Melba Johnson Is Honored At Party At Dekle Home

Miss Melba Johnson, Seminole High School graduate, was honored with a party given on Tuesday afternoon at 3:30 o'clock by Mrs. Gus Miller and Mrs. Melvin Dekle. The party was held at the Dekle home at 2465 Adams Court.

Mrs. F. E. Roumlat Honors Catholic Choir Graduates

Members of All Souls Catholic Church choir, who are being graduated from the high school this spring, were honored on Tuesday afternoon when Mrs. F. E. Roumlat entertained at her home on Palmtoe Avenue. Guests invited from St. James High School in Orlando included Miss Isabel Le Pils and Jack Amman, and from Seminole High and Junior High in Sanford were Miss Mary L. Boyle, Miss Lucille Norman, Miss Joan Ricketts, Miss Kathleen Haiman, Miss Connie Compton, Chuck Rodabaugh, Bobby McGill and Neil Michels.

Childhood Hints

How can you tell when a child is socially and emotionally well-adjusted?
One of the country's leading child psychiatrists, Dr. J. Louis Despert, replies:
"The well-adjusted child not only takes all the love and affection his parents and other adults shower upon him, but gives of himself as well. He is a child who enjoys getting along with his activities and who is able to communicate this joy to others. He is a child who knows how to accept himself, though not to the point of destruction. He is one who lives in an atmosphere of love and harmony."
Dr. Despert, associate professor of clinical psychology and associate attending child psychiatrist at the New York Hospital-Cornell Medical Center, has just written a book, "Children of Divorce," (Doubleday, \$3.50) in which she has recorded over 20 years of experience with disturbed as well as normal children. Not legal divorce but emotional divorce is the destroyer of children, says Dr. Despert.

These Women

Mike Smith, who is going on six and is a precocious fellow costing 25-cent payments for each tooth he loses, is a friend of mine and he's made me feel like cheap scheme.
Mike and his friends live in a wonderful little world inhabited by characters in ten-gallon hats, Indians, bad men who need horses and horses which are horses. Mike and his pals are, for the most part, good little lighting, shooting cowboys who, except during school hours and sleeping time wear big hats, hold a pair of six shooters strapped rakishly to their thighs. Some of these cowboys also happen to be girls. The girls in his set who are not cowboys are horses. The cowboys, including Mike walk in a strange, leering, slightly bow-legged fashion. The girl horses have clothe-line reins draped around their shoulders and they gallop.

Catherine Lloyd Is Married To George Y. Colley

In a ceremony marked by beautiful simplicity, Miss Catherine Lloyd, daughter of Mrs. Velma Lloyd, became the bride of George Y. Colley, son of Mrs. William Colley yesterday afternoon at 3:00 o'clock. The Rev. J. E. McKinley officiated at the double ring ceremony in the First Methodist Church before relatives and close friends of the couple.

Mrs. Roy Tillis Is Reinstalled As Head Of Sanford Woman's Club

Mrs. Roy Tillis was reinstalled as president of the Sanford Woman's Club in installation ceremony held yesterday at the club house on Oak Avenue. Other officers installed by Mrs. D. P. Herndon were Mrs. J. P. Cullen as first vice president, Mrs. J. E. Spencer, second vice president, Mrs. H. S. Dugart, third vice president, Mrs. J. E. Courier, secretary, Mrs. W. B. Ellerbe, treasurer, and Mrs. Arthur Beck, club corresponding secretary.

Navy Chiefs Invite Civilians To Dance

Chief L. W. Baxter of the Sanford Naval Auxiliary Air Station, this morning issued a cordial invitation to civilians to attend a dance tomorrow night at the Navy Station. The setting for the event will be the Chief Petty Officers' Club and dancing will be enjoyed from 7:30 p.m. until 1:00 a.m. to the music of the "Starlighters," well-known dance band from the Pinecastle Air Base.

Every teen-ager hopes for a dream room—that perfect combination of sitting-bedroom, where she can be about from her family and entertain at her parties.
If she is style-conscious, she will want her lounging room to be decorated attractively so that all of her pals will give off with appropriate "ohs" and "ahs" at first sight.

Graduation Rites At Seminole High Picnic Supper By Stated Tomorrow

Culminating four years of high school will be the elaborate commencement ceremonies for Seminole High School's 116 graduating seniors at the S.H.S. auditorium beginning at 8 o'clock tomorrow. As the previous year, the ceremony will be marked by four student speeches and annual awards, ending with the presentation of diplomas.

Miss Boyle Given Mmes. Holler, Lee

Miss Rosa Lake Boyle, June graduate, was honored last evening with a picnic supper in the lovely gardens at the home of Mrs. A. W. Lee on Laurel Avenue. The supper was given by Mrs. Holler and Mrs. Lee. The high school group gathered at the Lee home at 7:00 p.m. and enjoyed a wienner roast, roasted corn on the cob and ice-cream watermelon.

4-H Girls To Attend Tallahassee Course

Four Seminole County 4-H girls will attend the short course in fabric sewing opening Monday at Tallahassee. The girls are Miss Lila Woodard, Home Demonstration Agent, announced yesterday.

Miss Lynn Ginson Honored At Party By Miss Lundquist

Miss Lynn Ginson was honored at a party given on Wednesday evening at the home of Miss Peggy Jane Lundquist. The party was given in honor of Miss Ginson, who plans to leave soon to make her home in Orlando. The guests gathered on the back lawn where the refreshments, sandwiches and cookies were served by the hostesses, assisted by her mother, Mrs. Raymond Lundquist.

