

GOVERNMENT LABORATORY ESTABLISHED HERE FOR STUDY PLANT DISEASES

GREAT THING FOR VEGETABLE GROWERS OF FLA.

Seminole county, the greatest truck growing county in the state has again been recognized by the government and a laboratory for the study of plant diseases, especially of vegetables has been located here. Dr. I. C. Jagger and Dr. A. J. Mix are in charge of the work and Mrs. Mix will act as honorary secretary...

MANAGER MARTIN RAISES Former Sanford Man Goes Higher in the Scale

Tampa will lose the best glad hand committee in the city this week when Martin L. Raines, popularly known as "Martin" to every post as chief clerk at the Hillsboro hotel to take a step up the ladder of hoteldom, into the berth of manager of the Hotel Pershing at Miami.

Probably no one in Tampa will miss him more than the boys and girls of the press, who have depended upon him so long for "tips" on who's there and why. He has always been the first to come across with the news, and the way he could get a weary celebrity out of bed without jogg to the reporters for several years.

Martin Raines has had a corner here on a few little stunts that have been the envy of every other hotel man in the city, and he was one of the first in this section to learn how to write upside down in the register, so that it would read right side up. Many of the boys have seen him scratch in a room number alongside a signature without so much as a thought of turning the register around, and during the busy times of the year it has been no rare sight to watch him distribute rooms to a dozen guests at a time without so much as taking a short breath. His work is an art, and it isn't every man that can carry on a running conversation with half a dozen different people all in a hurry and all thinking along different lines.

Manager Daniels of the Hillsboro said last night he felt as if he was losing his right hand with the departure of Mr. Raines, and didn't know where he was going to get a man to match him. "Just have to kick along somehow," he moaned "while the sunshine and hospitality flows more freely than ever in the millionaire burg across Lake Okeechobee."

A hundred traveling men dropped in to express their regrets last night at Tampa's loss and Miami's and the east coast town always was in luck.

Chuluota Over Top in W. S. S. Chuluota District with Mrs. C. D. Brumley as district chairman for the War Savings Stamp campaign reported to County Chairman Schelle Malmes last Saturday that the full quota of \$6,000.00 that had been apportioned that district had been sold and subscribed. This is the second district to go over in War Savings, and speaks well for the district and shows the untiring effort of the chairman and her band of workers. Chuluota can be depended on when things are wanted done—and while the district is not large and thickly settled, yet the spirit is there and with just a bit of stirring things begin to boil and just keep on boiling till they boil over—hence they go "over the top." The Herald joins in congratulations for Chuluota.

Death of A. Wildasin Ardella Wildasin died at his apartments in the By-Lo Hotel Friday night from a complication of diseases. His family had been here for some time and he was in Jacksonville when he was taken sick. It came here several months ago from Geneva and Mr. Wildasin had been in ill health for some time.

The funeral occurred Saturday afternoon interment being made in Lakeview. Deceased leaves a wife and child to mourn his loss.

Mrs. W. L. Morgan is here much to the delight of her many friends. She has been visiting Miss Ruth in Virginia and was ill with influenza when Mr. Morgan was taken with it here. They are now consoling and congratulating each other.

RED CROSS TAKES FLU IN CONTROL

FURNISH NURSES AND WILL COMBAT DISEASE.

An important meeting of the executive committee of Seminole County Chapter was held Sunday afternoon, Oct. 20th, at the call of the chairman for the purpose of discussing and promulgating plans whereby the epidemic of influenza, now running its course in Sanford may be arrested, and substantial assistance given the city and county authorities in stamping out the disease.

Mrs. Deane, president of the board, presided, with the following members of the board present: D. C. Marlowe, Chapter chairman; R. R. Deas, treasurer; Mrs. R. A. Terhain, secretary; Mrs. J. W. Dickins, J. G. Ball, Sanford representatives; E. M. Galloway, East Sanford representative; R. J. Holly, Finance; H. C. DuBose, Membership; Mrs. Henry Wright, nurses chairman; Mrs. R. J. Holly, inspection; Mrs. M. C. Savage, supervisor hospital garments; Mrs. S. Q. Chase, chairwoman.

The meeting was arranged at one o'clock and called for three, hence the impossibility of securing the attendance of branch representatives. The influenza situation was discussed from every angle, the disease being on the increase. Precautionary measures were able, provided, whereby the thoughtless negligence of responsible and irresponsible people alike, that endangered the lives and health of others might be reduced to a minimum.

The following motion was made by Mr. Marlowe and seconded by Mr. Deas: "That a committee from the executive board appear before the city council on Monday morning at nine o'clock, to urge that all soda fountains and poolrooms be closed, that all bathers should be closed or subjected to a rigid inspection twice daily under police surveillance; that the ordinance prohibiting the stopping on the sidewalks be enforced and persons violating the ordinance be arrested; to arrest if necessary any person appearing on the streets having the disease or measures be taken to confine them to their homes; that the Red Cross equip and maintain an emergency hospital, provided that the city council and the county commissioners will reimburse the Red Cross at the cost of the epidemic to a certain percentage of people coming into the city with influenza; that the city be required to spray the streets with disinfectants three times a week until further notice, paying particular attention to the fronts of stores and places where filth accumulates; the same to be enforced without question.

