

If Taxes Are Too High

VOTE "FOR" THE AMENDMENTS

And Economy In City Administration

8 Reasons Why We Want a Change

1.—BECAUSE CONTRACTS HAVE BEEN AWARDED THROUGH FAVORITISM AT HIGHER PRICES THAN NECESSARY.

2.—BECAUSE PUBLIC FUNDS HAVE BEEN MIS-APPROPRIATED.

3.—BECAUSE THE PUBLIC RECORDS HAVE NOT BEEN PROPERLY KEPT AND FACTS WHICH THE PEOPLE ARE ENTITLED TO KNOW HAVE BEEN WITHHELD, ESPECIALLY RECORDS OF BOND ACCOUNTS.

4.—BECAUSE EXTRAVAGANCE AND MIS-MANAGEMENT HAVE CHARACTERIZED THE PRESENT ADMINISTRATION DURING RECENT YEARS.

5.—BECAUSE THE CITY CHARTER HAS BEEN FLAGRANTLY VIOLATED IN AT LEAST THREE SECTIONS.

6.—BECAUSE THE THREE COMMISSIONER FORM HAS RESULTED IN AN INEFFECTUAL REPRESENTATION AND A CENTRALIZATION OF GOVERNMENTAL POWER IN THE HANDS OF ONE MAN, AS WE SEE IT.

7.—BECAUSE THE PRESENT COMMISSIONERS BY SO VIGOROUSLY OPPOSING THE AMENDMENTS HAVE GIVEN CAUSE FOR SUSPICION IN THE MINDS OF THE PEOPLE.

8.—BECAUSE WE HAVE BEEN UNABLE TO GET INFORMATION ON THE BOND MONEY.

8 Reasons Why We Favor The Charter Amendments

1.—BECAUSE TAXES WILL BE REDUCED.

2.—BECAUSE FAVORITISM WILL GO OUT OF OFFICE.

3.—BECAUSE PUBLIC FUNDS WILL BE SPENT AS VOTED BY THE PEOPLE.

4.—BECAUSE "TWO HEADS ARE BETTER THAN ONE" AND FIVE ARE BETTER THAN THREE.

5.—BECAUSE THE PEOPLE HAVE A RIGHT TO NAME THE KIND OF STANDARD TYPE OF PAVING TO BE LAID IN FRONT OF THEIR PROPERTY.

6.—BECAUSE GOVERNMENTAL COSTS WILL BE CURTAILED.

7.—BECAUSE CONFIDENCE WILL AGAIN BE RESTORED IN SANFORD CITIZENS AND IN BOND HOUSES HOLDING SANFORD SECURITIES.

8.—BECAUSE NO ADDITIONAL BONDS WILL BE SOLD UNTIL A THOROUGH AUDIT OF THE CITY BOOKS IS MADE AND THE BOND MARKET IS FAVORABLE.

TULSA PREPARES FOR 4TH ANNUAL PETROLEUM FETE

Exposition This Year Will Be Staged From September 24 To October 1; Many Prominent Oil Men Are To Be Present

TULSA, Okla., Aug. 2. (INS)—Tulsa is preparing for its fourth annual International Petroleum Exposition, which has been called the "world's fair of the oil industry." The exposition this year will be held from September 24 to October 1.

Oil men from all parts of the United States and from most foreign countries where oil is produced will be here for the exposition. Exhibits worth between eight and ten million dollars will be on display, being brought here by supply companies for the petroleum industry, oil companies, scientific instrument companies and foreign nations. Approximately 200 firms have already contracted for space for displays, while the total will probably exceed 250.

The exposition will be entirely a scientific, technical and educational display this year, all pageants and side attractions being eliminated. Oil producing and refining companies have indicated their intentions of sending their chief technical men and executives to the show.

Show Latest Equipment

All the latest equipment of the petroleum industry will be on display, as in previous years, and oil executives will be able to view the latest developments at first hand. Many companies which will have displays declare that their exhibits will be entirely different from those of previous years. More advance in technical equipment has been made in the last two years, it is claimed, than in the preceding ten years.