Out of these parent images, he unconsciously creates his own attitudes, his acceptance or rejection of the responsibilities and privileges of adulthood."

Calendar

THURSDAY
Seminole Chapter No. 2, Order of Eastern Star, will meet at 8:00 p.m. at the Masonic Hall.
The Junior and Intermediate B. A.'s will meet at the First Baptist Church at 7:00 p.m.
The Junior Brotherhood will meet at the First Baptist Church at 7:30 p.m.
A covered dish luncheon will be held at 12:00 noon by the Parent-Teacher Association of the West Side School. All members are invited to attend and bring a covered dish.
MONDAY
Circulars on the seven of the Women's Missionary Society of the First Baptist Church will meet in the Educational Building at 10:45 a.m. A covered dish luncheon will be served at noon with a program to be presented at 1:00 p.m. in the church. The pre-school age, Primary Sunbeam Bands and the Junior Girls' Auxiliary will meet at the church during the same hours.
TUESDAY
The Pilot Club will hold its business meeting at 8:00 p.m. in the Vacht Club. The board will meet at 7:30 p.m.
The Unity "Truth" Class will meet at the Valdes Hotel at 7:45 p.m. with Carolyn H. Parsons as speaker.
The Cleaner's Class of the First Baptist Church will hold its monthly meeting at 7:00 p.m. opening with a covered dish supper at the home of Mrs. J. Peterson on West First Street.
Mrs. Charles Mulford will serve as co-hostess.

Ever try rolling fish fillets in corn meal before frying? This way they have a crispy texture that goes well with potatoes and other cooked summer vegetables such as snap beans, spinach and squash.

TIME ON THEIR HANDS

De Bary Doings
By RAY HENNINGER

Residents of DeBary and their friends, numbering approximately 500, gathered on the grounds of the Joseph Schlemmer home on Sunday at 1:00 p.m. to celebrate the third Annual DeBary Day. The weather was perfect and everything moved along smoothly, thanks to the good planning of the chairman, Herman Lederhaus, ably assisted by his wife and a fine committee. Many thanks are due to the workers who made this day a success. First of all, Mr. and Mrs. Joseph Schlemmer, who once again generously opened their home and grounds to their neighbors. To Mr. and Mrs. Jack Kanner of Sanford who for the third year donated and cooked all the corn that could be eaten; to Ed Westenberg, who again made the grounds gay and festive-looking with bunting and flags; to Ed Davis and Al and Sam Faron, who furnished lumber to make tables and to Ed Davis who also loaned his truck, which was used as a stage. Chairs were borrowed from Brinson Funeral Home in Sanford and Allen-Summerhill of DeLand. The P.A. system was supplied by Herman Lederhaus.

Harold Coffin took pictures during the day and these may be purchased by those who would like to have them. The committee working under Herman Lederhaus' leadership was as follows: Boarder; Michael McDermott, Chairman; Michael Rinaldo, Joe Gibbs, David Runkel, Aaron Dungan, Lou M. Schlemmer, Paul Fretschel, Edmund Jackson, Arthur Lalm and Ed Redman. Entertainment: Ed Holman, Chairman; Charles Schneider, Master of Ceremonies; Ginner; Libby Redman, Chairman; Mrs. M. Schlemmer, Mrs. Joseph Schlemmer and Mrs. Joseph Brenner. Refreshments: C. K. Hart, Chairman; Joe Gibbs, Bob Nolte. Decorations: William Westenberg. Publicity: Ray Henninger. Grounds Committee: Paul Vollrath, Chairman; Vincent Gurnehart, Art Bruzman and Herman Lederhaus.

Feats began to gather at about 12:30 o'clock and shortly after 1:00 p.m. the invocation was given by the Rev. Hubert Thomas, pastor of the DeBary Baptist Church. Mary Ann Lederhaus led the Salute to the Flag and this was followed by the singing of the Star Spangled Banner. Mrs. H. Thomas asked a blessing on the food and by that time everybody agreed with little Edith Holman who said, "Now we can eat." The mounds of fried chicken, the salads, the home made cakes, corn, ice cream appeared and disappeared as they should at all good parties.

After lunch, the chairman introduced Judge Hubert Wingfield, honored guest and speaker of the day. He has been with us on such DeBary Days and his coming is an integral part of the celebration. He brought with him a fine specimen of a manatee's tooth which was found in Volusia County. He said that the manatee lived about 1000 years longer in Florida than his less fortunate brother who happened to be roaming around in the north; proving, of course, that we DeBaryites made a wise move when we came here to live. He also complimented us on our "sensible, adult way of going about getting a much needed community building." He also repeated his invitation to us to visit him at his office at any time.

It would not be DeBary Day without Roy Miller who, as usual, gave generously of his talent as a singer. He not only sang the songs he had planned with Jim Scott accompanying him on the guitar, but he also sang several times during the afternoon and before finally leaving the "mike", he spoke of his enjoyment of all DeBary Days and his willingness to sing whenever he was asked. A number of children danced for the audience. Beryl Coffin gave a Spanish Bolero in costume, Linda Kanner a tap dance, and a square dance called by Susie Neider was danced by a group of eight. They were: Sally and Susie Neider, Beryl Coffin, Mildred and Pauline Schlemmer, Mary Ann Lederhaus, Marie G. Dwin and Gail Taylor. The children's games were

