

France Is Planning Big Reception For Queen Marie Soon

PARIS, Mar. 15. (INS)—Paris is getting ready to receive Queen Marie of Rumania this spring. Rumor has it that she is starting out on a lengthy voyage to find a husband for her youngest daughter, Jeanne. Paris will be her first stop where she will undoubtedly see her son, Prince Carol, who is now living in a chateau in Normandy. From here she will go on to Spain and then to England.

Paris will not find the beautiful queen who came to visit and shop in former years. Since the death of Ferdinand, she has been living a quiet and solitary existence. She is no longer the famous coquette of other days. Her face is much paler and shows its wrinkles. She receives visitors rarely.

The Queen-Mother, Helen of Greece, occupies herself almost entirely with the education of her small boy-king, Michel. Her health has recently improved and it is no longer feared that she will lose her eyesight.

Prince Nicholas is a great hunter and does little besides ride through mountain and valley in search of game.

THE ART OF PASTRY-MAKING

Anyone who can make good pastry is naturally proud of it. But let me tell you the secret—there is no reason why any woman should not know how to turn the pastry trick. It is really one of the easiest things in the world of cookery.

First of all there is the flour; if you handle it gently, and all-purpose flour will make good pastry but if you have a heavy hand pastry flour will stand rough treatment better. For a good sized pie mix 1-2 cups of sifted flour and 1-2 teaspoon of salt. Into this work 1-2 cup of cold shortening while many prefer one of the vegetable fats. A little butter may be used for flavor if you wish but it is not really necessary. Work in the shortening. If your hands are cold you may use your fingers otherwise use a knife or fork. I usually use a small wooden chipping tool and a double blade chipping knife. Do not cut the fat too fine if you like flaky crust with bubbles in it.

When the flour and shortening are well mixed make a hole in the flour at one side of the bowl and pour in one tablespoon of cold water and work in with a case knife as much flour as it will take up. Do the same thing to the other portions of the flour and when you have three balls of dough and one dry flour 1 ft in the bowl take your fingers and press them together. If you need a little more water add it a few drops at a time. Remember, however, that wet pastry is always tough. Put the dough in a bowl, cover it and chill before using. If you follow these directions you are perfectly sure to have tender flaky pie crust and what more can the family ask? Your reputation as a cook is made!

In baking pastry a hot oven is necessary. For a pastry shell it should be very hot—about 500 degrees F. For a fruit pie and for a custard pie we start out with a hot oven 500 degrees F.—but after 10 minutes we lower the temperature to 350 degrees F. or 400 degrees F.

Here is a recipe for a delicious chocolate filling for pie. It is a favorite recipe with the family who loves chocolate and with the housekeeper at this time of year because—please note—it is an eggless recipe.

Cut 2 squares of chocolate into five or six pieces. Cook over a low fire with 1-2 cup of cold water until smooth. Mix 1-4 cup of sugar with 1-3 cup of flour and stir into the chocolate. Add a dash of salt and 2 cups of milk. Stir over the direct heat until smooth and thick. Let boil one or two minutes while stirring. Remove from the fire and add 1 teaspoonful of vanilla. 1-2 cup of cream may be used instead of the chocolate.

AVIATORS MISSING

TO COMPLETE LOCKS

ROCKPORT, Ill., Mar. 16. (INS)—The largest locks in the world, the great iron gates of the Illinois waterway here, will be completed May 1, it is estimated.

Steel plates are being placed upon the south gate and the motors for their operation will be installed soon. Each leaf of the gates requires 350 tons of steel. They are 62 feet in height and provide a lift of 41 feet from the lower to the upper level, the equivalent of the series of five locks between Chicago and Utica. The locks here are 400 feet in length and 110 feet in width. The approximate cost will be \$2,000,000.

Health HINTS

By DR. J. C. HOWELL

ITCHING PILES

To show how ambulant methods are amenable in all forms of rectal trouble, I want to refer to the case of A. A. M., age 38, a retired business man from New Hampshire, who was brought to me by his physician for treatment for proctitis and two enlarged lymphatic nodes. A very examination had shown that he had ulcer of stomach. There was also constipation and head aches.

itching piles is undoubtedly the most troublesome, nerve-racking and sleep destroying complaint that anyone can be cured with. It is also the most difficult to treat, as until recent years it was impossible to find the cause of the trouble, as all kinds of drugs and surgical operations were resorted to but often without much relief. We now know that it comes from acid, as a result of constipation, getting down under the skin around the rectum, irritating the nerves and causing an intolerable itching.

In the case referred to above, it was found that there was a very tight sphincter muscle, which was divided without instruments, and the hemorrhoids and little pockets in the rectum were treated by ambulant methods. Almost immediately there was relief from the itching and he went to sleep that night for the first time without this troublesome symptom. That with several weeks ago and he is still free from itching. He is very enthusiastic over his condition and is apparently well, is on our special diet, and having no more trouble with his stomach, bowels and rectum at the present time.

Dr. J. C. Howell, 15 years practice in Orlando, specializing in non-surgical office treatment of stomach, bowel and rectal diseases, 200 W. Pine Ave., Orlando, Fla. You will be surprised how quickly you will get well without loss of time from home.

Studebaker's New Eight, The President, Will Be Shown At San Juan Garage

A. C. Fort, general manager of the San Juan Garage, today announced, that Studebaker's New President 8 would be shown to the public at their show rooms on Saturday and Sunday between the hours of 9 and 11 p. m. 100 horsepower, 80 miles per hour, full vision steel body, quick acceleration on 4-wheel brakes which

multiply pedal pressure three and one half times and great power under perfect control are a few of the qualities claimed for the new Studebaker 8. Models include the 5-passenger sedan, 7-passenger sedan, 5-passenger Strate sedan and the 7-passenger Strate sedan. The Strate sedan are equipped with wire x

STUDEBAKER The Great Independent

—asks those who appreciate the expression of genius in fine motor cars to read this story of

THE NEW PRESIDENT STRAIGHT EIGHT

100 Horsepower • \$1985 f. o. b. Detroit

For seventy-six years Studebaker has worked for, and has pleased, a clientele appreciative of quality.

Quality plus Value During the past ten years Studebaker has built and equipped new foundries, forge shops, stamping plants, machine shops, power houses, dry kilns, body plants, etc., to provide for the production of fine motor cars on a One-Profit basis. Studebaker quality has been made available at prices genuinely low, and thus, to traditional quality, One-Profit value has been added.

Quality plus Value plus Genius During the past two years Studebaker's engineering department has become recognized as one of the most brilliant in the industry. D. G. Roos, Chief Engineer (formerly chief engineer for Pierce-Arrow, Locomobile, and Marmon), and W. S. James, Research Engineer (formerly section chief of the United States Bureau of Standards), lead a group of skilled engineers and scientists. These technicians have the use of research laboratories, mechanical facilities and a million-dollar proving ground. Phenomenal results accomplished are reflected in the performances of Studebaker and Erskine cars.

