is of no value to the city now.

Rep. Syd Herlong told The Herald just before the meeting that he agreed that "this is Central Florida's most important project" and said he also agreed that "it is essential that work be started on it immadiately !

"I'll do everything possible to expedite action on the requests of your officials," Herlong said. Adams said after the meeting

William Norman of Sea, Spessard Holland's staff represented Holland and said the senior senator "completely backs" Herlong's statement and will work for action and appropriations for the flood control system.

Today's noon meeting at the Capri was the first one called by John Krider, head of a committee set up after consultation at Jacksonville last week with U. 9 engineers and officials of the Central and South Florida Flood Control District.

Another aession was scheduled later this afternoon at Orlando, to be participated in by Osceola, Orange, Lake, Seminole and other representatives.

Committees on water controls and city and county commissioners are seeking to enlist the aid of everybody possible to produce an immediate commitment on the flood control and water conservation proposal.

Finch Jury **Deliberations** Nearing

LOS ANGELES (UPI) - The econd Finch-Tregoff murder trial moved into its 17th week today with the jury expected to begin life and death deliberations by Wednesday.

Co-proseculor Clifford Crall said he expected to complete summation of the state's case Tuesday by demanding the death penalty for Dr. R. Barnard Finch, 43, and his paramour Carole Tregoff, 23. Crail's pariner, Joseph Powers, and an attorney for each of the lovers already have finished summarizing for the jury of 11 women and one man the testimony of 99 persona concerning events leading up to the death of Finch's wife Barbarn, 38.

The state charges the oncewealthy surgeon and his mistress plotted and carried out the July 18, 1959, gunshot slaying for the believed Finch and Carole manu-

It Pays To Advertise!

(Ed. Note: Today The Herald is using a guest editorial by Louis Spilman of the Waynesboro News Virginian. The only comment we make is that the next time someone says "advertising doesn't pay, ask him to name one of the 25 mountains in Colorado that are higher than Pike's Peak.")

Periodically someone emerges from life's whiripool of theory to lambast advertising. We fear that which we do not understand. There is a liberal sprinkling of people who have no conception of the value of advertising in our economic world. Dr. Arthur Schlesinger Jr., a Harvard professor, is one of the more recent snipers. It's altogether likely Dr. Schlesinger has never had the responsibility of meeting a payroll, balansing the income and outgo in a business or of being responsible for keeping a business alive. If he ever had, his would be a respect for advertising rather than a doubt.

Heavens knows I seek no duel with Dr. Schlesinger. His accumulation of theoretical knowledge and his ability to coin devastating phrases far surpass any propensity of my own in this area. I only know that business must aucceed else our economy collapses. Successful business rests upon an excess of income over expense. Income is rooted in sales. Sales are expanded through advertising. It's as simple as that.

Unfortunately there are still some skeptics who can't or won't understand this powerful sales tool. Russell T. Gray, Inc., an advertising agency, tells the following pertinent story in a recent promotion ad . . . a story that should bring understanding to the heart of the most akeptical:

"Once upon a time there were three manufacturers of mouse traps, and competition set the retail price at 30 cents. Manufacturing cost was 15 cents each, None of the three mouse trap makers advertised. One day one of the manufacturers decided to advertise. He found that he established

brand recognition and reached a wider audience and broader market. During the second year his sales grew so much that he increased production. This permitted him to install new, more efficient machinery and he cut production to 9 cents a trap. Dealers cut their prices from 30 cents to 25 cents. Manufacturing profits jumped from 33-1 8 to 50 percent and dealers made 66-2 8 percent instead of 50 percent. Brand recognition was built up so that the demand by brand forced the two non-advertising manufacturers out of business.

"Who paid for the advertising? Not the manufacturer because he increased profits and cut costs. Not the desler-he did the same thing. Not the consumer because he bought the trap for less. That somebody had to pay for advertising is a hard, cold fact, yet it is one of the most misleading facts in business. The answer lies in a combination of two things. The manufacturers who didn't advertise paid for it and the economies made possible by increasing production paid for it. Advertising is a factor in distribution and is paid for through the increase in distribution and the savings the increased production makes possible." Advertising, consistent and powerful, is never an expense. It is one of business' most valuable and essential investments.