Vacation Season Starts In Earnest As Resorts Anticipate Biggest Year

By SAM DAWSON
NEW YORK (AP)—Vacation time starts in earnest this month. Resort owners are happily anticipating their biggest year. Incomes are higher for many people. Factories are granting longer vacations and more paid holidays. More factory workers than ever will be hitting the road. In some cases factories will be closed for longer periods this year. That will affect industrial production figures, especially in July. And the steel industry believes this may give it an assist in catching up on its backlog of orders. But not all of the citizenry is included in this happy vacation prospect. More teachers than usual will be looking for summer jobs. Industry will have an added source of manpower this summer in the thousands of teachers harassed by inflation and low salaries, says Arthur C. Croff, publisher of Teacher's Letter, a Washington, D. C., fortnightly. Questioning 25,000 teachers a

round the country, the paper reports 56 per cent said they would work this summer. Of these 18 per cent expect to work in the field of education, others in paid community services, manufacturing, clerical work, agriculture, merchandising and selling, summer camps and construction work. Factory workers, however, are fast catching up this year with clerical workers in paid vacation privileges, according to the National Foreman's Institute, which keeps an eye on such developments. Collective bargaining this year is breaking through the traditional pattern of "one week after one year's service and two weeks after five," the institute says. It cites three cent changes as examples. B. F. Goodrich Chemical, Louisville, Ky., is granting two weeks' vacation after three years. American Machine & Foundry, New Haven, Conn., will give two weeks after two years. And Ky. has negotiated an agreement for one week after two months, two weeks after three years, and three weeks after 10 years. The institute says that nearly 85 per cent of the nation's corporations have some form of paid vacation.

cheduled next on the program; but before they were run off, Dan Fleming of Lake Helen, issued an invitation to all DeBaryites to attend a (sh) try at Lake Helen on July 4. The winners of the children's games were: Dorothy Schlemmer, Peggy Nolte, Larry Mitchell, Michael Jennings, Danny Neider, Gail Taylor, Edith Redman, Barbara Kanner, Frankie Jennings, Pauline Schlemmer, Susie Neider and Linda Kanner. The business people of DeBary were most generous with their donations and prizes. Here is a list of the donors and the useful and valuable gifts: Mr. and Mrs. William Stripp of Estates Food Center donated several prizes which were won by Mrs. Charles Yumman, John J. Snodgrass, Mae McMonaght, Harold Harper, Stanley Miller and Jack Jackson. Hart's Dinette donation won by Mrs. Ella Strand and O. G. Potter. Jackson's Golf Station by Mrs. Bob Nolte, James Coker, Ella's Beauty Salon by William Hoyer; Stroud's Electrical Appliance Service by Mrs. Lou Holman, Mrs. J. Winniburn, William L. Nowell and Joe Winniburn; Redman's Barber Shop by W. C. Post; Gurnehart's Gift Shop by H. W. Clark; Lederhaus Radio and TV Service by Mrs. Nell Snyder; Ray E. Peck, tractor, by Dr. Elizabeth Horven; Turner and Swift, tractors, by Edling Thompson; Plantation Estates, Inc. by Mrs. W. C. Post; W. G. Miller, builder, by Mrs. Sara Clark; Oak View Tractor Plant Company, by Peg Nolte. Harold Coffin, by Joyce Fowler. Thus ended another DeBary Day. Children with dirty hands and faces, but happy hearts were bundled off to bed, while the grown-ups honored little longer talking over the doings of the day.

Try and Stop Me
By BENNETT CERF

GERTRUDE STEIN'S writings may be unintelligible to some, but when she didn't use a stack of art, nobody could misunderstand her acidulous comments. She was invited to one Paris salon, for instance, for an exhibition of the paintings of a wild-eyed modernist. Miss Stein examined his handiwork briefly, then commented, "Hmph! I presume they couldn't find the artist so they hung his picture."

If you have the Wall Street fever in your blood, you are advised to pay heed to Graham, Ross and Company's list of the "Six Grumpy Gremlins" who keep people from profiting from their transactions in stocks and bonds: 1. Guess Work. 2. Follow the Crowd. 3. Buy 'em and Hold 'em. 4. Can't Wait. 5. Catch 'em Last Penny. 6. Can't Decide. A ravenous crew in all! Copyright, 1932, by Bennett Cerf. Dr. Wolman Presents Report On Pollution Of Lake Monroe

The City of Sanford is a thriving business community which serves a rich agricultural area in the heart of Florida. Its population has grown from 1489 persons in 1900 to about 12,000 in 1950. Robert M. Angas, consulting engineer to Sanford, estimates that this increase will continue at a rate which will raise the population to over 25,000 within 20 years.

Sanford lies on the south shore of Lake Monroe. Its relatively flat topography drains toward the lake except in areas along the two small streams flowing through the city. The easterly stream, identified as Ponce Branch, is the smaller of the two and flows part in conduit and part in open ditch. The streams draining the western part of Sanford, known as Mill Creek, has two main forks, both of which flow in open ditch. The easterly fork, which is the smaller, is known as Cloud Branch.

The City's waste drain northward to its outlet at the bulkhead along the lake front and one at the confluence of the Cloud Branch and Mill Creek. The system combines the functions of draining sanitary sewage and the water from the City. About 1,600 dwellings within the City are not served by sewers.

protected waters, and also the additional sources of pollution that will have to be removed.

Although Lake Monroe is part of the St. Johns River system, the flow of the river during dry months is so small in relation to volume of water in the lake, that movement of water by inflow and outflow has little significance insofar as the pollution problem is concerned. Circulation in Lake Monroe is due almost entirely to wind action. Currents move toward the west. Even under moderate winds the stirring action of the waves must reach the bottom of this shallow lake.