—the Studebaker Commander, the World's Champion Car, which earned the title by running 25,000 miles in less than 21,000 consecutive minutes—nothing else on earth ever traveled so far so fast

—the Studebaker Dictator, which established new endurance and speed records for stock cars listing below \$1400 by running 24 hours at an average of 61.795 m. p. h.

—the Erskine Six, the European type car which during 1927 invaded the export markets of the world with unprecedented success

—the new American Edition of the Erskine Six now being introduced in the United States. In October this car established new 24-hour endurance and speed records for stock cars priced below \$1000.

Studebaker holds every official endurance and speed record for fully equipped stock cars, regardless of power or price.

Thus, to the traditional quality and to the One-Profit value of Studebaker cars, has been added—unsurpassed engineering and manufacturing genius.

All this quality—all this value—all this genius now finds its highest expression in the eight-cylinder President sedans with which Studebaker greets the new year.

It was two years ago that the development of an eight-cylinder car

Superiorities of the New President Eight

- 1 100-horsepower, 80 miles per hour.
2 Safety—full vision steel body. Low center of gravity.
3 131-inch wheelbase but short turning radius.
4 No finer riding car at any price.
5 Fast get-away.
6 Amplified-action, 4-wheel brakes multiply your pedal pressure 3 1/2 times.
7 A "well-mannered" car—great power under perfect control.

PRICES NEW PRESIDENT EIGHT
5 Pass. Sedan \$1985
5 Pass. State Sedan 2250
7 Pass. Sedan 1985
7 Pass. State Sedan 2250
State Limousine 2450
OTHER STUDEBAKER AND ERSKINE MODELS
The Commander \$1495 to \$1775
The Dictator 1165 to 1345
Erskine Six 795 to 965

was begun by Studebaker. Orders were to design, if possible, the finest eight-cylinder car in the world regardless of cost. When satisfied that this objective had been substantially attained, preparation was made to produce this car of superlative luxury and power on a basis of One-Profit volume production never before enjoyed by a car of similar size and quality.

A One-Profit Car The PRESIDENT STRAIGHT EIGHT is Studebaker made throughout—body, engine, springs, gears, axles, transmission, forgings, stampings, gray iron castings—all made by Studebaker in Studebaker plants.

Power at a One-Profit Price The President Eight develops 100 brake horsepower. No car which equals it in rated horsepower (according to the ratings of the National Automobile Chamber of Commerce and the Society of Automotive Engineers) sells for less than double its price. So much value has been built into The President Straight Eight that it can be compared only

with cars selling for \$4000 and upward.

The President Eight, even the 7-passenger sedan, will exceed seventy miles per hour indefinitely in the hands of any driver.

Speed with Safety The President Eight offers not only sustained high speed, but speed with safety, due to full vision, welded steel body, low center of gravity and amplified-action, four-wheel brakes.

After the first thousand miles oil changes and chassis lubrication are needed only at 2500-mile intervals.

The President Eight is so built and broken in that it may be driven forty miles per hour the first day it is on the road.

These features testify to advanced engineering and precision manufacture.

Why the Prices Are Low And the prices—\$1985 for the Regular Sedans (five or seven passenger), \$2250 for the State Sedans (five or seven passenger), \$2450 for the Limousine—testify to One-Profit manufacture and to the following operating economies which make Studebaker supreme in value:

Studebaker's overhead, commercial and financial organization and expenses are lower per car than those of most manufacturers.

All of Studebaker's principal officers, executives and engineers live in South Bend in daily contact with each other. Studebaker's capital stock structure is lower per dollar of assets and its \$5.00 dividend charge is lighter upon the Corporation's treasury than any but one of its principal competitors.

Studebaker never takes an abnormal profit of from 15% to 20% of the public's dollar but has been satisfied with an average of 10.6% profits for the past sixteen years.

You can pay double the price of The President Eight without receiving more in honest quality.

What Price Genius? But no matter how much you pay you cannot match the genius which finds expression in The President Eight, the genius which made The Commander known as "the greatest post-war achievement of automotive engineering."

An illustrated booklet descriptive of The President Eight will be sent from South Bend on request, but only by seeing and driving these magnificent cars can you appreciate what beauty, comfort, safety and performance are offered at One-Profit prices.

LOWER PRICES OF CHRYSLER BOOST PUBLIC'S DEMAND

Public Interest in Entire Line Is Greater Than Ever Before; Quality Unchanged Officials Say in Interview

Greater public interest in Chrysler cars than ever before at this season of any year has followed the recent lowering of prices for its New "62" and Great New "62," according to reports received by J. G. Stamp, from J. W. Frazer, Chrysler Sales Manager. The savings to the public range from \$50 to \$100 on various body styles.

In the "62" line three body styles, two of them closed cars, are now priced at \$670 at the factory. They are the coupe, two-door sedan and roadster (with rumble seat). In the "62" line the business coupe is factory priced at \$1075, the roadster (with rumble seat) at \$1075 and the two-door sedan at \$1095.

Distributors and dealers throughout the country are reporting greater attendance at their showrooms and larger buying volume, with many orders being booked for future delivery, according to factory checkings. Not only do the largest cities report definite sales increases but smaller market centers from every part of the country have also felt the greater Chrysler buying.

Mr. Frazer points out that greater public demand, which has resulted in Chrysler achieving, for 1928, third place among all motor car manufacturers in the sales records of the National Automobile Chamber of Commerce, has made these substantial savings in cost to the general public possible.

As a result of the new price reductions it is possible to buy a Chrysler car to fit every need and pocketbook. With the widest range of choice offered by any individual motor car manufacturer, Chrysler now produces no fewer than 40 body types, selling from \$670 to \$3495.

First Goodrich Tire Turned Out Lately From Newest Plant

The first Goodrich Silvertown Cord Tire to be manufactured in the Company's new Los Angeles factory was produced on March 16, says a bulletin just received by C. E. Myers, local Goodrich Dealer from the Company headquarters in Akron. This tire possessed no significant marking to proclaim the remarkable achievement it represented, says Mr. Myers, "but was marked like millions of its brothers had been marked as they were fitted into the molds at the Akron factories."

The first Silvertown produced by the Pacific Goodrich Rubber Company commemorated an industrial engineering accomplishment that has seldom been paralleled by American business enterprise. It marked the completion of a gigantic factory over a quarter mile long and 400 feet wide with every detail and process efficiently functioning in the record time of seven months.

The new Goodrich factory produced its first Silvertown seven months to the day after the first ground was broken for its foundation. Carrying farther its commemoration of this achievement an official opening will be held on May 2 in the new factory, when its production machinery will be in full swing and Pacific-made Silvertowns will be pouring out to meet the mounting demands of the Western market.

A special radio program out over a network of eight Pacific Coast broadcasting stations will also be a feature of the opening. This program will fit in with a similar dedicatory program to be broadcast over the red network from WEAF and 30 other eastern and middle western stations.