An amendment to the motion was offered by Mr. Ball and carried: "That the emergency hospital be at the service of the entire county."

A further amendment was "That all persons in attendance on influenza cases must wear ward masks," which will be furnished free on application by the Red Cross."

A copy of this motion will be presented to the county commissioners also and the action taken by the executive committee of the Red Cross Sunday, Oct. 20th applies to the whole county and will be enforced by the A. R. C. committee.

The committee appointed include D. C. Marlowe, R. J. Holly, J. G. Ball, H. C. DuBose, Mrs. Henry Wright, Mrs. E. M. Galloway.

Should city council and county commissioners fail to act favorably upon this motion the said committee is empowered to take any action deemed advisable to suppress the disease, even to the expenditure of funds in the name of the American Red Cross.

PEACE IS CAMOUFLAGE ANSWERED

GERMANS PLAY FOR TIME WHILE WE ADVANCE.

London, Oct. 21.—The German reply to President Wilson's note, the text of which was received here today by wireless, says Germany hopes the United States will approve of a demand which would be irrevocable with the honor of the German people and with the opening of the way to a peace of justice.

Germany protests against the references of President Wilson to illegal and inhuman acts. It is stated that the German navy purposely destroyed lifeboats with passengers. The government proposes that the facts be cleared up by neutral commissions.

Germany has dispatched orders to submarine commanders precluding the torpedoing of passenger ships.

The German government suggests to President Wilson that an opportunity be brought about for fixing the details of the evacuation of occupied territories.

British troops, in striking through the formidable German positions along the Selle river north of Le Cateau, captured more than 2,000 prisoners. The Germans were forced from positions of great natural strength on a wide front and the British gains were maintained, notwithstanding enemy counter attacks. The British now hold the heights between the Sambre and Senne rivers and are in a position to outflank the Morval forest and cut the railroad between Valenciennes and Avesnes.

Further north the allied armies continue their progress through Belgium and French Flanders from Douai to the Dutch frontier. To the north the Belgians are approaching Ghent, while in the center the British are marching on the Scheldt river and outflanking Tournai, an important railway junction which has been quite useless for the allied advance.

The Belgians are along the Devezee-Esclon canal, which runs northward from the Lys river to Zeebrugge and have taken a large number of important points near that waterway. Further south the French have captured the Lys and have established outposts at several points. Along the Lys the British and French forces have met and fought a hard battle and are at Douai, on the west bank of the river.

Death of Oscar Lee Taylor

Sanford lost one of her best citizens Sunday afternoon when Oscar L. Taylor succumbed to pneumonia after a week's illness. Mr. Taylor was all just one week, being taken with influenza and had almost recovered from this disease but being very large of stature and fleshy pneumonia fastened upon him before those in attendance were fully aware of it and thought-sickened physicians and the best of nurses were in attendance and even oxygen was used by his anxious friends his spirit could not be stayed and winged its flight about five o'clock Sunday afternoon.

Oscar L. Taylor was probably one of the most popular men in this community, where everyone knew him and everyone loved him. Large of stature, large of mind and large of heart, Oscar Taylor seemed to be placed on this earth for the good that he could do, and the sunshine that he could scatter in the pathway of his fellow men. Jolly and jovial and of sunny disposition he was a general favorite with men, women and children and his death has cast a gloom upon the city and county and in other cities where he was well known.

O. L. Taylor was a native of Indiana, being born at Orleans in 1877 and at the time of his death was in the very prime of his life and with the better part of his life all before him. Early in life he took up dispatching and leaving the scenes of his boyhood travelled extensively over the west and the central states, being one of the best in the profession and always in demand. In his native state he married Mrs. Taylor

AVIATORS WERE HERE SANFORD LANDING FIELD FLYERS WILL VISIT US

THIS CITY WILL BE GOVERNMENT AERO STATION.

Did you see the aeroplanes this morning? This is only one of the many visits these fine young men will pay us in the future if the people will get busy and arrange a suitable landing place for them. Lieut. E. C. Stackpole and Lieut. E. T. Spencer of Dorr Field, Arcadia were here yesterday coming up from Kissimmee with A. H. Luffler in his car as they had no place to land in their aeroplanes and wanted to see if they could get one. They were met here by R. J. Holly and D. C. Marlowe and were taken to the bulkhead, first and then to several places near the city that might be suitable. The best location was the field on Celery avenue near Gatchell's store and this will probably be decided upon. At the meeting of the city council last night the matter was laid before them by R. J. Holly and G. F. Smith and E. A. Brumley volunteered to mow the grass and Sheriff Brady volunteered to cut the small trees and several others present said they would help out the street gang at any time.

Mr. Taylor was not only popular in business and railroad circles but he was a most consistent lodge member and in the Masons and Elks he was always on hand to supervise and direct and take a prominent part. He was a Past Master of the Masons and member of the Knight Templars and was Past Exalted Ruler of the Elks. He also acted as secretary of the Masons and the Elks for many years and held office in the Grand Lodge of Masons.

On account of the epidemic funeral services could not be held at the home but at the cemetery after a fervent prayer by his pastor, Dr. E. D. Brownlee, the Masons took charge and District Deputy Grand Master Frank L. Miller conducted the services, assisted by Chaplain J. P. Hilburn, the beautiful funeral rites of the Masons being carried out. The pall bearers were L. P. McCuller, R. L. Peck, C. E. Henry, C. H. DuBose, R. R. Deas, H. R. Stevens, B. F. Whitner and R. J. Holly.