The pollution survey of Lake Monroe, made by the Florida State Board of Health in March, 1951, indicates that the lake has a very great capacity to disperse and assimilate organic materials coming in as part of the sewage. The lowest dissolved oxygen content found during this survey was 6.4 ppm, or 72.7 percent saturation at the station 100 feet east of the bulkhead, some 300 feet offshore. The average oxygen content at this station was 7.4 ppm. All samples taken at southern part of the lake had higher minimum and average dissolved oxygen contents.

The large volume of the lake, its billion gallons, the shallow depth and the ease with which the wind stirs the water account for Lake Monroe's ability to receive Sanford's sewage without significant effect upon the oxygen supply. The pollution survey indicated that under conditions at that time the sewage was dispersing through about one quarter of the lake or some four billion gallons of water. Ten days may be taken very roughly as a high value for the average time required for the oxygen demand of the sewage to be dispersed. In view of the fact that the lake carries seven or eight ppm of oxygen, the demand exerted by Sanford's sewage is very small. Oxygen demand of the lake ranged from 0.4 to 1.4 ppm, except in the vicinity of the pier where the demand was 2.2 ppm. A large sewer discharge into relatively stagnant water at the latter point, without any real opportunity for assimilation.

Lake Monroe is not and probably never will be a swimming lake. Even if the water were not an undesirable place to swim, it would be exceedingly difficult to maintain a purity desirable for swimming, this would still be the case. If Sanford installed a complete sewage treatment plant and chlorinated the treated sewage. There are two reasons for this. (1) Sanford is situated at the head of the outlet of Mill Creek. The equipment for shielding the solids and pumping sewage could be installed here, and the sewage discharged through an outlet paralleling the north-south boat channel and leading out to relatively clean water.

An outfall length of 1500 feet is recommended in the belief that money spent to carry the sewage well out into the lake will accomplish more per dollar spent than will money invested in a sewage plant when treatment becomes necessary.

Sewage Treatment

Since Lake Monroe has ample ability to assimilate Sanford sewage without interfering in any way with normal biological life particularly that of game fish, in the lake, the only possible reason for treating Sanford's sewage, would be as part of an effort to make the water safe for bathing. In judging the desirability of treating sewage for the primary purpose of maintaining bathing water, it is necessary to consider the probable extent of use of the

spillings through the existing outlets. As the City grows, and the volume of sanitary sewage more nearly fills the interceptor, smaller and thus more frequent rains will bring the overflows into operation.

The amount of sanitary sewage and sewage solids going directly into the lake under the present conditions will then increase. This sort of thing has happened in all cities having combined sewerage systems and it presents an exceedingly difficult problem insofar as pollution of adjacent water is concerned.

The quality of water along the shores of Lake Monroe in Sanford might receive more effective protection by spending money toward conversion of the combined system into a separate system than by treating that part of the sewage which would be taken through the interceptor and pumped off-shore away from the city. Therefore, it is recommended that the interceptor, the pumping and comminuting station and the discharge of mill fall pipe into Lake Monroe be built as soon as an engineering and financing can be completed.

Further studies of the quality of Lake Monroe water under various conditions of wind and weather will then indicate whether pollution by sewage pumped off-shore or pollution by combined sewage and flushings spilling out of the present outlet is likely to develop into the problem most deserving of future attention.

The Sewerage System

Parts of Sanford's sewerage system have been found to be in a seriously deteriorated condition, primarily due to attack by acid sulfate gases. The survey of the conditions of these lines is a job which presumably will be carried out by the city in order that the magnitude of the work necessary for complete rehabilitation may be accurately known.

When surveying the existing system, all points of leakage into the creek draining the City can be discovered and eliminated.

Planning of the repair or present sewers should, whenever possible, aim at the ultimate separation of the sanitary sewage and storm water. In many cases storm water might be economically carried to the two creeks draining Sanford.

Some of the present lines might then be converted to carry only sanitary sewage. Two separate storm drains now discharge to Cloud Branch in the vicinity of the railroad station. The extent to which separation is practical at this time depends on how large the rehabilitation job turns out to be and also on whether the existing lines would be reasonably self-cleaning if converted to sanitary sewers.

In the long run, that is, after the present system is repaired, the decision as to how much additional money should be spent in the future to convert from a combined to a separate system must rest on studies of conditions which then exist in Lake Monroe. It depends also on whether or not the people of Sanford wish to undertake the work necessary to improve the water quality in the lake. As has been pointed out, efforts to maintain swimming water standards along the bulkhead may end in disappointment. A certain amount of contamination of waters in and along cities is always present.

The planning of sewers for several areas is another problem

on which work should continue. The construction of sewer lines to serve the 1,000 houses now in these areas will not only remedy existing unsanitary conditions, but should also stimulate construction of additional homes. The value of a public sewer to the property owner and the developer in a growing community is obvious.

The two creeks draining Sanford present a sanitary problem that could be most economically remedied by instituting a cleanup and maintenance program. Where the condition of the stream is particularly bad from the viewpoint of trash and weed accumulation, straightening of the channel and paving of the invert may be worthwhile.

These creeks act as drains which hold down the groundwater levels in the areas through which they pass. Since this ground drainage function is probably best served by this problem for a community that enclosing parts of the creeks in sewers might be undesirable unless water is admitted to these sewers from the surrounding ground.

Summary and Conclusions

The discharge of Sanford's sewage through outlets at the bulkhead creates a public nuisance that should be promptly remedied. Since the existing sewerage system capacity of Lake Monroe is very large, it is believed that dispersion of the sewage will prevent outlet pollution and thus provide adequate protection for this problem for a considerable period of time into the future.

