Marshall Teague, Daytona Beach, Florida, wins the Grand National Stock Car Race for the second consecutive year. The repeat winner of the gruelling 150-mile race over the famous 4.1 mile Daytona Beach course averaged 84.65 miles per hour in a 1952 Hudson Hornet.

Teague's performance was remarkable. He outsped and outdrove more than 60 of America's leading stock car drivers over Daytona's treacherous sands, sharp curves and narrow hardtop backstretch WITHOUT A STOP AT THE PITS FOR GAS, OIL OR TIRES! Marshall Teague used Pure Premium, the SURE power fuel; Purelube,

the SURE heavy-duty motor oil; and his Hudson Hornet was equipped with Pure DeLuxe tires as a safeguard against the torturing banks of Daytona's north and south turns.

Use Pure Premium gasoline in your own car for faster pick up and go, SURE power on the road, and more SURE miles to the gallon.

#### American Women Are Getting Bigger In Size, That Is

By HAL BOYLE

TAMPA AP—Are you finding it barder to meet American women on their own level?

I am. And with me the reason is very simple. I no longer can look them in the face, I have to look up to them.

They are getting that tall.

What are they feeding girls these days anyway—"grow-fast?"

Everywhere you travel about this nation you notice that the younger feminine generation is shooting up like corn stalks under a hot July sun.

Is a new race of American ama-zons in the making? It could be,

zons in the making? It could be, pardner, because the all-America lass today isn't only as pretty and siender as a willow tree. She can reach right up and chin herself on its highest branch.

That is as true in Florida as it is in California. It is gospel fact in the four cities which brag most often they have "the prettiest girls in the world"—Atlanta, Dallas, Kansas City and New York. Everywhere the damsels tower taller avery year. Maybe that's just a reflection of

Maybe that's just a reflection of the American credo that we have to have everything bigger and better. But foreign visitors, notably Frenchmen, for some time have been appalled at the altitude our ladies are attaining. And certain disadvantages are becoming apparent to the native male, too.

Steadily losing ground. They have been told women are made of finer stuff, have more culture, can endure more suffering. live longer, and control more money than they deen able to say to women, "Grow up, kid."

R. V. Phillips, manager of the Halnes City Citrus Growers Cooperative, backed a plan to set up a stabilization fund by a small assessment on each box of fruit:

"Wo'd better do it if we don't want to die on the bush," He said.

The money would be used to buy surplus fruit and packing house climinations, develop a dispenser.

In spite of paying more to the tax men, most corporations have maintained the dividend rate they pay to shareholders. This has resulted in a big drop in the amount of profit the companies are retained to run the business. In 1950 retained earnings totalled 13th billion dollars, but last year they are estimated to have totalled 3th billion dollars.

New Horsepower - new Brake Power - and new Power Steering blossom on Buick's ROADMASTER for 1952

MAYBE you've heard—horsepower has hit

Brake power has done the same. But today, we'd like to concentrate on the third member of the power trio - Buick's own version of Power Steering, available on

ROADMASTERS at a moderate extra cost. What is this Power Steering like? It's something like a helping hand, something like a "hydraulic slave"—that relieves you of all steering strain, but lets you keep command.

What we mean is this:

Power Steering is handled by a special hydraulic unit-and engineers can design this unit to take over any amount of steering effort Soat in that ease, you'd surrender all control to that hydraulic unit-get no steering "feel" from the wheel.

Now suppose you're telling two agile tons of automobile what to do in traffic. We think you'd like to have it know that you're in command.

And-out on the straightaway-we believe that a part of the joy you get from owning a Buick is the sensation of baving something alive and eagerly willing beneath your hands.

So we're glad to ennounce that Buick engineers didn't spoil this thrill. They've kept the fun of driving, and simply eased the effort.

When you're rolling along smooth and straight. it takes almost no effort to keep any Bulck on course. It almost steers itself, as every Buick owner knows.

But-when you want to get away from a ourb

-back into a parking spot-make a tran-Buick's Power Steering comes into action, saves four-fifths of the effort required with ordinary steering. Power Steering does the extra work.

And-in case you wonder what happens if Power Steering gets out of kilter, the unswer is nothing. Your Buick steers just as it always has.

