WEND SWIFT hair blows across her dark glasses as Greta Garbo reaches Paris for a brief visit before flying to New York. Reporters, inquiring about her plans, received a customary reply, "I have nothing to say."

Air Force Stages Another Daring Flight Into Space

WASHINGTON (AP)—The Air Force has staged another in its series of daring piloted flights into space, this time to an altitude of almost 24 miles.

Capt. Iven C. Kincheloe, 38, who piloted the Bell X-2 rocket plane to that height, ventured twice as high as the altitude at which without protection, a man's blood would boil, bringing instant death.

Secretary of Defense Wilson declined, at a news conference Thursday, to confirm published reports that Kincheloe, probing heat and altitude problems of supersonic flight high above Edwards Air Force Base, Calif., had piloted the X-2 to an unprecedented altitude of 124,000 feet—23.85 miles—late in August.

Wilson also refused to confirm similar unofficial information released in New Orleans early in August that Lt. Col. Frank K. Everest Jr. flew the X-2 1,300 miles an hour at Edwards last July 25.

Wilson only would say "I think I could say that it has flown higher and faster than any other aircraft."

Wilson observed that with people talking about Russia "closing the gap" between U. S. and Soviet air power, "If we yap about everything we do the gap will be closed."

The X-2 has wings and tail of stainless steel and a body of the nickel alloy K-model, to give it greater resistance to the heat.

It is borne aloft by a B-36 mother plane and launched at about 30,000 feet.

The Curtiss-Wright rocket engine has the power output of a Navy cruiser steaming at high speed.

Because centrifugal force, at its high landing speed, would tear wheels apart, the X-2 lands on skid gear.

It was built by Bell Aircraft Co. of Buffalo, N. Y., and has been flying for the Air Force for two years.

Delta Air Lines Places New Model Plane In Service

MIAMI (AP)—(AP) Delta Air Lines has placed in service the first of a \$4,800,000 fleet of eight Convair 440 Metropolitan aircraft equipped with Collins airborne weather radar, E. H. Bishop, Miami District Sales Manager, has reported.

The new twin engine, pressurized 44-passenger transport is a faster and quieter version of the popular Super Convair 440, now in use by major airlines of the world.

Special sound proofing and a new type muffler give the Metropolitan the quietest cabin of any modern airliner.

Powered by two 2,500 horsepower Pratt & Whitney piston engines, the Convair 440 can take off and climb to more than 7,000 feet on one engine with a full load, if necessary. The plane has a normal cruising speed of 370 miles per hour.

Delta placed orders last year for eight of the new models which, with spare parts, cost \$4,800,000. Deliveries will continue into early 1959. The plane will be integrated into regular schedules over Delta's domestic system as they are delivered.

FRUIT FLY TRAPS GAIN BANGOROUS TO BUREAU
LAKE ALFRED (AP)—The State Plant Board says Mediterranean fruit fly traps hung in 10 Florida counties are dangerous to humans.

The board said it made the announcement because 171 of the traps have been stolen or broken into. The traps contain a concentrated insecticide.

Therm-O-Tane Invites Public To Opening

Doors will be officially opened tomorrow morning at 9 o'clock at the Therm-O-Tane Gas and Appliance Co.'s new \$25,000 showrooms, offices and warehouse, recently completed at 414 W. 9th St.

The general public has been invited to attend the all-day event, according to C. H. Robertson, vice president of the Therm-O-Tane organization.

"Our faith and confidence in Sanford, its continued growth and expansion, and the future of the entire Seminole County area, prompted us, of the Therm-O-Tane Gas and Appliance Co., to invest in this brand new ultra-modern building," said Robertson as he announced the final details of the formal opening.

"Here in our new location, we will have an opportunity to show our customers the very latest gas appliances for the home and business," Robertson commented. "The homemaker and homeowner can choose from ranges, water heaters, refrigerators, washers, dryers, space heaters and floor furnaces."

A special eight-page section of today's Sanford Herald is devoted to the Therm-O-Tane Gas and Appliance Co. formal opening tomorrow.

The history of Therm-O-Tane Gas and Appliance Co., as well as a picture display of the new building, is featured in Section B.

Mayor F. D. Scott will cut the ribbon tomorrow morning at 9 o'clock to throw open the doors of the Therm-O-Tane Gas Appliance Co., said Robertson.

Through the day we will give away valuable merchandise including a Dixie Range, A. O. Smith Perma-Glass 30-gallon Water Heater, Dearborn Hobo Chef, Warm Morning Space heater, Newton Inbuilt mixer, blender, and sharper, ice service set, and two radiale space heaters.

"In addition," Robertson said, "we are giving away an eight-opp carafe every hour after 9 o'clock."

Recalling the history of Therm-O-Tane Gas and Appliance Co., Robertson said that the company was originally incorporated in May 1947 with R. F. Nicholas as president and himself as vice president.

"We considered a number of other places to locate our firm but decided that the best possibilities for growth and our particular business existed in Sanford," he said.

Therm-O-Tane Gas and Appliance Co. opened business on June 1, 1947 at the corner of Fourth St. and Pine Ave., employing three persons. After one year's operation a branch was opened in Orlando with Nicholas becoming manager of that office and Robertson remained in Sanford as manager.

Customers and business have increased each year and now the staff of the local Therm-O-Tane Gas and Appliance Co. numbers 33. The area which Therm-O-Tane serves includes all of Seminole and Orange Counties and as far as Orange City in Volusia County.

Modern facilities at Therm-O-Tane Gas and Appliance Co.'s new showrooms, office and warehouse include an off-street parking lot, 2,800 feet of floor space for display and warehousing, plate glass display windows, acoustical kilnoise plester, indirect lighting, and the very latest in modern decorative design.

"We will be happy to see all our customers and friends at our formal opening tomorrow," Robertson said today, "and we all go will be happy to have those with whom we are not yet acquainted come by to see us and join in the celebration of our formal opening."

Librace To Play At Favorite Night Club Of Princess

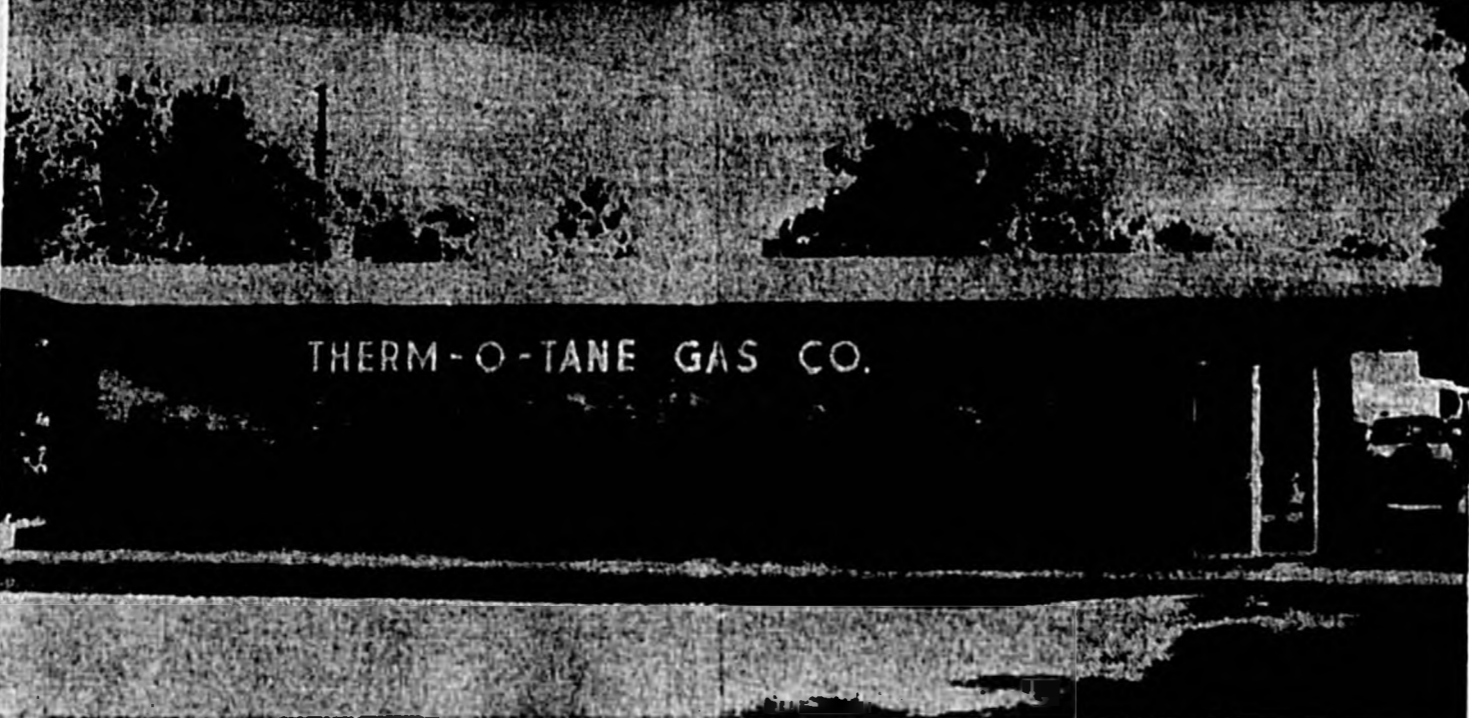

LONDON (AP)—One of Princess Margaret's favorite night clubs, the swank Cafe de Paris, said today it has signed Librace to appear there for a week "at the highest salary we ever paid anyone."

One of the club's managers, Maj. Neville Willing, said the night spot had only one regret:

"It's just too, too bad that Princess Margaret won't be in London. She's off in Africa, as you know, but I know that she's an admirer of Librace and will miss missing him."

While Librace was testing the acoustics at his Royal Festival Hall—where he'll give a series of concerts beginning Monday night—a group of 30 young men paraded outside chanting:

"Hate, hate, hate—we hate Librace."

THERM-O-TANE GAS CO.

FORMAL OPENING of the Therm-O-Tane Gas & Appliance Co.'s showrooms, warehouse and office, located at 414 W. Ninth St., will be held all day tomorrow. The building is at the corner of 9th St. and Laurel Ave. (Photo by Jameson)

Seminole Raceway Would Increase County's Economy

By RHODES CONKLIN

Seminole Raceway at Casselberry, the historic harness horse training center, is on the verge of a re-activation that may be expected to pump almost a million dollars annually into the area's economic bloodstream.

This is big business. The business of training and racing harness horses is today an industry.

Whether this industry takes root and transforms Seminole County's renowned raceway into the Saratoga of the South depends entirely upon outcome of the balloting on Nov. 6.

At that time Seminole voters will approve or disapprove establishment of this vast new income-producing industry.

If voters say "yes" to allowing harness racing, then it can be expected that officials of Seminole Raceway will proceed with their plans for expanding the raceway to turn it into the winter-time mecca.

Just how re-activation of the raceway can be expected to build a million-dollar industry, is easy to explain. And this in no way takes into consideration any income from racing itself—although the county will gain from that too.

The million-dollar income, all new money introduced into the county from outside sources, will come only from enlargement of the track facilities and the large number of horses and people it will bring, both directly and indirectly.

Experience shows that some 300 employees will be required to care for and train the 600 trotters and pacers which will be stable at Seminole Raceway. This includes trainers, assistant trainers, caretakers, blacksmiths, veterinarians and others on the payroll of the several stables using the plant.

Almost every stable varies in wage and salary set-up, but according to a survey, caretakers (they provide care for the horses) average about \$30 weekly. Assistant trainers receive a minimum of \$100 a week and trainers draw stipends in the three figure bracket.

A conservative average of \$75 weekly for all employees engaged in training of the horses, figures at \$22,500 total weekly payroll. Stretched over a 26-week period, which is about the length of time most trainers and stables remain, the payroll climbs to a whopping \$450,000 for the season.

But payroll alone is but part of the picture. Feed bills for the horses run to about \$3 per day per horse. Blacksmiths and veterinarians are kept busy. Even a horse in good condition can run up a \$15 bill annually for vet service. (Continued On Page Ten)

Flossy Uncovers Skeleton On Beach

FOIT WALTON BEACH (AP)—A badly weathered skeleton uncovered on the beach by hurricane Flossy has been taken to Crestview for study.

Sheriff Ray Wilson said he asked the Florida Sheriff's Bureau to help in attempts at identification.

Deputy Ralph Hendrix and Mrs. Hendrix found the skeleton Tuesday while checking water and wind damage on Santa Rosa Island. Its skull apparently had been dented by a heavy blow or a fall, he added.

