## Expenses Budgeted At \$50-Million

### Harris: Schools Need 8 Mills

By ED PRICKETT  
Herald Staff Writer

Officials have completed the 1975-76 budget proposal which says eight mills are needed to produce more than \$50-million required to run Seminole County schools next year, the assistant superintendent of finance said today.

Roger Harris said copies of the completed budget will be mailed to School Board members today.

However, budget hearings scheduled for Tuesday and Wednesday have been postponed until next week because of the absence of Board Chairman R.G. "Bud" Feather.

To produce the \$50,235,247.77 contained in next year's budget, Harris and School Supt. W.P. "Bud" Laver will ask the board for the full eight mill tax levy allowed by law.

In an Aug. 8 press release, Laver linked the \$8,100 beginning salary won last week by representatives of the county's 1,462 teachers to the school system's request for eight mills.

"Acting in my capacity as chief executive officer of the school system of Seminole County I have directed the assistant superintendent of finance to develop a balanced budget based on a \$8,100 base. All facts and figures indicate that the \$8,100 base salary will not be possible without my recommendation and board acceptance of an eight-mill levy," Laver's release said.

The addition of eight mills — 1.8 mills more than required by the state — would place close to \$2-million in a "discretionary fund." The fund is used by the board to cover additional demand at the local level.

Additional demands placed on the school system next year, Harris said, include unemployment compensation, new educational programs, an increase in the cost of the retirement program and additional money budgeted for collective bargaining.

The state could have met these demands, Harris noted, by increasing the amount of money paid the county for each student who attends classes.

Instead, the legislature left the funding at last year's level — \$745 per student attending fulltime at a Seminole school. The budget is split into four parts, with the proposed operating budget claiming the lion's share of funds. Harris' proposal for operating is \$39,320,412.50, up \$4 million from last year's budget.

"Those pay increases had a lot to do with that," Harris said. The increases won by the Seminole Education Association (SEA) will cost taxpayers \$1.8 million year, Harris said.

The total 1975-76 budget is smaller than last year's \$52,049,215.64 budget because less funds are requested for capital improvements.

In fact, about \$7-million less will be needed next year because of the fall-off in the need for new school buildings.

The other two parts of the budget proposal — debt service and federal budget — experiences no major changes either up or down. Debt service requests are for \$3,207,817.25 and the federal budget is \$800,692.84.

The federal budget will increase as money comes in during the year for projects backed by federal funds.

Though the state has set 6.2 mills as the required local effort needed for state funding, both Harris and Laver say to maintain existing services the full eight mills will be a necessity.

The local effort is the amount of money produced by local taxes needed to qualify for the state's funding program. The state pays \$1745 for each full-time student in the county.

Laver claims, in effect, taxes will be reduced by 33 and one-third per cent because of the board's elimination this year of a special four-mill construction levy.

Last year, citizens paid the full eight-mills required by law, plus the special four-mill levy for construction. But a declining population has erased the need for any new schools.

The first hearing on Harris' budget proposal will be 2 p.m., Aug. 26, at the board's conference room. A second work session will be held the same time the following day.

## Burglary 'Ring' List Grows

By BOB LLOYD  
Herald Staff Writer

Sheriff's detectives today arrested a ninth suspect in connection with an alleged "steal to order" burglary ring that authorities say had a million-dollar-a-year business going in Seminole and Orange Counties.

Deputies arrested James Arthur Onie, 28-year-old Orlando carpenter, outside a circuit courtroom where he was scheduled for trial on burglary and grand larceny charges before Circuit Court Judge J. William Woodson.

Onie had been free on bond, but was ordered held on \$25,000 bond on the new charges — three counts of breaking and entering with intent to commit a felony and one count each of armed breaking and entering and grand larceny.

Judge Woodson ordered Onie's trial, scheduled for this week in connection with a Feb. 14 burglary at Longwood, continued to the week of Sept. 16.

Arrested Saturday on buying, receiving and concealing stolen property charges were Roland Henry Durand, 31, of 603 David St., Winter Springs, and John Thomas Richards, 27, of Longwood Route One. Both were held on \$5,000 bond.

In four raids Friday night and early Saturday Sheriff John E. Polk and deputies arrested six persons and seized allegedly stolen property valued at approximately \$30,000 — including a \$17,000, 24-foot motor home.

Donald Richard Crowder, 44, and Carolyn Fields Crowder, 42, of 531 Karen Ave., Altamonte Springs, were arrested at The Rendezvous Bar and Package Store, next door to the Altamonte Springs Fire Department.

The Crowders posted \$10,000 and \$7,500 bonds and were released from jail after deputies conducted a second raid at their residence.

Two pickup trucks were used by officers to haul away items from the bar and the residence.

Altamonte Springs Police Chief Justin East said today he'll ask City Council Tuesday to revoke the bar's city occupational license.

State officials are reportedly considering the revocation of the establishment's state liquor license.

