

# Daytona Beach Defeats Lookouts By Score Of 13 To 9

## 2nd-Place Islets Use 4 Tossers To Check Locals

### Top-Notch Sanford Nine Still Holds No. 1 Position In State Loop; Play Return Match Tonight

Putting forth every effort to defeat the top-notch Lookouts the second-place Daytona Beach Islanders called four moundmen into service last night to hold the local's heavy hitters in check while the visitors piled out 15 safeties to win by a score of 13 to 9.

It was the season's third defeat for the locals whose No. 1 position in the loop standings has not been threatened since the opening of the season and they are still one and a half games ahead of the second-place Islanders.

Pinder, Dean and Howington called on the mound for the locals at the Municipal Athletic Field last night before a large attendance of fans who jammed the grandstands.

The Lookouts hopped off to a two-run lead when they grabbed a tally in each of the first two innings, but the Islanders came back to knot the count when they scored across five runs in the first of the seventh to give the Daytona Beach lads a 5-2 lead.

In the first of the eighth the Islanders slipped through with four runs, to which the Lookouts replied with two in the last of the same inning.

The Islanders bounced across another four in the first of the ninth before the Lookouts came back in the last half of the inning to shave across five runs when with the bases loaded, and two men away, Barnett struck out to end the game.

Lookout sluggers totaled 11 bluffs off the offerings of four Daytona Beach pitchers, Colonel Walker, Shrods, and Donnelly.

Campbell, Lookout shortstop, checked in with five errors over the evening.

Tonight the Lookouts go to Daytona Beach for the last of the current two game series.

Pinder	2	0	0	1
Dean	1	0	0	0
Hudson	1	0	0	0
Carroll	1	0	0	0
Howington	1	0	0	0
Totals	37	9	11	27

Hitless hit for Dean.  
Carroll hit for Campbell.  
Bynes hit for Howington.

## Saints Defeat Anglers 7-6 In Overtime Game

### G-Men Trim Reds 9-7 While Lowly Senators Trim Azaleas

It took 13 innings for the St. Augustine Saints to defeat the hard-fighting Leaning Anglers 7 to 6 in Leaning last night as the Gainesville G-Men nosed out the Deland Red Hatters 9 to 7 in another hard-fought state league battle. In Orlando the lowly Senators handed the visiting Palatka Azaleas an 11 to 5 defeat in the other loop contest.

Going into the 13th frame with the score still tied at 6, all the Saints made use of an error, a wild pitch and two sacrifices to push across the winning tally.

The Saints had come from behind to tie the score in the sixth inning and neither team scored until the Saints shoved across the winning tally in the 13th.

In Gainesville, the fighting Red Hatters outthrew the G-Men 11-9 but were unable to combine their safeties with men on base for tallies. The G-Men took the lead on a two-run rally in the seventh inning and never were headed.

The tall-end Senators combined 11 hits and 8 Azalea errors for their fallow and while the Palatka also blasted out a total of 11 hits, they were unable to score after a 4-run rally in the third frame.

## Gehrig Still One Of Highest Paid Baseball Players

### By DILLON GRAHAM

NEW YORK, May 3. —(AP)—The old Iron Horse, even though he's a bit rusty and wheezes loudly as he rounds the curves, still is baseball's highest-paid player.

Some of the baseball boys were sitting around bulling the other day about salaries. Everyone agreed Lou Gehrig got ten say but authoritative information lacking. It was difficult to do more than guess as to who were the highest paid major leaguers by position.

"Lou took a cut, but he's still getting more than \$30,000," one of the said.

"That puts him a bit above Jimmy Fox and Hank Greisner," another said.

"How about second-basemen?" "I'd say Charles Gehring."

"What about Bill Herman?" "He gets good money, but I think Gehring would be tops, until the Saints showed across the winning tally in the 13th."

"I heard Yawkey was paying him \$30,000."

"I wouldn't doubt it. That puts him first among the shortstops."

Well, who is Mr. Big among third-basemen? "I'd guess Red Rolfe of the Yanks."

"How about Stanley Hack of the Cubs?" "And Pinky Higgins of Detroit?"

"I'll still gamble on Rolfe."

"And the outfielders—?" "DiMaggio in the highest-paid flycatcher. He's getting pretty close to \$30,000."

"Yeah, he got \$25,000 last year and Barrow tacked on a raise."

"Becha he'll be the highest-paid man in baseball next year."

"Both Lou Medwick of the Cardinals and Mel Ott of the Giants get around \$18,000."

"I can't think of any others that get that much dough."

"What about the battery?" "I'd say Hubbell and Hartnett."

"Yeah, Hubbell gets \$22,500 again this year. I'll bet Hartnett is getting close to \$30,000. He was in the high 20's last year."

"Dickey probably made as much as Hartnett did as a catcher, but Gabby got another ten grand or so tacked on for managing."

"I guess Hubbell is tops among pitchers, but Ruffing and Lee and Dix Dean ought not to be far behind."

"Well, these are all guesses, but I bet we're not far wrong on any of them."

Texas, which in 1938 produced 3,285,000 birds, leads the nation in turkey production. California is second; Minnesota, third; Oklahoma, fourth.

## DUTCH SANCTUARY BOUGHT

### THE HAGUE, May 2. —(AP)—A delegation is being sent by the International Refugee Colonization organization to examine the possibilities of colonization in Dutch Guiana. It will contact the Anglo-American Commission already in British Guiana.

Preventing Deformities

In Philadelphia a New York woman was reported the other day as having drowned her ten-day old son while walking in a bus terminal. The child was deformed and the mother said she simply could not stand the thought of his growing up at the mercy of his fellowmen handicapped by physical defects for which he was not responsible.

One can sympathize with this woman's fear of deformities. Life can be hard enough for most well and strong people without having to be handicapped in the struggle for existence by a club-foot or a twisted neck. But what she did not know, and should have been told, is that in this day and time there are very few deformities which cannot be corrected if taken in time.

With a ten-day old child almost any physical handicap can be overcome if properly treated. In last Sunday's New York Herald Tribune was an article by Dr. Charles H. Smith, professor of pediatrics at New York University and a director of the Children's Medical Service at Bellevue Hospital, who points out a few of the more common deformities which can be easily overcome with treatment.