The officer said the bones were dark brown and appeared slightly petrified. The skeleton was lying face up with arms outstretched in the way that probably had a grave.

Herald Will Sponsor Letter Writing Contest

In observance of National Newspaper Week which begins Monday Oct. 1 and continues through Oct. 8, The Sanford Herald is offering 17 \$25 Savings Bonds to school children of Seminole County who are Fifth Grade students or above.

One child from each of the 17 schools in Seminole County will receive a \$25 Savings Bond in recognition of his or her ability to tell what a newspaper does for the community.

Letters will be mailed this afternoon to the principals of the Seminole County Schools with students eligible to enter the contest.

Fred Perkins, Editor and Publisher of The Sanford Herald, in his letter to Seminole County School principals said: "We will award a \$25 Savings Bond to the student from your school who submits the best letter, not more than 200 words in length, on the subject 'What A Home-town Newspaper Means To Our Community.'"

Prominent Seminole County citizens will serve as judges in the competition and letters will be judged on the basis of neatness, material content, and sincerity.

Those who have been selected to serve as judges are T. E. Tucker, President of the Florida State Bank; Mayor F. D. Scott, J. H. H. Othman, Jack Hall of Yowell's, and Mrs. Margaret Golt of the Seminole County School system.

The letters are to be submitted to the office of The Sanford Herald no later than 5 p.m. Friday, Oct. 6.

All of the winning letters will be published in The Sanford Herald as soon as the judging is completed.

Awards to the winning students will be made at appropriate times at the suggestion of each school principal.

School children eligible to participate in the competition for the best letter will be from Seminole High School, Sanford Junior High School, Lyman School, Sanford Grammar School, Pinecrest School, Lake Monroe School, Oviedo School, Wilson School, St. Luke's Christian Day School, and All Soul's Parochial School.

Others are: Crocus Academy, Goldboro School, Hopper Academy, Midway School, Oviedo Colored Elementary School, Lake Monroe Colored School, and Rosswald School.

The Sanford Herald Publisher and Editor, Fred Perkins, said that in The Herald's observance of National Newspaper Week, employees of Sanford and Seminole County's newspaper will receive their weekly pay in SILVER DOLLARS tomorrow, Sept. 28 and again on Friday, Oct. 6, so that local citizens will learn what part the local newspaper plays in the community's economy.

"There will be 1,900 silver dollars ringing and turning over in Sanford tomorrow and next Friday," Perkins said.

Suspicious Area Is Located Today Southeast Of State

MIAMI (AP)—A "suspicious" weather disturbance developed today far out in the Atlantic Ocean and began moving westward under conditions which forecasters said are "right" for the birth of a new hurricane.

A bulletin from the Weather Bureau at San Juan, Puerto Rico, said the disturbance was centered at 8 p. m. EST about 80 miles south-southwest of Martinique in the Windward Islands, or about 1,630 miles southeast of Miami.

There was a weak circular movement, with winds up to 30 miles per hour in squalls over a small area near the center. The disturbance was moving westward at about 17 m. p. h. and will move into the Caribbean sea today.

"No intensification is expected" during the next 12 hours, the San Juan bulletin said, but hurricane hunter planes were winging toward the area and forecasters in the Miami Weather Bureau noted that this is the time of year when most great hurricanes are born.

Small craft from Grenada in the Windward Islands to Guadeloupe in the Leeward group were warned to remain in port for the next 12 hours. These chains of islands separate the Atlantic from the Caribbean.

The storm was discovered as hurricane Flossy, sixth tropical disturbance of the year, moved through North Carolina after a long voyage from the Gulf of Mexico.

A. Lee, S. Jones Entertain Mt. Dora Audience Tuesday

By MRS. RAYMOND MORRIS

The ever increasing popularity of Sanford's diminutive entertainers, Allyson Lee and Suzanne Jones, was demonstrated again when they scored a triumph before more than 100 Lions and guests at the Mt. Dora Lions Ladies party Tuesday night.

Joe Welmer, program chairman of Casselberry Lions arranged for the girls' appearance at Mt. Dora with M. C. Reid, program chairman of that club.

After presenting a complete program for the affair, including six piano selections and four vocal numbers, Welmer said the enthusiasm for the talented youngsters was so great that they were persuaded to remain for more entertainment at the conclusion of the party.

Dave Lundquist, of Orlando District Governor of 258, commented that it has been his pleasure to hear Allyson and Suzanne on three occasions at Lions club affairs. He was loud in his praise for them, adding that they get better all the time.

Allyson's program included Chopin's Fantasia Impromptu, Debussy's Clair de Lune and Bumbly's Boogie. Suzanne sang On a Kiss, by Romberg, Love is a Many Splendored Thing and an original composition entitled River of Dreams, written and composed by Welmer.

Allyson is the 12 year old daughter of Mr. and Mrs. John L. Lee and Suzanne, age 13, is the daughter of Mr. and Mrs. C. O. Jones.

Babe Loses Fight Against Cancer

GALVESTON, Tex. (AP)—Babe Didrikson Zaharias, the greatest woman athlete the world has known, died today after a stubborn battle with the one competitor she couldn't beat—cancer.

Into her 42 years, she packed athletic triumphs that began with AAU basketball tournaments, included AAU track, then the Olympics and finally the golf courses of the nation.

Almost from the start she was known affectionately to sports fans as The Babe, a tag hung on her by her family.

She showed versatility early. She could lick any kid in the block, won a marble tournament, and was first-place winner in a harmonica contest.

Cancer struck in 1933 just after she won the golf tournament named for her—the Babe Zaharias Open in Beaumont.

After she underwent surgery that time, she came back to win seven golf tournaments.

But the cancer couldn't be stopped and her life became a succession of operations and days following days in a hospital bed.

For months, the whole world knew that death soon would reach the superb athlete. At times, her husband, George Zaharias, could hardly talk to Newman as emotion gripped him.

At one time, when her life was fading, a spark of competitive spirit flamed again, and from her hospital bed she shook her fist and declared, "I'll beat this thing yet."

It was not until Sept. 23—a Sunday—that the hospital finally admitted the end was inevitable and near. A spokesman said this was possible because the Babe had lost interest in newspapers and no longer listened to her radio. They had avoided frank statements earlier for fear they would depress her.

Almost to the last, Babe put up a courageous show. But friends were sick at heart to see the decline of the once-great athlete. When remembrance of her specific feats had faded, sports fans still remembered her gusty outlook on

life. The big man paced the corridors all during the night. He was in and out of her room as he had been his

Krider Named CofC Manager

McKibbin Announces New Head

John Krider, Sanford City Commissioner elect and president of the Florida State League, was named manager of the Seminole County Chamber of Commerce this morning by Clifford McKibbin, president-elect of the chamber.

McKibbin said this morning that "The incoming Executive Committee of the Seminole County Chamber of Commerce has spent many hours considering applicants for the position as manager of our local Chamber of Commerce."

"In making the announcement that Commissioner Krider has been chosen for one of our community's most important positions," McKibbin said, "we feel that the Chamber of Commerce has now taken a positive step toward progressiveness and an aggressive step toward making the Seminole County Chamber of Commerce the effective organization to which local citizens have looked forward."

Krider is indeed happy that Mr. McKibbin has accepted his offer to become the manager of the Seminole County Chamber of Commerce, a position which has been vacant for about 30 days," McKibbin said this morning. "With his strong enthusiasm for Sanford and Seminole County, there is no doubt we have secured the services of a man who will do much to make the voice of Sanford and Seminole County heard far and wide."

Krider said this morning that he will take over as Manager of the Seminole County Chamber of Commerce next Monday morning (Oct. 1) and by Oct. 15 "will be in full swing."

"I have given deep and careful consideration to the accepting of the offer to become manager of the local chamber of commerce and sincerely appreciate the confidence and faith that has been given me," Krider said.

"It will be several days before final plans for next year's Chamber of Commerce aggressive plans will be completed and ready to be announced," he said.

"I want to solicit the full cooperation of every citizen of Sanford and Seminole County in making the 1956-57 year for the Seminole County Chamber of Commerce the biggest year in its long time history," Krider commented.

"Mr. Krider's close association with Sanford and Seminole County's biggest projects, his thousands of friends and associates in national, regional, state, county and city circles will stand much toward making him a most important cog in the programs we hope to get underway this year," President-elect Clifford McKibbin said today.

Commission Calls More Witnesses To Support Stand

WEST PALM BEACH (AP)—The Florida Railroad and Public Utilities Commission called more witnesses today to support its stand that the public interest requires continued independent operation of the Florida East Coast Railway.

Seven St. Augustine residents testified at the Interstate Commerce Commission hearing yesterday that they feared the city would suffer a serious economic blow if FEC should be taken over by the Atlantic Coast Line Railroad and the offices moved.

A. H. Tebault, publisher and general manager of the St. Augustine Record, said loss of FEC and East Coast Hospital, representing four million dollar annual payroll would be "a dangerous blow."

Tebault called FEC No. 1 industry in St. Johns County and said loss of rail payroll and employees "would be a calamity for this area from which I do not feel it would recover during my lifetime."

Funeral Tomorrow For R. B. Monroe

Richard Bennett Monroe, 62, died suddenly at his home on Celery Ave. shortly after midnight this morning.

Mr. Monroe was born on Jan. 30, 1893 at Ty Ty, Ga. He had lived in Sanford for over 30 years and had engaged in farming up until 1954. Mr. Monroe was one of the pioneer celery growers of the area and for the last two years had operated a nursery at his home on Celery Ave.

Mr. Monroe was a member of the First Methodist Church of Sanford.

He is survived by his wife, Mrs. Mabel Cowan Monroe, Sanford; one sister, Mrs. Louie Shaffer, Houston, Tex.; a nephew, J. Leonard Monroe, New Smyrna Beach; and several other nieces and nephews.

Funeral services for Mr. Monroe will be held tomorrow afternoon (Friday) at 3:30 at the First Methodist Church with the Rev. Milton Wylst officiating.

Burial will be in Lake View Cemetery.

Active pallbearers will be: M. L. Wright, Francis T. Moriwether, Charles Lawson, C. M. Flowers, Edmund Howe, and W. P. Chapman.

Honorary pallbearers are: Sam Pickens, E. K. Brady, R. W. Ware, Claude Harnden, Dr. J. N. Tolar, Clark Lowmyer, John Lowmyer, Barney Beck Sr. and Charles J. Moriwether.

Mobile Therapy Unit To Be Here Next Tuesday

Next Tuesday from 9 a.m. to 5 p.m. the Mobile Therapy Unit of the Florida Society for Crippled Children will be at Touchton's corner in Sanford in connection with a survey now being made on handicapped children and adults.

Don Batteries, Director of the Unit, says that the purpose of the visit here is to determine the number and types of crippled persons who are not receiving physical therapy and who would be helped by regular treatment.

Members of the Seminole County Medical Society are cooperating in the one day schedule of the unit in Sanford according to the President Dr. Vincent Roberts.

Also assisting with arrangements are Dr. Terry Bird, Seminole County Health Officer and Mrs. Harold Appleby, longtime Easter Seal Chairman of the Central Florida Society for Crippled Children.

Any questions concerning the visit of the unit to Sanford should be referred to Dr. Roberts, Dr. Bird, or Mrs. Appleby.

Former Resident J. M. Vickery, 69, Dies In Georgia

J. M. Vickery, 69, died at his home in Hartwell, Ga., yesterday morning.

Born in Hartwell on Feb. 21, 1887, Mr. Vickery moved to Sanford in 1918 and for many years served as a deputy sheriff under the late Sheriff C. M. Hand. He moved back to his former home about 15 years ago.

Funeral services will be held Friday at 3 p. m. from South Brothers Funeral Home in Hartwell, Ga. and burial will follow there.

Surviving are six children including two sons, Philip M. Vickery of Arlington, Tex. and J. W. Vickery, Sanford; four daughters, Mrs. V. C. Maninger, Sanford; Mrs. J. B. Lee of Latham, N. C.; Mrs. Michael Dugan of Katocton, N. Y. and Miss Theo Vickery of Key West, 10 grandchildren and five great grandchildren; also a number of nieces and nephews.

Tito, Khrushchev Leave For Surprise Visit To Russia

BELOGRADE, Yugoslav (AP)—President Tito left today with Soviet Communist party boss Nikita Khrushchev for a surprise visit to the Soviet Union.

