

SUGAR SHORTAGE NOW PEOPLE ASKED TO SAVE CAN FRUIT WITHOUT IT

Valuable Suggestions That Should Be Followed

On account of the sugar shortage drastic measures must be taken for the conservation of sugar and the following suggestions will be most helpful to those who want to save their fruits.

Guavas, Pineapples, Peaches, and Scuppernong Grapes are now available for canning in Florida.

Do not let any of these fruits be wasted. If you can't can or dry take them to a Liberty Kitchen and get some one to preserve them on shares for you or sell them to some one who will see that they are not wasted. Use no sugar in saving these fruits.

The Food Administration will probably tell us later that we can use sugar for preserving and then preserves and jellies can be made. Now the sugar situation is such that the Food Administration asks us not to use sugar for preserving fruits, therefore, let no Florida housewife use sugar for this purpose.

Do not make jelly now. Bottle or can the juice. When there is an abundance of sugar, the juice, if properly put up, will make good jelly.

Dr. Caldwell of the Department of Agriculture says:

"Many housewives are apparently unaware that practically all fruits may be successfully canned without the use of sugar. Such fruit preserves more of the natural appearance and flavor than does fruit put up in heavy syrup, is fully as palatable and much more easily digested, is in better condition for use in cooking, and is available for all purposes for which fruit canned in syrup could be used. A heavy syrup aids in a slight degree in preventing the growth of the yeasts and bacteria which cause spoilage, but perfect sterilization makes its use unnecessary.

Fruit may be canned without the use of sugar by any method which the housewife is accustomed to use, but in every case the following rules should be used.

1. Fruit to be used for canning should be firm, not over-ripe, and free from decay. Vegetables should be young and tender. To attempt to use very dirty, over-ripe or decayed fruit, or old tough vegetables is to invite failure, since it is very difficult to sterilize such materials.

2. Jars should be tested by partially filling with water, adjusting rubbers, tightening covers, inverting and shaking.

3. Jars, covers, rubbers, spoons, cups, funnel, and all utensils which are used in canning must be placed in a pan of cold water deep enough to cover them, placed in a pan of water boiled for 20 minutes. Allow them to remain in the hot water until ready for use. This will prevent subsequent breakage and will insure perfect sterilization.

4. Rubbers should never be used a second time.

5. The neck of the jar should be wiped off before sealing as the cloth will almost certainly leave bacteria or yeasts in the jar.

Can your guavas in tin or glass without sugar. Process guavas canned without sugar 5 minutes longer than when canning with sugar. In stead of making guava jelly now, prepare the guava juice just as you would in making jelly then put the strained juice in sterilized bottles or glass jars or tin cans and seal. If using bottles, put sterilized stoppers in the bottles lightly, set bottles in rack in water bath and process at the simmering point for 30 minutes; remove the water bath, put stoppers in tightly, and when cool dip the stoppers in the melted paraffin or sealing wax for a depth of one inch. Guava juice may be prepared and canned in glass jars following the same instructions as you would in canning the fruit. The juice may be kept in tin cans following the same instructions as for canning guavas in tin.

Both the LeConte and Kiefer pears may be canned without sugar. The time of processing depending on the size and ripeness of the pears. Many women in North Florida have erected home made driers and pears are being dried daily. Home-made driers are most inexpensively constructed. Pineapples may be canned with water following the same instructions as followed in canning with sugar using water instead of syrup and processing an extra 5 minutes. Grapes may be canned with water but the best method of saving grapes is to can the grape juice. The Scuppernong grape juice is most excellent. The following are instructions: "Select sound ripe grapes, crush and heat slowly to about 180 degrees F. simmering point. (The flavor of these juices is finer when they are sterilized below the boiling point.) Strain through double thickness of cheese cloth and if juices free from sediment is wanted, let stand in cool place for a few hours, then pour off carefully to free from dregs, which will remain in bottom of vessel. Pour the juice into sterilized bottles, put sterilized stoppers in lightly, set bottles on rack in water bath, put stoppers in tightly and when cool dip stoppers in melted paraffin or sealing wax to a depth of one inch."

QUESTION OF LABOR DISCUSSED

Board of Trade to Have A Meeting Friday Night

Every employer of labor is requested to be at the Board of Trade meeting to be held in the Court House, Friday night, August 2nd at 8:00 P. M.