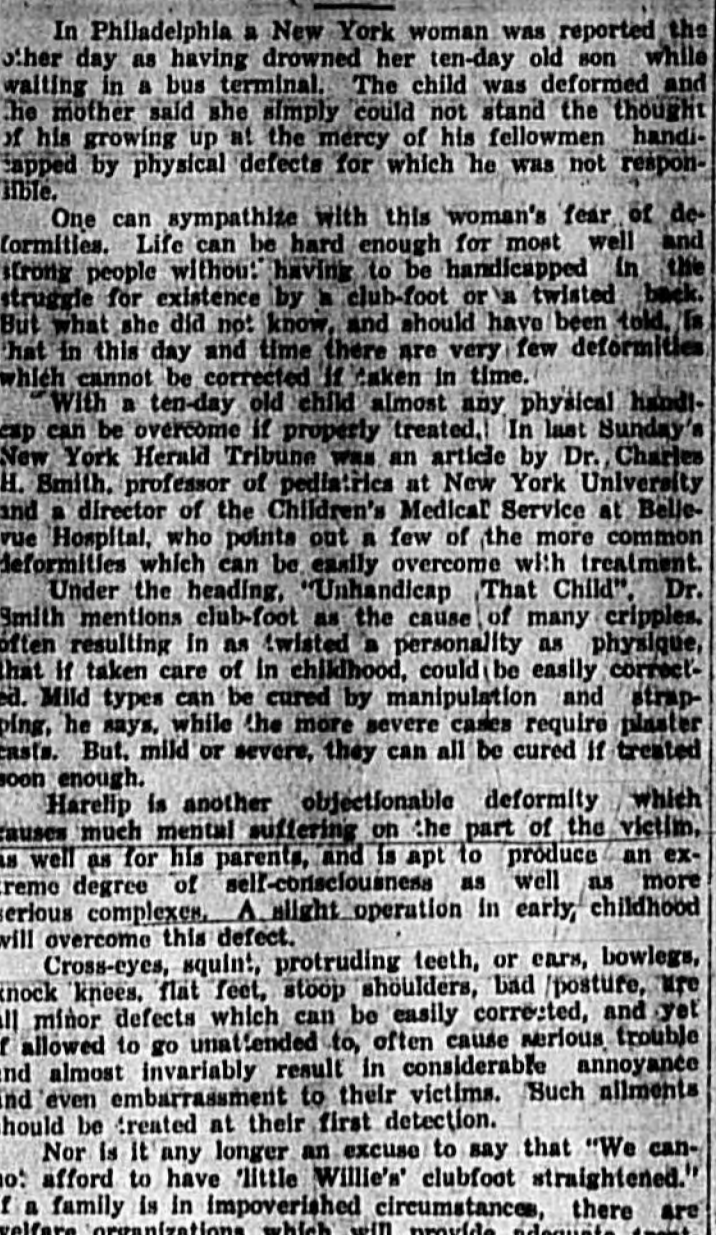

Under the heading, "Unhandicapped That Child," Dr. Smith mentions club-foot as the cause of many cripples, often resulting in a twisted personality as physique, that if taken care of in childhood, could be easily corrected. Mild types can be cured by manipulation and strapping. He says, while the more severe cases require plaster casts. But, mild or severe, they can all be cured if treated soon enough.

Harelip is another objectionable deformity which causes much mental suffering on the part of the victim, as well as for his parents, and is apt to produce an extreme degree of self-consciousness as well as more serious complexes. A slight operation in early childhood will overcome this defect.

Cross-eyes, squint, protruding teeth, or ears, bowlegs, knock knees, flat feet, stoop shoulders, bad posture, are all minor defects which can be easily corrected, and yet if allowed to go unattended to, often cause serious trouble and almost invariably result in considerable annoyance and even embarrassment to their victims. Such ailments should be treated at their first detection.

Nor is it any longer an excuse to say that "We cannot afford to have 'little Willie's' clubfoot straightened." If a family is in impoverished circumstances, there are welfare organizations which will provide adequate treatment. Society has at last learned, fortunately for everyone, that it is cheaper to cure sickness and deformities than it is to take care of people who are unable to take care of themselves.

TO, HMMI GUESS I'M GETTING SPRING FEVER

TOO LATE TO CLASSIFY

Not long ago I was asked to answer to a question in one of these popular question and answer programs. Furthermore, I was allowed to select my own question.

At this moment the Congress of the United States in Washington and the Legislature of Florida in Tallahassee are assembled to ponder over an attempt to solve countless questions affecting the welfare, not only of the state and nation, but of each individual citizen.

It was what might be termed an average group of average intelligence—all citizens of Florida who should possess a good general knowledge of their state.

Turning to state officials, I had no trouble in getting a quick answer to the query "Who is Governor of Florida?" but three went down when I asked to name the Secretary of State.

They are a justice of the peace in Clay County, a justice of the peace in Duval County, a justice of the peace in Alachua County, a justice of the peace in Volusia County, a justice of the peace in Brevard County, a justice of the peace in Indian River County, a justice of the peace in St. Johns County, a justice of the peace in Volusia County, a justice of the peace in Brevard County, a justice of the peace in Indian River County, a justice of the peace in St. Johns County.

They are a justice of the peace in Clay County, a justice of the peace in Duval County, a justice of the peace in Alachua County, a justice of the peace in Volusia County, a justice of the peace in Brevard County, a justice of the peace in Indian River County, a justice of the peace in St. Johns County.

Federal Judges Hold Citrus Law Unconstitutional

(Continued From Page One)
this year's crop is large, and the Florida Citrus commission, acting on authority of the act, fixed the price of grapefruit at 20 cents a box. Testimony showed that the growers could not pay that price and sell it at a profit.

The growers have established business, large investments, and thousands of employees, but were forced to exact contracts for future delivery of juice after the commission was passed by the legislature. The effect of this was that the growers were penalized for the benefit of the grover, if the growers continued in business, the opinion added.

The testimony also showed that many of the growers had organized cooperative corporations to process their grapefruit. The cooperatives did not pay each grower a share of the proceeds, but covered it with the amount of the price of the fruit and were not expected to pay for it unless the market price was higher than the price paid to the grower. The cooperatives were paid while retaining payment by the regular growers.

This certainly was discriminating against the growers, and the court said that the act was unconstitutional as to the portion which authorized the commission to fix the price of citrus fruit.