Ultra-Liberals Haunting Vice President Nixon

PROGRESS

Sanford, Florida

September 27, 1960

As a candidate for re-election for City Commissioner Group One, Sanford, Florida, I find myself thinking back over the past year during which time I had made up my mind not to seek re-election. However, in the past six weeks I have had so many citizens from all walks of life in our community urge me to seek the post again and conlinue to serve, that I decided that I would offer to serve for another term if the people of Sanford want me to do so.

Having been a member of the City Commission since May 1956, I am proud of the progress we have made during that period. I am very much interested in the continued orderly growth and progress of our city; keeping the cost to our taxpayers at a minimum by careful study and control of our expenditures.

With our capital improvement program, we have acquired the Civic Center and youth wing, Goldsboro swimming pool, a new fire station, and new fire equipment. Three off street parking areas, resurfacing some 16 miles of city streets, new three way radio system for police, fire, utilities and public works departments along with our street lighting program . . . We also obtained a lower fire classification resulting in lower fire insurance premiums, set up employee insurance plan ... Annexation of appreximately 425 acres and gained 2,750 persons in population ... Created a full time, year round recreation department, outstanding in small city recreation departments in

the southeast section of the country, and providing recreation activities for over a quarter of million participants yearly, which is a great factor in helping to keep the youth occupied and off the streets.

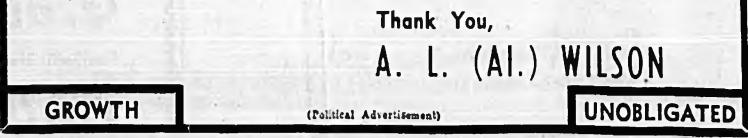

When we compare the seven cities in and near the central Florida area that compare in size and population to Sanford, we find from an independent survey that total phyroll contribution, property tax revenue, total general government revenue, refuse collection revenue, utility tax revenue, refuse and recreation cost per capita for the citizens of Sanford are the lowest of any of the other six cities.

We believe, and rightly so, that the City of Sanford is making sound progress and that the tax dollar is being handled to the best possible advantage of our citizens, and the welfare of the entire city as a whole.

Now I don't mean to infer by any means that I am responsible for all this, nor am I trying to take credit for it, I am merely taking the opportunity to let you know some of the progressive facts concerning your city. And to give you some of the reasons why I believe Sanford is growing on a sound basis and is a good place to live.

I consider it an honor to serve on the board of Sanford City Commissioners. If re-elected to another term, I pledge to continue to work just as diligently at all times in the best interest of Sanford and all of its taxpayers.

I still have no personal political aspirations, so I honestly feel that I can deal with the affairs of the city to the best interest of all the taxpayers. Since I am not representing any particular interest or group, political or otherwise, or being backed by any special interest, I am in a position to speak, vote and act freely on all questions with only my concience and the people of Sanford to account to. If you want me to serve as your commissioner for the next three years, vote for and re-elect A. L. Wilson Nov. 8, 1960 for Commissioner Group One. Sanford, Florida.

Mitchell Builds Up Reputation In Pro Grid Loop

United Press International Bobby Mitchell, who once nesty fumbled his way out of pro ootball, is latching on to teammate Jimmy Brown's reputation as the National Football League's most dangerous breakaway runner.

And that's a big reason why the Cleveland Browns own the only unbeaten-untied record in either the NFL or the American Football League. Mitchell, a habitual "fumble

bug" when he broke into the league in 1958, was both surehanded and sure-footed Sunday when he led the Browns to a 48-7 romp over the Dallas Cowboys. He caught a short pass from Milt Plum and raced 46 yards for Cleveland's first score, bolted 30 yards from scrimmage for another, and ran back a kickoff 90 yards for a third TD. Those runs and four intercepted passes were more than enough to send the Cowboys down to their fourth straight defeat before approximately 28,300 fans at Dallas. Mitchell, who was overshad-

owed by bulldozing Jimmy Brown for the past two seasons, now has scored 7 touchdowns and averaged 7 yards in 35 carries during the Brown's three triumphs. Cleveland took over the Eastern Division lead when the New York Giants were held to a 24-24 tie by the Washington Redskips in Sunday's biggest surprise. The

electric

is the modern way for a modern day

CLEANERI Flameless electricity won't smudge pots and pans nor produce soot and greasy film to dirty your kitchen walls and curtains.