Included in the new scientific equipment to be shown at the exposition will be the Torston balance, a very delicate instrument made in Germany, and the seismographic now used in locating oil pools. One manufacturer will show the actual operations of drilling an oil well, having a standard oil drilling rig in charge of an experienced driller on the exposition grounds. In contrast to this the exposition is erecting the rig and equipment of the Drake Wells, the first oil well to be brought in Pennsylvania.

The exposition this year will cover 20 acres of space on a tract recently leased. Two huge buildings have been erected to house the exhibits and a third may have to be built to accommodate all who want inside space. A large part of the grounds has also been set aside for huge pieces of machinery, such as engines, tank cars, rigs, and pumping outfits.

LIKE SHAVED LAMB

There is a new type of felt, popular for the tiny hats of the moment that is exactly like shaved

F BOWS

The tiny felt hat with the demure bow of grass grain ribbon directly in front is a very alluring type of millinery.

SHORT COATS

Short jackets of fur, particularly baby calf and the very close shaven fur are exploited in Paris.

No Assessments In Loch Arbor

The owner of Loch Arbor property is free from assessments—another advantage of this desirable development. Look it over, investigate, judge it on its merits now.

DeForest-Sanford Realty Co.
Sanford

No More Bobbed Hair for Them

The question of keeping it cut or letting it grow is dividing the ranks of the feminine stylists. Here are three ladies of the movies who have lined up with the "let-it-grow." At the top is Sally Rand, to the lower left is Estelle Taylor (Mrs. Jack Dempsey) and to the right is Dorothy Dwan. How does it look to you?

HIGH OXFORDS

The high oxford which laps over the ankle is most often developed in a combination of blue, suede and patent leather or kid and alligator skin.

NOVEL FRINGE

The newest development in fringe is printed fringe, in which conventional or floral designs are transferred to coarse silken strands. Fringe made of narrow strips of the material of the gown is very much the vogue.

Eruption Of Volcano Threatens Village Sets Air Mark

NAPLES, Aug. 3. (INS)—Woods on the outskirts of Terzigno at the foot of Vesuvius have been set afire by molten lava overflowing the dykes in Hell Valley. The lava stream is making its way slowly toward the village but it is cooling rapidly.

Professor Mallada, of the Vesuvius Observatory who has spent twenty hours of the last twenty-four at the craters, is still confident that no disaster will result from the eruption in progress.

CREPE FROCKS

Tucks are one of the most popular forms of trimming on the crepe frocks, often in groups, scalloped or stitched distinctively to give an absolutely new effect.

ON HATS NOW

The popularity of the chain brace hat knows no bounds, one sees these links of plain metal and jewels outlining the crowns of the newest hats.

HENNA RETURNS

Henna has been eclipsed as a color to some extent by the new reds but as the season advances there is a return to the warm brown tones.

"PEASANT" FROCKS

Paris is very fond of peasant-like frocks where the blouse sleeves and skirts are pleated with tiny flat points.

Lieutenant Byron J. Connell of the Pacific battle fleet aircraft squadron took a PS-10 seaplane into the air the other day, carrying a weight of 4,500 pounds and remained aloft 1 hour, 7 minutes and 18 seconds, covering a distance of 917.58 miles. It was a new air record, shattering the old mark held by an Italian pilot who remained aloft 5 hours, 1 minute and 7 seconds under the same conditions.

VELVETEEN POPULAR

The velveteen frock reaches the height of its popularity in the deep red shades.

Notice To City Tax Payers!

By Order of the City Commission time for payment of City Taxes without extra costs has been extended to September 1, 1927.

Ellen Hoy, Tax Collector.

INCREDIBLE but TRUE

Had she made the French Dressing before they came they would never have believed it was her handiwork, for it was a very exceptional dressing.

But she waited until they sat down to dinner. And then, right at the table, expertly, assuredly, she stirs and blends and seasons. They watch. They taste. They exclaim.

Your salad is twice as interesting, twice as much admired if you dress it yourself at the table. And your dressing is so much more appetizing when it is freshly blended.

If you like a mild-mannered French Dressing use three parts of Wesson Oil to one of lemon juice

or vinegar. For a tart dressing try two parts of vinegar. Let your own taste, and the strength of your vinegar or lemon juice decide it. Salt and pepper—paprika to make it gay.

Then, if you like, vary it. Add a bit of hardboiled egg—for a vegetable salad. Or bar-le-duc—for fruit salads. Or a sprinkle of grated cheese—on green salads.