The grave was literally banked in beautiful floral offerings from the many friends of the A. C. U. Elks, the Masons and Elks and friends throughout the county.

And today we can hardly realize that Oscar Taylor is gone and that we will not hear his voice again and it hardly seems possible that he could have been taken from us but he who doth all things well knows best and we are comforted in the belief that our old friend's soul is in Heaven today.

An honorary escort of Seminole County under Lieut. Maxwell were guests at the funeral. Mr. Taylor was Quartermaster Sergeant of the Guards and one of the first members.

He leaves a true and faithful wife to mourn his loss, also a brother in the north. To them the sympathy of the community is extended.

ANOTHER FEED RULING

Abrogating Official Order 10-15-18

Rule 1. All dealers handling feed stuff at retail in the state of Florida will be required to make sales under these rulings, which abrogate official order 10-15-18, and all other conflicting orders previously issued.

Rule 2. Margin of profit over costs for Retail Dealers Handling Corn, Oats, Rye, Barley, or Other Feeds Not Mentioned in Subsequent Rulings.—No retail dealer will be allowed in making sales of feed stuffs above mentioned, to charge on any individual sale, a price for goods delivered at warehouse door, which will give more than \$4 per ton profit; where delivery is made to the consumer reasonable cartage may be added, provided that such charges are shown on sales slip in addition to charge for food. This margin of profit shall apply to all sales of feed mentioned in this rule in amounts of twenty-five pounds or more. Where feed is sold in packages of less than 25 pounds the retail dealer may charge for measuring, weighing and packing, not more than one half cent per pound profit.

Rule 3.—Margin of Profit over costs for Retail Dealers handling Wheat Mill Feeds, Rice Polish, Rice Bran, Dried Beet Pulp, Cotton Seed

THIS CITY WILL BE GOVERNMENT AERO STATION.

Did you see the aeroplanes this morning? This is only one of the many visits these fine young men will pay us in the future if the people will get busy and arrange a suitable landing place for them.

Lieut. E. C. Stackpole and Lieut. E. T. Spencer of Dorr Field, Arcadia were here yesterday coming up from Kissimmee with A. H. Luffler in his car as they had no place to land in their aeroplanes and wanted to see if they could get one. They were met here by R. J. Holly and D. C. Marlowe and were taken to the bulkhead, first and then to several places near the city that might be suitable. The best location was the field on Celery avenue near Gatchell's store and this will probably be decided upon. At the meeting of the city council last night the matter was laid before them by R. J. Holly and G. F. Smith and E. A. Brumley volunteered to mow the grass and Sheriff Brady volunteered to cut the small trees and several others present said they would help out the street gang at any time.

Lieut. Spencer and Lieut. Stackpole are instructed to make the trip from Arcadia to Valdosta and to secure a landing place every forty miles. As Sanford is on the route and they would like to land here they visited us yesterday to secure the necessary data and they will return from Valdosta in two weeks and if the field is ready in that time they will land and visit with us. Not only then but every day or so thereafter they will be landing and paying us a visit and after the war Sanford will be a station on the Aero Mail Route that will be established. The possibilities are unlimited and the field should be arranged for at once and the people should turn out en masse to see that it is accomplished.

And again the Board of Trade means something to the people.

Meal, Cotton Seed Products, Bean Meal or other manufactured or Mixed Feeds.—No retail dealer in handling feeds described in the above heading shall make sales which give a profit greater than is fixed in the following schedule:

a. Where one or more persons purchase in advance of delivery in full carloads take delivery at car and pay cash when retail dealer is required to meet slight draft, \$1 per ton plus demurrage if any.

b. Where one or more persons purchase in advance of delivery in full carloads, take delivery at car and pay for it on delivery \$1.50 per ton plus demurrage, if any.

c. Where buyer purchases and takes delivery at car and pays for it on delivery in ton lots or more but less than carloads, \$2 per ton.

d. Where buyer purchases and takes delivery at car and pays for it on delivery in lots less than 1 ton, \$2.50 per ton.

e. Sale ex-warehouse in lots of 1 ton or more, \$4 per ton.

f. Sale ex-warehouse in lots of less than 1 ton, \$5 per ton.

g. One dollar may be added to the foregoing margins when sale is made on credit, or at dealer's option the legal rate of interest may be charged.

h. One dollar shall be deducted from the margins prescribed in e and f when the retailer buys on credit and the jobber's margin is thereby increased \$1 a ton.

This margin of profit shall apply to all sales of feed mentioned in Rule 3 in amounts of 25 pounds or more. Where feed is sold in broken packages of less than 25 pounds, the retail dealer may charge for measuring, weighing and packing, not more than one half cent per pound profit. Braxton Beacham, Federal Food Administrator, Fla.

Dr. Raymond L. Johnson, formerly in Phillips Drug Store and who is now at Camp Greenleaf, Chickamauga, Ga. on Medical Corp. Reg. 15, Bat. 4, has been promoted to the office of Lieutenant, enlisting from Waycross, Ga.

STRANGELY WEDDED

By JESSIE E. SHERWIN.