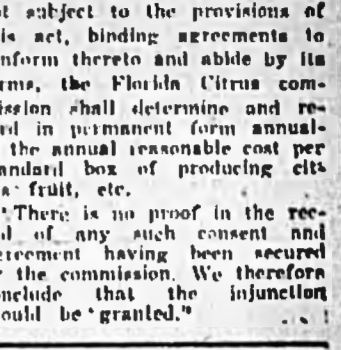

The act makes a sale for less than the price fixed unlawful. The price fixed by the commission is a sale by the grower for less price would be unlawful.

If his actual cost of raising his crop were \$10,000 and he sold it for \$8,000 and he would be compelled to let it spoil on the trees and so lose his whole crop. It is not this alone sufficient to make the act arbitrary and oppressive. We find the act unconstitutional.

There is some other feature of the act which may not render it arbitrary and oppressive, but certainly requires enjoining the production of citrus fruit.

### Sex Diseases Of Children Found On Rise

#### Buck, Of New York, Reports Gain In Illegitimate Offspring

NEW YORK, May 4.—(AP)—A nationwide increase in venereal diseases among children and illegitimate birth to girls of high school age in the last four years is reported by Ellsworth B. Buck, vice-president of the New York City Board of Education.

Mr. Buck, who has vigorously campaigned for the introduction of sex education in the city schools, said that a national survey he had directed showed an alarming increase of adolescent sex misdemeanors. He urged that steps be taken in all public schools to educate children to avoid pitfalls.

Mr. Buck reported that the greatest increase in venereal disease among children and illegitimate births to school girls was in New York, where more than 100,000 illegitimate births were reported last year, the highest rate in any of the seventy-four large cities covered in the survey, in the amount of child-sex offenses.

He said the index of illegitimacy in New York is "New York conditions" with their twin of vice, venereal disease, abortion and incest are less than one-third as high as those in the average city or the whole country.

Mr. Buck found that Yonkers, N. Y., had the lowest rate of illegitimate births, 7.42 to every 1,000 legitimate. Other cities with rates lower than New York's 12.07 were Bridgeport, Conn.; Salt Lake City, Utah; and Paterson, N. J. Southern cities were found to have the highest rates, Richmond, Va., being first with 27.49.

"The year-to-year growth of illegitimacy in larger cities needs particular noting," Mr. Buck said. "Of 67 cities of the unwarlike mothers, if the 1938 figures are fairly typical, one should count something over three times the number of rapes and some thing like thirty cases of venereal disease."

"It is precisely because parents refuse or are unequipped to perform this duty that the present conditions have arisen."

### Law Violators Are Tried In Municipal Court

W. R. Potter was given the alternative of a \$200 fine or 60 days in jail when he appeared Monday afternoon before Judge Frank L. Miller in Municipal Court to answer to a drunken driving charge. He was also fined \$10 for driving on a rim.

W. B. Walker forfeited a \$10 bond when he failed to appear to answer to a charge of drunkenness, while G. E. Woodcock forfeited a \$5 bond for non-appearance. He has been posted following his arrest for drunk and disorderly conduct.

Victoria Lee, negro, charged with keeping a disorderly house, was granted a continuance by Judge Miller, as was Henry Rowe, another negro, charged with liquor selling, along with two other negroes, John English and Joseph Morrison, charged with selling liquor. Henry Walker, negro, was also granted a continuance on a charge of keeping a disorderly house.

Eddie West, negro, was given the choice of 30 or 15 days on a drunkenness charge. Willie Busch and Charley Mackwell, both negroes, each paid a \$5 fine for riotous conduct, while Sam Hutton, negro, drew a straight 15-day sentence when he pleaded guilty to a charge of assault.

### Law Reaffirms U. S. Friendship

NEW ORLEANS, May 4.—(AP)—President Roosevelt of Nicaragua, who reaffirmed the friendship between his country and the United States.

Roosevelt, who is enroute to Washington for conferences with Roosevelt on the development of Nicaragua, announced full accord with the "new interpretation of the Monroe doctrine" and said the nation looked upon the United States as its protector.

As long as the United States remains well-armed and powerful we of Nicaragua feel that our country always will be free and safe from any foreign invasion," he said.

He revealed that his discussions with Roosevelt would include the canal the United States once proposed to build across his country for the treatment and elimination of the Pan-American highway.

The future, Roosevelt said, would be a forward step in military cooperation which he described as the best way to maintain peace.

### NEW PLANT PLANNED

NEW YORK, May 4.—(AP)—The Federal Highway Administration has announced plans to build a new plant for the production of asphalt at a cost of \$1,000,000.

The plant, to be located near Washington, D. C., will produce asphalt for use on the new highway system. It is expected to be completed by 1940.

## FLORIDA EXAMINES ITS ROADS AND THE TRAFFIC THAT FLOWS OVER THEM

Florida's state wide Highway Planning Survey was begun in 1934 under the direction of Walter M. Parker, chief of the Division of Highway Planning.

Designed to provide the facts on which a long-range, rationally planned highway program can be based, the Planning Survey is now nearing completion after three years of extensive research, during which approximately two hundred technicians have been employed.

This gigantic research project has been carried out at a cost of \$1,000,000, of which \$350,000 was contributed by the Federal government.

The survey is divided into three sections:

1. Rural Road Inventory.
2. Traffic Survey.

Electric eyes like this automatically measure the flow of traffic over Florida's roads.

By weighing trucks, the Planning Survey finds out how strong roads must be built to support traffic.

habits of rural and urban residents. Although the Florida data has not yet been analyzed, studies made in other states show that the main roads are everybody's roads—both rural and urban people use the main highways most.

In addition to counting traffic, the Division of Highway Planning has made studies to determine just how much the traffic weighs that flow over the roads, what products move over the roads, where these products come from and where they are bound. Using 24 portable scales called loadometers, and four permanent pit scale stations, accurate information has been gathered to help Florida's highway engineers design roads fitted to the loads they must carry.

Because there has never been any accurate information on how much it has cost Florida to own its highway system, or who has paid for it, financial surveys are vastly important and extremely complex. As Walter Parker points out, it is only by obtaining this information that it will be possible to build safe, adequate roads without imposing undue tax burdens on highway users.

### Who Pays the Bill

By digging into back records of highway spending, it has been possible to discover what taxes have been levied, what they have yielded, what the farmer has paid and what the city man has paid. Likewise, it has been determined what these taxpayers got for their money—how much road for construction—how much for maintenance—what proportion for all the different phases of traffic on which automobiles run—and how much was diverted to purposes unrelated to roads.

