easter Seal Telethon broadcast nationally Saturday night and Sunday from the Altamonte Mall.

Seminole County chairman for the first Florida Easter Seal Telethon, Don Reynolds said today he expects pledges and donations from the local viewing area to total around \$90,000 when they are all in. He said this was a very successful effort as \$50,000 would have been considered a good response for this first telethon attempt. Final figures will not be available this morning, but approximately \$20,000 had been pledged by Orange-Seminole County callers as of 6 p.m., Sunday.

Reynolds said schools in the county cooperated and both elementary and high school students really "got out and hustled" to raise funds for Easter Seals. The Seminole High School principal said that his school alone had raised \$125,000. Clubs such as Key Clubs and Interact helped with the event.

In conjunction with the Telethon, Colonial High School Keyettes raised \$250 for Easter Seals with their annual 30-hour Sea-Saw-a-thon.

Reynolds commended Mayor Norman Floyd and the Telethon, Colonial High School Keyettes raised \$250 for Easter Seals with their annual 30-hour Sea-Saw-a-thon.

of the Burger King and Holiday Inn organizations and the Soriana Clubs. Farrell's Ice Cream Parlor in the Mall gave certificates for free sundaes to those putting money in the "fish bowl" and all the ice cream they can eat once a month for a year for those donating \$100.

Helping to inspire Channel 9 viewers to phone in donations was the presence of Easter Seal Poster Child, 18-year-old Rusty White, a local boy. Confined to a wheelchair since birth, Rusty recently made news by competing in the National Wheelchair Games at the University of Illinois. The nation's youngest wheelchair competitor Rusty is a member of Orange Wheels Wheelchair basketball team which is coached by his father and finished second in the state.

In other burglaries, a house under construction at 105 Skogen Court, Sanford, was entered and a kitchen cabinet, light fixture, bathroom sink and

## Action Reports

★ Fires  
★ Courts  
★ Police Beat

Sanford police today were investigating a weekend break-in in which burglars ransacked desks at the Southern Bell Telephone business office, 206 E. Commercial Ave., and made off with items valued at several hundred dollars including two new designer model telephones.

Patrolman J.W. Foster discovered the break-in early today and reported the thieves entered by smashing a window with a sledge hammer and a tape recorder, camera and portable radio were taken.

Hunt said a Commemorative Elite telephone, a black and brushed chrome special model suitable for engraving and valued at \$100 was apparently selected from a showcase by the burglars.

A chest-type telephone was also reported taken from a display.

Hunt said the yeags also pried open cash drawers in the teller office but that money isn't in the office at night.

Garrett's 1967 Chevrolet Sanford police reported weekend burglars also broke into the rear of Garrett's Dept. Store, 200 E. First St., Downtown, by removing a window pane only to find they couldn't get from the auxiliary storage room into the store. Nothing was reported missing, police said.

Patrolman Jacob Cohen reported burglars made off with 12 cartons of cigarettes, valued at \$85, in a break-in at the Imperial Oil Station, 1208 Park Ave., Sanford.

Residence Burglarized  
Carrie Holton, Apartment 69, Seminole Gardens Apartments, Sanford, reported a tape deck, three speakers and a sewing machine, valued at \$350, were missing after a burglary at her residence.

Springer Theft  
Deputies are investigating a series of weekend sprinkler thefts in the Knollwood subdivision, Longwood. Sheriff's reports listed a total of 30 pop-up lawn sprinkler heads, valued at \$600, as stolen from the lawns of five residences in the Warwick Court, Kingston, Carlton and Preservive Aves., area.

CB Radio Missing  
Police reported a 400 single-sideband citizens band radio was taken when a pickup truck owned by Lou Tempie was burglarized at 2606 Iroquois Ave.

Purglar Flee  
Sheriff's deputies reported Mrs. Shirley Williams fired two warning shots in the air before an armed burglar fled from the Orange Plaza Bldg, 2325 W. 18th St., Sanford, early Sunday.

Mrs. Williams, who lives at the rear of the bar, reported she heard someone breaking in the front door of the business and came out a side door to see a man armed with a blue steel revolver forcing open the door.

Deputies said the man fled on foot after Mrs. Williams fired the gunshots.