TEX TO PROMOTE MATCH
NEW YORK, Mar. 17.—(INS)—Tex Rickard has won out over Jim Mullen, Chicago promoter, in the bidding for a lightweight championship match between Sammy Mandell and Jimmy McLarnin. The bout will be fought at the Polo Grounds on May 17.

Eddie Kane, Mandell's manager, wired yesterday that he would arrive from Chicago tomorrow to sign the papers. Kane stuck to his guns until he was convinced the Chicago promoter could not land McLarnin, who turned down a Chicago guarantee of \$50,000 last week.

Mounted police were called to soothe the crowd that gathered in London to witness the arrival and departure of the bride and groom when Lord Hamilton, elder son of the Governor of Northern Ireland, and the daughter of the late Lord Ashton were married recently.

To cut down the waste of human or through use of the "torque," Sierra Leone, Africa, considering the building of feed-... this fitting auto and animal transportation to displace man freight-

Eight Minutes Required To Bolt Victory Body and Chassis Into Single Unit

Upper left—Fastening body bolts in Victory Six after body has been let down from floor above (right) and proceeding to next operation (lower right).

EIGHT minutes after the Victory Six body is let down from the floor above to the final assembly line at Dodge Brothers, Inc., factory, it has become one with the chassis.

There is no welding, nor riveting, in the operations which make the body and frame one. Reversing the operations the body can be removed from the chassis through the removal of the bolts and the lifting of the body. Any service station equipped with a small chain hoist can easily lift the body from the chassis.

In these eight minutes, consumed in fastening the body to the chassis, twenty-three bolts, twelve horizontal and eleven vertical, have been placed and securely tightened by a crew of eighteen men. The car then passes on to other stages of final assembly. While the bolts are being fastened the Victory is having fenders, steering column, steady bracket and other parts put on it.

Through the elimination of the conventional body sills, the Victory's center of gravity is lowered with normal road clearance and head room maintained. The over all height of the car is reduced two inches by bolting the steel double-wall body to the sides of the chassis frame.

Deadening felt and anti-squeak padding is placed throughout, assuring a silent body. All body and door panels are also padded. In the illustrations the three stages of the bolting operations on the final assembly lines are shown.

The Victory's revolutionary design and construction are laid on principles so simple, say the engineers, that one often wonders why this type of car had never been built before. In this new type of construction, the frame channels are built to follow the body contour, there being no body overhang. Besides front and rear motor supports, four major cross members are employed, and further strength is added by the steel floor plates. The body of the car is fitted directly to the frame side channels, the sides of the body extending downward over the side channels so that frame and body are virtually a single unit.

This design gives the Victory Six long, sweeping lines and, engineers say, has many advantageous effects on the performance of the car, reducing side sway and adding greatly to riding comfort.

To Berkeley, Cal., goes the distinction of operating the first police fleet which is completely radio equipped. In line with his policy of providing every scientific aid for his men, Police Chief August Vollmer, well-known criminologist, sponsored installation of fixed-tuned short wave sets under the rear decks of these...

Oakland \$3,000,000 Building Program Completed Recently In Record Time

PONTIAC, Mich., March 17.—Last week, less than four months after the first rattle of pneumatic hammers signalized the commencement of the latest expansion project of the Oakland Motor Car company, the new \$3,000,000 car assembly and shipping buildings for the Oakland All-American Six were completed, and pronounced ready for the installation of conveyors, processing equipment and machinery.

The speed with which the buildings were erected is believed to constitute a record for this type of steel, brick and concrete construction.

The new structures provide the company with 580,191 square feet of additional floor space besides five more railroad shipping spurs, four of them entirely within the walls of the shipping building. The company now has ten tracks in its private "railroad yard."

Nearly all of the machinery to be used in the Oakland assembly will be entirely new. The old assembly plant will cease operating on March 24 in order that a portion of the equipment now in use may be transferred to the new assembly. President A. R. Glancy expects that production in the new plant will start April 2. The old assembly building will be used for material storage.

Two assembly lines will be installed and space has been provided for a third assembly line such as was added recently in the Pontiac Six assembly plant which parallels that of the Oakland Six. Minimum production capacity of each line in the new Oakland plant is 19 cars per hour.

The Oakland assembly building is of two story monitor type construction, 540 by 640 feet. Besides the assembly lines it contains an entire new enameling unit for the treatment of Oakland fenders and sheet metal. Exactly as in the Pontiac Six plant, the converging lines of Oakland assembly parts and materials will be so synchronized that the component parts of the car will be delivered at exactly the proper moment as the automobile progresses down the assembly line.

The adjoining car shipping building is one story high, 108 feet wide and 700 feet long.

Some idea of the size of the Oakland expansion project may be gained from data provided by L. A. Blackburn, resident engineer, who supervised the construction work.

Lindy Offers Flight To All Congressmen

WASHINGTON, Mar. 17 (INS)—Col. Charles A. Lindbergh offered today to give airplane rides to all members of Congress who desire to take them. The invitations were extended verbally while the Flying Colonel was at the capitol discussing the extension of air mail service into Latin America. Both Vice President Dawes and Speaker Longworth told Lindbergh they thought many members would accept.

While uncommunicative concerning future plans, Lindbergh evidently plans to remain in the Capital until after Mar. 19, on which date he is to receive the Congressional Medal of Honor from President Coolidge.

NEW YORK, Mar. 17.—(INS)—William T. Tilden, 2nd, has dotted his lock and basin for the greater glory of America's tennis prestige.
NEW YORK, Mar. 17.—(INS)—Stock sales on the floor of the New York Stock Exchange today totaled 4,027,930 shares; bonds 469,000.

Aged Woman Dies At Home Of Niece Early This Morning

Miss Rebecca Jane Murray, aunt of Mrs. D. S. Starr, of Sanford, died at the Starr home here at 1 o'clock this morning. Miss Murray was born in 1857 in Coffee County, Ala. Funeral services will be held at P. M. tomorrow at the Miller-Erickson Funeral Home. Besides Mrs. Starr, Miss Murray is survived by one sister, Mrs. A. N. Poncey, one nephew, W. J. Poncey, two other nieces, Mrs. W. Neasing, and Mrs. E. V. Dean, of Sanford, and Mrs. T. Hardy, of Miami. Miss Murray lived in Sanford 10 years. Funeral services will be conducted by the Rev. T. D. King.

Latest Kidnap Victim Is Held For Ransom

DETROIT, Mar. 17.—(INS)—James Hall, the latest victim of Detroit's kidnaping gang, was being held for \$10,000 ransom today. Hall's abduction adds another name to the long list of abductions of persons connected with roadhouses and gambling establishments for ransom ranging from \$5,000 to \$50,000. Hall, former cafe operator, was kidnaped from his home by two men posing as detectives. Police say friends of Hall have made arrangements for his release as soon as the bank opens this morning. Hall is said to be wealthy. Two men called at Hall's home yesterday and introduced themselves as detectives. They told Hall he was wanted at headquarters to identify a prisoner. After an argument he went away with the men. An hour later two men called at the home and presented a note to Mrs. Hall demanding \$10,000.