All this information has been obtained through road use studies that will determine an annual cost average for the various types of road particles—how the time they were needed to travel with they were riddled because of worn out or obsolete. These facts will make it possible for the Road Department to know what type of paving will be most economical for each road.

All the information gathered in these three major field studies—Rural Road Inventory, Traffic Survey, and Loadometer—has been sent into Tallahassee for tabulation, correlation and final analysis. The state-wide Highway Planning Survey has been the most comprehensive study ever made in this country. It is expected that the results of this survey will be of great value to the nation as a whole.

### ROAD USE STUDIES DISCOVERED THAT AN AVERAGE OF 4,000 OUT-OF-STATE CARS ENTER OR LEAVE FLORIDA EVERY DAY

By digging into back records of highway spending, it has been possible to discover what taxes have been levied, what they have yielded, what the farmer has paid and what the city man has paid. Likewise, it has been determined what these taxpayers got for their money—how much road for construction—how much for maintenance—what proportion for all the different phases of traffic on which automobiles run—and how much was diverted to purposes unrelated to roads.

All this information has been obtained through road use studies that will determine an annual cost average for the various types of road particles—how the time they were needed to travel with they were riddled because of worn out or obsolete. These facts will make it possible for the Road Department to know what type of paving will be most economical for each road.

All the information gathered in these three major field studies—Rural Road Inventory, Traffic Survey, and Loadometer—has been sent into Tallahassee for tabulation, correlation and final analysis. The state-wide Highway Planning Survey has been the most comprehensive study ever made in this country. It is expected that the results of this survey will be of great value to the nation as a whole.

## New Fashions Give Matrons Biggest Break

By ADELAIDE KERR

That famous little girl silhouette has come to town again in new Spring and summer clothes for mother!

Designers had young things to mind when they carved out that youthful profile, but now the new mode seems to be better than they thought, for little-girl clothes fit the matron's figure.

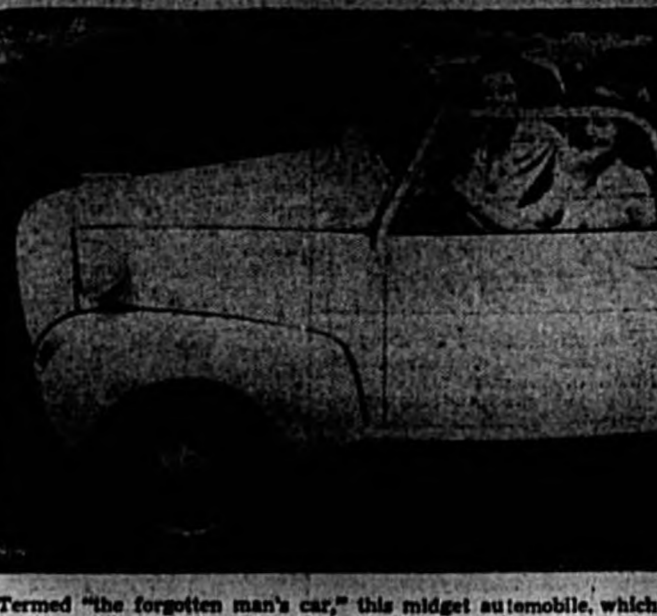

Moreover, they give mother the greatest fashion "break" she has ever had, says the clothes counsel for a leading Fifth Avenue shop, who settles each year, the wardrobe worries of thousands of women who are frankly fifty or more. Listen to her opinion and some of the tips based on it.

"There's never been a better canning time for the 'middle aged' spread, than the little-girl silhouette, for it falls in soft fullness from the hips and no one can tell what the hip measurement really is. To get the most flattering line, let the skirt remain fitted to the hips and the fullness break from there, seeing that it does not extend too far out on each side.

"If the waistline is no longer slender, the best effect is obtained with a hemline slightly lower than the bulge in the side of the leg, which should never show, even in a young girl."

The little-girl silhouette appears in a number of new Spring suits for mother designed of sheer wool with gently fitted jackets and gone to pleated skirts. It has also come to town in charming printed ensembles that combine a simple frock (pleated or gored as to skirt) with a trim little jacket, nearly all the patterns splash in blue, green, or gray backgrounds with white.

But there are plenty of other clothes for mothers who want to leave the little-girl silhouette for the younger generation. Electric wool tailcoats are cut with fitted hip-length jackets and many coats

## Chemists Lead To Study Of Wider Use Of Farm Products By Worm

By JACK THOMPSON

WASHINGTON, May 4.—(AP)—A scientist's curiosity about a worm led modern chemists to the farm to find raw materials for the factory.

"Why don't we beat the silk-worm to it—can't we make silk ourselves?" asked an inquisitive insect expert more than two centuries ago.

The chemists boiled that one word in their text books for 130 years before an ex-pupil of Pasteur hit upon exhibit "A" of modern chemistry.

That's rayon—produced in 1844.

By the Count-Hilaire de Chardonnet from the pulp of a mulberry-tree.

Today this test-tube baby of the textile field leads a growing list of products produced from farm crops by factories. From the product of an infant pre-war industry, rayon has grown until it is the most important synthetic fiber in the world.

To make rayon by modern methods chemurgists draw on the cotton fields for raw material that used to be thrown away as waste. They use cotton lint, the little white hairs that stick to cotton seeds after the other fibers have been pulled off. Forty-two thousand tons of these tiny white fibers went into U. S. rayon production alone in 1937.

The excess of rayon is only one indication that chemistry can create new markets for farm and forest products.

Camera cases from farm product plastics have cut the cost of equipment for amateur photographers.

Cellophane covers everything on the store shelf from cigarettes to cookies. It is made of wood pulp.

From soybeans, factories now turn out paints, enamels, varnish, glue, ink, linoleum, plastics and a

## Old Age Claims Paid Last Month Average \$42.18

A total of 244 Federal Old-Age Insurance claims averaging \$42.18 each were paid in Florida in March, it is announced by Paul Weaver, manager of the Social Security Board's Orlando Field office. Of this total 37 claims were certified in the eight counties served by the Orlando office.

Claims now being paid are filed by insured wage earners who have already reached age 65, and by the heirs or estates of those who have died. Mr. Weaver explained. These are single cash payments amounting to 31.2 percent of total wages received in employment covered by the Federal Old-Age Insurance plan since Dec. 31, 1936.