Offices Entered  
Casselberry Police Patrolman Frank Roche told deputies that he saw a man

Man Held  
Sanford police arrested Desie Dee Fowler, 19, of 615 Park Ave., on a circuit court warrant charging burglary and grand larceny. Bond was set at \$5,000.

Screen Doors Taken  
Burglars entered the Lockwood Co. Inc., Silver Lake Road, Sanford, kicked in an office door and made off with screen doors valued at \$400, deputies reported.

\$10,000 Bond Set  
Casselberry and Oviedo police officers arrested Danny Jerome Morris, 19, of Oviedo, on charges of grand larceny and possession of stolen property. Bond was set at \$10,000.

Arrests Lester Brown Jr., 19, of Atopka, was jailed by sheriff's deputies on reckless driving and felony possession of marijuana charges, in lieu of \$5,250 bond, following a traffic stop at U.S. 17-92 and SR-496.

MIAMI (AP) — A 22-year-old Fort Lauderdale man who has been fishing since he was 10 makes his living hog-scooting around the world as an expert in catching "granders" — fish of 1,000 or more pounds.

Peter Wright has fished both sides of the Atlantic Ocean from Newfoundland to South Africa to Puerto Rico. He has secured the Pacific from Cabo Blanco, Peru, to Tahiti and Australia and fished the Indian Ocean.

"When Peter handles the wire, it's a work of art," big-game angler Freddie Rice of Hawaii said of Wright's ability with leader wires with a 1,000-pound fish on the line. "He looks like a ballet dancer in the cockpit."

MIAMI (AP) — Making the body more like an actual battlefield in the war against cancer, scientists say they are developing drug-filled capsules to act as microscopic anti-cancer guided missiles.

The scenario outlined by scientists today has the capsules circulating through the body until they detect their pre-selected cancer cell targets. Then the capsules would home in on the target, attach to or penetrate the cells, and release their fatal "warhead" of drugs.

Dr. George Poste of the Roswell Park Memorial Institute in Buffalo, N.Y., told an American Cancer Society science writers seminar that the principle of using the capsules — called liposomes — against cells has been demonstrated.

MIAMI BEACH (AP) — A researcher says that youngsters visiting dentists for the first time can be made to relax by watching such popular children's shows as Sesame Street, The Electric Company and Mr. Rogers.

"These shows, generally, move very fast and hold the child's attention," said Dr. Larry L. Venham, assistant professor of pediatric dentistry at the University of Connecticut. "This really is the same idea as the canned music that is played for adults. The idea is to induce relaxation and calm anxiety."

Venham presented his study Sunday at a convention where dentists were told about developments ranging from the benefits of fluoridated dental floss to the discovery that dentistry might have been practiced 4,500 years ago.

ST. PETERSBURG (AP) — The government claims Dickinson received the money as campaign contributions, did not report the funds to the state Elections Division and converted them to his personal use.

Gov. Reubin Askew has said the state will investigate for possible violations of state laws after the federal government's first trial.

The first trial was filled with testimony of contributions from bankers Dickinson regulated. Witnesses said he made large cash payments for goods and services.

Lackington was defeated for re-election in 1974 after being indicted on federal extortion charges. He was acquitted of those charges last year.

He is the third former Cabinet officer in a year to be accused of income-tax evasion.

Former Education Commissioner Floyd Christian pleaded guilty and served 135 days of a six-month sentence in federal prison.

# FLORIDA IN BRIEF

## Miami Senior Citizens Causing Controversy

MIAMI (AP) — An office set up here by a national senior citizens group to collect complaints about hearing aid companies is causing a loud controversy within the industry.

Ralph Penvaler of the National Council of Senior Citizens said the office was located in this haven for the retired to help the Federal Trade Commission put together regulations on the hearing aid industry.

But industry spokesmen say the NCCSC is a group of federally-funded "carpetbaggers" who have come South to make trouble.

Thomas Smith, head of the Florida Hearing Aid Society, said his organization is "unilaterally opposed" to proposed regulations which he says would keep many elderly and shut-in patients from obtaining hearing devices.

But Penvaler, 24, said many senior citizens have reported gripes and disappointments about the way they were sold hearing aids. He already has about 50 names and half a dozen detailed statements from dissatisfied customers and says he is looking for more.