This meeting is called at the request of many growers who are interested in the labor situation for the present season and they desire a common ground on which to meet is their reason for requesting the Board Of Trade to call this meeting. All growers and business men are urged to be present. Some standardization of this matter must be had and it is the purpose to arrange the affair next Friday night and come prepared to assist in making adjustments along sound lines so that all concerned will be protected and work together in this vital matter.

The Board Of Trade is glad indeed to act as this medium for everyone and do its utmost to help carry out any agreements reached and it is in your interest that this meeting is called and it is further the purpose to adjust this labor question at this meeting.

Fire caused by an explosion of nitrate on the 16th, destroyed the fertilizer plant of the American Agriculture Chemical Co. at Jacksonville. The loss totals \$1,250,000. The explosion came apparently from spontaneous combustion and hurled wreckage and debris hundreds of feet. On account of the early hour few employees were present and none were killed or injured.

Bees Wax for Covering Stoppers
One pound of bees wax; one-half pound resin. Place resin and bees wax into a quart can. Place on a stove and allow to come to a boil. Remove from the stove and use while in a liquid state. If foam is on mixture, skim it off.

To seal bottles put in stoppers as light as possible, then turn the bottles downward and dip into can of melted sealing wax, a little below the mouth of the bottle.

It hardens almost at once and in Florida is much more satisfactory for sealing than the paraffin. Mrs. E. G. Chesley, Tallahassee, Fla.

Directions for the Preservation of Guavas, Pears, Scuppernong Grapes and Cling Peaches Without Sugar.
GUAVAS.—Canning in Glass. Only firm sound guavas should be used for canning. Pare the fruit cut into halves, and remove the seeds, float the halves in boiling water for 20 seconds, drain and pack carefully in jars. Cover to over-flowing with boiling water. Seal partly, process pint jars 20 minutes, quarts 40 minutes. Seal immediately.

While packing have a pan of water near and dip hands into water carefully to remove seeds which stick to them. Select, prepare, float and pack as in canning in glass. Cover fruit with water to within one-fourth inch from top of can. Cap, exhaust 5 minutes and tip. Process number 2 cans 25 minutes; number 3 cans 35 minutes. Immediately after processing place cans in cold water to cool and stop the cooking.

Preparation of Guava Juice to be Canned for Jelly Making
Wash guavas, remove blossom end and slice into small pieces with sharp knife. For each one pound of guavas taken add 2 pints of water and boil until soft, about one hour. Pour into a cheese cloth bag and allow to drain. This juice is then drained without pressing through a clean flannel jelly bag. Pour the sterilized juice into bottles or glass jars or tin cans and seal. If using glass jars or tin cans follow instructions in canning in glass of tin. In tin cans use sterilized stoppers in the bottles lightly, set bottles in rack in water bath and process at the simmering point for 30 minutes; remove the water bath, put stoppers in tightly, and when cool dip the stoppers in the melted paraffin or sealing wax for a depth of one inch.

Pears
Select pears, ripe but not soft. Peel, blanch, put in cold bath, drain and pack rapidly. Cover with water, process quart jars 35 minutes. If using tin cans exhaust number 3

(Continued on Page 4)

GOVERNMENT WILL OBTAIN STATEMENT

Of The Great Business On The St. Johns

A full and comprehensive statement of St. Johns river traffic has been forwarded to the Waterways Commission by the Sanford Board Of Trade, bearing out our statements in regard to the proposed inland waterway route between Jacksonville and Miami. The figures come from careful compilation of tonnage over a long period and shows in detail the various lines now operating between Jacksonville and Sanford and their respective tonnage.

It is astonishing to know just the what the enormous tonnage now is on the St. Johns and further to realize what this tonnage can be brought to should the contemplated improvements be made. The entire St. Johns river sections should combine and go after this improvement. It means within a few years double population, the construction of many new industries and development of and development of lands now lying idle. It means an outlet for the timber of vast forests lying south of us and would be a tourist beacon clear across to the Pacific coast for many tourists now uncertain as to Florida.

The detailed statement sent in is a credit to that organization and shows that when they are called upon for anything they are able to produce. Our experience of over two years with the Board Of Trade indicates that in this organization we have an active body through which we can realize the many needed things for this and other sections.