Marianna Audience Hears The Governor

TALLAHASSEE, Fla., Mar. 17.—With 25 more counties practically finished, Gov. John W. Martin will end this week's campaigning in Hillsborough. The March session of the Parliam. Board ended yesterday afternoon and the executive session will probably be held today. During the past week the Governor has motored to some county seats here each night for a speech. About four hundred people heard the executive in Marianna last night. Paul Carter, secretary to the state Democratic Executive Committee, introduced him and most of the county officials accompanied him on the platform.

Radio Experiment To Be Conducted Soon

HOLLYWOOD, Calif., Mar. 17.—(INS)—More than forty principal cities of the nation will engage in a huge broadcasting experiment on March 20th when six of Hollywood's most famous film stars will be heard on the air. Charles Chaplin, Douglas Fairbanks, Norma Talmadge, John Barrymore, D. W. Griffith, and Dolores Del Rio will appear before the microphone. The radio-gram will be released over a national chain from 6 to 7 P. M. Pacific Standard Time. Among the cities to participate are New York, Philadelphia, Chicago, St. Louis, San Francisco, New Orleans, Atlanta, Houston, Oakland, Seattle and Kansas City.

Dr. King To Tak On Al Smith Again

What Al Smith will do if he reaches the White House will be forecast tomorrow night by the Rev. P. D. King, pastor of the First Baptist Church, in the third of his talks on Smith's candidacy. Multitudes of Americans, contends the pastor, do not realize the dangers which are involved in even a casual consideration of Smith as president. "The man whom the people of this country choose to preside over the affairs of the greatest nation in earth should be a man whose heart inspires confidence," says Dr. King.

Warner Installed As Hotel Inspector

Jerry W. Carter, state hotel commissioner, was a visitor in Sanford yesterday, coming here especially to install W. Warner into the office of deputy hotel commissioner. The territory including Sanford will be under Mr. Warner's jurisdiction. Following a conference with Mr. Warner, Mr. Carter said that the local man had formally assumed charge of his district.

Speed Boats Will Chase Bank Bases Try For Records In Miami Beach Races

MIAMIBEACH, Fla., Mar. 17.—(INS)—Concluding heats for the \$3,500 Col. E. H. R. Green Trophy, the Governor Martin Cup, and the Commodore Ketcher Trophy were scheduled today for the St. Patrick's Day program of the Miami Beach Mid-Whiter Regatta. Gar Wood's Miss America V, he broken steering wheel repaired, was ready to go out in dashes against time for new world's records, Miss California, owned and driven by Dick Loyne of Long Beach, California, was favored to win the Waldorf Astoria Trophy for unlimited 151 cubic inch hydroplanes. After taking two heats from Miss Risco, owned by James Talbot of Los Angeles, in the 151 limited class, Miss Risco capsized and swamped in the second heat, but her driver Ralph Stoddy escaped injury. Gibson Bradford of Barnesville, Ohio, had a chance at the Governor Martin Trophy, after winning one first in the Biscayne Bay events, but losing points in the second heat because he cut a bouy.

WOMAN KILLED IN STORM THAT HITS SORRENTO

(Continued from Page 1) was completely destroyed. That no more loss of life was sustained was regarded as marvelous by the citizens of the little town as they hurried to the scene of wreckage. The road was littered with brush and debris, making passage almost impossible for a time. Deputies from the office of the Lake county sheriff were on the scene early to maintain order and clear the roadway. News of the twister's damage spread rapidly to nearby places and within an hour several hundred curious persons had gathered on the scene. A great number of Germans are believed to be in the area, working conditions.

CLARK SUGGESTED

WASHINGTON, Mar. 17.—(INS)—The appointment of Frank Clark, former congressman from Miami, Fla., as a member of the U. S. Tariff Commission, was urged upon President Coolidge today by Senator Fletcher (D) of Florida.

HICKMAN ENTERS PRISON

SAN QUENTIN PRISON, Calif., Mar. 17.—(INS)—William Edwin Hickman entered San Quentin Prison today. He is scheduled to stay with his life here Apr. 25 for the murder of Marion Parker in Los Angeles.

BOAT RAMS WARSHIP

WASHINGTON, Mar. 17.—(INS)—The U. S. Battleship Colorado was rammed by a commercial steamer, the Bahia Alexander, off San Diego, Calif., late last night, according to a dispatch to the navy today. The Colorado was deployed out on the starboard side, but suffered no damage below the water line.

POLICE GUARD SUBWAY

NEW YORK, Mar. 17.—(INS)—All subway stations in great New York were closely guarded by police today following receipt of a telephone message at the office of the Interborough Rapid Transit Company that "one of its subway stations was likely to be blown up before morning."

CELESTINE MARKET

Shipments were heavy from Sanford yesterday in spite of the rain. One hundred and seven cars rolled out of Sanford Section and a total of 115 from Florida. Calif. shipped 39 cars which brought the U. S. total to 154. The Sanford cars were billed to the following points: 42 Wayne, 22 Patonance Yards, 6 Chicago, 6 Jersey City, 3 Philadelphia, 3 Florence, 5 New York, 2 each Cincinnati, Detroit, Montreal, 1 each Baltimore, Boston, Decatur, Ft. Smith, Grand Rapids, Kansas City, Knoxville, Macon, Newark, Pittsburgh, Richmond, Rochester, Toronto, Toronto.

REPORT REVEALS GERMAN DYE HAS LARGE EXPANSION

WASHINGTON, Mar. 17.—(INS)—At no time since the war has the German chemical industry exerted more pronounced effort toward international expansion than in 1927, according to a report sent the Commerce Department by William T. Daugherty, American trade Commissioner at Berlin. By gradual processes the German dye trust has established a back ground of international cooperation, assuming interests in the United States, Great Britain, and elsewhere, according to Daugherty. He said that the most significant case of international action by the German trust to frame a pact with Imperial Chemical Industries of England, the Establishments Kuhlman of France, probably to allocate production to minimize competition to exchange technical processes and to share markets.