(Copyright, 1918, Western Newspaper Union)

Waldron Morse, seventy, worn out, had come to Shell Beach to die. Wilton Revere, thirty, at life's ebullient phase, had come to reconstruct a broken life.

There was a pulse, gravity and clearness about the younger man that led Mr. Morse to accept him as a person he could rely upon.

The fact that he seemed to be well versed legally added to Mr. Morse's regard for him. The old man was

wealthy, but his affairs had some complex features that disturbed him, in view of his condition.

"All I fear for," he told Revere, "is that my daughter Ethel, if left alone in the world, would be at the mercy of self-interested persons who would not guard her interests. If I could only be sure of living until some pending litigation is settled."

"Cheer up, dear friend!" Revere told him. "You may live for many a year to come." But the next day Morse was taken fatally ill. He called Revere to his bedside and seemed to rely upon his continued presence as a solace until his daughter, who was living with an aunt in the city, arrived.

Revere was fascinated at his first glimpse of the sweet, innocent face of Ethel Morse. He was sent for in urgent haste. Mr. Morse clasped his hand fervently as he sat down by his bedside.

"Revere," he said, "you have been like a son to me. The doctors say I may live but a few hours. I have learned to esteem you, more, to rely upon you. Oh, my friend, help me to die in peace by consenting to cherish and look after my daughter's interests."

"I will do all you may wish to benefit her," assured Revere. "More than that! Revere, I beg of you to do what I suggest. She will have a fortune, she is a wife any man may be proud of. Will you marry her?"

Revere was dumbfounded. He got as far as "I dare not—I am—" but a spasm of pain overtook Mr. Morse, and Revere had to call for the doctor. An hour later he was sent for again. At a glance he realized that Mr. Morse was dying. By his side was his daughter, pale and benumbed with grief. A stranger in clerical attire sat at a distance.

"Revere, it is all arranged," panted the dying man. "Ethel has consented to be kind to her, protect her, make her life happy." And in the whirl of hurried words the words were spoken that made Wilton Revere and Ethel Morse husband and wife.

He did not intrude upon her until the funeral was over and she started for the home of her aunt. As he helped her upon the train, he said, simply, quietly, definitely:

"I shall soon be in Chicago, whether I shall remain in office to take up the affairs of the estate, as your father has desired. When my business occasion arises where it is necessary to consult with you, I will notify you. I would suggest that we keep the marriage secret."

There followed for the wife a strange experience. Only twice in a year Revere came to see her, and then only long enough to submit some legal papers, and in the presence of her aunt. Then one day he called at her home, to find her alone.

"I am about to leave the city permanently," he said, "having closed up all matters of the estate. I have a confession to make. I am not your husband; that marriage ceremony was invalid."

She regarded him with speechless amazement. "I could not deny your father's wish," he continued, "and I fancied I saw a way to protect your interests in the way I have without intruding upon you. Two years since I parted from my wife, an unworthy woman, whom I have never seen since, but I am still her legal husband."

"Oh, why did you not tell me before?" suddenly breathed forth Ethel. "It was unmanly, it was cruel, for I—"

She hurried from the room in tears, and Revere left the house in a strange haze of emotion. Could it be possible that she cared for him? And he—oh, faint faint lie, that shut him out of paradise!

Hope, doubt, despair were in his thoughts as, a week later, he again called at the home of Ethel. There was a certain plaintive expression in her face that seemed to upbraid him.

"I learned only yesterday that my wife died over a year ago in a railroad wreck in Canada. It was previous to my marriage with you. I am sorry if this new complication distresses you."

"Then I am your wife, in reality?" breathed Ethel, a quick glow suffusing her lovely face. Then she seemed to totter, leaped towards him and fainted in his arms.

To lie there! When her eyes again opened, in her face was that which told Wilton Revere that she loved him even as he loved her, and that there was no menace of another parting.

Useful Electric Lantern. Among the numerous electric lanterns is a mechanical one, standing about a foot high, that provides its own current. A spring motor, wound up like a clock, drives a small generator, and this supplies current for a lamp bulb of 12-candle power. The motor, generator and governor are contained in a base six by eight inches in size. Such a lantern is useful for the camp, the farm, or other place, and can be carried about in all kinds of weather.

Ivory Phonograph Needles. The phonograph stylus of vegetable ivory has a decided advantage over the old wooden needle, the usefulness of which is finished when it has played over the record. The ivory point will stand the wear of six records then when it has been filed over the bevel and can be used on six more. The vegetable ivory is produced by a Central and South American growth, the phyllophorus palm, which produces large clusters of seeds.

"One Thing More." Brave old Gen. "Jim" Steadman, during the thickest of the battle at Chickamauga, decried up to a retreating brigade and shouted: "Face about, boys! We must hold this point!" "But, general," said a brave officer, "we have done everything that brave and patriotic men can do for their country." "What! Everything?" said Steadman, "you haven't died yet!" —Argonne.

New One on Him. "Have you any worth while books in here?" asked the superior person. "We have thousands of volumes, sir," replied the clerk. "The sure there is something in our stock to suit the most exacting taste. What do you require?" "I want a book of synonyms." "Just a moment, sir, until I speak to the boss. I don't believe we have any of—er—Synonym's works." —Birmingham Age-Herald.