Tito was accompanied by his wife Jovanka, Vice President Aleksander Rankovic and Djuro Pucar, chairman of the state of Bosnia-Herzegovina and a member of the Yugoslav Communist party Politburo.

Like Khrushchev's equally unexpected trip to Yugoslavia, Tito's latest visit to Russia was described as a vacation. The official Yugoslav news agency Tanjug said the party left the military airport of Batajina on a special flight plane this morning and will spend several days resting on the Black Sea coast.

Khrushchev arrived in Belgrade Sept. 19 and got a private official welcome from which all outsiders were barred. Officials insisted his visit was only a holiday, but most observers believed he came to strengthen further the rapport with the Soviet have been forging with Tito.

Weather

Generally fair through Friday. High today 71-80.

Federal Reserve Board's Control Of Money Affects Individuals Also

Just about everyone has heard of the Federal Reserve Board. Most people probably know in a vague and sort of general way that this body, which is entirely non-partisan and non-political, has great powers of control over the nation's money supply. It is equally probable, however, that many of us feel that the Board's policies have little if any influence on the life of the average man, even right here in Sanford and Seminole County, and that they are of direct interest only to large financial and industrial interests.

That feeling—as numbers of people are now learning at first hand—is gravely in error. It is true that what the Board does in limiting or expanding the money supply has a powerful impact on business. It is also true that it has an equally powerful impact on individuals. A feature article in the September 14 issue of U. S. News and World Report tells the current story in clear and concise fashion.

For some time the Board has been pursuing what is known as a "tight" money policy. The reason, as U. S. News expresses it, "... is to make money less abundant and more expensive and thus discourage borrowing. Borrowed money, when spent, adds to demand for goods and for labor—both sometimes in short supply. The result is pressure for rising prices that government officials want to prevent." In other words, it is an anti-inflation policy.

Then U. S. News and World Report provides several illustrations of how the "pinch money" will affect various people and groups as a practical matter.

The installment car buyer—a classification which seems to include the majority of us—is encountering some changes. There is plenty of credit available, but larger down payments are asked, and the number of months allowable for paying the balance is being reduced. That means large monthly payments.

Home buyers, used to limitless credit at low rates of interest, will also find that things have changed. Larger down payments are required, and in many cases amortization time is shortened. On top of that interest rates are generally up—by a full one per cent.

A county, embarking on a school-building venture financed by bonds, finds the market

less favorable. It has to offer a higher interest rate. Over a twenty year period the increased interest costs on a \$10,000,000 issue could amount to \$1,000,000.

Businessmen, needing money for inventories and plant expansion are in a similar fix. Interest rates are up, by about one per cent. On a big, long-term issue that may involve \$30,000,000 in additional interest costs.

Even the U. S. Treasury is not immune from the impact of "tight money". In World War II days, it used to issue 91-day-bills—of which it sells \$1.5 billion worth a week—at an interest rate of three-eighths of one per cent. Now the rate is 2.7 per cent.

And now here is where it strikes home the hardest in our area of the country for we are experiencing the impact—a builder with plans for two hundred homes may find loans both harder to get—as well as more expensive. In a competitive market, that darkens his profit potential.

So it goes. As the magazine puts it, the aim of the men on the Federal Reserve Board is "... to supply an amount of money considered adequate for normal needs, but to keep the supply tight enough to discourage lots of undertakings that can be postponed."

Fire Prevention Week

A little girl was curled up on the bed in a spare room one afternoon not long ago, reading a storybook. When her mother called, she left the room—and forgot to turn out the light. It fell onto the bed. The lampshade rolled off; the hot bulb nestled on the covers.

Several hours later, the little girl's father went up to the spare bedroom to have a look at a cabinet he was refinishing. When he opened the door, thick grey smoke poured out into the hall. He yelled to his wife; she called firemen.

When they came, they found that the hot light bulb had burned its way down through the covers and mattress, onto the rug below. A bit of the rug was glowing; the varnished floor beneath it was blistered. Tragedy had been barely averted.

We tell the story as a reminder to the myriad unexpected ways in which a home fire can start. This is the time of year when the fire hazard begins to rise to its peak again.

Preventive measures, and alertness, will curb the danger.

We believe that Fire Prevention Week is just a mere "days" ahead of us, a week during which all of these dangers of "destruction by fire" will be vividly brought before us.

"Fire Prevention Week" is an annual project of the Seminole County Junior Chamber of Commerce which this year will be observed during the week of Oct. 7-13.

We in America perfected the world of machines—and it was rapid perfection. Only about 50 years ago half the work in our country was done by animals and men. Today, mechanical power does virtually the whole job, and yet we have been hitting new peaks in total employment.

YOU'RE TELLING ME!

By HOYT KING
Central Press Writer

VICE PRESIDENT NIXON says Republican candidates will talk more about themselves than about their Democratic foes in the campaign. Apparently the GOP decided if you can't say anything good about someone it's better not to say anything at all.

Nixon says "our concentrated campaign" will emphasize accomplishments. Democratic strategists feel that's what will make it concentrated.

Adlai issued a 25-page statement analyzing the Republican platform plank by plank. In short, he finds it unreliable in the matter of world.

The Democrats also attack the Republican record in the field of big business. They seem to think the GOP platform is made up of boards rather than planks.

Both Ike and Adlai congratulated the League of Women Voters on the 36th anniversary of woman suffrage. You don't catch them underestimating the power of a woman voter.

After Adlai watched the Republican convention it was announced he would do 80 TV shows in his campaign. He figures when you've found a weak spot, hit it.

Besides, with TV a political candidate has two audiences. One on purpose and the other too tired to get out of the chair.

Why Comedians Wear Glasses

BY HAL BOYLE
NEW YORK (AP) — Ever wonder why so many comedians wear glasses?

A Broadway cynic might say the reason was "so they can make their audience look larger." But if this were true most comedians would wear hearing aids, too, in order to convince themselves they were getting louder laughs.

Phil Silvers says this is why he first started wearing specs as stage props 25 years ago: "I learned people like a sign of weakness in a performer. It makes him seem more human, and gives them more of a fellow-feeling."

Phil wore only empty frames when he originally donned his trademark glasses as a young burlesque comic. But now, at 44, he finds it convenient to wear lenses in them. He finds they are a great help in reading the fine print on racing forms—and to see where he is going.

Just where he is going is very much on Phil's agile mind these days. After 30 hectic years as an entertainer, he feels he is in the position of a sophomore at the moment.

Before the opening of the 1955 television season CBS gambled nearly a million dollars on a new network series called "You'll Never Get Rich," starring Silvers as Sgt. Bilko.

They hadn't even lined up a sponsor, but their goal was to end the eight-year reign of NBC's Milton Berle as TV's Tuesday night king.

Phil succeeded where Red Skelton, Red Buttons, Gene Autry and Frank Sinatra had failed. He dethroned Millie, became the comedian of the year. But this year?

"I'm a sophomore now," said Phil, wryly. "And the brickbats are sure to come."

But Silvers, while lacking the supreme self-confidence of the ordinary Harvard sophomore, in

News Of Men In Service

FORT DIX, N. J. —Private Henry A. Brown Jr., of 18 17th Avenue has arrived here and has been assigned to Co. "W" 2nd Trg. Regt. of the U. S. Army Training Center, Infantry, for eight weeks of basic training.

His parents are Mr. and Mrs. Henry Brown of Sanford. He was formerly employed by L. Bamberger & Co.

The 2nd Trg. regiment will receive instruction in general military subjects, Infantry weapons and tactics, as well as character guidance programs under the post chaplain.

After the initial eight weeks, he will be given a two-week leave and then receive eight more of advanced Infantry training, be enrolled in one of the specialist schools conducted here or be transferred to another Army post for training in one of the Army's technical schools.

Prior to entering the Army, Private Brown attended Croom's Academy and Florida A & M University.

SIGN LANGUAGE
BILLINGS, Mont. (AP) — His ability to read sign language cost a defendant on trial in police court for public intoxication a 10-day suspended sentence.

The man wore a hearing aid, but apparently it wasn't working. He gave Judge Ode Packwood only a look of perplexity in answer to the shouted question: "Were you drunk?"

Finally, the court clerk raised an imaginary bottle to his lips and looked inquiringly at the defendant. He grinned and nodded his head vigorously.

Three out of four Americans believe that all people should buy United States Savings Bonds. Most common reasons: "good investment" and "a good way to save."

IT'S THE '57 INNER FORD' IN ACTION

Mr. Horsepower! That's the title this '57 Ford has already won. With up to 248 hp Ford simply flattens mountains that would knock the wind out of any other car.

You're seeing why the '57 FORD will "take nothing from nobody"

"Gangway!" You'll say as you flash ahead in the new kind of Ford for '57. For Ford's Silver Anniversary year of building V-8's, you'll have more skedaddle than any other low-priced car ever... up to 248 hp. And wait till you take this split-fire over the hills and down the straight-aways. It's fun-driving at its finest!

But more seat is only half the powerful difference in the new Ford. There's more savings, too. Ford engineers have built an easier breathing engine for fewer gas stops. Ford's new low silhouette carburetor teamed with the new higher compression combustion chambers, new giant intake valves and new king-size manifolds bring you more zip on a slim-size gas diet.

In the new kind of Ford you'll "take nothing from nobody"—except from another Ford, perhaps. Action-Test this power sensation at your Ford Dealer's Wednesday. And just wait till you see the beauty this new power's wrapped in!

Six or V-8, the going is great!

V-8
You can have Thunderbird GO up to 248 horsepower strung in any 1957 Ford model you choose.

SIX
The new Millage Maker Six, America's most modern six, delivers 164 hp; is available in all models.

Your Tomorrow Starts with a New Kind of Ford—see it Oct. 3rd

Seminoles Begin 4th Day Of Rough Tumble

Minor injuries, aches, pains, and bruises began starting the morning after the game as the Sanford Seminoles go into their fourth day of rough and tumble work-outs. But a plague of sore muscles is expected as a normal thing around football teams, especially when there's a purpose in the roughness.

The purpose of the roughness in the workouts at Seminole High is to make a winning ball club. After being dumped hard by Cocoa to the tune of 27-7, the Sanford Seminoles are determined not to have themselves labeled a "dead" ballclub.

Only one player has been lost in the season due to the roughness. Joe Rusal hit the sidelines yesterday for the remainder of the season due to a recurrence of last year's knee injury. But Rusal will still be traveling with the squad. His talented toe has been taking the Seminoles out of the hole and he will still handle the punting chores for the warriors.

Terry "The Bull" Gombel, this week's selection for Gridster of the Week, was sent to early showers yesterday after he bruised his shoulder in the long session of hard contact. There are no broken bones, however, and "The Bull" is expected to do more ploughing before the end of the week.

This week has been a terrific strain on the boys. They are beginning to drag now, but by next week the boys should be in shape. One of the great faults in the Cocoa game was physical conditioning. The boys just were not up to par with the keenness of the Cocoa club. Even though the boys are exhausted, they are beginning to hit a little harder. With a week-end to rest the griders should be running at top speed next Monday as the roughness tapers off and offensive fundamentals emphasized.

The mentor staff hinted today that there may be some changes in lineup if more desire isn't displayed. "We're hurting most in the backfield now," coach Bill Fleming said. "Our men were not in shape and now they're exhausted. What we must all realize is that when we're exhausted we can't possibly be in shape. And they can't stop and rest every time they get tired. To be in shape and stay in shape enough to play Orange Belt ball they'll have to go all it hurts and then rest."

mented, "It's the stuff that makes a ball club."

In an interview this morning coach Fleming was asked about his opinion of the Sanford Seminoles and their chances in the Orange Belt Conference, he said, "I doubt seriously if we could beat Cocoa at any time during the season. Their backs are fast and experienced, their line is fast, and experienced, their line is fast, mean, and also experienced. But that's past now, and we have nine games ahead of us. We misjudged our potential strength on the basis of pre-season practices. We don't have the depth we thought we had in experienced personnel."

"We're having a rough and tumble week to try to find the boys that will help us this season and who really want to play. They'll be the ones we'll depend on for the other nine games."

"We know we will improve over last week, and we think we'll improve enough that the boys who come through this week will have the desire to meet Apopka Friday week and avenge last week's game."

"The workouts now are rough on the boys and rough on the coaches but it is necessary for the advancement of the club. The boys won't be playing ANY games rougher than this week's scrimmages."