CONCLUDES PACT

The dye trust, he explained, concluded a pact in 1927 with Norsk Hydro, the important Norwegian calcium nitrate and hydro-electric power factor, it concluded an arrangement with an American oil company, exchanging processes, a pact with American companies to manufacture titanium white in Germany, and shared an agreement, according to still another American company rights to manufacture a patented carbon in United States. Continued expansion of the dye trust, now given as controlling 62 percent of the capital foundation of all German chemical corporations, is expected to result in a capital increase from its present \$100,000,000 marks to finance future internal and external expansion, Daugherty said. "It is a conspicuous fact that many old-time German chemical establishments, faced with desperate conditions, pressed dividends to a minimum in their latest annual statements, while the trust paid 10 per cent in 1926 business. It is expected to pay 12 per cent in 1927 operations." The German trust, the I. G., entered into an arrangement with the Standard Oil Company of New Jersey, concerning oil patents and processes. This agreement, according to Daugherty, enables the German dye trust to produce oil from lignite in Ger-Standard Oil company the benefit may involve giving the title of some petroleum cracking research done at the I. G.'s chief laboratories at Oppau bei Ludwigshafen. Daugherty said that the I. G. contracted with the American Na-

During the course of the argument, which was brief, the court interjected the remark that "it appears as though the Chase National Bank should have made a more thorough investigation before accepting the collateral posted by the Seminole County Bank in obtaining a loan." The City of Sanford protested the Chase National Bank's contention of legality in the transaction in submitting argument to the effect that the bonds never had proper inception, were not issued in conformity with the laws of Florida and were handed to like in an unexecuted form. Lake, the City claims, in his capacity as president of the Seminole County Bank as well as mayor of the City, acted in aiding the bank without authority from city functionaries. It is understood that the Seminole County Bank obtained loans from the Chase National Bank to the amount of about \$700,000.

WOMAN KILLED IN STORM THAT HITS SORRENTO

(Continued from Page 1) was completely destroyed. That no more loss of life was sustained was regarded as marvelous by the citizens of the little town as they hurried to the scene of wreckage. The road was littered with brush and debris, making passage almost impossible for a time. Deputies from the office of the Lake county sheriff were on the scene early to maintain order and clear the roadway. News of the twister's damage spread rapidly to nearby places and within an hour several hundred curious persons had gathered on the scene. A great number of Germans are believed to be in the area, working conditions.

REPORT REVEALS GERMAN DYE HAS LARGE EXPANSION

WASHINGTON, Mar. 17.—(INS)—At no time since the war has the German chemical industry exerted more pronounced effort toward international expansion than in 1927, according to a report sent the Commerce Department by William T. Daugherty, American trade Commissioner at Berlin. By gradual processes the German dye trust has established a back ground of international cooperation, assuming interests in the United States, Great Britain, and elsewhere, according to Daugherty. He said that the most significant case of international action by the German trust to frame a pact with Imperial Chemical Industries of England, the Establishments Kuhlman of France, probably to allocate production to minimize competition to exchange technical processes and to share markets.

CONCLUDES PACT

The dye trust, he explained, concluded a pact in 1927 with Norsk Hydro, the important Norwegian calcium nitrate and hydro-electric power factor, it concluded an arrangement with an American oil company, exchanging processes, a pact with American companies to manufacture titanium white in Germany, and shared an agreement, according to still another American company rights to manufacture a patented carbon in United States. Continued expansion of the dye trust, now given as controlling 62 percent of the capital foundation of all German chemical corporations, is expected to result in a capital increase from its present \$100,000,000 marks to finance future internal and external expansion, Daugherty said. "It is a conspicuous fact that many old-time German chemical establishments, faced with desperate conditions, pressed dividends to a minimum in their latest annual statements, while the trust paid 10 per cent in 1926 business. It is expected to pay 12 per cent in 1927 operations." The German trust, the I. G., entered into an arrangement with the Standard Oil Company of New Jersey, concerning oil patents and processes. This agreement, according to Daugherty, enables the German dye trust to produce oil from lignite in Ger-Standard Oil company the benefit may involve giving the title of some petroleum cracking research done at the I. G.'s chief laboratories at Oppau bei Ludwigshafen. Daugherty said that the I. G. contracted with the American Na-

The Herald is a member of the Florida Newspaper Publishers' Association, the International News Service, receiving from this superior news organization nearly thousands of words daily covering all the leading events of the nation world. The I. N. S. is especially efficient in Florida and its vicinity.

THE HERALD'S PROGRAM: Economy in city and county administration; Development of water route to Jacksonville; Construction of St. Johns Indian River Canal; Installation of monthly "Pay-Up Week"; Accelerating of building program—schools, hotels, apartment houses; Development of community chest; Completion of city beautification program; Work new and modern hospital.

BIBLE VERSE FOR TODAY

THE TWO GREAT COMMANDMENTS: Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself. Luke 10:27.

PRAYER: We thank Thee, Lord that to all those who trust in Thee, Thy commands are not grievous.

"Hundreds Die in Dam Burst" headline. When cursing is excusable.

That "Blood will tell," as the famous adage says, is doubtless true, but there's no telling what.

We wonder how long it will be before Appleyard, Taylor and MacKenzie withdraw from the race.

Newspaper paragraphers devote lots of space to the flapper's skirt, but if it gets much shorter it won't be so funny.

Seminole County has a woman candidate for superintendent of schools. Women are fast becoming more and more prominent in politics.

The world continues to lose some mighty good aviators by allowing them to continue to try flights beyond the ability of their machines.

The Orlando Sentinel is running a feature called "Tips for Taxpayers." Tips won't help us any. What we need is a regular endowment.

Remember you can't vote if you don't register and pay your poll tax. And if you don't vote, you've got no right to kick about conditions.

Forrest Lake testified he hadn't looked at his bank statement for four or five years. Don't know as we blame him much. Ours is all ways a bunch of bad news too.

Though Jim Carson has never mixed in politics before, he comes from a politically prominent family, two of his uncles having served Florida in the United States Senate.

John H. Perry of the Jacksonville Journal thinks all opposition to Al Smith is based on the fact that he is a Catholic, and yet almost any of us would be glad to see Senator Walsh of Montana nominated for the presidency.

Brisbane may be right about a lot of airplanes flying across the Atlantic and attacking the United States, but if they don't have any luck crossing that body of water than other attempts during the last ten months, we won't have any much.

The little girl down the street says that the price paid for curls the present crime wave. Sanford Herald. This should be encouraging news to criminologists, for indications that crime waves are more permanent than the present kind.—Clement News.

Speaking of the exposures of uptight Republican campaign conditions, Will Rogers says the secret ought to improve their opinion if they want to win in general elections. Just let Al become president and he'll even the Republicans a or two about corruption.

Most simultaneously with the announcement that the J. G. Penny party is soon to open a new in Sanford, squawks were that these chain stores do a good—that they deposit money in the banks today and if out tomorrow. To which a Seminole County banker with considerable wit that merchants check it out today deposit it tomorrow.

Get Ready To Vote

In view of the importance of the rapidly approaching election on June 5, The Herald wishes to take this opportunity of urging all Seminole County citizens to register and pay their poll taxes before it is too late. At the present time the voters may register in their home precincts but after April 2 the books will be removed to the office of supervisor of registration where registration is still possible until May 1.

Many citizens have come to regard their government as something with which they have little to do and want even less. Time was when men died for the sake of the franchise, but, once granted, it has been totally disregarded by large numbers of persons. This is particularly true of the "best citizens," who seem to feel that they might be contaminated by going to the polls, yet who, if they voted, would more than likely help to improve a government which at best is often corrupt.