You will find Wesson Oil an important part of this recipe. It is delicate in flavor and blends just as you want it to. And, as everybody knows, Wesson Oil is good for you. Three excellent reasons for its popularity.

---a personal message to Sanford merchants

Does stagnation reign when you lock your store?

Does your business "stand still" during the night hours?

Do your sales stop when your salesmen start for home?

Locked doors shouldn't mean suspension of merchandising.

Your salesmen cannot visit people at their homes in the evening; but you CAN send your efficient "personal representative" into the homes and to the very people you wish to reach.

How? The evening newspaper will carry your message and promote sales six nights every week.

Build tomorrow's sales through your advertising message in the evening newspaper which your customers read every night.

The evening newspaper works at night for you while your store is closed.

The evening newspaper is the best insurance against a dull business day tomorrow.

Reach the right people at the right hour through the right newspaper by advertising regularly in

The Sanford Herald

Herald Your Business Make Business Better

This Ceremony a Poor Servant Girl Becomes One of America's Richest Society Matrons

is the wedding ceremony that made Lena Wilson, once a poor servant girl in the Stillman mansion at Anse, Que., the bride of James A. ("Bud") Stillman, Jr., and one of the richest society matrons in country. At the right is Father L. Ami, Catholic priest of Grand Piles, who officiated. Before him, kneeling in front of the improvised altar on the lawn of the Stillman estate is the bride. From left to right are Mr. and Mrs. James A. Stillman, "Bud's" father and mother; "Bud" Stillman; Lena Wilson and Lena Wilson, Lena's brother, who gave her in marriage.

MANY WIVES OF LEGIONAIRES ARE GOING TO PARIS

Of The Fifteen Thousand Who Have Signed Up For Second Expeditionary Force Forty-five Per Cent Are Women

INDIANAPOLIS, Ind. Aug. 3.—(INS)—Those members of the American Legion who thought the convention in Paris this fall would be a fine session of freedom from their women folk are due for a big disappointment. For when boys pass the madamoiselles near the Cafe de la Paix the American women will be tagging right along, according to records at Legion national headquarters in Indianapolis.

Of the total number of more than 15,000 persons who have signed up for the second American Expeditionary Force, 45 per cent are women relatives of the former service men.

Mothers and Sisters. Although the majority of the women are the young wives of the veterans, the delegations will include many mothers and sisters. One veteran, who had reserved a stateroom with several friends who fought the Battle of Vin Blanc back in 1919 after the Armistice, a few days ago sent a telegram to Legion headquarters.

"Cancel previous reservation and make new one for myself and wife," the message said. While the men who went to war ten years ago will celebrate a bit, most of the crowd will do some rather serious touring, the legion officers say. Records show that more than 90 per cent of the delegations intend to pay a visit to the battlefields.

Voluntary Police. For the unruly vets who overestimate their capacities for the wines and liquors of France, the Legion has formed a corps of voluntary military police, chosen from the more sedate members in nearly every State. Any difficulties with the French will be settled through this body.

The atmosphere of the French pilgrimage already is prevalent at national headquarters. National Adjutant James Barton and a number of the department heads have gone to Paris to prepare for the invading host of comrades. "It won't be long now," says money for the trip.

"Too many women along," mutter those who wasted their substance or who can't get away.

DINNER GOWN. A very lovely black velvet dinner gown has flowing and very ample sleeves of delicate white lace.

EVENING PUMPS. Very elaborate slippers for evening are made entirely of narrow silver braid woven together and bound with silver leather.

A SOUND INVESTMENT

A 15 years resident of Sanford recently stated he did not know the plan of our Building and Loan—meaning the co-operative feature by which profits go to Stockholders proportionately. Your Building and Loan Association is something every Citizen is vitally interested in—"The Best Home Building Plan—The Best Plan for Saving."

His Highness Gets Ready to Rough It

The Prince of Wales will turn "ranch boss" again soon. He will take personal charge for a short time of his 4000-acre "E-P Ranch" at High River, Alberta, in the Canadian Rockies. Here are splendid photos of the ranch house, some of the prince's fine sheep, and the prince himself attired for "roughing it."