Remove Varnish. When doing over an old piece of furniture all old varnish may be quickly removed by washing with a solution of one part water glass (silicate of soda) and seven parts water. Use mixture generously, as it is cheap, and you will soon find the wood looking fresh and clean as new. When dry, stain and wax.

MESSAGES TO THE PEOPLE OF FAIR FLORIDA

Appeals To Hearts And Energies Of Men And Women Who Have Great Work To Do

Four little messages for all the people of Florida. They carry appeals to the hearts as well as for the best efforts of everyone in this war-time period—something for all to do.

These are the messages that the Florida State Fair Association sends to YOU. The first one is properly addressed.

To Women And Children Of America. Over across the way millions of women and children—just as sweet and bright-eyed and loving as your own—are wasting away for want of food.

Women and children of America! It is your God-given duty to do all you can to put an end to the deep misery of these oppressed peoples.

Your Fair—through its big food-producing and food-saving program—offers one opportunity to do this, and one you cannot shirk.

Let's all work together this year—we can do so much more by working together. Opportunities come only once for humanity's sake don't turn your back on this one.

World Faces Live Stock Famine. The world faces a live stock famine of such magnitude that you and I simply cannot comprehend it.

Where are the hundreds of millions in war-torn Europe and Asia to get meat to eat—where are they to get horses and cattle to till the soil and help harvest the crops?

The duty of America is plain—we must all help plug that gap by getting into the live stock business more deeply ourselves.

That's why we are offering such big cash premiums for the best stock exhibited this year—it's merely our way of getting every one more interested in livestock raising.

For humanity's sake, let's do something! America Must Supply Food. Food—more food—and still more food—in all history the world never faced such need for food.

It is vitally necessary for America to do everything it possibly can to increase the international food supply.

Else millions more must succumb to the relentless ravages of hunger in war-worn Europe—and those who are suffering the most are the women and children, the old men, and the unfit, who have not been able to play a man's part in the trenches.

Your Fair is pointing the way to greater efficiency in food raising and saving—and with your aid we can do an infinite good.

Must Use Machine Power More. There is only one way of producing enough food to supply our own wants and feed the hungry in Europe until they are able to care for themselves.

The men of America who till the soil must use their hands less and machine power more, put gangs of iron-fingered laborers at work upon farm tasks of every kind, and multiply the farm labor supply a hundred fold, by conscription of that crowd army of steel farm hands that awaits the call to arms.

Our farm machinery show is the machine power recruiting station of all this community—the only place where new types and models of farm machinery can be compared, and the new steel workmen needed to increase our crop yields can be found.

Three Great Events For Florida State Fair

The idea of combining with the Florida State Fair of this fall the Pan-American International Farm and Live Stock Exposition, and then adding the Farmers' National Congress, included for good measure, was to give Florida three great events at one time, between November 27 and December 6, in Jacksonville, that would be the greatest and most important, agriculturally considered, at least; that have ever transpired in the state.

Homemade Paste. Teachers and others who use much paste will appreciate a recipe for making it at home. Stir into a cup of flour enough cold water to make it of a creamy consistency. Pour over this four cups of boiling water, stirring all the time, and cook five minutes. To this add one teaspoonful of powdered alum, pour into a bowl and beat till cold. Then add one teaspoonful carbolic acid and one teaspoonful of more of oil of clove or wintergreen. Pour into glasses or jars and cover with paraffin. This will keep indefinitely.

Before Day of Chronometer. Longitude baffled old navigators until the chronometer came into use in 1735. The ancients and later navigators, including all the great discoverers, could find their latitude by observations of the sun's height, but they could determine their longitude only by "dead reckoning," or estimating their ship's progress from day to day. This system was uncertain and caused a great many shipwrecks.

Animal Languages in Captivity. The female duckbill lays two to three eggs about three-quarters of an inch long, enclosed in strong, flexible, white shells. The young are suckled by the mother. Duckbills have been kept in the zoological gardens at Melbourne, but attempts to carry them alive to Europe and America have met with failure.

Road's Thick Ice Foundation. At one point of a road recently constructed in Alaska, there is a solid ice foundation. At the surface there is a two-foot layer of moss and tundra, but previous mining operations at this point proved that there is a forty-foot bed of clear ice and six feet of gravel between the surface layer and bed rock.

Refuge for the Shabby. "An Eskimo wears the same suit of clothes all the year round." "I've heard so," replied the man with the shiny coat sleeve. "Sometimes I'm tempted to move way up North where that sort of thing is fashionable."