Fleming said he would continue the rough schedule through the remainder of the week, emphasizing defenses and offensive pass patterns. Heavy contact will be continued through next Thursday, but the length of time will be considerably reduced and offense will be emphasized.

SINKING CALLED 'AN ACT OF GOD'

JACKSONVILLE — The sinking of three lives apparently was "an act of God," a Coast Guard investigator said yesterday.

Cmdr. John F. Thompson described as "unfathomable" a sudden 20 mile an hour squall which overturned the vessel in St. Augustine Sound between Brunswick, Ga., and Jacksonville on Aug. 20.

W. G. Hayden, A. J. Rongucki and V. H. Myrick, crewmen, drowned in the sinking. Capt. Elwell D. Crews, and Mate R. A. Albert escaped.

Three Is Magic Number For Braves

ST. LOUIS — The magic number is 3 for the confident Milwaukee Braves as they await the opener of their final three-game series with the St. Louis Cardinals tomorrow night.

"The combination is 3" said Manager Fred Haney, "three Milwaukee victories. We're not counting on Brooklyn losing. We've got to win 'em all."

"There has been no question in our minds but that we feel we can do it. And we're not ready to settle for any tie or playoff. We want to win it outright."

Haney huddled with Charley Root, his pitching coach, to study charts of pitching performances against the Cardinals before naming his pitching selections. Bob Buhl was expected to work the opener, probably followed by Warren Spahn Saturday night.

The Braves, who have displayed no great surface enthusiasm down the stretch, happily discussed Brooklyn's defeat by Robin Roberts and the Phillies which gave them a one-game edge.

"I never thought I'd be rooting for Roberts," said shortstop Johnny Logan. "And how about that 'Boner' shortstop Roy Smalley of the Phils, an ex-Brave who delivered a timely hit against the Dodgers."

"We're in good shape," said catcher Del Crandall, "but we've still got to win our games."

"It probably will go right down to Sunday," said Warren Spahn, the Braves' 20-game winner and star of their stretch drive. "I think it's better to go into a series right off a hot pennant race."

A recent survey shows most people save for the proverbial "rainy day." In the past four years, however, more and more people save with positive objectives in mind, such as buying homes and durable goods or providing for retirement.

Ansley's O. B. C. Analysis

The Old Prognosticator dons his cap and gown and gets down to work.

Two very important Orange Belt Conference games are slated for this Friday night. The top billing goes to Cocoa, where they entertained Winter Park in the game that may well determine the OBC championship. Winter Park boasts the biggest line in the conference, and linemen Bob Fox, Don Chambers, and Jim Washburn are not slow-pokes. Quarterback John Jans called an excellent game and turned in a fine performance last week in leading the Panthers to an easy Smyrna eleven. Cocoa will be considerably outweighed by the hefty club from Winter Park, but they have an aggressive club that wants to play ball—and they have experienced players with good football sense. Dave Williams and Willie Harper are the big guns for the Tiger backfield with Jim Jim Earquis, Cocoa's 200 pound tackle is no slouch, and will meet the best of the Panther line. COCOA GETS THE NOD—about one touchdown.

Both Leesburg and Apopka suffered stunning defeats last week. Leesburg was taken to the cleaners by the powerful Ocala Wildcats 26-6. But until the time that Leesburg's Eddie Parber was pulled from the game because of injuries, it was a close game. Yellow Jacket Ivan Roberts turned in a fine showing. Both of these boys are veteran starters, and are the nucleus of the Leesburg squad. The much improved Apopka Club was impractical in going down before Umatilla 21-7. A host of players showed good potential, however, and by mid-season the names Fox, Cousins, Clagburn, Chandler and King should be familiar in OBC circuits. But LEESBURG GETS THE NOD — it should be at least two touchdowns.

Melbourne stays out of the conference again this week as they play host to Vero Beach. The Bulldogs were blanked out by Ft. Pierce last week 20-0, but the score is not indicative of the game. The Melbourne backfield is well-manned by the experience of Corbin, Myers, and McGraw. Melbourne will be on the rebound and up for the game. MELBOURNE GETS THE NOD—by a touchdown or more.

Only two Lakeview of Winter Garden players' lives "in" the competition last week as the Devils were upset by Seabrook 20-0. Tommy Martin was a consistent ground-grinder, and Bud Crawford showed a lot of calm precision in his passing. They have good, experienced material, but it is expected that something is wrong with their drive and they're a "dead" club. Lakeview will be the host as KISSIMEE GETS THE NOD—but anything can happen.

Meet of the Sanford fans that will be taking to the road to see some of the Sanford Seminoles at future opponents are expected to be in Leesburg some Friday evening. After this week's open date the Seminoles travel to Leesburg to invade the Yellow Jackets.

More than half of all buyers of United States Savings Bonds purchase them through the Payroll Savings Plan.

Panthers Up'n Coming

The Crooms Academy Panthers started their season with a smashing victory over Melbourne last Saturday night under the watchful eye of head mentor Joseph E. Fair.

JOSEPH E. FAIR begins his third season as head mentor for the Crooms Academy Panthers. (Staff Photo)

Fair came to Croom's Academy as head coach three years ago, bringing a distinguished record with him. Since that time the Panthers have been an up and coming ball club. After one year of piloting the Crooms eleven Joe felt they were ready for a step up. So he made application in the "Big 9" conference. The Big 9 is the power of Florida colored football and includes such teams as Miami, Jacksonville, Orlando, Daytona, DeLand, Ocala, Melbourne, Palatka, Eustis and Hungerford. The Big 9 let the Panthers in on a two-year probation, to see if they were good enough to compete in that class play.

Last year, the Panthers came through with a 4-4 record; not bad considering the competition, and they hope to better their record this year. By all indications, Fair will realize his hope. Melbourne was smashed by the Panthers 21-7 last Saturday night, and Melbourne was rated as a better-than average Big 9 team. "This is our last year of probation," Fair said today, "and although we are not eligible to receive conference honors this year, we're gunning for a win in every game. We want to at least better last year's record."

Joe Fair, a Floridian, attended high school at DeLand, Florida and gave him a scholarship. He served as guard for the squad from 1947 through 1950. He was chosen the team's most valuable player, and that same season was selected All-American guard.

The professional football system contacted him and in 1951 he made commitment to the draft system of Canadian Pro Football. But the army got first chance at him.

In 1952 Joe was playing first string for the Ft. Hill, Oklahoma team. The Canadians won the Midwest Service Conference Championship that year, offering only one defeat for the entire season. That lone defeat came at the hands of S. M. U. in a close 6-0 battle. S. M. U. had a glorious year and went on to the Bowl.

Ft. Hill spelled the end of a football career for Joe. In a post-season exhibition game Fair injured a ligament in his ankle and was unable to accept a pro contract after being discharged. So Joe turned coach and came to Sanford.

MURRAY NANCE (Staff Photo)

JACK STOTKY (Staff Photo)

Line coach Bud Layer pointed out two men for special praise. It seems that Murray Nance and Jack Stotky played against each other in yesterday's scrimmage. Both refused to give an inch and it turned into a spirited man to man combat with a matter of pride involved. "We need more of that sort of thing," Layer com-

Next Week Is National Newspaper Week So We Are Paying Off In

SILVER DOLLARS

*The Sanford Herald
Wants To Know
How Far
A Silver Dollar
Goes?*

What Becomes
Of The
Sanford Herald's
\$1,900.00
Weekly Payroll?

Starting tomorrow and continuing for one more payday the Sanford Herald will pay its 28 employees, 1,900 round, shiny silver dollars.

We are hoping that this two-week trial will reveal, to some extent, what impact the Sanford Herald's \$100,000 annual payroll has upon the economy of Sanford and Seminole county.

We think we know where our \$100,000 annual payroll goes in this community. We think it goes to pay the landlord, the butcher, the baker, the insurance man and so on through the channels of trade. We think it "turns over", many times before it gets out of Sanford. And so, in an effort to find out, this newspaper is pay-

ing it's 28 employes—starting tomorrow and continuing next Friday—in round shiny, silver dollars. Nineteen hundred cartwheels each week for two weeks. We hope you'll keep them moving for eight days. keep them circulating at high speed through the business district...

Therm-O-Tane Gas & Appliance Co. To Hold Formal Opening Tomorrow

C. H. ROBERTSON, VICE PRESIDENT of Therm-O-Tane Gas & Appliance Co. with Mrs. Robertson who is Office Manager. Mr. and Mrs. Robertson are shown in the business and accounting office at Therm-O-Tane's brilliant new home on W. 9th at Laurel Ave. (Staff Photo)

Things Are Made From Use Of Gas

Countless wonders of gas help keep America's standard of living at its highest level in history. The magic blue flame is used to make virtually everything; from soup to nuts and even the kitchen sink.

Gas has 28,000 adaptations of more than 2,500 individual uses in the fabrication and production of almost every item required in the daily life of the nation.

In addition to its dual role as a raw material and a vital precision tool for such industries as food processing metal working, finishing and petro-chemical production, gas is also a major fuel in the generation of electrical power.

The versatility of gas provides millions with the best in food, clothing and shelter. Further, it contributes to their health and happiness at work and at play. And, in war or peace, gas keeps the country along with arms, ammunition and everything from jeeps to jets.

Food, of course, is the nation's No. 1 concern. While Americans spend more than \$75 billions a year for food, gas helps to produce, process and preserve it.

Starting at the farm, fertilizers made from gas derivations help the crops grow. Gas heat protects orchards from killing frosts and in arid districts, gas-fired engines pump life-giving water into irrigation ditches. It also keeps billions of bushels of rice, wheat and corn and tons upon tons of hay and alfalfa safe from damaging moisture.

At poultry farms and hatcheries, gas gives both life and protection to little chicks. The chicks are hatched by the controlled temperatures of gas and are safeguarded by gas-fired brooder heaters afterward.

Industries which process and preserve foods also are important gas users because they need the economical and efficient heat to pre-cook millions of cans and bottles of food as well as frozen foods and dry cereals.

Gas, a fast and flexible heat source, has the capacity to do just about anything. It produces odors of dried fruit and soup as well as tons of roasted peanuts. In other applications, gas literally pops the peeling from pimientos and it pops mountains of popcorn.

But, before food goes to market, it must be packaged. Gas helps to produce the paper, the glass and the tin containers. On top of that, gas helps to make the corks and bottle caps. It also dries the ink on the labels.

The tin can industry, which produces more than 40 billion containers a year, is but one of the big metal working gas customers. Gas is used to produce almost every type of metal aluminum, iron, copper, lead and many others. It not only produces the metal but also provides the heat for the manufacture of all types of metal products used in the home, office, stores, factories, farms and countless other places.

Millions of today's modern homes are actually houses that gas built and that gas furnished, too. In fact, gas is the fuel that was used to make almost every one of the 90 million gas appliances.

The water heaters, furnaces, air-conditioners, ranges, refrigerators, clothes dryers and incinerators. It is also the fuel used to make the kitchen sink, bathroom fixtures, electrical fixtures (including TV's, radios, clock, kitchen).

The basic building materials which go into a house were made or processed with gas, too—lumber, roofing paper, shingles, asbestos, insulation materials, brick, tiles, cement blocks and floors and, even the paint and varnish for exteriors, interiors and furnishings.

The window glass which brings the outside in and, vice versa, is also a product of gas heat. For that matter, millions of square feet of glass that play such an important role in today's manufacturing and building comes from vats of molten liquid heated by gas to a white hot temperature.

Wherever heat is needed for manufacturing gas is the reliable

THERM-O-TANE GAS & APPLIANCE CO.'s office, showrooms, and warehouse where formal opening is being held tomorrow. A large parking lot for customers is located on the Laurel Ave. side of the building located at 414 W. 9th St. (Photo by Jameson)

Modern Wives Are Buying Colored Home Appliances

It's the homemaker of 50 or more and her newly married daughter who are buying colored home appliances and utilizing coordinated or contrasting colors in the kitchen.

Homemakers in other age groups are displaying conservatism in their selection of white gas ranges and refrigerators, with colored trimmings, though they are conforming to the "rage" for color by painting walls and woodwork in the popular decorator colors.

The theory is that the older women are rebelling after keeping house for many years in "hospital white" kitchens, while their daughters are expressing their dissatisfaction, unconsciously, of the kitchens they grew up in. Now both are rushing to surround themselves with pastel-bright kitchens—even going to extremes to get away from the unpleasant association a white or monotone kitchen has for them.

If you're about to redecorate and replace some of your kitchen equipment, pick a color you'll want to live with a long time as the focal point of your color scheme. For instance by a gas range that harmonizes with at least three different color schemes, as it will still be in perfect condition by the time you've redecorated your kitchen five or six times.