The election on June 5 is the most important one which has come during the recent span of four years. For state and county we make almost a clean sweep, re-electing former office holders to their old jobs, or putting in their places other candidates. Seminole County citizens will vote to fill the following offices:

- Six presidential electors. Twelve delegates to the national Democratic convention, four from the state at large and two from each congressional district. Members of the National Democratic committee. A United States senator. Four representatives in congress, one each from the First, Second, Third and Fourth congressional districts. A governor. A secretary of state. An attorney general. A comptroller. A state treasurer. A state superintendent of public instruction. Two justices of the state supreme court. Two members of the Florida railroad commission, one for an unexpired and another for a full term. An adjutant general. A state chemist. County judge. Sheriff. Clerk of the circuit court. County superintendent of public instruction. County assessor of taxes. Tax collector. Supervisors of registration. County commissioners. Members of county boards of public instruction. Justices of the peace. Constables. Prosecuting attorney. Members of the state executive committee. Members of the congressional executive committee.

In filling these offices the people have a duty to perform not only to themselves but to their country. It is highly important that the best men be selected in every case. The people should make it their business to investigate and find out who is the best man for each office and then see to it that he is elected. In order to elect the best men, it is necessary that every citizen vote. Remember the crooks never miss a vote; it's the good people who forget to qualify or are too tired to go to the polls.

The War Of Beauty

Uneasy lies the head that wears a crown. Since "Miss Faith DeFord" was crowned queen of the Miami Bathing Beauty Contest, she has not had a restful moment. Being beautiful apparently is not all its cracked up to be, especially when it arouses jealousies and kicks from all sides.

It seems that "Miss DeFord" was very beautiful, beautiful enough to catch the judges' eyes in a crowd of several hundred other beauties. She was hailed as "Miss Miami" until it developed later that she was married and the complainants protested that she might well be called "Mrs. Miami," but that no self-respecting married lady could afford to go about as "Miss Miami."

But this is not the first time that a contest winner has found herself in hot water. Last year Miss Marvia Hand was hounded as being a professional after she had been crowned queen. And the year before winsome little Miss Ada Williams, crowned queen, was declared to be under the age limit. A battle royal resulted, and another queen was chosen. Miss Williams, however, refused to relinquish her title and both went to the national contest in Los Angeles where the dispute was settled in the courts.

We gather then that it was not so much that "Miss DeFord" was married and was the mother of a child some eighteen months of age that caused all the row, but rather simply that she was adjudged the most beautiful. If anyone else had been chosen, squawks would have arisen just the same. It is no difficult problem to find some reason why anyone should not be queen, especially a beauty queen.

Some day perhaps it will be possible to hold beauty contests in which the spirit of brotherly, or rather sisterly, love prevails, but that will be in the sweet by-and-by when nations settle their disputes by arbitration and candidates for county jobs speak to political-rivals.

The actual fact is that in this day Opportunity not only knocks on your door but is playing an avil chorus on every man's door, and lays for the owner around the corner with a club. The world is in sure need of men who can do things. Indeed, cases can easily be recalled by every one where opportunity actually smashed in the door and collared her candidate and dragged him forth to success.—Elbert Hubbard.

A NEEDED REFORM

JACKSONVILLE JOURNAL

The rebuff for the plan to eliminate the "lame duck" session of congress is only temporary. It is enough support in both parties eventually to be adopted.

The measure will make it possible for presidents to take office sooner and for new congresses to function promptly with a fresh mandate from the people. It will eliminate the force of the short sessions of congress made up of many members who have been defeated. Too often members of congress who have been repudiated at the polls are able to block legislation at the short sessions, which comes between a national election and the time for the new members to assume their duties.

As matters stand, members of congress elected in November do not have any say about legislation for more than a year after they

TAX TIME

LEESBURG COMMERCIAL

THERE WILL BE A TAX REDUCTION at this session of congress. The surplus available for tax reduction will not exceed \$225,000,000. The senate finance committee will begin writing the measure March 15th and it will no doubt be in committee until April 1st when it will reach the floor of the senate and probably will be debated for thirty days; then go to free conference for reconciling the differences between the house and the senate bills and it will then be ready for final passage, probably between the first and fifteenth of May.

The surplus can be applied to tax reduction, debt reduction or absorbed by increasing the appropriations and the peril lies in a deadlock of the factions and no tax measure, which will automatically apply the surplus to debt reduction. We favor tax reduction of the entire amount of the surplus.

It seems reasonably certain that income tax of corporations will receive a share of the tax reduction. The only uncertainty is the amount. A tax cut of one per cent on the incomes of corporations yield \$90,000,000 and if the entire surplus was applied to corporation tax reduction we could have a reduction of 2-2 per cent in rates but it is hardly possible that the entire surplus can be applied in that direction. A maximum reduction of 2 per cent is about all that can be reasonably hoped for and much depends upon public sentiment and the taxpayers convincing congress of the business necessity and economic advantages of such reduction.

The federal-estate tax has a good chance of being repealed. Unfortunately those who do not pay this tax do not consider that they are interested but it is socialism, centralization and confiscation in its most virulent form and every citizen should battle against it with all their might. It is levied as a regulatory and not a revenue measure so far as the federal government is concerned as congress permits the states to take 80 per cent of the proceeds.

Secretary Mellon recommended that \$50,000,000 of the surplus be applied to reduction of the income tax of individuals in the intermediate brackets but the house gave the \$50,000,000 to repeal of the automobile tax. There is still another group that would apply it to reducing the corporation tax. This is one of the controversies that will be fought over in the senate.

It is the privilege and the duty of every taxpayer to express his views on tax reduction to their senators and congressmen. In no other way can they be in position to accurately reflect the sentiment of their district.

A LANDING FIELD

ALBANY HERALD

Wid Rogers told his Albany audience Monday night that Albany needs a landing field. Every town needs one, he added, and we think he is right. "The town that has no landing field," said the humorist, "in a few years will be almost as popular with the traveling public as a town without a depot."

Rogers came to Albany from Montgomery by air, and the problem of a landing field presented itself. There is, of course, a place in the outskirts of Albany where flying machines land, but it lacks a good deal of being a landing field.

It is true, undoubtedly, that many an airplane that passes Albany by would land here if a suitable landing field were available. A field of ample size, suitably marked for identification from the air, and with a few accommodations such as airplanes and their crews require.

More and more will people travel by air. Presently freight will be moving overhead, just as Uncle Sam's mails now move. The mail service itself will be extended from year to year, and the towns and cities with good landing fields are the towns and cities where flyers will stop.

It is a matter Albany can well afford to give attention to. Thinking it over will mean nothing unless thinking is followed by action. A landing field is a community asset even now, and that will be more and more true as the years pass.

TUESDAY
No. 7 of the Presbyterian Church will meet at 8:00 o'clock at the home of Mrs. J. H. Grogan.