It will be difficult to maintain a water quality in Lake Monroe satisfactory for swimming, because after construction of an interceptor, storm runoff carrying domestic sewage and solids flushes from the sewers and from streets and yards will still discharge from the present multiple outlets during intense storms. Installation of sanitary sewage and storm water in a primary treatment plant would not make Lake Monroe continuously safe for swimming.

Separation of storm water and sanitary sewage will be a difficult and expensive task. The magnitude of this job is such that, if it is to be done, the work will probably have to be spread over a long period of time. A preliminary report on rehabilitation of the present system, any practical measures for separating the sewage and storm water that fit into this program should be carried out.

The two creeks draining Sanford, at places, weed grown and littered with trash. A maintenance program with some channel straightening and weed pulling appears worthy of consideration.

Extension of sewers to unimproved areas will not only correct existing unsanitary conditions, but will increase property values and stimulate further development of these areas.

In view of these findings, the following recommendations are proposed in this report:

- (1) Build an interceptor, a pumping and comminuting station and an outlet pipe to discharge collected sanitary sewage about 1500 feet offshore into Lake Monroe.
- (2) Repair the existing sewerage system and where feasible, as part of this work, convert to a separate system to a separate system.
- (3) Clean up the two creeks draining the City and study the desirability of straightening and paving nearby streets and yards to make an impenetrable enclosure of parts of the

The big TV actress, Miss Mary Martin, celebrates the advent of June Dairy Month and raises a toast to the U. S. Dairy Industry with a refreshing glass of milk during a break in recent rehearsals.

Dairy Month, June 1 to 30, starts in its own right on the American continent being declared for the 13th successive year by over 40 million Americans who gain in health from the production, processing and distribution of dairy foods such as cream, milk, butter, cheese, powdered milk and dry milk. The dairy industry contributes annually \$1.5 billion dollars to national commerce.

Visitors keep trim by following the newly developed scientific diet of weight reducing or ideal weight maintenance, which includes liberal portions of dairy and other basic foods in the menu.

COUGH IN A CARLOAD Safety Test For Smokers Prior To Taking Anesthetics Recommended

By ALTON K. BUSEY, Staff Writer

NEW YORK, N. Y., (AP)—People who cough or spit up phlegm before or after a dental procedure should have a safety test for anesthetics before taking them, according to the American Medical Association.

The test is to cough or spit up phlegm before or after a dental procedure, according to the American Medical Association.

The test is to cough or spit up phlegm before or after a dental procedure, according to the American Medical Association.

People who cough or spit up phlegm before or after a dental procedure should have a safety test for anesthetics before taking them, according to the American Medical Association.

The test is to cough or spit up phlegm before or after a dental procedure, according to the American Medical Association.

Sanford's sewerage system has been found to be in a seriously deteriorated condition, primarily due to attack by acid sulfate gases. The survey of the conditions of these lines is a job which presumably will be carried out by the city in order that the magnitude of the work necessary for complete rehabilitation may be accurately known.

When surveying the existing system, all points of leakage into the creek draining the City can be discovered and eliminated.

Planning of the repair or present sewers should, whenever possible, aim at the ultimate separation of the sanitary sewage and storm water. In many cases storm water might be economically carried to the two creeks draining Sanford.

Some of the present lines might then be converted to carry only sanitary sewage. Two separate storm drains now discharge to Cloud Branch in the vicinity of the railroad station. The extent to which separation is practical at this time depends on how large the rehabilitation job turns out to be and also on whether the existing lines would be reasonably self-cleaning if converted to sanitary sewers.

In the long run, that is, after the present system is repaired, the decision as to how much additional money should be spent in the future to convert from a combined to a separate system must rest on studies of conditions which then exist in Lake Monroe. It depends also on whether or not the people of Sanford wish to undertake the work necessary to improve the water quality in the lake. As has been pointed out, efforts to maintain swimming water standards along the bulkhead may end in disappointment. A certain amount of contamination of waters in and along cities is always present.

The planning of sewers for several areas is another problem

Smockey Says:

Smockey says that the old bears of Britain were hunted about 1,000 years ago. A generation ago, most boys used to go for it in their pockets. Now many boys are marked to go for it in their pockets.

Pollution of Lake Monroe

The pollution problem at Sanford results principally from the discharge of raw sewage at the bulkhead along the City's waterfront. The sewage, with its insignificantly floating solids, drifting along the seawall near the outlets, is a public nuisance. Conditions are particularly bad in the vicinity of the yacht basin where one of the larger sewers discharges into relatively quiet water. During the dry season, when Lake Monroe is at its lowest level, solids stranded on the exposed beaches are particularly objectionable.

Since the assimilative capacity of Lake Monroe appears to be more than adequate to care for Sanford's sewage at this time, the problem of disposal is one of discharging the sewage sufficiently far offshore so that mixing and dilution will have an opportunity to function before an adverse wind could bring it near the bulkhead.

To rid the City of the nuisance conditions along the wall, there are two possibilities. One is to intercept and pump out into the lake. Dispersion and dilution at an outlet some 1500 feet offshore should be such that it would be difficult to find any visible trace of the sewage anywhere near the wall.

To assure that floating material is not brought to shore by winds, the sewage should be passed through a mechanical shredder or comminutor before discharge. Later, as Sanford grows and as reservoirs of the lake conditions decline, material objectionable features may become desirable to install additional treatment facilities. The interceptor should, therefore, carry the sewage to the City owned site east of the outlet of Mill Creek.