No matter how gay you want your kitchen to be, be careful that it doesn't turn out to be a "busy" color scheme, as it is exhausting to be surrounded with too many patterns. If you have a geometrical design on your walls, select a monotone for your floor covering and paint your ceiling

New Ice Age Ushered Into American Homes

A new "Ice Age" has been ushered into American homes by automatic ice-serve refrigerators which provide constant, generous supplies of readily available cubes.

Technically, they aren't really cubes; they're half-moon-shaped, produced by an ingenious device found only on top-of-the-line refrigerator models manufactured by Servel, Inc. The automatic ice-serve freezer ice "cubes" without trays, stores them in a container, and automatically replaces them as they are used.

The quick availability of large quantities of ice has led housewives to discover numerous new ways to cook, serve and entertain with ice.

"This unique principal of refrigeration eliminates the filling and re-filling of trays, spilling water, sticking ice, and wasting of ice on removal," C. H. Robertson, vice president of Therm-O-Tane Gas & Appliance Co. 414 W. 9th St., says. "In addition, the container holds more ice than do four old-type ice trays, even though the ice-serve unit takes up no more room in the freezer compartment."

Here's how the automatic ice-serve works: It first measures a supply of water into a mold. When the water freezes, a small electric heater loosens the half moons of ice,

to correspond; or have just one wall papered, and the other three painted in a harmonizing color. Accessories, too, must be picked with care so that they do not conflict with the definite patterns in the room and thus provide a jarring note.

and ejector arms sweep them out of the mold and hold them at the top of the unit until "dry." Meanwhile, more water flows into the mold.

With the next cycle, the ejector arms turn again. This time the half-moons of ice drop into the container where they remain dry and loose. The ice in the mold is raised to dry, and more water enters. These cycles continue until the container is filled.

A signal arm starts and stops the operation of the ice-serve. This it does by feeling the ice supply, stopping when the container is filled and starting up again when enough ice has been removed to lower the arm.

New Gas Clothes Dryer Introduced

A new gas clothes dryer that dries faster than a load of clothes can be washed, has been introduced by Whirlpool-Segger Corporation. The new 1956 Super-Speed safely dries all fabrics in half the time required in regular speed dryers. The unit operates at a higher gas output and with greatly accelerated air flow.

A thermostat automatically shuts off the gas burner if temperature exceeds a certain degree and renews the operation when temperature returns to the proper drying level. Heat is off during the last five minutes of drying time. Operation is automatic from ignition of pilot light to dryer shut-off.

THERM-O-TANE GAS & APPLIANCE CO.'s staff who will be on hand to greet their friends and customers during the formal opening tomorrow. (Left to right) A. D. Laney, service man; H. V. Buckner, bulk delivery; C. H. Robertson, Vice President; Mrs. C. H. Robertson, office manager; W. M. Sutton, Sales Representative; and John D. Mullan, Cylinder delivery. (Staff Photo)

Company Locates In Sanford Because Of Better Growth, Business Possibilities

Therm-O-Tane Gas and Appliance Co. will hold its formal opening tomorrow in their brand new showrooms, offices, and warehouse, located in Sanford at 414 W. 9th St. at the corner of Laurel Ave.

The building, only recently completed, is a \$25,000 structure, from which the latest and most modern gas appliances, commercial gas appliances, air conditioning will be installed and delivered to Sanford area customers. Bulk gas deliveries will also be made from the Sanford headquarters of the firm.

Therm-O-Tane Gas and Appliance Co. was incorporated in May 1947 with R. F. Nicholas, president and C. H. Robertson, vice president.

After considering several other locations for their firm, the two popular businessmen decided that Sanford and Seminole County had the best possibilities for growth and their business.

Therm-O-Tane Gas and Appliance Co. opened for business on June 1, 1947 at the corner of 4th St. and Pine Ave. where they employed three persons.

In 1948, and after only one year's operation, Therm-O-Tane Gas and Appliance Co. opened a branch office of their firm in Orlando at 1327 N. Orange Ave. Nicholas became manager of the Orlando branch and Robertson remained in Sanford as manager.

Therm-O-Tane Gas and Appliance Co. has increased each year in new customers and volume of business. At present they have 13 employees.

The area which Therm-O-Tane Gas and Appliance Co. serves includes all of Seminole County and Orange County, and as far as Orange City in Volusia County. All types of residential, commercial, and domestic are serviced by the Therm-O-Tane

fuel. That goes for the simplest paper clips to the biggest machinery in factories.

And, wherever Americans go, their mode of conveyance is a product of gas. Even the ends of railroad tracks are hardened by gas flames.

And, travel logs, as well as luggage are made by gas. The textile industry uses gas to make hot water for steam and, for the finished product, it is used for bleaching, dyeing and printing. Also, the blue flame sears off the "fuzz" that is left on many fabrics after their manufacture.

staff with their slogan "no gas need is too large or too small." Early in 1956 Therm-O-Tane Gas and Appliance Co. started the construction of their new ultra-modern office and showroom at 414 W. 9th St.

The building covers an area of 2,500 square feet which gives ample room to warehouse appliances in the rear of the display room.

Exterior of the building which is being thrown open tomorrow at their formal opening observance is of Roman brick and concrete block with 31 feet of plate glass in the showrooms. A flower planter extending from the front entirely across the west side of the building and another planter on the southwest corner of the building are bedded with brilliant crotons.

Unusual and brilliant display signs have been installed by Marcelle Fallo. The cut-out letters are an original French design.

There is an off-street parking lot large enough to accommodate 10 to 12 cars on the west side of the building. The parking of trucks and personnel cars will be on the east side of the building.

The walls inside of the showrooms and office are plastered

and painted a beautiful dolphin blue and moon mist appleay and one wall of teal blue. The ceiling is snow white acoustical kilohouse plaster. The lighting is of indirect design with a cove extending from one end of the showroom to the other. Three shades of grey are used in the concrete tile floor. For the convenience of displaying appliances, an electrostrip circles the entire display room which allows a receptacle to be placed anywhere along the strip as desired.

Provisions have been made for complete summer and winter air conditioning of the office and display rooms and will be installed before next summer.

Appliances on display in the modern Therm-O-Tane Gas and Appliance Co. showrooms include: Servel refrigerators, A. O. Smith water heaters, Caloric ranges, Siegler Space heaters, Dearborn space heaters, Dixie ranges, Janitrol heating equipment, Safe Air heaters, Hunt No Vent heaters, Panel Ray heaters, Mor-Sun homes furnaces, Coleman floor furnaces and panel heaters, National ranges and cabinets, Whirlpool washers and driers, Warm Morning

and Brilliant Fire space heaters, and Garland commercial equipment which includes deep fat fryers, ranges and ovens.

Therm-O-Tane Gas and Appliance Co. handles and installs air conditioning equipment and are distributors for Sinclair I-P Gas.

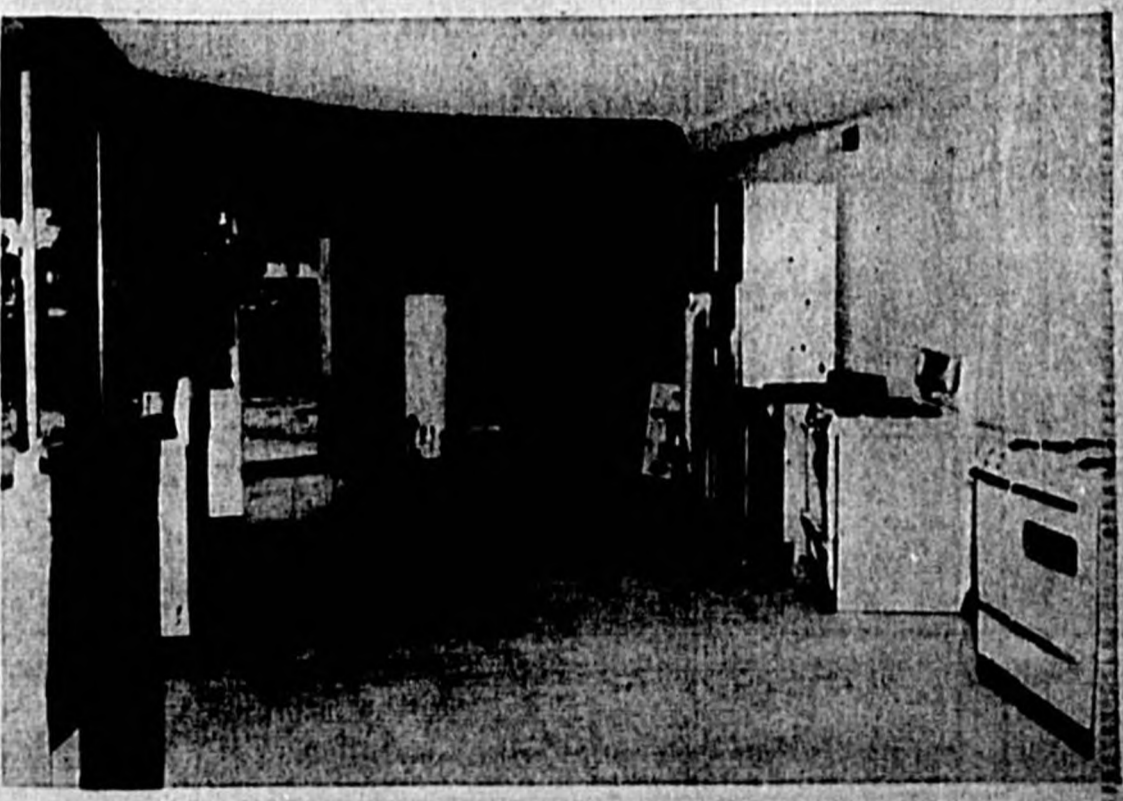

Sanford Sign Man Creates Display

The modern sign which appears in large cut-out letters at Therm-O-Tane Gas and Appliance Co.'s new building at 414 W. 9th St. was installed by Marcelle Fallo of Sanford.

Fallo is Southern distributor for the unique sign which glimmers night and day from reflections on the shiny metallic hanging jewels.

Originally designed in Paris, France for use during blackouts during World War II, the sign was brought to America by way of Canada.

The large cut out sign display appears on the west side of the Therm-O-Tane building and a smaller one was installed on the south side.

THE ATTRACTIVE SHOWROOM of Therm-O-Tane Gas & Appliance Co. where their formal opening is being held all day tomorrow. This view taken from the business office facing the main entrance. (Staff Photo)

AN INSIDE VIEW of the Therm-O-Tane Gas & Appliance Co. showroom and office at 414 W. 9th St. This portion of the building houses the business and accounting offices. (Staff Photo)

THE SANFORD HERALD
Page 2 Section B

Today's Automatic Gas Ranges Offer Many New Features

New "cool" ignition systems, foldaway gas burners, timer controls on top burners as well as the oven and midjet 20-inch ranges with full ovens and regular-size burners are among the innovations that the housewife can find in today's automatic gas ranges.

According to C. H. Robertson of Therm-O-Tane Gas Co., these and other similar features, along with the trend toward the "all-purpose" range, are responsible for the tremendous demand for new gas ranges.

He said that once the householder tended to fill valuable kitchen storage space with griddles, deep-fat fryers, rotisseries and other auxiliary devices, but this is no longer true. Instead, he said, she is letting the automatic gas range perform all these functions.

One of the most popular features of the new models is the AGA laboratory-developed hypodermic pilot—a tiny, bead-like pilot that gives off only 50 to 60 BTU of the standard pilot. This feature, adopted by several manufacturers, means lower gas bills as well as a range that is cool to touch at all times. These new systems are under a number of different trade names, such as "Needle" pilots, "Magelite," "Instalite" and others, but they are all basically the same.

Burners and burner arrangements are in the spotlight, too. One manufacturer has come out with a range that has a four-line cooking unit with the burners side by side at the back of the range, leaving the entire front free as a work area. And other manufacturers are making ranges that have about every possible burner arrangement. One even offers a staggered top arrangement which claims to eliminate reaching over and around utensils while providing work space behind each burner.

The most popular is still the "divided" top with work space in the middle, or the customer can have all the burners to the right or the left with work space on the remaining side. Then, of course, there is the four-burner range with the griddle in the middle; in many cases this griddle can be removed and a grid placed there instead to make another burner.