## New Idea In Dentistry

MIAMI BEACH (AP) — A researcher says that youngsters visiting dentists for the first time can be made to relax by watching such popular children's shows as Sesame Street, The Electric Company and Mr. Rogers.

"These shows, generally, move very fast and hold the child's attention," said Dr. Larry L. Venham, assistant professor of pediatric dentistry at the University of Connecticut. ST. PETERSBURG (AP) — Making the body more like an actual battlefield in the war against cancer, scientists say they are developing drug-filled capsules to act as microscopic anti-cancer guided missiles.

The scenario outlined by scientists today has the capsules circulating through the body until they detect their pre-selected cancer cell targets. Then the capsules would home in on the target, attach to or penetrate the cells, and release their fatal "warhead" of drugs.

Dr. George Poste of the Roswell Park Memorial Institute in Buffalo, N.Y., told an American Cancer Society science writers seminar that the principle of using the capsules — called liposomes — against cells has been demonstrated.

## County Could Be Sued On 'Illegal' Impact Fees

County Atty. Thomas Freeman said today the county is in jeopardy of being sued if county commissioners don't bite the bullet and halt collection of impact fees.

Freeman denied any campaign promises were made by him in 1974.

Freeman accused Kimbrough of using Joe McCarthy-like tactics by clouding the issue with statements and half-truths in an effort to hide the fact that Freeman, as county attorney, officially ruled last Tuesday that collection of the \$310 per unit impact fee is illegal.

Freeman says fees collected must be applied solely to expansion of new facilities, and secondly, the funds must be segregated.

Without those criteria, an ordinance "will be struck down," the attorney said.

At issue is about \$250,000 already collected and some \$5-million on the books for future collection.

Freeman says fees collected must be applied solely to expansion of new facilities, and secondly, the funds must be segregated.

## Shortening Firm Expands To New Plant

Southern Shortenings, Inc., a Sanford food products manufacturer which began five years ago as a family operation in a small quarters, announced plans today to move into the 45,000-sq. ft. Innmont building on the west edge of town.

Southern Shortenings, said the relocation is a result of the firm's recent expansion to national status, with distributors in California, Texas and Puerto Rico.

The company produces emulsifiers, pan oils and other specialty items for such giant bakeries as Winn-Dixie, Food Fair, Howard Johnson's, Ward Foods (Dandee bread products) and American Bakery, maker of Merita breads, cakes and rolls.

Emulsifiers are agents which keep bread fresh during and after the baking process, and son oils are the industrial equivalent of aerosol coatings that the housewife uses to keep her banana bread from sticking to the baking pan.

Southern Shortenings has recently launched a line of specialty blends which includes rye, sourdough, sweet dough and French blends.

It did not take Southern long to outgrow its present 14,000-sq. ft. facility on two acres of land at 2800 Country Club Road.

Moving the operation to the old Innmont building near the intersection of Airport Boulevard and Jewett Lane is expected to take about two months, said Laura Jackson, company secretary-treasurer.

At present, Mrs. Jackson said, Southern is turning out about one million pounds of food products each month, including tank car shipments of liquids and other loads packed in 55-gallon drums.

Company officials are expected to be meeting with local officials to discuss the new plant and the purchase of the new building for W. Garnett White Realtors.

## Housing Funds Offered

A state official today offered Seminole a shot in the arm for the ailing construction industry and an opportunity for more low-cost housing.

Judith A. Treat of the state Department of Community Affairs said she will offer the county commission \$200,000 at three per cent interest for up to three years to develop homesites for a maximum cost of \$4,000.

The present cost of a fully-developed homesite is about \$6,000, she said.

County Commissioner Sid Vihlen Jr. supported the county proposal and asked the county staff to research the issue. "We do have a shortage of low to middle income housing," Vihlen noted.

A department chief told the commission, "Virtually all of the county is eligible except for Sanford."

Commission Chairman Michael Hattaway was skeptical of the project. Hattaway said he would like to see land sites in Seminole County for less than \$4,000.

Mrs. Truett said the \$200,000 loan from the state is available as soon as the county commission approves a resolution of acceptance.