For Sale or Rent—The Dan Clouser place of 10 acres, with good buildings, grove with the fruit and lake frontage, at Longwood, Florida. For particulars call on or address A. J. Searle, Longwood, Florida, Box 167. 18-2tc

For Sale—A good horse. Mrs. L. N. Barnhart, City R. A., Box 223. 10-3tp

For Sale—Strawberry plants, \$2.00 per 1,000 f. o. b. Lake Mary. C. A. Farina, Lake Mary, Fla. 18-4tp

For sale—Burred Rock Pullets, \$2.00 each. Co.berles \$3.00. Pure Thompson Ringlets. A. B. Commona Sanford, Fla. 17-3tp

For sale—Grade-A Angora buck, 6 months old. Box 1918, Sanford, Fla. 17-3tp

Kerosene attachment for Ford's. Saves one-half on fuel. For demonstration call phone 2412. W. W. Dresser, Rt. 21. 16-8tp

For Sale—Good all round horse and harness. \$100 cash for quick sale. Can be seen at Mrs. B. E. Squires, Cameron avenue. Lloyd Hoak. 16-4tp

For Sale—New single Weber wagon on box. Dutton Crate Co. 13-1tc

For sale—One Plattner "I" Fertilizer machine, one plow and scratcher, one and half tons of bleaching paper, 18 thousand stakes and two horse sprayer. Enquire F. C. Welsh, Photographer Park Ave. 16-4tp

For Sale—Farming implements of all kinds, chest of carpenter tools, platform scales, set of batteries and other articles. Also lot and building. Atkins, next to Vincent's Fish house. 8-11

For Sale—Old newspapers at the Herald Office. 5-11

For Sale—One Baby Grand Chevrolet auto. H. G. Dieterich. 6-11

FOR RENT. For Rent—Housekeeping rooms, also bedrooms. 206 Park avenue. 19-2tp

For Rent—Cottage on Magnolia and Eleventh. Toilet and sink in the house. Bath tub and electric lights if wanted. Nine dollars per month. Apply E. W. L. Crown Palace Co. 19-2tp

For Rent—Private apartment of three rooms, first floor. Large front porch, sulphur and rain water. Wood fireplace, cooking utensils. S. W. corner Fourth and Cypress avenue. Unfurnished. \$10.00 month. Mrs. Fannie Munger. 18-3tc

For rent—Apartments over 50 cent. Studio—nice rooms \$15 per month with laundry improvements. 17-11

For rent—Block 75 of M. A. S. subdivision known as The Beards place. Apply A. P. Connelly. 13-Fri-4tc

For Rent—Country Place, 1 1/2 miles from postoffice; 15 acres under cultivation. Good house. Large woods pasture. Apply C. H. Leffler. 4-11

For rent—A six room house at Market Station. Enquire of J. H. Ellsworth, Beardsall Ave. 13-3tp

Furnished Rooms by Day, Week or Month. 225 N. 1st St. North Postoffice corner. L. C. Phillips & Co. drug store. Mrs. C. C. Hunt, manager. 10-11

For Sale—Housekeeping rooms, also bedrooms. 206 Park avenue. 19-2tp

For Rent—Cottage on Magnolia and Eleventh. Toilet and sink in the house. Bath tub and electric lights if wanted. Nine dollars per month. Apply E. W. L. Crown Palace Co. 19-2tp

### CURBSTONE CLEANINGS BUDGET OF OPINION "JUST BETWEEN YOU AND ME" EVEN THE GATE POST NOT IN IT

A Chief Is Among Ye Taking Notes  
and Faith, "He'll Print 'em"---  
So Says Saunterer.

There is no need to be unduly alarmed over the influenza situation here as it seems to be well in hand but we should use judgment and know that it has been under control and has been since the first appearance we should keep it down by using all precautions that we can. Every one that has influenza should stay at home until the physician says they can go out and that they will not only endanger themselves but others around them. The Red Cross deserves great credit for taking this case in hand and supplying everything needed. The mayor and the city council and the county commissioners are to be commended upon their stand and every citizen should respond to any request made upon them.

There should be no place where people gather in numbers remain open during the next two weeks. There is no reason in closing the schools and churches and stopping all meetings unless every other place where crowds congregate are closed. The safety of us all and we should all cooperate.

There is a chance that a station may be made a government aero station now and after the war and with a very little work and expense we can have one of the best landing places in the state. We should get busy on this proposition that the Sanford Board of Trade has started and give the aviators a good field and give them everything else they need to make Sanford their best stopping place in this part of the state. And the individuals that we spent so much money on and then left it to rot should be headed off and used in some way that will be of benefit to the community and where we go to.

Look Here, I'm Interesting  
Through the kindness of our enterprising editor, whose name has been in the headlines of the post office and local Red Cross headquarters. We have now gathered them up and are passing them on. PLEASE KEEP THEM GOING UNTIL THEY ARE FRAYED AND FRAZZLED AND WORN OUT. THEY COST YOU ABSOLUTELY NOTHING.

Carbon Needed for Gas Masks  
Fine hundred tons of carbon are needed daily for gas masks. How are we going to get it? By a long, strong pull, all together. Men, women and children. Yes, this is Junior Red Cross work, but not alone, for in many families there are little folks are too tiny to help, so of course the older people must supplement the children's efforts and everyone must save and gather the pits of prunes, pea hns, plums, dates, cherries, olives and apricots. Nut shells too are in demand for carbon; hickory nuts, walnuts, butter nuts and Brazil nuts. Help protect our soldiers from deadly poison gas by collecting these waste products and seeing that they reach the Red Cross.

Where can they be sent? To local Red Cross headquarters where barrels are provided for them. They will be taken care of Mrs. S. O. Chase, who will forward them to their destination. Everybody get busy.