Kitchens With Gas Built-In Cooking Units Are Popular

Some of the hottest buys on the real estate market today are featuring kitchens with gas built-in cooking units. By the end of 1956, Therm-O-Tane Gas Co. predicts, 35 per cent of the nation's new homes will have all-purpose kitchen with separate top burners and oven-broiler units.

The last-named units were "slow starters" until the idea of a combination kitchen-laundry-dishette caught on. Now buyers are demanding the new layout as they find its many innovations appealing and practical. The plan of sink the burners into the work counter of the partition between the food-preparation and serving areas, for example, has several points in its favor. It permits them to pass food directly from the stove to the dinette

Housewife Looks For Instant Heat Pick-Up In Range

The man of the house may never have thought of it this way, but Therm-O-Tane Gas Company claims that the housewife looks for the same thing in a range that a man seeks in a new auto.

For example, says Therm-O-Tane, a man wants a car that will run smoothly through slow traffic without stalling, yet can respond instantly with a burst of speed when a traffic situation warrants it.

Essentially, the housewife ex-

pects the same kind of performance—plus streamlining and attractive decor—from a new automatic gas range. In other words, she wants instant heat pick-up as well as slow, constant heat.

And appliance engineers, as alert as automotive experts to consumer demands, are turning out gas ranges that change cooking speeds at the flick of a wrist.

Most modern gas ranges, for instance, feature a just-simmer adjustment for slow cooking or "keep

warm" purposes and another hot enough to sizzle a steak.

The simmer-to-sizzle operation as well as unlimited shadings of heat between the two extremes, is a matter of simple manual control.

Want extra flavor for pork chops? Try adding pineapple juice or canned chunks of the fruit to the skillet while pan-frying the chops.

"THIS IS ONE OF THE features we always point out," says W. M. Sutton, Therm-O-Tane Gas & Appliance Co.'s sales representative as he demonstrates a Servel ice maker. (Staff Photo)

Want extra flavor for pork and onions, cook the onions first in butter until they're soft and golden. Then draw the onions to one side of the pan and fry the sliced liver, adding more butter if necessary.

Color in Kitchen Today's Big News

The big news today is color in the kitchen, says Therm-O-Tane Gas Co. with yellow in first place and green second in the color parade.

Manufacturers are meeting the consumer demand for color by producing kitchen appliances and other equipment in the most pop-

ular decorator shades. This makes it easy for any one to work out a coordinated pattern, as you can buy gas ranges, refrigerators, kitchen cabinets and even sinks in matching colors.

For those who prefer white gas ranges with color accents, Therm-O-Tane Gas Co. points out that some manufacturers are featuring removable colored trimmings in order to keep kitchen color schemes flexible during the life of the range.

But, even if you are not in the

market for new appliances and equipment, you can achieve the "new look" by using paint as your main miracle-worker.

For example, to create a candy pink kitchen, start by painting the walls and ceiling a pinkish gray, with the ceiling a few shades lighter than the walls. Next paint all the woodwork and cabinets your favorite shade of pink. Finally choose floor covering and counter tops the same shade of gray as the ceiling.

Gas Heating List In Central Heating

The August 30 issue, Wall Street Journal, quoted the following statistics on central home heating:

Gas	10,800,000
Oil	10,100,000
Coal	7,500,000

For the first time gas leads in central heating. Although it is the youngest fuel, it now heads the list. Again, a clear expression of America's choice of quick, clean, economical gas.

Asphalt tile makes a tough, attractive flooring, but requires regular care to keep it from getting scratched and shabby. Wash it regularly with thick warm soap-suds from the top of the pail, rinse with a mop wrung out of clear water, and allow to dry

Automatic Gas Dryer Saves Time

And what did YOU do with the 30 days your gas clothes dryer saved you the past twelve months? That's the dividend of time experts figure you gain each year without even trying, simply by using your automatic gas dryer instead of hanging your clothes outdoors.

If you think this is an exaggerated estimate, you have only to recall how long it took you to get through with a typical washday in the years before clothes dryers appeared on the market — those dreary hours you consumed carrying a heavy basket of wet wash outdoors, hanging the clothes, then taking them off the lines and carrying them into the house when dry. Then a "digest" of what you did, after you took the clothes out of the washer. Actually, it wasn't as simple or cut-and-dried as that.

To begin with, before you hung a single piece, you washed and wiped the clotheslines, to avoid streaking or smudging clothes; but despite your care, you often came across the tell-tale clothespin marks as you sorted the laundry preparatory to ironing.

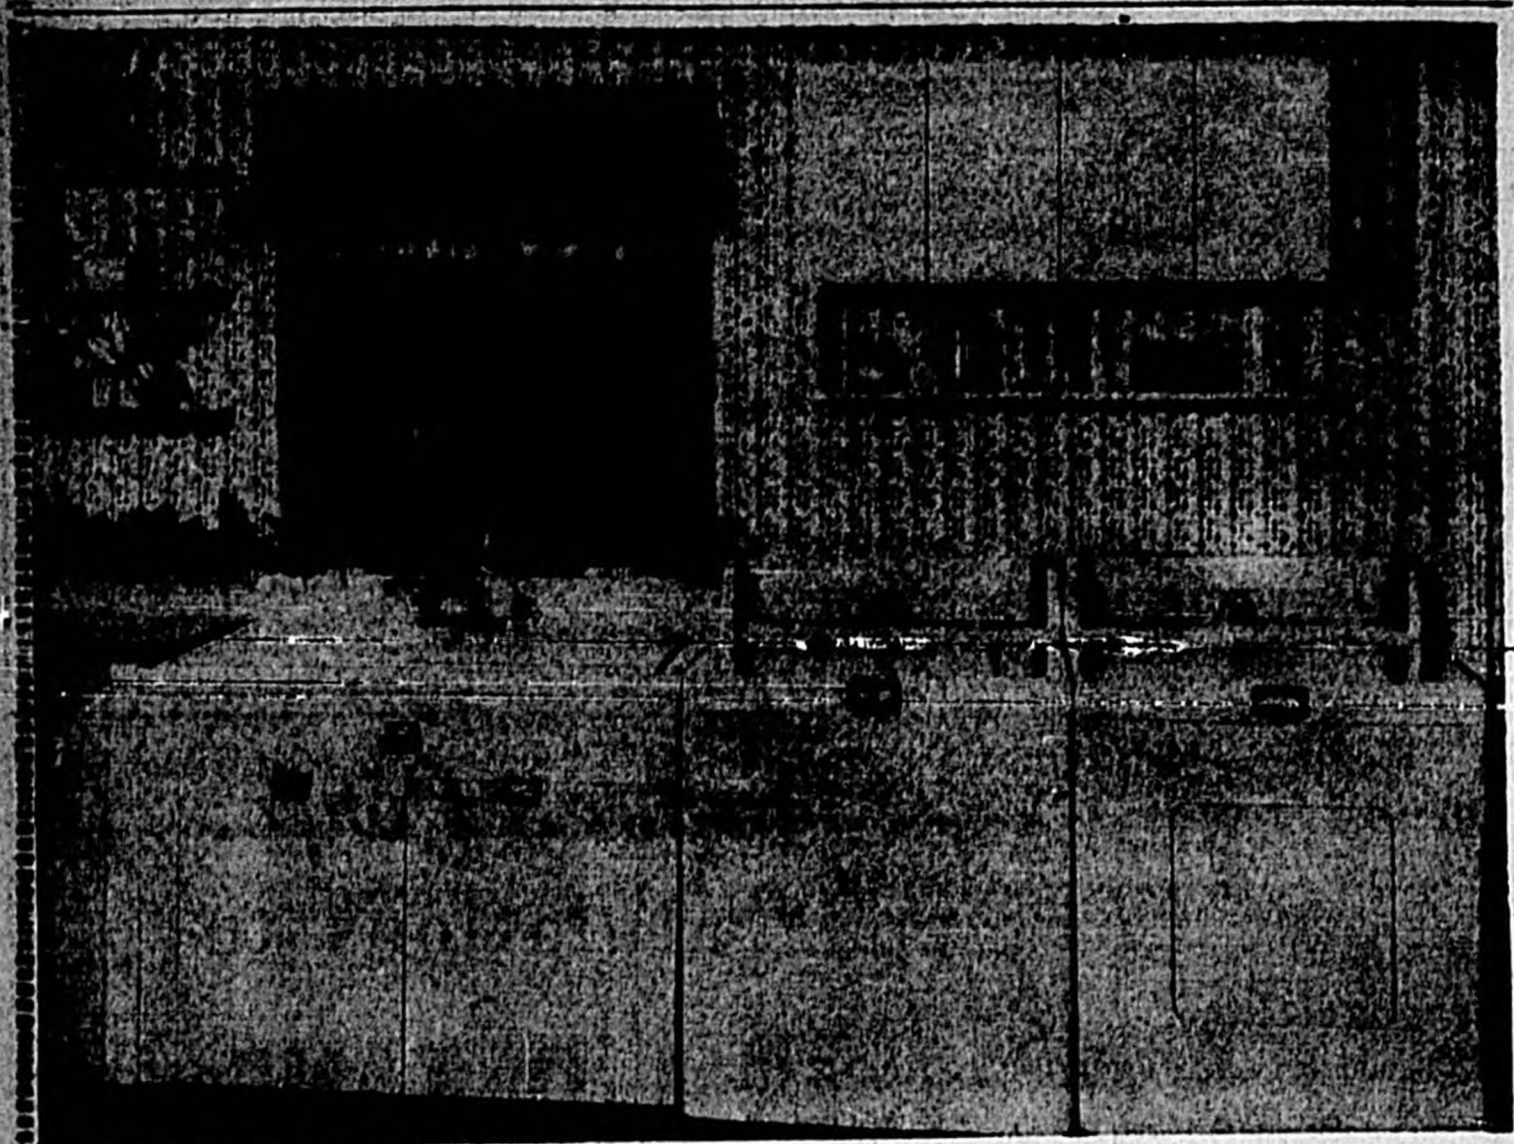

Next, you shook each piece as you took it out of the basket, and pinned it to the line. You were methodical and liked to group things together, which took a little longer; and sometimes you even transposed articles, after you had hung them, so that all the items were appropriately "related". And

Report Shows Gas Ranges Preferred

A September issue of Retailing Daily quoted Gas Range sales through June as 1,010,925 as compared with electric range sales of approximately 726,100.

This clearly reflects the increasing preference for gas ranges by the American housewife, says the magazine.

Small fry like this: bowls of tomato soup sprinkled with popcorn.

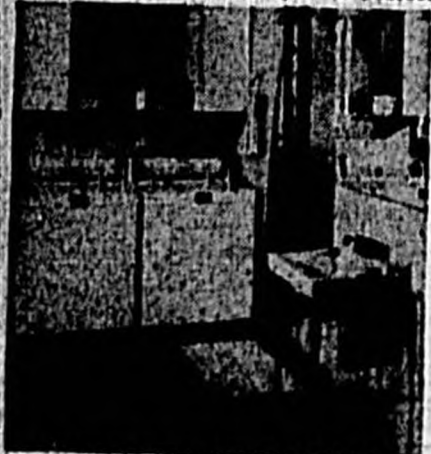

A NEW AUTOMATIC WASHER, with two separate speeds and cycles for laundering normal and delicate fabrics, forms an ideal laundry corner when flanked by sink, clothes dryer and ironer. The nine-pound capacity RCA Whirlpool 1956 Imperial washer (left) has a match-

ing gas or electric dryer. Finished in white enamel, the Supreme ironer (right) occupies storage space of only 16-1/2" x 34-1/2". It is equipped with casters to roll anywhere in the room for use.

Laundry-in-the-Bathroom Adds Efficiency To Home

More and more architects and builders are placing the laundry in the bedroom wing of the home. Since it is the center of the bedded clothes area and close to bedroom and linen storage, the bathroom is the logical place to do the wash. Laundry out of this area usually consists of small, easy-to-carry pieces such as dish towels and table linens.

For existing houses, as well as new construction, bathroom and laundry are easily combined. Short pipe-runs for plumbing keep installation cost low. An 8" x 10" bathroom nicely accommodates a standard size washer and dryer, such as RCA Whirlpool 1956 Imperial models. For smaller bathrooms, space-saving Delmas units together occupy only a fraction of an inch over four feet of floor space.

Fully automatic home laundry appliances require no attention other than controls are set and do not tie up the room while laundering is under way. The Imperial washer and dryer have cycle-tone signals to sound completion of operation.