## Unemployment: Nobody's Sure How Many Jobless Today

Figuring the unemployment rate in Seminole County is a complicated process, limited in its accuracy by relying on statistics from the 1970 census.

As a matter of fact, there actually is no practical way of determining exactly what Seminole's unemployment rate is in March 1976. There's also no practical way to determine the total population. And as the latest census grows more and more outdated, the more unreliable unemployment estimates become—especially in a rapidly-growing county like Seminole.

Even so, estimates of unemployment rates are used, among other things, to determine a county's eligibility for federal jobs programs.

The impossible dream of precise accuracy is just that—a dream, say statisticians, who accept that they are limited to an estimate. The ultimate goal is, of course, an exact estimate. But you never know just how accurate an estimate you are getting.

The business of figuring unemployment levels is simple enough in an ordinary rural county. Following the 10-year census random samplings are taken of a fixed number of homes each month. These samplings make it possible to estimate the degree of upward or downward movement in the county's unemployment rate, as compared to the precise percentage of unemployed workers established by the 1970 census.

The Florida State Employment Service, which computes unemployment rates for all parts of the state, has a hedge against the system's potential inaccuracy. It is called an industrial

survey and is included among more than 70 steps used in determining the unemployment rate.

The survey involves a regular group of employers, large and small, who voluntarily submit information each month on how many persons are working for them. This information covers about 40 per cent of the employed persons in the Orlando metropolitan area, according to Sterling Tuck, labor market analyst for the State Employment Service. A correction factor is applied to the figures to allow for moonlighters and for persons working outside their county of residence.

Then the trick is to relate survey statistics to the total number of persons employed in, say, the Seminole toothpick industry. The State Employment office knows, from studying lists of workers for whom unemployment insurance is being withheld, that there are 300 employees in the Seminole County toothpick industry. A survey of certain toothpick companies shows that in January 1976 100 persons are working for those firms, but a survey of the same firms in February reveals that the number of employees has risen to 110.

In order to apply this increase to the entire 300-person industry, the State Employment office uses what it calls a "link relative." This means that if the difference between January and February survey totals represents a 10 per cent hike in the partial statistics, this change is extended to the industry's overall employment. Thus the agency will estimate that in February the total number of toothpick workers in Seminole County rose to 330.

This, of course, is a high percentage of change, used purely for illustration. Tuck says monthly link relatives usually reflect close to a one per cent fluctuation up or down.

These things are straightforward enough for the mathematically inclined, but Orlando's sprawl into south Seminole complicates the issue.

Unemployment rates for the three counties in the Orlando metropolitan area—Seminole, Orange and Osceola—are based on the population ratio established by the 1970 census, when Orange had 76 per cent of the metro population, Seminole 18 per cent and Osceola 6 per cent. But the Disney boom has not affected each of the counties equally.

By 1974, a U.S. Dept. of Commerce estimate showed Orange's share had sunk to 71 per cent while Seminole climbed to 23 per cent and Osceola stayed at 6 per cent.

But for figuring unemployment rates, the proportions established in 1970 are kept as constants until the 1980 census.

This phenomenon helps decrease the accuracy of unemployment calculations for Seminole, because Orange County—like a large planet exerting gravitational influence on its smaller satellites—automatically affects Seminole's statistics. No matter what the individual unemployment rates are for the three counties, no matter which is highest or lowest or in the middle—any time the random sampling indicates the population count for Orange County has fluctuated in either direction, unemployment levels for Seminole and Osceola counties are adjusted up or down in the 76-18-6 proportion established by the familiar house-to-house survey.

And as the months and years slide by, these figures will retain roughly the same relationship to each other, even though Osceola's largely agricultural work force probably won't be affected as much as the other two counties.

## Democrats Choose Seminole Delegate

Allen Keen of Altamonte Springs will represent Florida's fifth congressional district at the Democratic National Convention in New York City this summer.

Keen, 27, served as Carter's campaign manager in Seminole County for the March Presidential Preference Primary and is pledged to Carter at the national convention.

He was elected a delegate at the fifth congressional district caucus in Dade City this week, and will join 80 other Floridians on the convention floor.

Keen is a partner of Carter's Country Club Kennel and the Paw Spa, both in Longwood; a past president of the Seminole County Democratic Club.