Stanley Grant Stroupe, 35, was arrested at his 119 Hubby Court, south Seminole, residence on a stolen property charge and deputies seized a motor home parked in the back yard. Officers said the vehicle was reportedly stolen in Orlando.

Others arrested in the Seminole raids were: Ralph Howard Dilts, 45-year-old owner of Mattland Marine, U.S. \$5,000 bond on a stolen property charge after agents seized an

## Pilot Drainage Study May Lead To Total Storm System

By MICK LOCHRIDGE  
Herald Staff Writer

A pilot drainage study in the Midway area, east of Sanford, could lead to a total storm drainage system for the "disadvantaged community," according to Bill Bush, Seminole County engineer.

County Commission Tuesday at 7 p.m. will consider an application for \$120,000 of federal money for funding the Midway drainage project. The money is allocated under the Community Development Block Grant provided by the Department of Housing and Urban Development (HUD).

If the money is approved, Bush said, an "innovative" storm drainage system will be installed in a two-block area of the one-mile square district for the experiment.

The system will utilize 12-18 inch perforated pipe and specially designed inlets to provide an underground system to hold ground water beneath the drain between rains and also to serve as a storm sewer when it rains.

"This may be the answer to the woes of the saturated community," Bush said. He said the project will also be monitored for water pollution.

Bush pointed out, however, that if the \$120,000 is approved it would only provide funds for the pilot project and not for an entire drainage system.

If the pilot program is a success Bush said it "would give the county a weapon to seek more federal money."

County Planner Bill Kercher said the area has some "poor structures" and a "bad drainage problem." He called the pilot program "relatively inexpensive."

## Murder Trial Delayed

The first-degree murder trial of Mrs. Betty Jean Kiley, 41, of Sanford, was postponed a second time today.

Circuit Court Judge J. William Woodson ordered the trial rescheduled for the week of Sept. 16 because the prosecutor, Assistant State Atty. James Figgart, was unable to appear in court. Figgart is wearing a cast after breaking his leg while roller skating.

Last month the Kiley trial was delayed due to the death of a firearms examiner who was to testify in the case.

## Pay Hikes, Expanded Force Urged By Lake Mary Police Commissioner

By DONNA ESTES  
Herald Staff Writer

In discussions prior to the detailed examination of Mayor Walter Sorenson's proposed budget, which included various department requests, the council considered reassessing and reevaluating job descriptions.

Councilman Martin Bacon Sr. said he would like to see concerted efforts in street paving and street light installations in addition to beefing up the police department.

LAKE MARY — Police Commissioner Burt Perinchief has recommended the city's police force be beefed up by hiring two new patrolmen. Too, he said he feels that current officers should be given pay raises totaling \$600 each in the 1976 fiscal year.

Perinchief, at a budget workshop Saturday, told colleagues a five-member police force would give the city 24-hour per day coverage in law enforcement and the pay raises are necessary to reduce police personnel turnover.

"It is unreasonable to believe Lake Mary is going to keep its police officers when they can find better benefits elsewhere," he said. He recommended present officers' salaries be determined by the Seminole County Port Authority (SCOPA) said today.

Administrator Jim Ryan will explain to the SCOPA board tonight at eight o'clock "why they (Standard Systems) are not doing anything."

Officials with Standard Systems could not be reached for comment. The port and firm have entered into a lease agreement with the un-demanded firm would manufacture concrete modular units.

The units originally were to be used for nursing home rooms, according to Ryan. But, Ryan says the firm is holding off on building the nursing homes, pending action by the County Commission for construction of units to be used as jail cells.

Seminole County Commission Chairman Sid Viben Jr., could not be reached for comment today.

## Modular Firm Awaits Word On Jail Cells For County

"They're playing a waiting game," Ryan said, if the county doesn't return the jail cells soon, the company will request the original plan of nursing home rooms.

Meanwhile, state officials have approved a minimum safety plan for returning prisoners to the county jail if a new jail is built within two years.

The County Commission reportedly is looking into possible funding of \$600,000 in the 1975-76 budget for providing a jail facility.

"We have the ability to provide a jail cell for no capital outlay to the county," Ryan said. "If the problem is financial we can solve it. If it is time we can solve that, too."

Ryan said the port and Standard Systems would need a lease from the county with the assurance that the cells would be used, once constructed.

"Imagine the units could be used for cells," said George Proudfoot, jail administrator. "But we need an architect to work the cell into the rest of a facility."

Prepare Carefully For Picnics

An outdoor party is an ideal way to entertain because it crosses the line between a formal affair and a casual picnic. To insure the success of your outdoor party, be sure to exercise caution in food preparation since food spoilage is more prevalent when temperatures rise.

danger of food spoilage is to serve and cook food in serving dishes with smooth, non-porous surfaces. These are the easiest to clean and the least likely to develop crevices and hollows where bacteria can hide.

By keeping hot foods hot and cold foods cold, the chances of food spoilage are minimal. And remember, maintain the highest sanitary conditions possible by keeping hands and surfaces spotless. If you follow these few simple rules, your outdoor party can be an occasion of which you will long be proud.