That's why we've been saying, "This is Power Steering as it ought to be.'

Come in, Try it out. We think you'll agree.

Sure is true for 52

#### Not So Solid South

The South has served notice that it can no longer be counted as safely in the Democratic camp whatever candidates that party nominates or platform it adopts. In 1948 the Dixiecrat revolt could not defeat President Truman but it did make clear that there are cracks in the once "solid South." The bitterness which led to the War Between the States and the badly bungled period of reconstruction which followed alienated the South from the Republican Party for many years. But there is a growing feeling among Republicans that their cause is no longer hopeless in those states. cans that their cause is no longer hopeless in those states.

The Democrats were able, until very recently, to count on the South for support of their candidates and program whatever it might be. Concessions made in forming a plat-form or choosing a candidate were made to doubtful states where persuasion seemed to be needed. Thus the South re-ceived little reward for its unswerving loyalty. During Republican administrations few political favors were granted to a region which was considered unattainable under any circumstances.

By declaring their political independence the Southern states may find both political parties more willing to court their favor. Voting a straight party ticket every time is a mistake for a region as well as for an individual.

It is not quite a choice between guns and no butter or butter and no guns, but there is a difficulty in keeping the balance so that military production may go on without destroying production and employment on the civilian side. This windfall of aluminum came, says Fleischmann, from reserves "held back to cover inequities and emergencies." It is well that we had that reserve, and well that those in charge of metal reserves had enough to use some of their stockpile for such an emergency as 100,000 men out of work in the automobile industry.

It takes a keen eye to cover needs here and needs there and strong common sense to act promptly and efficiently on the knowledge gained. We may yet get the kind of balance which will give us guns and butter both. We have the production power and know-how for both, but working out the allocations is not easy.

#### No Parking

"Look at that new office building going up," said a city dweller. "Our town is sure growing."
"Yes," said friend, "but where are all the tenants going

Parking is the forgotten factor when new apartments and skyscrapers are planned. Yet lack of parking facilities will eventually empty these fine downtown buildings, and drive the occupants to the suburbs, where there is more room. It is in the real interest of the owners to pass an ordinance such as that now pending in a large midwestern any trouble, but he thinks a lot city, requiring the builders of a new structure to provide of folks would enjoy visiting his whatever parking space its tenants will need before a permit can be issued.

This proposal has produced considerable clamor on the part of the builders, who say it means the end of downtown construction. Yet an office building in a congested section which fills the streets with its dwellers' cars is not so much which fills the streets with its dwellers cars is not so much an asset as a public nuisance. This is a problem which cities are going to have to face.

He started many years ago collecting directins until he now has over 6,000 individual items that date back as far as the year 1225 and cover sust about every type up to the present day.

Many of the pieces in his cellection have interesting histories. There's the Adams pistol that killed Long Nose Kate in 1222 at Blaby, Arisons and a rifle that Pawnee Bill gave to sharpeheoting Annic Oakley; a Sharpes Buffalo gun once owned by Death Valley Scottle on down to famous guns of more recent days including one carried by the late Al Capone and another by John Dillinger.

The only weapon he has with any Florida history is a Gatling gun that was shipped to General Custur for use against the Indians in the West. Unfortunately, the general did not receive it is time for use in the famed 'last stand;' it remained in the fort unoposed and later was shipped to Fl. Basinger, Florida for use in the Seminole War.

As Andy's collection grew he had to find some place to keep it, so a few years ago he purchased the Old Detroit Avenal built in 1885, ramedeled it and resummed it the Billitary Inn. Here his famed collection is on display in assessed built roles and cases.

#### Cagney's Sister To Appear At Festival

Jeanne Cagney, young stage and serven star and sister of the famous fames Enguey, will be this week's attraction of the Central Florida Drama Festival in the heart warming love story "Voice of the Turtle", which opens in the Winter Park High School mulitorium on Wednesday evening. The play is one of John var Deaten's hest. It is the story of a week end in the lives of three ordinary people and is as smooth and polished as the publics in a swift moving stream. The plot is handled with wit, wisdom and chormous craftsmanship and its dialogue is us true as Christma and every bit as heart-warming as it deals with the little things which are part of people's hearts.