Mrs. S. O. Chase and Tin Foil  
Mrs. S. O. Chase has been appointed Chairman of Conservation for Seminole County Chapter and will have charge of the salvage gathered by the children of the county through the schools and out of them, as well as that collected by the older

people. Tin foil is of special value and is being collected in large quantities throughout the town, many hundred pounds having been accumulated awaiting the call of the Conservation committee. The salvage will be sold by the committee and the proceeds will be given each School Auxiliary, Branch or Mother Chapter, in proportion to the number of pounds donated by each. Mrs. Chase will appoint certain days on which it can be delivered and weigh it at Red Cross headquarters. Any information along this line can be secured from Mrs. Chase.

### TO ENROLL DOCTORS

Every Physician in Country Is to Be Listed.

#### National Defense Council Will Mobilize Them for Civil and Military Work.

Washington.—Dr. Franklin Martin, chairman of the general medical board of the council of national defense, explains the scope and function of the volunteer medical service corps, in which it is proposed to enroll every legally qualified physician in the country, including women, without reference to age or physical disability.

"It is a method of recording all physicians who are not yet in service and of classifying them so that their services when required, can be utilized in a manner to fulfill as little hardship on the individual as possible," Doctor Martin writes. "It is a method by which every physician not in uniform will be enabled to wear his insignia which will indicate his willingness to serve his government."

"The object of the corps is to place on record all medical men in the United States; to aid the army, navy and public health service in supplying war needs; to provide the best civilian service possible; to give recognition to all who record themselves."

"Civilian service will be supplied under a fixed plan. Every one in the corps will receive proper credit for service rendered, and ample medical attention will be assured for all requiring it. There will be four tentative classes, consisting of fit to fight men under forty, reserves under fifty-five; home forces over fifty-five; and Ineligibles. Reserves may be called on occasion for army, navy, public health and civilian service, the home forces being those able to perform only civilian service."

Service of members of the corps will be called and rendered in response to requests from the central governing board in which the names of the corps will be listed. State boards will appoint executive committees to receive applications for enrollment in the corps and will make recommendations concerning them to the central governing board.

### "HAIL, HAIL," GREET YANKEES IN FRANCE

They had "Hail, hail, the King's men here."  
Thousands of the 1918 edition American tourists who are daily arriving "somewhere in France" look up joy in their faces and a warm glow in their hearts as groups of little French children sing this homely refrain as they line the gangways.  
According to a letter received here recently early arrivals of the American expatriate forces have taught this greeting to the children, who pass it on as each new contingent arrives. "Hail, hail, the gang's all here!"

### TAKE 60 HUNS WITHOUT SHOT

Americans Bag Big Bunch of Yellow Barbarians North of Fismes.

With the American Army on the Vesle front—Sixty Prussians have been taken prisoner by the Americans near Fismes, north of Fismes, without either side firing a shot. The Prussians were machine gunners, and all that remained of a company which had been in line less than a month.

American detachments went out a few nights ago, the location of the machine gun positions having been reported by a prisoner. According to the Americans, the Prussians were waiting to be taken prisoner. The intelligence officer who questioned the Prussians asserted that they nearly all had agreed to surrender if the slightest opportunity arose.

The Americans who took the prisoners do not claim any credit for the capture, declaring that the Prussians virtually deserted their posts.

Naturally.  
A new baby sister arrived at Freddie's house. Next day at his birthday the ten year old boy asked him what they were going to name his new little sister. Freddie thought deep, a minute and then exclaimed: "Oh, we're going to name it Mrs. Throckmorton, after my mother."

Ideals.  
We must love ideals and string 'em toward them ourselves, but we must not use them exclusively to the measurement of others.—Dwight D. Davis.

### Early American Diplomats.

The first American minister to France was Thomas Jefferson, who represented this country under the Confederation and during the revolution before the Constitution was adopted and the United States was organized. After the adoption of the Constitution, the United States was first represented in France by William Short in charge of affairs (1792) and then by Gouverneur Morris (1792) as minister.

### Local Flow Like Water.

In a great steel works at Pittsburgh 1,200 feet of four-inch pipe, under a pressure of 100 pounds to the square inch, and there so rapidly that four tons have been put through a 550-foot line in 24 hours.

### Draw Rusted Nails.

First drive them in a little, which holds the heads, and then they may be drawn out much easier.

### Eels for Canning.

Canned and bottled eels are new enterprises talked of in Japanese fishing circles, as these fish are found almost everywhere along the coast. At present only a limited amount of each year's catch is used for fertilizer, the proportion being used for fertilizer.

### Daily Thought.

To know how to wait is the great secret of success.—De Maitre.

### Alphabetical Possibilities.

All the inhabitants of the globe, on a rough calculation, could not in 1,000,000,000 years write out all the possible transpositions of the 26 letters of the alphabet even supposing each person wrote 40 pages daily, and each of which pages contained 40 lines, and 40 transpositions of the letters.

WOOLEN SOCKS will not shrink, get hard or knot up when washed with Grandma. No more heartaches after spending hours knitting a pair of socks and then having them ruined by washing with an inferior soap.

# GRANDMA'S Powdered SOAP

Follow these instructions and you will never have any trouble: Sprinkle some Grandma in luke warm water—wonderful suds in an instant. Wash the socks in this water then rinse in clear, luke warm water. After rinsing shake out well (do not wring) then hang up to dry slowly. Socks washed this way with Grandma are sure to be soft and fluffy and easy on the feet.