The equipment for shielding the solids and pumping sewage could be installed here, and the sewage discharged through an outlet paralleling the north-south boat channel and leading out to relatively clean water.

An outfall length of 1500 feet is recommended in the belief that money spent to carry the sewage well out into the lake will accomplish more per dollar spent than will money invested in a sewage plant when treatment becomes necessary.

The Sewerage System

Parts of Sanford's sewerage system have been found to be in a seriously deteriorated condition, primarily due to attack by acid sulfate gases. The survey of the conditions of these lines is a job which presumably will be carried out by the city in order that the magnitude of the work necessary for complete rehabilitation may be accurately known.

When surveying the existing system, all points of leakage into the creek draining the City can be discovered and eliminated.

Planning of the repair or present sewers should, whenever possible, aim at the ultimate separation of the sanitary sewage and storm water. In many cases storm water might be economically carried to the two creeks draining Sanford.

Some of the present lines might then be converted to carry only sanitary sewage. Two separate storm drains now discharge to Cloud Branch in the vicinity of the railroad station. The extent to which separation is practical at this time depends on how large the rehabilitation job turns out to be and also on whether the existing lines would be reasonably self-cleaning if converted to sanitary sewers.

In the long run, that is, after the present system is repaired, the decision as to how much additional money should be spent in the future to convert from a combined to a separate system must rest on studies of conditions which then exist in Lake Monroe. It depends also on whether or not the people of Sanford wish to undertake the work necessary to improve the water quality in the lake. As has been pointed out, efforts to maintain swimming water standards along the bulkhead may end in disappointment. A certain amount of contamination of waters in and along cities is always present.

GAS For FARMS And INDUSTRY

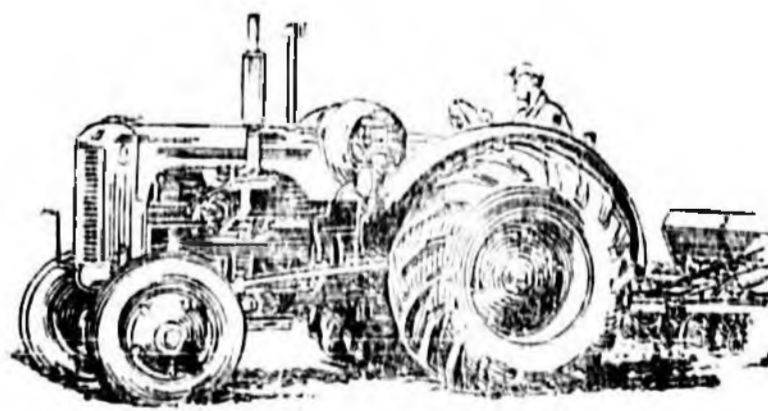

Wherever you need a dependable supply of Low Cost Fuel!

On farms and in factories, a variety of internal combustion machines are powered with LP Gas (Liquefied Petroleum - Bottled Gas). Tractors, for instance, may be quickly converted to LP Gas by means of a carburetor conversion unit. Such a simple, inexpensive conversion gives more power, cleaner valves, less bearing strain and several other advantages.

Other farm uses are numerous—for milk can sterilizing, in chicken brooders, grove heaters, for irrigation pumps.

Industrial uses are many, too—Gas is the ideal fuel for melting such materials as lead, tin, paraffin. It is used in glass forming, kiln drying and metalwork. Look at your own operation and see how many uses you can find for clean, efficient, versatile, low cost Gas!

VOLUME XLIV Established 1908

AN INDEPENDENT DAILY NEWSPAPER SANFORD, FLORIDA, FRIDAY, JUNE 5, 1953

Associated Press-News Wire

THE WEATHER

Considerable cloudiness and mild with scattered showers through Saturday.

Turmoil Over Charge Delays Session's End

Legislature Puts Off Adjournment 'Hour

TALLAHASSEE (AP)—The Florida Legislature, with most of its work done and the decks cleared for adjournment, was thrown into last-minute turmoil today by the state beverage director's charge that a clique of six men controlled the Senate.

Davis, under pressure to resign from some of his own friends in an effort to patch up a serious rift between the executive and legislative branches of government, was in Tampa.