DUKE UNIVERSITY ERECTS DORMS TO COST \$20,000,000

This Is Estimated As One Of The Biggest Construction Program Ever Undertaken By A Southern University

RALEIGH, N. C. Aug. 3.—(INS)—The dream of James B. Duke, which gripped the imagination of the world through his endowment to Duke University three years ago, will soon be realized.

Over at Durham, the home of this southern seat of learning the foundation is being laid for the starting of construction in September of the University's new buildings, representing an expenditure of \$20,000,000.

This, in itself, it was estimated, will be one of the biggest construction programs ever undertaken in the South. The mammoth project will require several years for completion, and no part of the new plant is expected to be in operation before the fall of 1929. It will require five years to complete all of the plant, it was figured.

100 Acres of Building. The new buildings will cover more than 100 acres in the midst of Duke's new 5,000 acre woodland campus. There will be two score new buildings, all told.

The site of the new campus has been the scene of a beehive of activity for the past few weeks, where the entire surface of a mile-long plateau is being leveled for the construction of the plant.

The elongated group of 40 buildings will run North and South, extending over the top of the mile-long plateau from tip to tip. On the Northernmost tip, nestled among the pines and somewhat separated from the main group,

will be the new Duke Medical School, which is estimated to cost \$44,000,000 alone, and which will be operated under a separate endowment of \$10,000,000.

The medical school, it was said, will be among the first to be completed, and is expected to begin functioning under the direction of Dean Wilbur Cornel Davidson, M. D., now of Johns Hopkins, by September, 1929, according to present plans.

Looking a little to the South from the towering chapel spire, visible for 20 miles around, one will see the schools of engineering, chemistry, religion, forestry, class room buildings, laboratories, the library and the administration buildings.

Could Control Floods By Construction Of Basins And Reservoirs

KANSAS CITY, Mo., Aug. 3.—(INS)—The construction of basins, lakes and reservoirs, starting at the source of rivers, would be the most feasible plan for flood control, according to E. E. Blake, Oklahoma City, chairman of the Interstate commission for flood control of the Arkansas and Red River systems. Blake's territory includes Arkansas, Texas, Louisiana, Mississippi, Oklahoma, Kansas, New Mexico and Colorado.

The cost of basins for the Arkansas and Red rivers would not exceed \$100,000,000, Blake explained. These rivers, he said, the Mississippi river. For another supply one-third of the water of \$200,000,000, other tributary streams could be basined and reservoired, he said.

The present plan to spend about \$900,000,000 to rebuild and enlarge Mississippi levees was said by Blake to be the less effective of the two policies. He pointed out that benefits to agriculture and industry could be gained from the basins and reservoirs, whereas the levees would be mere protection. Blake is making an effort to get

Darrow Says There Is No Such Thing As Criminal Mind

CHICAGO, Aug. 3.—(INS)—Poverty and ignorance are the greatest causes of crime.

Clarence Darrow, noted criminal lawyer of Chicago, stated this belief and added that practical education could aid materially in reducing major offenses against society.

"There is no such thing as a 'criminal mind,'" he contended. "Crime is a pathological social lesson induced by an undue strain in the relationship between a man's desire and the law."

"The quickest cure is education. By that I do not mean Virgil and Caesar, Keats and Shelley, Astronomy or Metaphysics, excellent though such luxuries may be, but a practical education that aids any individual to earn a decent living and satiate many of his desires for the so-called better things."

"No boy should be allowed to leave school until he has been taught these rudiments of education."

"Criminals are not born, except in rare instances. Neither are they made. But they are both born and made to some degree. They are the product of their heredity plus their environment."

"Heredity cannot be immediately changed by society. But it can change environment. With this change would appear an education of the individual to economic independence."

DINNER GOWNS. Black georgette crepe combined with black lace is a popular choice for dinner gowns this year. Senators and representatives through the southwest to join in a flood control conference in Kansas City, Oklahoma City, or Little Rock.

SECOND AND SANFORD AVE.

The Sanford Herald

Published every afternoon except Sunday at Sanford, Florida, 111 Magnolia Avenue. Entered as Second Class Matter, October 27, 1919, at the Postoffice at Sanford, Florida, under Act of Congress of March 3, 1907.