"The backbone of the Federal Old-Age Insurance system," Mr. Weaver said, "is the Social Security account number. It is also important that the worker see that his employee record lists his number and name correctly and exactly as it appears on the account number card. Benefits are based on wages credited to the numbered account maintained by the Social Security Board for each of more than 42,000,000 workers throughout the United States."

variety of foods. A major manufacturer of cheap cars has been using soybeans in paint and to make steering wheels and dashboard gaskets for several years.

And today's industrial markets for farm products are only a prelude to the future as chemists and engineers see it.

But there still remains a pound of waste for every pound of wheat, corn or cotton used in the factory or on the farm, says Dr. Henry G. Knight, who will direct Uncle Sam's laboratory search for new farm markets.

Farm surplus glut the markets in bumper crop years.

Now big a dent can the chemists make in these wastes and surpluses?

## MIAMI, May 4.—(AP)—A man identified as Charles Dowdell, 35, flight employe from Hollywood, Fla., was killed yesterday in a collision between his automobile and a truck at a street intersection.

### Scientists May Develop Suits Made From Milk

**Greater Use Of Farm Products In Factories Is Sought**

By JACK THOMPSON  
WASHINGTON, May 4.—(AP)—Come the chemical revolution, men will wear suits produced from milk and see through eyeglass lenses made from corn plastic.

They'll fly airplanes out from out-hulls, write letters on cotton paper, run automobiles and cheap cars on alcohol instead of gasoline—and the factories will swamp the farm with orders for raw materials.

That's the pattern of the future as the chemurgists see it, and they're willing to bet their last test tube it comes true.

The skeptics are inclined to scoff. But to chemurgists' evangelist William J. Hale, the future is assured for a science that has already given the world rayon, cellophane, soybean paint and plastics, and a long list of fac-

tory products made from farm crops.

Hale, research consultant for a big chemical company, goes even further. Since the early 1920's he has been spreading the doctrine that "The chemical revolution is here." He predicts the time is near when alcohol made from farm products can be mixed half and half with water and still out-perform gasoline as a motor fuel.

He says a half billion dollar industry that would employ 3,000,000 men directly and indirectly, could be set up now to ferment farm products for industrial use.

Uncle Sam's more conservative scientists agree that alcohol produced from corn, wheat, potatoes or any of a half dozen other crops can be blended with gasoline to perform efficiently in modern gasoline engines. They plan to study further possibilities in the Government laboratories being established to ferret out new markets for farm products.

Germany, France and Italy use various forms of synthetic motor fuel either as a part of their national defense measures or to stimulate agricultural production.

Milk made wool has progressed to the patent stage. The Department of Agriculture scientists have developed a process for making synthetic wool from the

curd of chemically soured skim milk.

It looks much like natural wool, and can be cut to convenient lengths for the loom and mixed with real wool.

But no one in the U. S. is making money on corn-alcohol for auto fuel or milk-wool for the first of four major drawbacks they think will delay the age of chemurgy. Those obstacles are:

1—The cost of production is too high.

2—Although Uncle Sam's patents on milk-made wool are open to private promoters no one is putting out the product commercially.

Farm alcohol is also too high priced, say Department of Agriculture scientists, to compete with straight gasoline.

Farm market prices fluctuate too much from year to year.

For example, a profitable factory making soybean products folded up during a single season of high farm prices.

A new synthetic fiber to compete with silk hosiery could be made from castor beans, but probably will be made from castor instead because that material has a more stable price.

3—It takes too long for a discovery to be perfected and made available.

"It may take five to twenty years to put a test-tube discov-

### Cost Of Last War Should Be Considered In Crisis

By PRESTON GROVER  
WASHINGTON, May 4.—(AP)—Here are some things to remember about the last war while we consider whether or when we shall get into another one.

It all comes from "American Armies and Battlefields in Europe", freshly printed by the Battle Monuments Commission headed by Gen. John J. Pershing. Army men are burbling about it. It took ten years to prepare. It is as condensed as "Pilgrim's Progress" written on a nail head, but accurate no end. It tells the story of the war in everyday English but technically exacting enough for military scholars.

We emerged from one "miscellaneous" chapter with the following:

Total strength of the American Expeditionary Force, Nov. 11, 1918—1,951,701 men of all services.

Total marines (did they win the war?)—32,353.

Combat strength at the time of the Armistice:

Infantry and machine gunners	616,000
Artillery	278,600
Medical corps	132,800
Air service	34,000

First soldiers killed by enemy: 1st Lt. William T. Fitzsimmons and Privates Rudolph Robbins, Jr., Oscar C. Tugo and Leslie G. Woods, all of U. S. lost in hospital. They lost their lives at 10:55 P. M. Sept. 4, 1917, when Germans bombed a British hospital where they were on duty.

First soldiers killed in action: Corp. James D. Gresham and Privates Thomas F. Enright and Merle D. Hay, all 16th Infantry, killed when German troops raided American trenches at Bathmont, Nov. 1917.

By April 1918, a year after our entry we had three air squadrons on the front; by armistice, 45 squadrons totaling 740 planes. Of these, 12 squadrons were equipped with American planes.

American aviators brought down 755 enemy planes and 71 balloons. American losses to enemy aviators were 357 planes and 35 balloons.

No American made cannon or shell were used by the American first army during the war. All were bought from the French and English. All tanks used by America were of French or British make.

Ammunition expended by the AEF in combat included 302,092,133 rifle cartridges, 2,274,200 101 mm. cartridges, 2,274,200 one-pounder shells, 7,550,833 French "seventy-five" shells, 1,983,907 rasping artillery shells, 2,724,077 grenades.

Total horses and mules used every on the market" says Dr. Henry G. Knight, in charge of the Government's new laboratory program.

To help industry bridge the gap, Uncle Sam's program will include test production in large enough quantities to learn about manufacturing costs and problems.

4—New inventions dislocate established markets.

Secretary of Agriculture Wallace warned the Farm Chemurgic Council that "by the very nature of his work, the chemist cannot help destroying as well as creating farm markets."

"A million acres are now used to grow soybeans for industrial uses including automobile manufacture. But first technological progress—in the form of the automobile—threw out of use 30 million acres once needed to feed horses and mules."

But Dr. Knight, head of Uncle Sam's new laboratories, says he has no fear of the long-run effects of chemistry's hunt for new farm markets.