Delightful Tea Given By P.T. Association

An exceptionally delightful affair of the week was the St. Patrick's Tea given Thursday afternoon at the West Side Primary School under the auspices of the West Side Parent Teachers Association.

The large primary room was beautifully adorned with festoons of shamrocks, bougias of bamboo, as well as numerous baskets of phloxes, snapdragons and other cut flowers, accentuating the color scheme of white and green.

As the guests arrived they were met by two quaintly gowned waitresses, Misses Pauline Myers and Marjella Duncan, who introduced them to the hostesses. A most enjoyable program keeping with the day was rendered including a reading, "The Origin of St. Patrick's Day," by Mrs. W. J. Cooper.

Splendidly rendered piano solos were given by Misses Madeline Mallem, Miss Elizabeth Clarke and Mrs. Preston Stephenson. Miss Margaret Wilkins, a talented young violinist, played a number of delightful Irish airs.

Mrs. Robert L. Glenn, Mrs. B. C. Moore and Mrs. T. L. Hale wearing Irish frocks sang a melody of Irish songs. Mrs. L. G. White and her rhythmic orchestra played throughout the afternoon and during the social hour.

At one end of the large room, a prettily appointed punch table had been placed and here throughout the afternoon mint punch was served by Miss Aline Chapman. Refreshments of concealed miniature, individual angel food cakes laid in white and embossed with tiny green shamrocks were served. On each plate were favors of shamrocks and clusters of sweet peas.

Mrs. Courier Hostess At St. Patrick Party
Mrs. J. E. Courier was hostess at a most delightful St. Patrick's party at her home on Palm-belle Avenue, when she entertained the members of the Lottanham Bridge Club.

An attractive assortment of cut flowers including white sweet peas and baby breath combined with ferns was used with pleasing effect about the rooms where the party tables had been spread for the day. The color motif of green and white was further carried out in the table cloths which were in the form of shamrocks and at the conclusion of the stated number of progressive scores were collected and prizes awarded. Mrs. Frank W. Tabbott who acted as the most points among the club members, received an embroidered card table cover, while the guest prize, a dainty embroidered guest towel went to Mrs. Earle T. Field.

At the tea hour the bridge accessories were removed and refreshments of stuffed green peas, cold, radishes, olives, and vitalized angel food cake, in green and white and mint punch were served by the hostess.

At The Churches

FIRST BAPTIST CHURCH
Sunday School 9:30 A. M.

Church maintains a free Reading Room, 517 First National Bank Building, where the Bible and all authorized Christian Science literature may be read, borrowed or purchased. Open daily except Sundays and holidays from 3 to 5 p. m.

Woman's Club Column

SARAH WHEELER, Reporter

Tuesday afternoon, March 20, the music department of the woman's club will give a splendid program featuring the Gratoris "Elijah" by Mendelssohn. Very careful preparations for this program are being made and it is earnestly hoped there will be a large number present to enjoy it. The hostesses for the afternoon will be Mrs. R. A. Winston, chairman, Mrs. Herbert Russell and Mrs. Bailey.

In this, one of Mendelssohn's most dramatic works will be given incidents from the life of the prophet Elijah. Favorite solo numbers will be given, as follows: "Hear ye Israel," "O, rest in the Lord," "It is enough," and "Lord, God of Abraham."

A quartette of ladies will render parts of chorus numbers, a duet and piano solo with the song "I'm a Soldier" by the same quartette. The "Youth" sent by Elijah to look for signs of rain when he is praying for rain to end the famine in Israel, Mrs. Julius Talach, Mrs. W. S. Leak and Mr. Mortimer Glover are soloists. Mrs. Phillips, Mrs. Cook, Mrs. Colquhoun and Mrs. Leak are the quartette.

Wednesday afternoon at 3 p. m. the welfare department will meet and it is an important meeting as final plans will be made for the flower show which will take place on the 25th of this month. The committee in charge is working hard on this most interesting affair and predict a more beautiful flower show than ever before.

SOCIAL CLUB MEETS
The meeting of the Crystal Lake Social Club held last Tuesday evening at the club rooms at Lake Mary was well attended and proved to be a most enjoyable event. The club rooms were decorated prettily with green tulle and other decorations appropriate to St. Patrick's Day. There were also presented to the members and guests St. Patrick's Day favors of all kinds and the committee serving during the evening were green and white.

During the evening the following program was received:
Song, "Wearing of the Green" by the Club Quartette.
Piano Duet, by Miss Deslie Singletary and Mrs. Ross Houghton.
Vocal Duet, "Where the Shannon River Flows" by Mrs. Benjamin Wiley and Mrs. Ross Houghton.
Irish Stories, by members of the Club.
Irish Reading, by Mrs. G. A. Woodman.
Vocal Solo, "Killarney" by Mr. A. H. Gregory.

Various games and contests were then enjoyed, one of which was the feeding of fish potatoes to a huge green pig. Old fashioned dances proved a delight to the crowd. Delicious sandwiches were served by the committee in charge.

JUNIOR HIGH GIVES PLAY
"His Lady's Niece," given by the seniors at the Junior High under the direction of Mrs. J. M. Stimpinger, was played Tuesday evening at a packed and enthusiastic house.
The play is a character sketch of their past and throughout the whole performance, especially Otha (Him) and "The One," the only old person who never seemed to get things right and tries to boss the affair. Hendrix Lyons was the young author who suggests the play, a girl, "The Niece" in honor to a million Mary Lightfoot, Mrs. Sarah Ann Miller, a woman of few words, often a terror to us that "erazy critter" was a queen.

These characters were well supported by Jean Laney, Julia Ritchie, Julius Deane, Gregory Kinlaw, Britt (Holt) Law and Marion South. Praise goes to the girls against Florida tropical scenes painted by Mr. A. G. Grogan. It proved a very beautiful presentation. The specialties were also good, particularly the choruses of beautiful little girls representing doll and fishing girls. Mrs. Matt C. Stimpinger gave several vocal solos which were greatly appreciated.

Beth Israel Group Enjoys Bridge Party
The members of the Auxiliary of Beth Israel and their guests were most pleasantly entertained Wednesday evening at a bridge party at the Community Center with Mrs. M. Kronen and Mrs. Charles Kanner as hostesses.

Green and white, the preferred colors were emphasized in every detail. Backs and baskets of white petunias combined with ferns were arranged in artistic effect about the room. The tables, some pads and seats were done in green and after the fifth progression had been played, scores were compared and the prize for highest score, a deck of bridge cards, was won by Miss Mary Danford. The men's top score was a box of men's handkerchiefs won by H. Jacobson.

At the conclusion of the games, the hostesses assisted by Mrs. J. Fleischer, Miss Mary Danford, Miss Rose Matthews, Miss Gertrude Benjamin and Miss Lillie Benjamin served refreshments of assorted sandwiches and coffee. There were ten tables of players.

CHULUOTA
E. L. Dason, who underwent an operation at the Orlando Sanitarium two weeks ago, returned to his home last Sunday.

