Motorists: Don't Disregard Simple Safety Rules; Slow Down

Tell Truth About Age

In these days of social security, apployment insurence and so can't be sover all of us, both men such women, to ter the south about our ages.

A writer specializing in the subject reports that meny persons approaching retirement are running interdifficulties because in earler years they fibbed about this periodal statistic for one reason or another. This is easily remedied where birth statistics are available, but many of the present middle aged and elderly were born when and where no official birth records were kept.

The story is told of a men who juggled his age around to fit circumstances as time went by. Once be dropped a year to get into an athletic contest. And so on. Now he is actually 62 and entitled permanent disability instirance, but company tetords show him to be only 58. How to get a nonexistent birth certificate is his problem.

So this modern epoch of changed social and econsmie relationships has established increased recognition for at least one variety, the value of truth about birth dates.