The stage coach held on for years after the railroad was invented, he points out. When the automobile came along it did not replace the railroad. The invention of radio brought a tube that has actually helped improve long-distance telephone conversation.

### Expenditures Discover New Crop Uses

#### Laboratories Set Up To Assist Farmers With Huge Surplus

By JACK THOMPSON  
WASHINGTON, May 4. — (AP) — Chemists will pull the farmer out of the red and help cut the Federal subsidy of agriculture which has cost at least three billion dollars since Hoover Farm Board days.

The chemurgists say yes—and emphatically.

"We'll turn farm products into almost anything from eye-glasses to airplanes and put the farmer into the business of supplying raw materials for the factory," says Uncle Sam, smilingly.

Eighty new laboratories are being set up in the major farm areas of the U. S. north, south, east and west. Eight hundred scientists—test tube economists with an eye on both the farm and factory—are going to hunt new and wider industrial uses for farm products.

They're studying what the chemurgists had in mind a few years ago when they coined their catchword from the Greek "chemura" for chemistry, and "ergon" which means work.

In the 1920s the iron horse welded together a continent and put commerce on steel wheels. In the teeming twenties of this century a cheap car set off a lifetime boom. And today a wild dream of perpetual airplane came true to help things along. Its supporters see chemistry as a means of creating another new age—this one for the American farmer.

Round-faced, merry-eyed William J. Hale, inventor of the word "chemurgy," caught the eye of Henry Ford during the depression years. Three hundred representatives of agriculture, industry and science trooped to the first chemurgic conference at Dearborn, Michigan, in the Spring of 1935. Other conferences followed and the National Farm Chemurgic Council began to enroll members and spread the word.

Then they found that for 20 years Department of Agriculture scientists had been searching for new ways to put farm products into industrial markets.

With limited funds these government scientists already had learned, for instance, how to make building board and high-grade paper from cornstarch, straw and other wastes; starch from sweet potatoe pulp and paint and plastics from soybeans.

They were a prelude to the new program which experts say will be the biggest in history. The new battery of scientists will have something like a million dollars a year to spend in each of the four new ultra-modern laboratories.

In the South they'll try first to find new industrial futures

for cotton, sweet potatoes and peanuts, crops in which the major surpluses have occurred. It is likely to occur, says Secretary Wallace. The three-story laboratory, to be built in New Orleans, will serve nine southern states covering the area from Oklahoma and Texas east to the Atlantic.

The laboratory at Peoria, Illinois, will concentrate on the most troublesome mid-western surpluses, corn and wheat.

In the east scientists at the laboratory near Philadelphia will work on apples, milk products, potatoes, vegetables and tobacco. Its territory runs as far south as North Carolina and Tennessee.

The western laboratory near San Francisco, at Albany, California, will experiment with fruits, vegetables, potatoes, wheat and alfalfa.

The tentative program for cotton covers the whole cotton plant. Already the fine white hairs from the lowly cotton seed have helped build the biggest success in the synthetic fiber field. Rayon, made from cotton linters and from wood, has skyrocketed from a two-by-four industry of pre-war days to a giant among the textiles.

Its half-brother, a transparent cellulose wrapping material, is just one more of a long list of test-tube triumphs credited to scientific research.

On a million of dollars worth of crop-consuming industries scientists have created in the past, the chemists and engineers base their hopes for the future.

#### American Manners Fit For Royalty

DENVER, May 4. — (AP) — With the big summer royalty parade under way, here's a tip for garden variety American citizens:

Don't drain your wine glass when a toast has been proposed to the honor of the titled visitors.

Nine chances out of ten the royalty will turn around with only a sip gone and make a toast for you.

Most embarrassing moment of the visit of Prince Frederik and Princess Ingrid of Denmark to Denver was the toast incident.

Quite a few persons enthusiastically doctored their wine with whiskey-jigger technique when Gov. Ralph Carr, at the evening banquet, proposed they drink to the health of the King of Iceland and Denmark.

They gulped water or pantomimed with empty glasses a moment later when the Prince said a word for President Roosevelt.

Others, American citizens unaccustomed as they are to royalty, did pretty well with their conduct in the West's preview of the summer royalty parade.

Manners fit for royalty, learned in theory, stood up pretty well under the pressure of practicality.

There was the little incident, however, at Durango, Colo., of the train crew that knew Prince Frederik was a railroad fan (he had driven a railroad fan (the had arrived at Salt Lake City to drive a locomotive). The crew wanted a toast. The prince, with efficiency, fumbled a stiff salute, started away with a rush and left the royal pair standing on the platform. They discovered their error within 60 yards and the steamroller locomotive jammed its brakes while the couple displayed commuter form and dashed for the rear platform.

# Lookouts Trim Daytona Beach 7 - 6 In Overtime Tilt

## Locals Score Winning Tally In 13th Inning

### Sanford Heavy Hitters Get 14 Safeties Off Five On Mound For Islanders; G-Men To Visit Here Tonight

The Sanford Lookouts chalked up their twelfth win of the season in Daytona Beach last night, routing out the Islanders 7-6 in a stormy 12-inning session, in which Vincent, Pinder and Dean held their opponents to six hits over the extra-inning route.

The Lookouts pounded a total of 14 hits off the Daytona Beach hurlers including Donnelly, Petropoulos, Horton, Zawlocki and Herr, with Herr eventually being charged with the defeat.

The Sanford club grabbed off a one run lead in the first, which the Daytona Beach club nullified in the last of the fourth when they moved across one run.

The 1's took over the lead in the last of the fifth when they picked up another brace of runs, but the Lookouts came back to add two runs in the first of the seventh and then collected two more runs in the first of the eighth, to give them a 6-3 lead.

Daytona Beach came through with two more runs in the last of the eighth to tie things up 6-6.

In the tenth Sanford rammed across one run under protest when Stefan, Pinder's third as a catcher, came through with the old hidden ball trick on Catcher Red Lane at third, which Lane refused to allow, stating that time was called at the time of the play.

The Islanders again evaded things up in the last of the ninth when they collected one tally, the Lookouts finally coming through with one run in the first of the thirteenth to grab off the win.

Skeen, steadfast centerfielder, banged out four safeties in six trips to the plate, one of them a home run, while Barnett, second baseman, was swinging at a respectable 500 clip, connecting for three for six.