Ferry Vane arrived from Birmingham night train Birmingham, where he was called by the serious illness and death of his mother. He and Mrs. Vane will visit their parents Mr. and Mrs. H. T. Brown for a week or ten days before returning to their home in Washington.

J. W. Weston was operated upon in the Orange General Hospital on the 14th Saturday evening for appendicitis. His friends will be pleased to know that he is getting along nicely.

The Sanford County Credit and Finance and Finance Club meeting here Saturday at the hotel house. A lady member was present in the evening. The business meeting was held at the hotel house, following the dinner and gave splendid reports of the work done during the last year.

Longwood
E. S. Lutzada of Abundant and his thought of Mr. and Mrs. W. W. Williams for a three day vacation. The boys, who were in the water and found a hole in the boat. The annual meeting of the Longwood League was held on Tuesday afternoon at the home of Mrs. E. J. Turner and other members of the committee and officers were elected and accepted.

The nominating committee reported the following names who were elected for the ensuing year: President, Mrs. Fred Egan; Vice President, Mrs. W. W. Williams; Secretary, Mrs. W. W. Williams; Treasurer, Mrs. H. B. Tanner; Librarian, Mrs. J. E. Mungler; Chairman, Mrs. J. E. Mungler; Executive Committee, Mrs. Grace Pinnard, Mrs. J. E. Mungler, Mrs. J. E. Mungler, Mrs. Elsie Dunbar, Miss Una Dolan, Miss Florence Lovell, Trustees, Mrs. J. A. Bastline, Mrs. E. E. Mungler, Miss Elsie Dunbar.

Lake Mary To Give Entertainment For Seminole Tourists

Winter visitors to Seminole County will be the guests of honor at an entertainment to be given next Monday night at 8 o'clock by the Lake Mary Chamber of Commerce at the community building, according to an announcement today by Frank Evans, who is chairman of the committee on arrangements. All winter visitors are cordially invited to attend.

The program will include addresses by J. Putnam Stevens of Portland, Maine, past imperial potentate of the Mystic Shrine, Judge W. Wallace Wright, S. O. Shindler, and Judge James G. Shanon, Secretary E. J. Trotter of the Sanford Chamber of Commerce will have supervision over a series of games and other entertainment features are planned. Mr. Evans will be master of ceremonies.

SEATTLE GIRL BECOMES WIFE OF MAHARAJAH
The city of India, capital of the native states, a city of vast size they will leave for Pondicherry. The Princess will undergo an operation for appendicitis. She has been suffering from this ailment, but her condition was not sufficiently serious to demand immediate operation.

The American girl may attain high honors for a married woman. Maharajah to the throne of the state of Indore. He had a son of 10 years ago after a painful illness and a dancing girl.

The Princess, who is the daughter of the Maharajah and the former Maharajah and the Maharajah's only daughter, is now in the city of Indore. She is now in the city of Indore. She is now in the city of Indore.

The Princess, who is the daughter of the Maharajah and the former Maharajah and the Maharajah's only daughter, is now in the city of Indore. She is now in the city of Indore. She is now in the city of Indore.

Health HINTS

By DR. J. C. HOWELL

ITCHING PILES
To show how unobtrusive methods are available to all from relief of itching piles to the cure of the disease of hemorrhoids, a retired business man from New Hampshire, who was brought to his physician for treatment for pruritus ani, was called to the attention of the doctor. He had a long history of itching piles. A very examination had shown that he had piles of the hemorrhoidal type. There was also constipation and head aches.

Itching piles is undoubtedly the most troublesome, nerve-racking and sleep-destriving complaint which anyone may be cured with. It is the most difficult to treat, as until recent years it was impossible to find the cause of the trouble, as all kinds of drugs and surgical operations were resorted to but often without much relief. We now know that it comes from a certain condition of the rectum, which is a result of constipation, straining down under the skin around the rectum, irritating the nerves and causing an intolerable itching.

In the case referred to above, it was found that there was a very tight sphincter muscle, which was stretched without instruments, and the hemorrhoids and little piles in the rectum were treated by a non-surgical method. Almost immediately there was relief from the itching, and he was able to sleep. The doctor, who is now in the city of Indore, is now in the city of Indore.

The doctor, who is now in the city of Indore, is now in the city of Indore. He is now in the city of Indore. He is now in the city of Indore.

The doctor, who is now in the city of Indore, is now in the city of Indore. He is now in the city of Indore. He is now in the city of Indore.

The doctor, who is now in the city of Indore, is now in the city of Indore. He is now in the city of Indore. He is now in the city of Indore.

The doctor, who is now in the city of Indore, is now in the city of Indore. He is now in the city of Indore. He is now in the city of Indore.

The doctor, who is now in the city of Indore, is now in the city of Indore. He is now in the city of Indore. He is now in the city of Indore.

The doctor, who is now in the city of Indore, is now in the city of Indore. He is now in the city of Indore. He is now in the city of Indore.

20—Farms For Sale

CELEBRY LAND SACRIFICE
 I am land poor. I need cash. Hence am offering my fine 22 acre celebrary farm, located 2 1/2 miles east of Ovidio, in Iowa City. Price \$100, an acre, cash, about one-half of the real value. There is no better farm in Seminole Co. Anyone interested may see it now growing a fine crop of celery by G. F. Smith. This offer is made because I need the money here. E. R. Moore, 250 N. E. 25th St., Miami.

10 acre farm, West Side, including all tools and equipment. Possession in time for Spring crop, if desired. Phone 616 J. L. H. Echols.

Help Wanted

WOMEN—Earn \$17 dozen sewing aprons. Experience unnecessary. No selling. Easy, steady work, materials cut. Addressed envelope brings details. Goshen Dress, Goshen, N. Y.

23—Wanted Real Estate

I want to buy 10 acres high, 50' x 100' lot, close to Sanford, Mr. Downes, 515, N. Broadway, Orlando. Phone 4890.

24—Lots For Sale

2 Acre lots on Dixie Highway, near Lake Monroe. Fine Trucking land, outside city limits. L. A. Renaud. Phone 190 W. 304 W. 2nd St.

26—Miscellaneous For Sale

BOAT FOR SALE: 50 foot bridge deck cruiser, thirty inch draft, fully equipped, sleeps six. Price reasonable. P. O. Box 938.

27—Money To Loan

MONEY TO LOAN—When borrowing or refinancing your mortgages come to us for straight loan. No bother about monthly payments. B. W. Herndon and Co. Seminole Hotel.

27—Money To Loan

We are prepared to consider application for first mortgage loans on the best type of residences and Mercantile Buildings in Sanford at 6 pct., 6 1/2 pct., and 8 pct., depending on the character of loan, construction and location of buildings. C. S. HOAG & COMPANY, 7 W. Church St. Orlando.

28—Radio

PHONE 578 or Repairs on all makes of Radios and Phonographs. If we don't fix it, there is no charge. Couch's, 108 S. Park Ave.