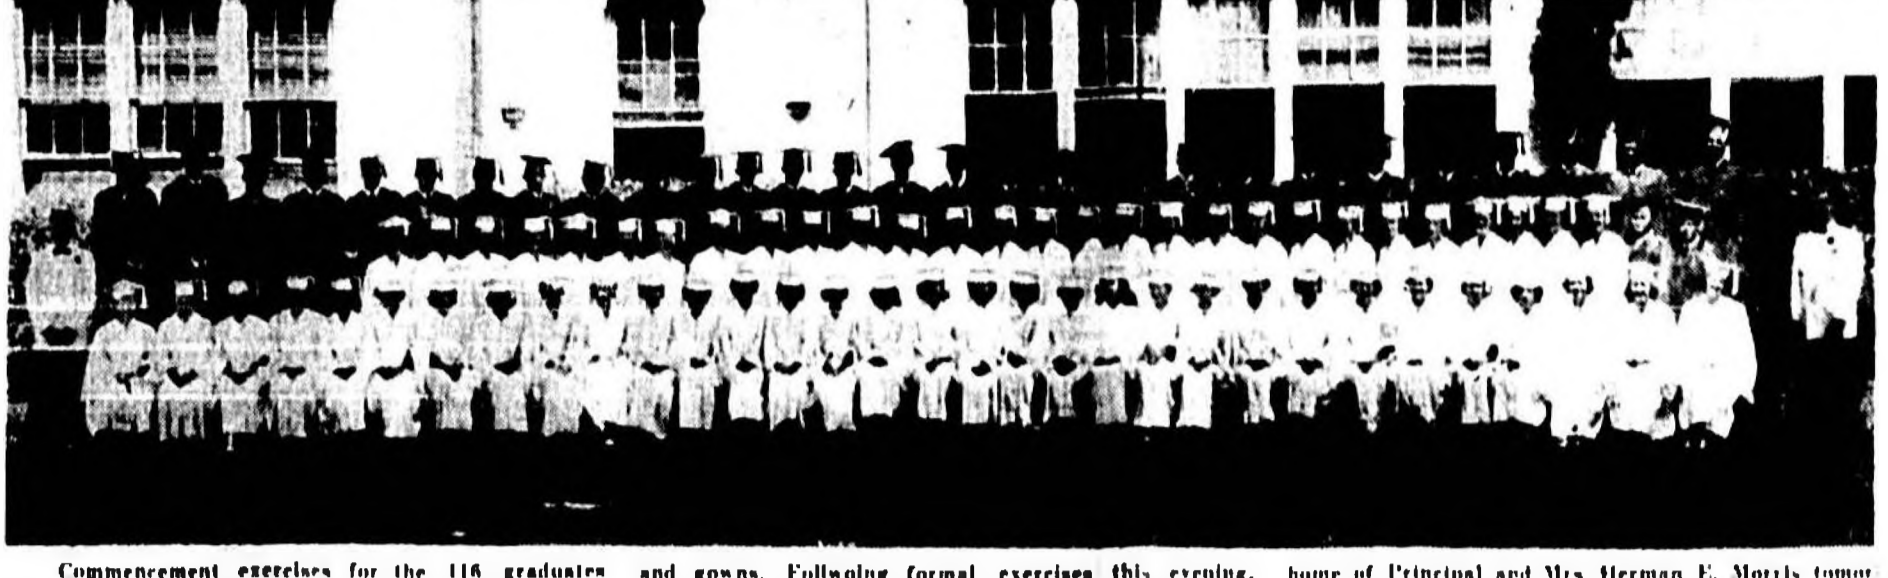

The outbreak ruined at the last minute the spirit of harmony which had prevailed during most of the 60-day legislative session, which was ready to adjourn after giving state agencies and services the budget response account in history and still leaving a little nest egg for the future.

Legislative Group Praised For Stand On Beverage Hours

The three members of Seminole County's legislative delegation at Tallahassee today received a letter from the Seminole County Ministerial Association praising them for their stand in passing the law fixing the hours of sale of alcoholic beverages.

Senator Lloyd Boyle, and Reps. Volts Williams Jr. and Mark Cleveland Jr. have recently been criticized by the Seminole County Liquor Dealers Association through their attorney, Ernest Housholder, for refusing to consider and introduce any bill that would amend the act setting a closing hour of midnight for taverns.

"We realize that you have been and are being brought to bear on you in regard to this matter. But we are confident that the majority of the people of the County appreciate the fact that the law has been passed.

Commencement exercises for the 116 graduates of Seminole High School will be held tonight at 8:00 o'clock in the high school auditorium. Members of the 1953 graduation class are shown above in their caps and gowns. Following formal exercises this evening, there will be a class reception at the M. L. Rabun home, followed by a midnight movie, a swimming and square dance party, ending activities with a breakfast at the home of Principal and Mrs. Herman E. Morris tomorrow morning. Highlights of tonight's program will be the recitation of the Pledge of Allegiance, the playing of the national anthem, and the reading of the valedictory address by Miss Mary Lou Boyle.