GERMANS RETREATING ALLIES GAIN GROUND GIVE HUNS NO REST

Important Railroad Sectors Gained Yesterday

The German retreat is continuing along the whole line, the allies closely in pursuit, according to news from the fighting area in the Soissons-Rheims salient received up to noon today. The Germans have succeeded in checking, but not stopping, the allied advance.

The French are on the north bank of the Ourcq, and in the east they have secured the whole road between Rheims and Dormans. The Germans are stubbornly resisting and are burning villages. Heavy fighting is still in progress south of Soissons near Buzancy. So far the French have made no progress there. Villages between Soissons and Bazoches, about 14 miles to the east, however, are on fire, leading to the belief that the Germans may intend a further retreat.

Since yesterday the allies have advanced between two and three miles on a 20-mile front. The enemy has definitely abandoned the line of the Ourcq, and there is little doubt now that he will go back beyond the Vesle to the line 30 miles long between Soissons and Rheims, which is probably well entrenched and has good lines of communication. The German retreat has been orderly and deliberate. So far the taking of only four guns has been reported.

The Americans in the Fere en Tardenois sector are pressing the Germans vigorously. North of the Marne the tide of German invasion is fast ebbing. The fact that a German retreat in this region is going on is not questioned, and the only question of moment remaining to be cleared up is the location at which the enemy will turn at bay.

Since Saturday morning there has been important changes in the battle line between Soissons and Rheims. Today it runs almost directly east of Oulchy le Chateau to Fere en Tardenois, then crosses the Ourcq and continues east until it reaches the Dormans-Rheims road northwest of Rheims mountain. Military experts thought the Germans might stand on the Ourcq river, from which their cannon might menace the Chalons railroad which runs along the Marne. Now it is certain this is not their intention. The only position possible aside from the Vesle river is the line which runs along the Aisne and military critics believe the withdrawal will not stop until it has reached that body of water.

Burning villages between Soissons and Rheims are reported indicating a withdrawal. Paris, July 29.—Under the irresistible pressure of the allied troops, the enemy's retreat continued yesterday, according to the Havas correspondent at the front. The average advance of the allies during the day was from 3 to 6 kilometres. It is impossible to determine the limit of retreat but it is probable it will stop on the wooded heights along the Vesle. On the left of the allied line the Germans made great efforts to hold the France Gen. de Goutte, blowing up bridges and foot bridges leading to Fere en Tardenois and contending for territory foot by foot. The enemy's stubbornness was useless and the allies entered the town by the west and south and are holding their positions. Further toward Rheims, the allies continued to advance toward Ville en Tardenois in which the vanguard has now probably penetrated.

The small number of German prisoners taken is due to the fact that the allies advanced with extreme caution while the Germans left only small forces to cover their retreat. These forces were given orders to hold on to the last so the main body could withdraw. Thus the enemy's losses are relatively heavier in deed than prisoners. On the other hand the Germans left considerable booty, especially engineering machinery, munition depots and many cannon than put out of order.

Come prepared to discuss the situation at the Board of Trade Friday night 8:00 o'clock.

PRESIDENT WILSON ON MOB LAW

SPIRIT IS ALL WRONG AND CONTRARY TO OUR PRINCIPLES

President Wilson, in a personal statement addressed to his fellow countrymen, denouncing mob spirit and mob action, called upon the nation to show the world that while it fights for democracy on foreign fields, it is not destroying democracy at home.

The president's statement in full follows: "My Fellow Countrymen: "I take the liberty of addressing you upon a subject which so vitally affects the honor of the nation and the very character and integrity of our institution that I trust you will think me justified in speaking very plainly about it.

"I allude to the mob spirit which has recently here and there very frequently shown its head amongst us, not in any single region, but in many and widely separated parts of the country. There have been many lynchings and every one of them has been a blow at the heart of ordered law and humane justice. No man who loves America, no man who really cares for her fame and honor and character, or who is truly loyal to her institutions, can justify mob action while the courts of justice are open and the governments of the states and the nation are ready and able to do their duty. We are at this very moment fighting lawless passion. Germany has outlawed herself among the nations, because she has disregarded the sacred obligations of law and has made lynchings of her armies. Lynchings emulate her disgraceful example. I, for my part, am anxious to see every community in America rise above that level with pride and a fixed resolution which no man or set of men can afford to despise.