When you plan a bathroom-laundry, allow storage space for soap, detergents and other washday needs. Overhead cabinets save space and keep these items handy. Washer and dryer tops set as counter space for sorting and folding.

Mix a quarter cup of sugar with a couple of teaspoons of cinnamon; spread over well-buttered toast and reheat under the broiler.

A hard-cooked egg leftover? Press it through a small fine strainer and mix it with French dressing for use on a vegetable salad.

Do your family's food tastes differ? For a quick lunch, put sandwich fillings of various sorts into different plastic containers and place on table with a tray of sliced bread; let each member of the family make sandwiches of his or her own choice. Leftovers in containers can go right back into the refrigerator.

Congratulates Therm-o-Tane Gas & Appliance Co. Inc.

YOU CAN HEAT ONE ROOM OR YOUR ENTIRE HOUSE WITH

Dearborn AREA HEAT

It costs you less in every way to heat your home with Dearborn Area Heat. If you haven't heard about Dearborn Area Heat... come in and let us tell you about it... you'll save money!

Peachie Bars

For a tender, rich-tasting cookie that will get calls for "repeats," try Peachie Bars.

After you've made the easy-to-mix dough, spread half of it in a baking pan. Spread peach preserves over the dough, then drop the remaining dough over the top. The thin layer of preserves makes peachy surprise filling.

Cut down on the measuring and lifting when you bake cookies and quick breads by using self-rising flour. You can see from the recipe how convenient it is to use. The baking powder and salt are already in the flour in correct amounts, so your time is saved.

PEACHIE BARS
1 cup sifted enriched self-rising flour
1/2 cup sugar
1/2 teaspoon cinnamon
1/2 cup uncooked rolled oats
1/2 cup shortening
egg, beaten
1/4 cup milk
1/2 cup peach preserves
Mix together flour, sugar and cinnamon. Stir in rolled oats. Cut in shortening until mixture is crumbly. Combine egg and milk and add to flour mixture, stirring until well blended. Spread 1/2 of dough in bottom of greased paper-lined 7 x 11-inch baking pan. Spread peach preserves over dough. Drop remaining dough by spoonfuls over peach preserves. Bake in moderately hot oven (350° F.) about 25 minutes. Cut into bars while still warm. Makes 20 to 25 bars.

HOT WATER AIDS OUTDOOR CLEANING
When you wash the car in your driveway it is likely to complain and it's not very convenient or satisfactory to wash and rinse it with cold water. If it's at all possible, try to attach the hose to a basement or kitchen faucet to get running hot water outdoors.

Always drain second place to clean on cold ground. Fill basin of driveway with second place to clean. Sprinkle with sand. Serve with mayonnaise. Add a little of second place to clean.

Congratulations:

Therm-o-Tane Gas & Appliance Co. Inc.

9th. and Laurel Ave. Grand Opening FRIDAY, SEPTEMBER 28th.

COMPLIMENTS

On Sanfords Most Modern Showroom and Office Building

A. O. SMITH. PERMAGLAS WATER HEATERS:

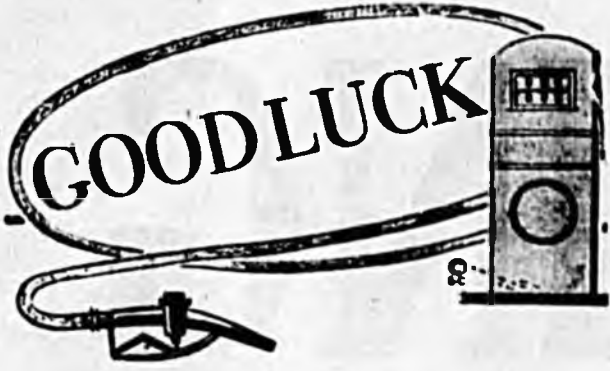

Are Supplied By ---

J. & M. DISTRIBUTING CORP.

Proven in - over 3,000,000 homes
The - one glass - liner water heater
that has earned your confidence

A household short cut is to clean sheet of aluminum. After the sil-
 iver by electrolytic method— ver is bright, it must be washed
 oiling it in an enamel pan with in hot soapsuds and rinsed with
 solution of baking soda plus a hot water.

THERM-O-TANE

WE ARE PROUD TO
 SUPPLY YOUR FLEET
 OF TRUCKS WITH
 GAS AND OIL

HUGHES TEXACO

1120 SANFORD AVE.

A LACY NYLON PETTICOAT doesn't require hand-washing since the introduction of
 a new washer with two separate speeds and cycles. Besides a normal speed and time
 allotment for regular fabrics, the new RCA Whirlpool 1956 Imperial automatic (left)
 has a one-third lower speed and shorter time for washing, rinsing and spin-drying deli-
 cate fabrics. Three-temperature and three-level water selectors provide the proper heat
 and amount of water for small loads of silks and nylons. Even nylon stockings can go
 into the new washer—without danger of fingernail snags. A matching gas dryer is at
 right.

A little diced leftover ham and
 cooked rice plus diced celery
 cooked until soft in butter make
 a fine stuffing for green peppers.
 Cut off ends of peppers and scoop
 out seeds and membranes; par-
 boil the peppers for about five
 minutes in lightly salted water,
 then stuff and top with buttered
 crumbs. Bake in a moderate oven,
 in a pan with about a halfinch
 of water in it, until the peppers
 are tender and the browned—
 about half an hour.

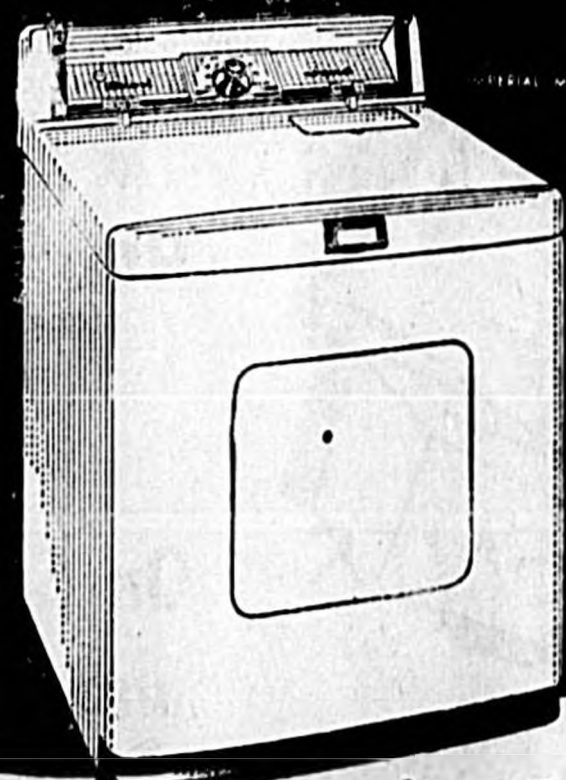

Baking macaroons? Top them, Paprika, added to the seasoned
 before baking, with chocolate flour in which chicken pieces are
 sprinkles, pieces of glazed pine- rolled before frying, helps give
 apple or cherries, or small pecans, attractive brown color.

To wash your tile bathroom
 floor to a gleaming white, add a
 little ammonia to the soapsuds.
 A stiff scrubbing brush will erase
 stubborn spots, but such spots
 won't have a chance to develop if
 you rely on suds several times a
 week.

Just one extra small suds-up
 job a day will keep your house
 in good order all year 'round.

WITH A 1956
RCA WHIRLPOOL
 FULLY-AUTOMATIC DRYER

Now...faster drying than ever
 ... any time, day or night!

Your RCA WHIRLPOOL dries all fabrics fluffy, soft and
 clean whatever the weather outside. Weather wait-
 ing, dust, wind, lifting, lugging are eliminated ...
 you choose drying "weather" from four automatic
 temperatures, set the dial then relax. In minutes,
 "tempered heat" gently dries clothes free of matted
 appearance without sun-fading or clothespin "dog
 ears". And, a germicidal lamp gives them sweet,
 fresh-air fragrance.
 Save yourself and clothes ... buy RCA WHIRLPOOL!

Milwee Reports County School Enrollment Rise

"School enrollment, or membership, last Friday," Rayburn T. Milwee, Seminole County Superintendent of Public Instruction, told school teachers last night "is five higher than it has ever been."

Milwee, speaking at a meeting of the Seminole County Teachers Association held at Pinecrest School, said that "The school membership at the end of last Friday had a total of both white and colored students of 6,702. Last January Seminole County schools reached its highest total in membership which was 6,697."

"Of this total," he said, "4,036 are white children and 2,666 are colored."

Pointing out the growth of Seminole County in school population the Superintendent of Public Instruction said that at the end of the first month of last year's session there was a total of 6,111 children attending school with 3,714 of them white children and 2,397 colored.

"If the same percentage of increase from now to the end of the peak month which is usually January holds," Milwee told Seminole County school teachers, "we should have approximately 7,200 children in school."

As for individual growth in schools, the School Superintendent pointed out that the white school with the biggest total is Lyman, at Longwood, with 851, Southside School next with 523, then Seminole High School with 372 and Pinecrest School with 170.

In the colored schools, 761 was the total at Crocans Academy, 666 at Goldboro School and 428 at Midway School.

Milwee told the teachers that during the week of Nov. 5, a school building survey team from the State Department of Education and the University of Florida will come into Seminole County and project our building needs through 1960.

The Seminole County Teachers Association named Mrs. Hilda Wray and Ernest Cowley as delegates to the statewide meeting of the Classroom Teachers Association which will be held in Jacksonville later this year.

2nd Yalta Conference Appears In Making

LONDON (AP)—A second Yalta conference appeared in the making today following the arrival of Yugoslav President Tito and Soviet Communist party chief Nikita Khrushchev in the Black Sea resort.

The presence of Soviet Premier Bulganin and Foreign Minister Dimitri Shepilov at Sochi, another Black Sea resort less than an hour's flying time from Yalta, lent credence to widespread Western beliefs that top-level Communist talks were planned.

Bolestering the speculation in the West was the surprise nature of the flight by Tito and Bulganin from Belgrade to Russia yesterday and the large number of advisers on hand for what was described officially as "a few days rest."

Bulganin and Shepilov previously had been reported on a holiday in Sochi.

Word that Tito and Khrushchev had reached Yalta—site of the last World War II meetings between Roosevelt, Churchill and Stalin—came from Belgrade radio. An earlier Moscow radio broadcast reported they had arrived in Sevastopol from Yugoslavia and they "journeyed to the south coast of the Crimea where they will be resting."

The Tito-Khrushchev party left Belgrade in a surprise move early yesterday. The Yugoslav group included Tito's wife Jovanka, vice President Alexander Rankovic and Djuro Pucar, chairman of the state of Bosnia-Herzegovina and a member of the Yugoslav Communist party Politburo.

October Should Be Significant Month To Churchgoers

By Senator Douglas Stenstrom

October should be a significant month in the lives of the members of all of the churches of our community. It is during this month that church loyalty is being stressed throughout the nation.

In our own community and county, the Seminole County Ministerial Association is emphasizing church loyalty and the importance of regular and faithful attendance and worship at our churches. While church membership involves much more than attendance, our ministerial association is urging church attendance as a means of expressing our loyalty to the churches of our community.

Thomas Payne once wrote, during the days of the Revolutionary War, that "These are times which try men's souls." I suppose that much the same could be said of the age in which we live. By turning to God through the church and regular attendance, we renew our faith in ourselves, our fellowmen, and, most important of all, in the Father of all men. It recalls to our minds and hearts the true values and ideals which are of God.

Mr. Hoover, our FBI head, has said that the institution the communists fear most is the church. He has also said that the church is fighting the most offensive battle against those ideals alien to our American ideal of government. If this is so, and surely it must be, through faithfulness to the church of our choice, we are not only witnessing for Him but we are striking a blow against all who would deny the worth of the individual and who would deny to us the freedoms which we and our forefathers have enjoyed as Americans.

In this forthcoming month of October, may we make a special pledge to be faithful in our church attendance and worship.

Korean Official Is Shot

SEOUL (AP)—Chang Myun, President Syngman Rhee's outspoken opposition vice president, was shot and wounded in the hand today as he stepped from the stage of a political convention.

The attempted assassination came less than 24 hours after the Rhee-dominated National Assembly voted 83-6 to warn Chang against continuing his criticism of the government.

Chang, a Roman Catholic and a former ambassador to the United States, has been in off-and-on seclusion since he was chosen vice president May 15 after a turbulent election campaign. The candidate of the opposition Democratic party, he decisively defeated Rhee's running mate.