WILLIAM L. DEAN, EDITOR; H. HOWARD BEHR, MANAGER; EARLE E. JONES, MANAGING EDITOR. SUBSCRIPTION RATES: One Year \$7.00, Six Months \$4.00, Three Months \$2.25.

The Herald, Sanford's pioneer newspaper, subscribes to the International News Service, receiving from the superior news organization twenty thousand words daily covering all the leading events of the entire world.

WEDNESDAY, AUGUST 3, 1927. THE HERALD'S PROGRAM: 1. Economy in city and county administration. 2. Deeper water routes to Jacksonville.

BIBLE VERSE FOR TODAY: A COMPLETE DELIVERANCE—Deliver me from blood guiltiness: O God, thou God of my salvation; and my tongue shall sing aloud of thy righteousness, Psalm 51:14.

THE SLEEPYTOWN EXPRESS: Just beyond the rainbow's rim a river ripples down. Beneath a bridge, around a bend, and flows through Sleepytown.

I know a certain little boy who always starts to whine when he is asked to trot upstairs before it's half past nine.

But other little boys, and little girls as well, As soon as eight o'clock has struck, rush right upstairs pell-mell.

As an exchange infers, President Coolidge doesn't say much, and means even less.

St. Cloud is having a telephone rate problem. Is there a city in Florida which is not having difficulties about something?

The new charter means good and efficient government. Have we had it in the past? Gainesville Sun. Neither have we.

Just two days over two months after he had committed an atrocious murder, Benjamin Levine was sentenced to death by a jury in Tampa. That was good work, well done.

Look To The Future

For nearly a year The Herald has advised, and used every legitimate means at its command, to get the City to put a stop to the ill-advised boom-period extravagance. It has consistently counseled economy and retrenchment for individuals and business houses as well as city, county and state affairs.

The County has adhered rigidly to this course. Late in 1926 it was proposed to have the County Commissioners call an election to vote \$1,600,000.00 worth of bonds for the purpose of widening certain roads in the County.

But the City, in spite of frequent promises of Mr. Lake to the contrary, has continued to spend money right and left. City governmental costs were higher last year than the year before, and are higher this year than last.

And in spite of the fact that Sanford was already over-bonded, and the market was flooded with Florida securities Mr. Lake went to New York last fall and disposed of \$1,575,000.00 worth of municipal bonds at a great sacrifice to tax payers.

Now while this record of the Commissioners at best is terrible, we might hear their arguments of not "rocking the boat," and not "swapping horses in the middle of the stream," if we had any reason to believe that the future would be any better.

It is this that we are so earnestly trying to avoid. What has been done in the past, is done, and cannot be helped. But the future is before us and can be saved.

We are expecting to see those charter changes, which will once again bring confidence back to municipal affairs and place the City on a sound substantial foundation, voted FOR by the people in Friday's election.

Coolidge Retires From The Field

President Coolidge's decision to refrain from seeking the Presidency would again be a candidate to succeed himself, the whole country and a severe blow to his followers who had previously felt that it was a foregone conclusion that the president would again be a candidate to succeed himself.

In view of the President's withdrawal, speculation has already become rife as to the one who will fall heir to the Coolidge mantle. The names of James O. Lowden of Illinois and Herbert Hoover stand out above all others in the discussion of a possible successor.

With the followers of these two potential candidates equally anxious to secure the nomination for their leaders, and with the possibility that a boom may be launched for Vice President Dawes, there appears to be plenty of work ahead of the Republicans.

The party for four years has been united solidly under the leadership of the President to push its own claims for recognition. Considerable discord that is likely to result will do the Republican party no good, and the internal strife may precipitate a row which would work advantageously to the interests of the Democrats.

When News Is News

There is no excuse for the newspaper attitude which would distort the news or give undue prominence, regardless of its value as news, because of personal opinions. The straight line that points real news—facts and actions, not supposition and hints, is the line to which the fair and honest newspaper will hew.

The importance of facts and of representing them fearlessly was forcibly brought out by Julian Harris, a Georgia editor, in a recent address, in which he says:

"The need for editors to print the truth whether the facts are creditable or discreditable to their community or state has never been greater than it is today, and never greater has been the responsibility resting on each and every editor to do his full share toward ridding his section of the forces and ideas which are menacing its intellectual growth, and making a jest of justice and a lie of liberty."