"We proudly claim to be the champions of democracy. If we really are, in deed and in truth, let us see to it that we do not discredit our own. I say plainly that every American who takes part in the action of a mob or gives it any sort of countenance is no true son of this great democracy, but its betrayer, and does more to discredit her by that single disloyalty to her standards of law and of right than the words of her statesmen or the sacrifices of her heroic boys in the trenches can do to make suffering peoples

believe her to be their savior. How shall we commend democracy to the acceptance of other peoples, if we disgrace our own by proving that it is, after all, no protection to the weak? Every mob contributes to German lies about the United States what her most gifted liars cannot improve upon by the way of calumny. They can at least say that such things cannot happen in Germany, except in times of revolution, when law is swept away.

"I therefore very earnestly and solemnly beg that the governors of all the states; the law officers of every community, and above all, the men and women of every community in the United States, all who revere America, and wish to keep her name without stain and reproach, will co-operate—not passively merely, but actively and fully—to make an end of this disgraceful evil. It cannot live where the community does not countenance it.

"I have called upon the nation to put its great energy into this war, and it has responded—responded with a spirit and a genius for action that has thrilled the world. I now call upon it, upon its men and everywhere, to see to it that its laws are kept inviolate, its fame untarnished. Let us show our utter contempt for the things that have made this war hideous among the wars of history by showing how those who love liberty and right and justice and are willing to lay down their lives for them upon foreign fields stand ready also to illustrate to all mankind their loyalty to the liberty at home which they wish to see established everywhere as a blessing and protection to the people who have never known the privileges of liberty and self-government.

"I can never accept any man as the champion of liberty either for ourselves or for the world who does not reverence and obey the laws of our own beloved land, whose laws we ourselves have made. He has adopted the standards of the enemies of his country, whom he is to despise.

WOODROW WILSON

Be at the Board of Trade meeting at the Court House Friday night, 8:00 o'clock. Question: Labor and costs.

Red Cross Briefs
More than fifty names of members on the roll for June and July whose dues are still unpaid. The American Red Cross supplies serum to prevent deadly gaseous gangrene in wounds. A ban has been placed on political candidacy of all holding executive Red Cross positions. On July Fourth, the American Red Cross Commission to Great Britain sent to every American soldier, sailor and marine on the headquarters hospital list, a small American flag, an extra allowance of tobacco and greetings to the men in the English hospitals through the Red Cross by President.

The American Red Cross is forwarding supplies to all prisoners in German prison camps. As soon as a man is officially reported as a prisoner of war a twenty pound package of nourishing food is sent him each week. To care for American wounded sent from the French sectors to the French military hospitals, the American Red Cross has assigned one of its Red Cross nurses and a French and English speaking Red Cross aid to every French hospital caring for our men.

There is still an urgent call for trained nurses for overseas and for nurses for the military hospitals and home defence in our own country. The Red Cross Canteen Service is rendering valuable aid wherever established and the troop trains are especially favored recipients of their services. A long train of colored troops passing through one of our Southern cities recently were made happy with ice-cream cones and watermelons. Assisted by a squad of colored troopers, the canteen workers (white) passed through the trains dispensing refreshments and words of cheer, writing post cards and collecting for mailing the letters to home folks. To show their appreciation the soldiers were formed in a hollow square outside the station and talent among them rendered songs and dances and musical selections. Canteen service is one of the most important branches of Red Cross work and is proving very efficient. Our local canteen committee under the able supervision of Mrs. Alex. Vaughan prepares appetizing boxes of lunch for all of the boys leaving Seminole County, distributes magazines and otherwise makes the journey less burdensome to the boys. She is assisted by a competent committee.

The Junior membership of the A. R. C. approximates eight million five hundred thousand, which includes fifty-three thousand, eight hundred and fifteen school auxiliaries and they are doing a wonderful work.

The building of a 5000-ton floating drydock at Pensacola for United States Shipping Board is assured. Mr. E. F. Carry director of operations for the shipping board and chairman of the port and harbor facilities commission, stated recently that the commission has recommended to the shipping board that a 5000-ton floating drydock be built at Pensacola without delay.

Castor beans are making wonderful growth where they are given a chance. J. S. Davis, of Summerfield, has a field of beans averaging five feet; no fertilizer was used seem to be several varieties in the field. If the farmers would select their own seed there would be a big improvement in the crop another year.