COOLER! Flameless electric cooking keeps the kitchen 8 to 16 augrees cooler than flame-type units which emit heat along with soot and other products of combustion.

EASIER! Electric ranges automatically provide exactly measured heat at fingertip control.

SAFER! Electricity is flame-free, fumesfree for precious peace of mind. No danger from open flames. No constant-burning pilot light. Safe as an electric light bulb! BETTERI Flameless electric cooking preserves food color, flavor and healthful minerals. Vitamins are not "boiled away." Up to 15% less meat shrinkage.

CHEAPERI The operating cost of a modern electric range is about a penny a meal per person. Sunshine Service electricity is the biggest bargain in town.

See your electrical appliance dealer today and enjoy the blessings of flameless electric cooking.

There are good reasons why nearly a million Florida families have switched to electric cooking. Ca'l your nearest FPL office and get the facts.

- There's no Match) for Electric Living FLORIDA

Dear Abby:

DEAR ABBY: My sister is going to a Halloween party and she is dreaming up a costume. She wants to go as a Greek Goddess or an Oriental High Priestess, I told her I didn't think it was right to go dressed up as one of these. I asked her how she would like it if she were in a forsign country and one of the kids came dressed up like a Catholic priest or a Baptiat miniater. She said the never thought of it that way. My mother said to stop arguing and to write to you.

OLDER SISTER

DEAR SISTER: There is nothing disrespectful about masquerading as a "Greek Goddess" or an "Oriental High Priestess." You are exceptionally kind to consider the possibilities of sacrilege,

DEAR ABBY: Don't you think married men who attend college should be required to wear wedding bands? A college girl has no way of knowing whether a buy is married or not. Most men in college who are married act the least married and this makes it harder yet. CAROLYN

DEAR CAROLYN: A wedding ring aroung a man's finger doesn't always stop his circulation. You can't legislate fidelity.

DEAR ABBY: The children in the winth Grade are taking dancing lessons

By Abigail Van Buren

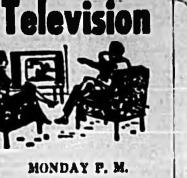

at school this year. Os a result they are starting to give dancing parties at home. At these parties they play "spin the bottle" and "post office" (they go in the clothes closets to kiss). Some parents think no party is complete without kissing games. Should we allow such games? We had a big discussion about this and are divided in our opinions. Are parents out of line in permitting it? I'd like to hear how parents in other communities handle this problem with Sixth Graders. And, as a mother of a teenaged boy and girl, how do you feel about it. Abby? SHOOK UP MOTHER FROM SHAKER HEIGHTS

DEAR MOTHER: Kissing, inspired by a feeling of genuine and mutual affection, is perfectly all right. But games that encourage kissing merely for the sake of kissing (at any age) destroy the real purpose of a kiss. Rely on the Law of Naturenot the Law of chance; and why rush

things? CONFIDENTIAL TO "NEUTRAL AT THE CLUB": A businessman who says he is not interested in politics is like a drowning man who insists he is not interested in water. Come, now!

For Abby's pamphlet, "What Teenagers Want To Know," send 25 cents and a large, self-addressel, stamped envelope in care of this paper,

Ninon and Sen. John Kennedy be- our option to continue the show ing a good thing for the country, will be picked up." but they're an help to a fellow breaking into the TV series busi-

At least that's the way young actor Skip Homeier feels about the presidential candidates' video appearance.

The reason for Homier's coneern is that he's trying to get his new TV series, "Dan Raven" off the ground and keeps being intersupted by the politicians.

"I just wish they weren't pre mpting me, "he complained. We've been on the air only two works now. We lose one show then come back for a week and get pre-empted again." Homeler wouldn't mind the can-

didates arguing on "Raven's" time if his show was firmly established.

"It's difficult because we don't have time to build up an audience et get people into the habit of watching us every Friday night," he explained. "If we do get a good audience, those two follows come back in our time the next week.