Tonight the McShane-managed G-Men make their second appearance of the season at the Municipal Athletic Field where Sid Hudson will act as master of

## Deland Reds Defeat G-men By 8-1 Score

### Anglers Take Saints 9-6 While Palatka Loses To Senators

The scrappy Deland Red Hats triumphed the Gainesville G-Men 8-1 at Conrad Field last night to move a notch closer to the No. 2 spot in the State League standings while the Leesburg Anglers staged a big fourth inning rally to come from behind to take the game by a score of 9 to 6 from the St. Augustine Saints. At Palatka, the Orlando Senators got their fifth victory of the season when they handed the Azaleas a 9 to 6

IRON MAN LOU GEHRIG, Yankee first baseman, is shown seated on the dugout steps May 2, after benching himself for the "good of the team" thus ending his consecutive games at 2130.

## Galento May Be Jinx To Louis' Fighting Record

By DILLON GRAHAM  
NEW YORK, May 4.—(AP)—I have just discovered "White Hope" boxing needs to kazo Joe Louis.

He's another guy named Joe. He can't box a lick.

Joe Dunninger. He lives in the Bronx. But don't hold that against him.

If he should hit Louis it would have approximately the same effect on the Tan Terror as an inspired attack by an angry housefly.

I mean to say that Joe—my Joe—can't punch.

But he won't have to. He will retreat into the Alphonse whip Louis without even climbing into a ring with him. He is my "White Hope" by proxy, or remote control.

We'll send a robot man, or better still, a test barrel into the squared circle to do the actual fighting. The test barrel will be disguised as Tony Galento, in

lights. Dunninger will merely be the power behind the punch.

Dunninger, my "White Hope," is a sensation. He says he has a scheme to make battleships invisible.

And I figure that anyone who can make a back-long battleship invisible could do at least a half-way decent job on Galento.

If Louis can't see Galento, he can't hit him. Galento will see Louis. And if Tony can get set to come in left hook, without warning about reprisals, he'll beat Louis. Knock him a close.

Dunninger won't reveal the details of his secret of invisibility. "It's a combination of several inventions," he confided, mysteriously.

I haven't talked this fight over with Dunninger, and there may be a catch. For instance, a test barrel doesn't punch and Alphonse can't be hit. And even if Louis can't see Galento, he likely could tell Tony's location by some means.

I'm not sure the match also will be as that for secret.

When an invisible force can't be immovably object, there will be a test barrel. But what I happen when a test barrel

## Team No. 5 Wins Game In Kiwanis Junior Loop Series

### Team No. 5 came through with an 11-0 win over the No. 6 club in the Kiwanis Junior Loop series of the season at the Municipal Athletic Field yesterday afternoon.

Team No. 5 ran up a four run lead in the last of the first, Team No. 6 racing back in the first of the second to shove across one run, adding five more in the first of the third.

The No. 6 outfit snuffed back into the lead in the last of the third when they chalked up three runs to give them a 7-6 lead, before the five punched across another brace to give the first of the fourth to tie up the seven in the top.

Doc L and Hayes, Team No. 5's pitchers, held out the opposition for the remainder of the game.

The next game in the Kiwanis Junior series, and all games to be played at the Lake County Municipal Athletic Field, R. M. Hargrave, Kiwanis recreation director, will officiate, and the date of the contest is announced to be May 5.

## Senate Committee Continues Probe Of Florida Racing

### Widener Summoned For Questioning In Regard To Charges Of Graft, Corruption

### Track Records Are Subpoenaed

### Graven Denies Alleged Gang Connection At Tropical Track

TALLAHASSEE, May 5.—(AP)—The Florida Senate's race track investigation committee sought today the appearance of Joseph E. Widener, former president and now board chairman of Hialeah Park at Miami. Chairman Graham of Miami, asked for him to be invited here and Senator Horne of Madison agreed to seek from other Hialeah officials an agreement that Widener would appear. Horne said he had been informed Widener was ill at Philadelphia and could not be reached by a committee subpoena. The committee sought to question him regarding Graham's charges of "graft and corruption" in connection with Miami racing.

Legislation designed to give Supreme Court justices and circuit judges higher salaries was introduced in the Senate today. Opponents talked until adjournment time but denied they were filibustering the measure in death. The bill will be the special order of business when the Senate resumes Monday.

For the first time, the committee subpoenaed a newspaper publisher, for use in the campaign of the committee's chairman, Senator Graham of Miami. The committee subpoenaed Mahoney at the request of Beacham, who recently has defended Hialeah before the committee. Graham joined in a request that he be called.

The members disagreed about a proposal to ask Hialeah officials for a list of all legislative employees at the track since January, 1937. However, they voted to insist that Hialeah furnish information asked by John H. Stembler, committee secretary.

The request was called by John Stembler of Miami, Hialeah attorney, an evidence that the committee was making "a general search and inquisitorial investigation, which is known in legal phrase as a 'fishing' expedition."

Specifically, the committee insisted on knowing any campaign contributions made by Hialeah, records of advertising and public relations.

### City News Briefs

Mrs. J. A. Jones, who has been critically ill at the Fernand-Lauderdale Memorial Hospital, returned home yesterday.

The regular meeting of the Taylor Commandery Knights Templar will be held in the Masonic Temple tonight at 8:00 o'clock, according to recorder Joe D. Jinkins.

The name of Mrs. Ebyl South was inadvertently omitted from the list of grammar school teachers whose re-appointments were recommended by the school trustees. The list appeared in yesterday's paper.

### Lee P. Calhoun Is Still Unconscious

Lee P. Calhoun, local insurance agent, who was critically injured when his auto was struck by a truck last night, has not regained consciousness since the mishap. He is still in the hospital and his condition is reported to be serious.

## OPERATES AT GUN POINT

Dr. Sigmund Hirschfeld, above, demonstrates how he operated at gun point with a safety razor blade and removed a bullet from the back of a wounded gunman in Chicago recently.

## Senator Warns U.S. To Speed Up Defenses

WASHINGTON, May 5.—(AP)—Calling for defense preparations "while there is time," Chairman Scruggs (D-Nev.) of the House Naval Appropriations Subcommittee yesterday urged approval of a \$70,147,000 appropriation to maintain and strengthen the Nation's sea forces.

In reply, one Republican, Fish of New York, denounced the proposed expansion as unnecessary, while another, Ditter of Pennsylvania, demanded that Congress determine whether the outfit was for defense or participation in "the power politics of Europe." Ditter, announced, however, that he would vote for the bill.