Card Of Thanks.
We wish to thank our many friends who were so kind and sympathetic during the recent illness and death of Mrs. Edward Cameron. Ed. Cameron and Family, F. E. Gatchell and Family.

BLASTS KAISER'S HOPE OF VICTORY

Italian Invents Canned Lightning Capable of Destroying Trenches of Enemy.

TERRIBLE ENGINE OF DEATH

Claimed Invention Could End War in Thirty Days and Allies Could March Unchallenged into Berlin. Tests Prove Its Value.

Rome.—The Kaiser's dream of victory and world supremacy may be blasted out by "canned lightning," a terrible death engine invented by an Italian scientist. Dazzling swords of fire, more deadly than are highest explosives, followed by annihilating explosions, are capable of destroying enemy trenches with one blinding flash, according to his claims. Mine sweepers equipped with this device could fire mines thousands of yards distant. On the land, "canned lightning" could be used to form a most successful barrage and could wipe out the defenders of German trenches with unerring certainty.

The scientist is credited with having discovered a means of concentrating and reflecting electric rays in such a manner as to produce the results described. It is reported that this inventor has proved to representatives of his government that electric current can be concentrated and directed in rays.

Tests Held on Banks of Tiber. In describing the results of these tests, held on the banks of the historic Tiber, F. H. Randall, writing in the Illustrated World, says that the scientist was asked to burn through

a three-inch plank of hardwood. In an instant, the writer says, the plank was seared and broken as if it had been broken by lightning.

Officials then asked the scientist to explode two bombs, one hidden along the bank of the river and the other in the bed of the stream. Within ten minutes the bomb along the bank exploded. It required a much longer time to explode the other bomb, but this, too, was finally accomplished. The entire outfit, used by the inventor was placed on a single small barge.

An approximate idea of the power of the arcing electricity may be obtained by watching an electric furnace at work. It will cut the hardest steel like putty. To flash such a flame through an aeroplane, submarine, battleship or a trench would leave a total wreck. Mines placed in the North sea by the Germans could be eliminated, and mine sweepers could destroy all of these hidden terrors of the sea located within thousands of yards of the ship.

Death to Airplanes.

In a graphic description, Mr. Randall paints a picture of what would happen with this machine in action. Every enemy airplane or any fleet of them would fall to earth, a crumpled wreck. At the touch of a button, a bolt of electricity would suddenly shoot forward with incredible speed. A few scarred parts would be all that was left of what had been a soaring airplane a few minutes before.

A scout could lurk with his deadly weapons, connected with the generators and concentrators behind the lines, in shell holes or craters in "no man's land." When the enemy charged he could sweep the whole line as it passed, annihilating each successive wave of advancing Germans. Mr. Randall says that he can't say that this has been done or will be done, but he don't dare to suggest that it cannot be accomplished. Light, heat and rays of other kind can be reflected. He concludes by saying: "Once this problem is solved there will be no war. If the allies were possessed of equipment that would permit the arcing at a distance of powerful electric currents, the war would be won in 80 days and allied troops would be marching unchallenged into Berlin."

"WAR BRIDES" DUPE SOLDIERS

Women Fortune Hunters Arrested for Having More Husbands Than Law Allows.

San Diego, Cal.—Almost since the United States entered the war soldiers have been victims of women fortune hunters. Girls at various camps are being arrested charged with having an over quota of soldier husbands, and in every case the question of insurance was the motive. This city has been no exception to

the rule, and with the thousands of soldiers and sailors in training at the camps near by federal officials are always on the alert, and as a result two girls are under arrest. They gave their names as Miss Mae Smith and Mrs. Elsie Byrnes, and both are pretty. They were caught in the act of mailing about 20 letters to sailors and soldiers asking for money for clothes and traveling expenses. In every letter written by the girls was the phrase: "I wish you oceans of love with a kiss on the top of every wave." The girls also received 18 letters from ardent lovers and each letter contained money.

Fine Cotton Crop.

New Orleans, La.—Reports from practically every section of the South indicate the yield of cotton will be heavy this season. The staple selling at around 80 cents a pound in the seeding season stimulated planting, notwithstanding the fact that in many localities a plea was made for the planting of more food and feed crops.