The assassin, identified by police as Kim Sang Poon, 28, fired two revolver shots at 2:35 p.m. as Chang stepped to the floor after addressing a Democratic party convention in the municipal theater.

One bullet went through the palm of Chang's left hand. A party aide said several bones were smashed. The vice president, after being treated by a doctor attending the convention, shut himself up in his home and refused to see newsmen.

Police said Kim, a veteran of the Korean War, admitted the assassination attempt and said in explanation:

"I thought he would do a fair job for the nation, but he was trying to fraternize with Japan, which is my enemy."

Rural Development Plan Aiding Low-Income Farmers

MAYOR F. D. SCOTT OFFICIALLY opens the brand new \$25,000 Therm-O-Tane Gas and Appliance Co. building this morning when he cut the ribbon to allow a huge crowd already waiting to visit the ultra-modern show rooms, offices and warehouse located on the corner of West 9th St. and Laurel Ave. With Mayor Scott is C. H. Robertson, vice president of the company. (Staff Photo)

President Hails Major Progress

WASHINGTON (AP)—President Eisenhower today hailed what he called "major progress" in aiding small and low-income farmers through a rural development program.

An interdepartmental committee handling the program, under the chairmanship of Trus D. Morse, undersecretary of agriculture, presented its first annual report to Eisenhower.

The reports said efforts to aid more than a million farm families who need to adjust to modern trends are underway in half the states.

Eisenhower said in a statement complimenting the group's work: "Initial success of this program is a challenge to all of us in the year ahead. We have a solid foundation to build upon. The rural development program is the first truly broad-based attack on the problems of low-income farmers."

The President said every one of the main recommendations made by the committee of government officials in April, 1955, has been acted upon, including expanded technical aid for families on small farms, new job opportunities, training in nonagricultural skills, research, and community action in rural areas.

In addition to Morse, the committee is made up of the undersecretary of interior, commerce, labor, health, education and welfare, plus Joseph S. Davis of the President's Council of Economic Advisors.

Morse told reporters the program is "beginning to show results," and said the small farmer must do one of two things: "The most other intensely and build up the level of production, and that he actually is doing under this program."

"Or—and these go together—he must get part-time employment off the farm."

Big Crowd Attends Plans Are Completed For Therapy Unit Visit

Don Satterlee, Director of the Mobile Therapy Unit for the Florida Society for Crippled Children, was in Sanford today to complete final arrangements for visiting the unit to Sanford Tuesday.

Satterlee conferred with Dr. Vincent Roberts, president of the Seminole County Medical Association, County Health Officer and the county's public health nurse.

The Mobile Therapy Unit, which will be in Sanford from 9 a. m. to 5 p. m. next Tuesday, is being brought here to determine if there are enough people who would be helped by physical therapy to warrant the sending of a physical therapist with the mobile unit to Sanford on regular visits or to show the need for establishing a permanent clinic.

The Mobile Therapy Unit Director talked with Mrs. Mable S. Brown and Mrs. Hulda Kibbe, Seminole County Health Unit public health nurses and with Mrs. Kathleen Anderson, District Nurse for the Florida Crippled Children's Commission, relative to setting the Mobile Unit here next Tuesday, and completing plans for interviewing both crippled children and adults.

Dr. Vincent Roberts said today: "Parents, even though they are now taking their handicapped children to therapy centers of the

Babe Returns To Hometown

BEAUMONT, Tex. (AP)—A home town Babe Didrikson Zaharias never forgot paid final tribute today to the famous athlete who lost her courageous three year battle against cancer.

It was nearly a quarter of a century ago that the 42 year old Babe left this southeast Texas oil refining center to gain fame and fortune in the sports world, first in basketball, then track and field, the 1932 Olympics and golf.

The Babe returned home the last time at mid-afternoon yesterday some nine hours after death came while she slept peacefully in John Sealy Hospital at Galveston.

Only relatives viewed the body last night at Broussard Mortuary but a hundred or more hometown friends called and signed the guest register.

The body will lie in state today at Bethlehem Lutheran Church. Funeral services will be conducted by the Rev. C. A. Woytek, the pastor, this afternoon.

George Zaharias, husband of the famous Babe, and relatives will

(Continued on Page Two)

TB Assn. To Meet Tonight At 7:30

George Dabbs, president of the Seminole County TB Assn., has called a special meeting of the executive board to be held at the home of Mrs. Lorraine Graham, 204 W. 20th St., tonight at 7:30. The purpose of the meeting is to make plans for the Christmas Seal Drive.

Weather

Partly cloudy and mild through Saturday; low tonight 69-71.

Allyson Lee, Local Concert Pianist To Appear On TV

Television viewers of Sanford and Central Florida have a special treat in store at 7 o'clock Monday night when the talented, popular concert pianist, Allyson Lee, will appear as guest artist on the Walter Kimble program on WDBO-TV.

Allyson, 12 year old daughter of Mr. and Mrs. John L. Lee of this city, has been the recipient of many compliments on the occasion of her appearances locally and at other points because of her unusual talent in one so young. (as she plays over 60 selections from memory) and her fine personality.

Although her appearance on Monday night's program will be limited to one number, it will afford those who haven't heard her an opportunity to see and hear an artist for whom a great musical future is predicted.

FSU President Tells Retirement

ORLANDO (AP)—Dr. Doak K. Campbell today announced to the Board of Control his retirement as president of Florida State University at the close of the present school year.

Dr. Campbell, 68, is in his 18th year as president of the Tallahassee institution. He came there from Peabody Teachers College at Nashville, Tenn.

His action apparently took the board by surprise.

Hollis Binehart, a member of the board from Miami, commented "I can only say that this is shocking although we have expected it."

Chairman Ralph Miller of Orlando said "this can only be accepted by the board with regret. Few can look forward to reaching retirement age with as much dignity and accomplishment as you have. We will look for a man to take the place you occupy. You can't be replaced."

Dr. Campbell told the board he was announcing his retirement at this time to enable the board to find a new president and to make the transition in administration as simple as possible.

Longwood Civic League Sets 1st Session Tuesday

The Longwood Civic League will hold its first meeting of the fall season on Tuesday afternoon, Oct. 2, at the Longwood Library. There will be a social hour from 3 to 5:30 which will be followed by an interesting talk on "The Red Cross—Its Role in Civil Defense" by Mrs. James Gilpin of Casselberry.

All members are urged to attend.

Some Sections Will Revert To Standard Time This Sunday

By THE ASSOCIATED PRESS

Some areas in the nation return to standard time this Sunday, Sept. 30, but the majority continue "fast time" until the last Sunday in October—this year it's Oct. 28.

Returning to standard time on the September date are California, Nevada, Maryland, northeastern Ohio, and some sections of Indiana, Pennsylvania and Delaware.

Observing the Oct. 28 date are New York, Vermont, most of Pennsylvania, the St. Louis metropolitan area in Missouri, Rhode Island, New Jersey, Chicago and other metropolitan Illinois areas, sections in Virginia adjacent to Washington, D. C.; Washington, D. C.; Maine, Massachusetts, New Hampshire, and Connecticut.

SEPT. 27 Admissions: Mary Barkley (Orlando) Elizabeth Mitchell (Sanford) Mrs. W. King (Sanford) Lorraine Langford (Lake Mary) Births: Baby Girl King Discharges: Anna Belle Fleming (Sanford) Albert Gibbs (Sanford) SEPT. 28 Admissions: Audrey Browne (Sanford) Gloria Prews (Sanford) Michael Swagerty (Sanford) Visiting Nurses: Private Rooms, 11 a. m.—9 p. m.; Semi-Private Rooms, 2 p. m.—4 p. m., 7 p. m.—9 p. m. Pediatrics, 11 a. m.—3 p. m. (Parents and/or grandparents only); Obstetrics, according to accommodation and no visitors during feeding of babies.

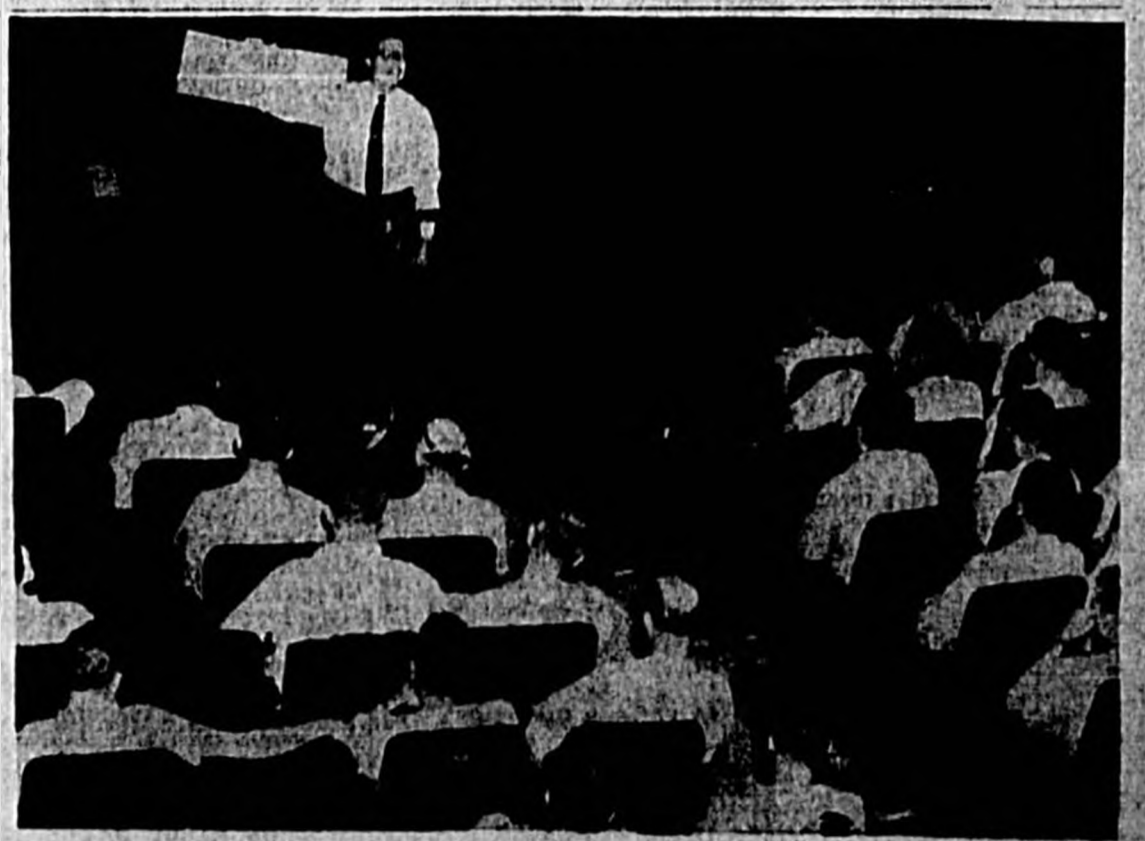

SOME OF THE 2000 SILVER DOLLARS mentioned will be receiving from Sanford Herald employees as they shop in Sanford stores this weekend and again next. Mrs. A. K. Shoemaker Sr. cashes a check for Miss Patty Walker this morning. The silver dollars are just a small part of the \$100,000 annual payroll of The Sanford Herald which is deposited into the stores and shops of local merchants. (Staff Photo)

INDIVIDUAL ACCIDENT REPORTS NOT OPEN TO PUBLIC

TALLAHASSEE (AP)—Reports made by individuals involved in traffic accidents are not open to the public. Atty. Gen. Ervin has ruled.

In an opinion given at the request of assistant City Atty. John J. Twomey of Tampa, Ervin said the reports are confidential under the law because "it would be improper to require a driver to make a report which might, at times amount to a declaration against interest."

Ervin said reports by officers are open to the public.

VOLIE A. WILLIAMS JR., Assistant State Attorney, uses a poster to drive home one of his points during one of a series of Safe Driving Lectures currently being held aboard the Sanford Naval Air Station. Williams is the featured speaker for the September program, succeeding Patrolman Carl Williams and Trooper T. Mark Mack of the Florida Highway Patrol and Kariyle Housholder, Seminole County Prosecutor. Talking on the need, shortcomings and desired improvements of state traffic regulations, Williams gave a different outlook on the highway safety program than the three speakers who preceded him who spoke mainly on the law enforcement problem. Bill France, President of the National Association of Stock Car Automobile Racing (NASCAR), is scheduled to be the program's speaker for the month of October. (Official Photo, U. S. Navy)