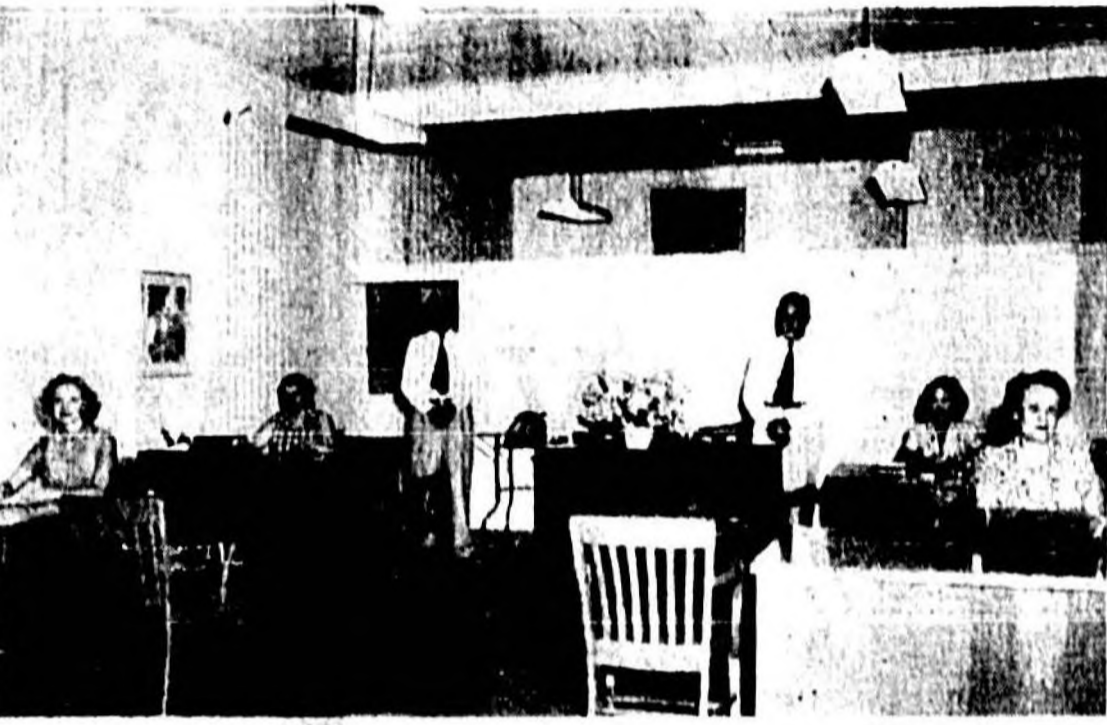

Taft Calls For End Of Fighting In Korea Looms As Parley Nears

By JACK BELL
WASHINGTON (AP)—Sen. Taft (R-Ohio) called today for a military alliance with the British in the Pacific to bypass the United Nations veto in that critical area.

The Senate GOP leader issued a statement clarifying the views he expressed in a Cincinnati speech May 26, which caused President Eisenhower to say "No," that he could not agree with Taft that the U. S. might as well forget the United Nations so far as the Korean War is concerned.

But if armistice negotiations fail, Taft indicated in the statement that he has not changed his view that the U. S. might as well forget the U. N. in dealing with the Korean situation. He denied he ever advocated "go it alone" policies and did not mention any difference of opinion with Eisenhower.

His statement declared: "How ridiculous that our course should be guided by nations claiming with one breath to be part of the United Nations and with the other to be opposed to its principles declared by the Assembly of the United Nations, namely, the driving of the Chinese from Korea and its unification."

Pictured above is an inside view of the new modern business office of the Southern Bell Telephone Company located at 118 South Palmatta Avenue opened on Monday. Shown in the picture are left to right Miss Margaret Van Hecke, Mrs. Mae B. Sheppard, Mrs. Ethel A. Mezzell, Mrs. Virginia C. Wallace, R. V. Turner, local manager and J. P. Evans district manager.

Race Controversy Wearing Of Shorts In Cooking School Is At Sewanee Ended By Unanimous Vote

SEWANEE, Tenn. (AP)—A racial segregation issue, simmering since June, 1952, apparently has been defused with a vote by the Board of Trustees of the University of the South to give all applications for admission to the school of theology without regard to race.

The resolution passed by an overwhelming 78-6 vote. Last year the Fourth Presbyterian Synod recommended Negro candidates for the ministry be admitted to the seminary. The board refused to adopt the recommendation and several seminary faculty members issued a statement against the trustees.

Then the trustees said it was not thought advisable to adopt such a resolution at that time. Taggart's action as "untenable," the seminary dean, the school chaplain and faculty are being prepared.

Industrial Report Of Caccavajo Given To Board Members

116 Seniors Will Get Diplomas In Class Exercises

The high school careers of 116 graduating seniors of Seminole High School will formally end at the evening's commencement exercises in the S.H.S. auditorium. The school class will present its own program, which will include a play, a musical, and a variety of other entertainment.

Following the traditional S.H.S. commencement ceremony, the school class will present its own program. Miss Judy Irwin will deliver the valedictory address. The program will include a play, a musical, and a variety of other entertainment.

Harman Is Believed As Deputy Sheriff

WALTER HARMON, 31, of Jacksonville, was believed to be the man who shot and killed Sheriff J. J. Harman in the city of Jacksonville, Fla., on Monday, May 2, 1953.

Foreign War Vets To Stage Free Supper

The Veterans of Foreign Wars of Seminole County Post No. 3282 will hold a free supper Monday, June 8, at the Legion Hall. This will be the first meeting of the summer and all the old members are urged to attend by Commander W. (Pat) Johnson.

USO Fund Drive Has Reached \$163 Total

The United Service Organization's fund drive reached the \$163 mark today, according to Mrs. Charles R. Jones, secretary. The goal is \$1,000.

Air Force Program Is Scheduled In Oviedo

The U. S. Air Force will conduct a special ground observation training program at the school house here next Monday night at 8:00 p. m. It was reported today by Mrs. Marian Jones.

Several of the leading authorities in the field of sanitary engineering throughout this section of the country were on hand Wednesday night to hear a report submitted by Dr. Abel Waldman, professor of sanitary engineering at Johns Hopkins University, in the picture above, taken at the Yacht Club just before a luncheon which preceded the open meeting at the Court House, near first row, left to right—Dr. Waldman, City Attorney Ed. Rhinoholzer, Water Department Superintendent E. H. Johnson, and Dr. Wade H. Garner, president of the Seminole County Medical Association. In the same order in the rear row are Dr. David L. Lee, director of the State Board of Health; Robert Wakefield, State Board of Health representative; Ralph Heath, U. S. Geological Survey; Robert Angus, consulting engineer for the City from Jacksonville; J. Denver Cordell, City Commissioner; H. N. Hayer, City Clerk; Dr. J. N. Tolar, City health officer; Sidney Berkowitz, State Board of Health; Orlando William Stepper, City Commissioner; Paul Richards, U. S. Public Health Service representative from Atlanta; Gen. Sidney Richard, City sewer department superintendent; Dr. Frank L. Gullman, City health officer; Valde Robbins, assistant County health officer; Perry Temple, resident engineer; John Ivey, City Commissioner; and Mayor Randall Chase. City Manager Tom Lemon, although present, was not in the picture.
