No literature is worth discussing in her view, unless it was written about something of human consequence and unless it means something for us here and now. Whatever author and whatever subject she treats, it is always in terms of health, optimism, and idealism for the arthyrehal and also of social ideals, of brotherhood, and of human progress.

People who come to be entertained by Miss Hamilton are not disappointed. Her audiences prove this by increasing from night to night wherever she gives a series. Improving Egypt.

Egypt has drainage problems as well as irrigation ones. Just at present the Egyptian government is pumping out Lake Marcotis, a sheet of shallow, beackish water in the extreme north of the delta, at the back door of Alexandria. About a million acres of cultivable land will be reclaimed by this work, though not all at the same time. Other drainage projects of equal magnitude will be taken up later.

liere, as in so many other cases, the Anglo-Egyptian government is following in the footsteps of the more enlightened Pharaohs and Ptolemies of ancient days. Lakes were drained in Egypt 3,000 years ago. Where oldville spent several days, this week time kings used the shadoof and the erpaid labor of fellahin, modern rulers employ steam and machinery; but the end almed at is the same.