There may be newspapers in Florida so spineless that they permit themselves to be swayed from the road of truth and fact to venture out on the quagmire of insinuation and guesswork. It is certain that there have been those in the lurid past of boom days who let their perspectives become colored by hate, prejudice or desire for gain.

As Brisbane Sees It

Crossing The Ocean. Death And A Trip To Europe. News From Both Sides. Perhaps We Come Back. By ARTHUR BRISBANE. Copyright 1927 by Star Co.

WRITTEN ON THE Aquitania by the way of Cherbourg, leaving New York just after midnight yesterday morning. No matter how often you cross or big ships like this or an little one, you are reminded that the long trip called death and an ocean voyage are alike.

YOU TAKE YOUR "last dinner" in New York, friends are more or less sorry to see you go. That's the death.

On board ship you sail through space for some thousands of miles, with only water all around you. That's the trip from here to the next world.

THE SAFETY IN crossing our little ocean, the certainty of landing on the other side, should make us worry less about the big crossing over the ocean of ether.

When the Phoenicians, ancestors of many energetic Jewish citizens, first sailed from the Mediterranean, through the straits of Gibraltar, past the gigantic rock and into the Atlantic ocean, friends thought that was the end of them.

NOW CROSSING THE ocean is like going from New York to Chicago. You hear from your friends on both sides of the ocean. Business messages come from the United States side, other messages from European side, when 1000 miles from shore.

SCIENCE HAS conquered this little ocean, intelligence has made it familiar, cleared out sea serpents, taught us we need not put wax in our ears to shut out the singing of sirens, convinced us, to our sorrow, that no mermaids are waiting to pick us up when we fall overboard.

Our oceans and our land have been cleared of superstitions, unreal horrors, Chimera, Hydras and Gorgons dire.

IT HAS TAKEN men all of the million years they have lived on earth to change from cavemen to cannibals, to modern exploiters of their fellow men and to get rid of earthly superstitions.

WE ARE ONLY 12,000 years, from the late Stone Age, not 200 years from the stage coach and railroad.

A simple idea, like putting the eye of a needle in the point instead of the end made the sewing machine possible and freed millions of women from slavery. We should believe that other ideas will free us from the slavery superstition which has driven us hard through the centuries and caused more brutality, fear, cruelty and murder than all other causes together.

TENNYSON HOPED there would be no moaning at the bar when he put out to sea, and wrote prettily about "Twilight and evening shade."

AS PEOPLE GO to Paris and come back, none the worse for the trip, and take up their activities again, many believe those that take the voyage of death come back from that trip to earth and take up their work about where they dropped it.

THERE MAY LATER be news by this column about Europe, if anything is seen that might interest you.

IT IS GOOD for the United States, to have so good a neighbor and as swift a peacemaker as Canada on the north. We should like to see Mexico develop as Canada has developed and give us stronger competition on the south.

Cameras clicked in the Black Hills but the trout refused to bite. It seems the fish have no public relations department. This certainly would be a dull summer were it not for the air-planes, worms, flagpole sitters and Stillmanns.

Gosh! Mebbe Darwin Was Right

NORTH CAROLINA PLANS TO HONOR PIONEERS OF AIR

Towering Memorial To Wrights Is Planned By Tar Heel Citizens On Site Of Their First Experiment With Planes

RALEIGH, N. C., Aug. 3. (U.S.)—Coincidentally, with the ushering in of the Lindbergh era of flying, North Carolina, of whose lonely shores a quarter of a century ago aviation had its genesis, is preparing to erect a towering and lasting memorial to the Wright brothers and aviation.

U. S. AIRMEN ARE INSPIRATION TO EUROPEAN ACES

Renewed Efforts To Forge To Lead In Aeronautics Seen On All Sides On Continent

LONDON, August 3. (U.S.)—Inspired by the trans-Atlantic flight of Lindbergh, Chaubert and Pryde, the European nations are making great efforts to foster a new era in aeronautics.

They're Behind Fight in Chicago

Nelzer Tex Rickard, left, nor George P. Getz, Chicago promoter, plan to leave any details unfinished that would make the Timmer-Dempsey championship fight in Chicago next September the biggest of all times.