There are hundreds of other uses for Grandma. It is the greatest "all-round" household soap of the age and is by far the most economical. It's powdered—you measure it out with a spoon—no waste. Try it today.

In Cupid's Realm

The vale of cashmere was never more enchanting, nor could its rippling fountains play more joyously, neither are its scenes of romance more enchanting than those of fair Florida, with her orange groves bending in golden splendor, or the dainty fragrance of its snowy blossoms of purity ever ready to kiss the presses of a bride, for the perfumed breezes singing in joy and when in twilight hours the moonlight gleams on dewdrops, and carries the softest petals, or touch gently the softest strands of the woman's curls, they tarry not in their dancing glee until even Cupid's most secluded trysting places are found; so here we find him in sweet content, for his aim proved true, his arrow piercing with in the citadel of the tenderest hope.

hood. He has made Sanford his eastern standard of time is based home, where he is held in highest on the 70th meridian, the central eastern; his noble Christian virtues standard time, the change put us in and true business qualities speak for themselves at home and abroad.

Mr. and Mrs. Brannon left yesterday for their future home in West Sanford, accompanied by the merry group that witnessed the happy work, where music and pleasant notes were enjoyed until in the wee hours, when the laughing face of fair Luna lulled the great world to repose and to the land "where dreams come true."

May the hand of God be laid very gently and lovingly on this happy pair, that the morning of life will be beautiful as the early dawn's greetings to the great king of day as with his brush he softly tints the zenith of blue to the rainbow colors of hope and promise, and where in the evening of life may their many useful acts and noble deeds well done be reflected in the radiance of the sunset's purple and gold.

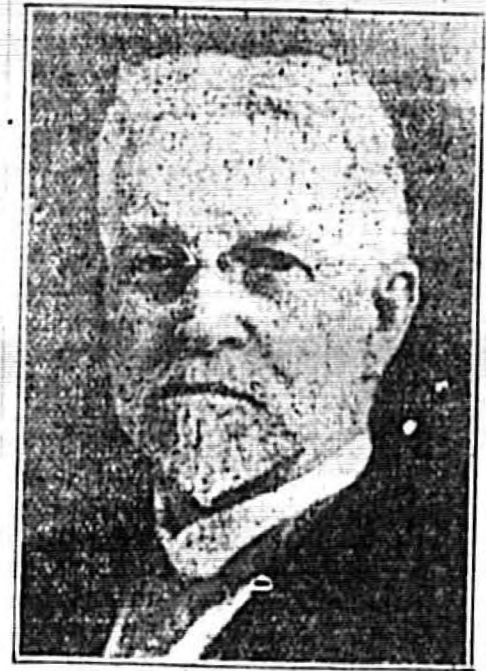

Death of Mrs. Frank Hatch  
Mrs. Little Hatch, wife of Frank Hatch, died at her home Saturday night after a short illness of pneumonia. The funeral occurred Sunday afternoon, a short service being held at the cemetery. Rev. M. H. Massey of the Baptist church officiating. Interment was made in Lakeview cemetery.

Mrs. Hatch leaves a husband and several children to mourn her loss.

### SET CLOCKS BACK

#### To Make Them Eastern Time

There always seems to be more or less confusion in the minds of the people when the authorities begin to talk about setting the time. And, it may be added that there are always plenty of people who are dissatisfied with the present division of time, and making plans for something better, or at least different. When the saving daylight law was proposed it was difficult to convince many people of its benefits, and now that it is nearly time to return to the old system it seems just as difficult for them to understand the necessity. The problem is complicated by the fact that the commission on standardizing time, which is now considering changing the division of the day into 24 hours, and setting the standard time for the eastern division of the United States, is also considering setting the standard time for the eastern division of the United States, which is now considering changing the division of the day into 24 hours, and setting the standard time for the eastern division of the United States.

PROF. F. LAMSON SCRIBNER, Expert on Exhibits, United States Department of Agriculture.

COMMERCIAL POTATO CROP HARVESTED BY USE OF DIGGER—SORT AND SACK IN FIELD

Horse-Drawn Potato Digger in Operation.

Prepared by the United States Department of Agriculture. When an early crop is grown, the date of harvesting is largely governed by market conditions. If the price is high, a crop may often be harvested profitably when it is half or two-thirds grown, whereas if prices are low it is generally advisable to allow the tubers to reach full development before they are dug. In the case of late varieties destined for winter consumption it is the usual practice to delay harvesting as long as it is safe to do so without running unnecessary risk of freezing the tubers.

screens, arranged one above the other. The diameter of the openings in the upper screen in some graders is 1 1/2 inches and in others 2 inches, while the lower one may have openings anywhere from 1/2 to 1 1/4 inches in diameter. Some makes of graders or sizers have wire-mesh screens with square openings, while others have circular or oblong openings with circular ends. Pickers and Sorters. Three pickers usually work with one sorter, each taking a row. The potatoes are picked into wire or split baskets having a half handle, and as the baskets are filled they are dumped on the upper part of the top screen and then shaken down. The large potatoes passing over the top screen are diverted into one sack and those passing through the upper screen and over the lower go into another sack. One man drives the horse and operates the sorter while another sees the sacks and assists in loading the wagons. One digger with the necessary crew of men and teams can harvest from three to four acres a day.