The measure, which includes funds for beginning the construction of two 45,000-ton battleships, 21 other warships and 530 war planes, came before the House after hearings in which Admiral William D. Leahy, the Navy's top ranking officer, called for all possible speed in carrying out the rearmament program.

The "prospect of international disturbances in the near future," made basic imperative, he said in testimony made public during the day.

George Washington Once Used Table Which Is Owned By Sanford Woman

By BUD FORD  
One hundred and forty eight years ago tonight George Washington tucked up the curls on his periwig, pulled on his silk pants, flicked an imaginary bit of dust off his lacy cuffs and died himself blithely to trip a couple of minuets at a dance of his in honor in Charleston, South Carolina by the Sons of Liberty on the evening of May 5, 1791.

All of which has little or nothing to do with Sanford in 1939 except that it was while on this trip through the South, that Washington stopped in Laurens County and while there had occasion to use a table in the office of County Clerk Lewis Saxon.

Today that table stands in the front room of the home of Mrs. R. M. Bagwell, at 1007 Palmview Avenue. It isn't a particularly unusual piece of furniture, although the editor of the magazine, "Antiques" will tell you that it has been converted of Dutch Walnut.

## House Passes Bill For State Market Pact

### Other Regulatory Measures For Citrus Industry Get Action By Legislature

TALLAHASSEE, May 5.—(AP)—The House passed today a bill setting up broad powers for a State Marketing agreement to control the flow of citrus into trade channels. The bill would allow a State marketing agreement to be set up by the Florida Citrus Growers Association upon the demand and approval by 75 percent of the citrus growers in an election.

Representative Governor Cane vetoed a bill which would have created a State Department of Labor. He said he objected to the creation of the department and to other features, including a provision making the President of the Florida Federation of Labor automatically a member of the board.

## John Meisch, Sr. Adds 80 Acres To Site For Hospital

### Committee Expected To Arrive Tonight To View Location

John Meisch, Sr., prominent local citrus grower, advised county officials today that he would donate to the county 80 acres of land adjoining the property already owned by Frank Evans of Lake Mary as a site for a proposed branch of the State insane hospital.

County officials and others interested in securing the proposed donation for the county, are in the state today. They tomorrow will be in the county to view the site.

Meisch, chairman of the Meisch Citrus and other citrus growers, said he would donate the land to the county if the county would agree to purchase the land for the hospital.

## Trial Date Set For Accused Holdup Men

EUSTIS May 5. J. W. and Gordon Hays, charged with first degree murder in a grocery store holdup, pleaded not guilty when they were arraigned and their Circuit Judge trial date was set for Monday morning.

The Revel brothers and Lowell Griffin were indicted Tuesday for the murder of Charles Shepherd, 17-year-old Clermont grocery clerk, three months ago. Shepherd and R. V. Burroughs, store manager, were wounded by Griffin when he and others held up a Clermont A. & P. grocery store.

## Paulsen Is Winner Of Improvement Award

Through an error the name of the winning service station operator in the recent Garden Club highway beautification campaign was incorrectly announced Tuesday.

# Beck Rejects Nazi Demands For Danzig And Polish Corridor

### TRIPLE PENDERGAST

In whispered conference over the defense table, Tom Pendergast, right, Kansas City political boss, appears in Federal Court to answer income tax evasion charges. With him are James M. Pendergast, left, nephew and lieutenant to the ex-governing Democratic machine, and T. J. Pendergast, Jr.

## Appreciation Is Expressed For Contributions To Park

The cooperation of Sanford County residents in the beautification of East Millon Park has been commended. Superintendent of Parks, James Hamilton, today expressed his appreciation for the latest donations of plants and trees. The beautification program is being carried out by the park commission. The park is located in the town of Sanford.

## ACL Charged With Wage Law Violation

RICHMOND, Va., May 5.—(AP)—John J. Hale, representing Elmer F. Andrews, wage law administrator, filed a petition in equity in Federal court today charging the Atlantic Coast Line railroad with violation of certain sections of the wage-hour law.

The petition charged the railroad with failure to keep adequate records of the number of hours worked by its employees and the amounts paid them.

## Local Woodmen Stage Orlando Initiation

A large delegation of local woodmen went to Orlando last night where they attended the regular meeting and initiation of the Orlando chapter.

Seven members were inducted into the chapter. The initiation ceremony was held at the local lodge. The woodmen are active in community work and are known for their craftsmanship.

## Mrs. Hardaker Arrives

Mrs. R. M. Hardaker arrived yesterday afternoon from Jacksonville to join Mr. Hardaker, city recreation director. They plan to make their home at 114 West Fifteenth Street.

## Door Is Left Open For Negotiations If German Intentions Are Peaceful

### Berlin Terms Reply Brusque

### Danzig Nazis, Von Ribbentrop Called To Berchtesgaden

A reliable source in London said today Soviet Russia had offered to enter a "triple military alliance with Russia and France. In Berchtesgaden, Germany, Reich-Chancellor Hitler conferred with his foreign minister and summoned Danzig Nazi leaders for talks on Beck's reply.

Polish Foreign Minister Joseph Beck today rejected German demands on Danzig and the Polish corridor but left the door open to negotiations, in a speech to the Polish parliament which Europe hoped would banish its fear of war.

Beck was firm in rejecting what he called "one-sided" German offers but gave assurances that Germany would be guided by peaceful intentions and that all conversations are possible.

As Beck spoke, German Foreign Minister Von Ribbentrop said that the German government had received a letter from the Polish government in which the Polish government had requested that Germany should not be allowed to send troops to Danzig.

Beck's statement in Berlin, reported by the D.N.R., official German news agency, was that Beck has given a "brusque" reply to the German offer. However, it was pointed out that Beck's reply was not a final one.

Beck's statement in Berlin, reported by the D.N.R., official German news agency, was that Beck has given a "brusque" reply to the German offer. However, it was pointed out that Beck's reply was not a final one.

Unofficial Chinese dispatches reported that Chinese planes yesterday attacked a Japanese army base in the vicinity of Shanghai, in the Hunan-Changsha sector, and "seriously wounded it." A Japanese army division at war strength would be more than 20,000 men.

The planes, reported to have been of the Mitsubishi type, were said to have been shot down by Chinese anti-aircraft fire. The Japanese army division at war strength would be more than 20,000 men.

## LOCAL WEATHER

Partly cloudy tonight and Saturday; slightly warmer tonight in the west-central portion.