BROTHERS IN ARMS

Every wearer of khaki who is now with the American expeditionary forces in France has been taken into the hearts of the French families and our sons are as their sons. There is no bond like that which arises from fighting in a common cause for high ideals.

CHAMP CLARK'S GRANDSON

Mrs. James Thomson of New Orleans, formerly Miss Genevieve Clark, daughter of the speaker of the house, and her baby, Champ Clark Thomson. She and the baby are spending the summer in and near Washington.

"OUTWITTING THE HUN"

By
LIEUTENANT PAT O'BRIEN

Copyright, 1918, by Pat O'Brien

entering this house with food in my possession, I would not only have paid the penalty myself, but you would have been discovered, too. It is too dangerous a proposition. Why don't you go out by yourself and buy your food at the stores? That would give you confidence and you'll need plenty of it when you continue your journey to the border."

There was a good deal of truth in what he said and I really could not blame him for not wanting to take any chances to help me in view of the relations between us.

"Very well," I said; "I've gone without food for many hours at a time before and I suppose I shall be able to do so again. I shall look for you tomorrow evening."

The next evening he came and I accompanied him to another house not very far from the one in which I had been staying and not unlike it in appearance. It, too, was a substantial dwelling house which had been untenanted since the beginning save perhaps for such occasional visits as Huylliger and his associates made to it.

Huylliger let himself in and conducted me to a room on the second floor, where he introduced me to two men. One, I could readily see by the resemblance, was his own brother. The other was a stranger. Very briefly they explained to me that they had procured another passport for me—a genuine one—which would prove far more effective in helping to get me to the frontier than the counterfeit one they had manufactured for me.

start something. The man who had lived in the house had evidently been a collector of ancient pottery, for the walls were lined with great pieces of earthenware which had every earmark of possessing great value. They certainly possessed great weight. I figured that if the worst came to the worst that pottery would come in mighty handy. A single blow with one of those big vases would put a man out as neatly as possible and as there was lots of pottery and only three men, I believed I had an excellent chance of holding my own in the combat which I had invited.

I had already picked out in my mind what I was going to use, and I got up, stood with my back to the wall and told them that if they ever figured on getting the passport, then would be their best chance.

Apparently they realized that I meant business and they immediately began to expostulate at the attitude I was taking. One of the men spoke excellent English. In fact, he told me that he could speak five languages, and if he could lie in the others as well as I knew he did in my own tongue, he was not only an accomplished linguist, but a most versatile liar into the bargain.

"My dear fellow," said the linguist, "it is not that we want to deprive you of the passport. Good heavens! If it will aid you in getting out of the country, I wish you could have six just like it. But for our own protection, you owe it to us to proceed on your journey as best you can without it because as long as you have it in your possession you jeopardize our lives, too. Don't you think it is fairer that you should risk your own safety rather than place the lives of three innocent men in danger?"

"That may be as it is, my friends," I retorted, "and I am glad you realize your danger. Keep it in mind, for in case any of you should happen to feel inclined to notify the German authorities that I am in this part of the country, think it over before you do so. Remember always that if the Germans get me, they get the passport, too, and if they get the passport your lives won't be worth a damn! When I tell the history of that clever little piece of pasteboard, I will implicate all three of you, and whoever is working with you, and as I am an officer I rather think my word will be taken before yours. Good night!"

The bluff evidently worked, because I was able to get out of the city without molestation from the Germans. I have never seen these men since. I hope I never shall, because I am afraid I might be tempted to do something for which I might otherwise be sorry.

I do not mean to imply that all Belgians are like this. I had evidently fallen into the hands of a gang who were endeavoring to make capital out of the misfortunes of those who were referred to them for help. In all countries there are bad as well as good, and in a country which has suffered so much as poor Belgium it is no wonder if some of the survivors have lost their sense of moral perspective.

I know that the average poor peasant in Belgium would divide his scanty rations with a needy fugitive sooner than a wealthy Belgian would dole out a morsel from his comparatively well-stocked larder. Perhaps the poor have less to lose than the rich if their generosity or charity is discovered by the Huns.

There have been many Belgians shot for helping escaped prisoners and other fugitives, and it is not to be wondered at that they are willing to take as few chances as possible. A man with a family, especially, does not feel justified in helping a stranger when he knows that he and his whole family

may be shot or sent to prison for their pains. Although I suffered much from the attitude of Huylliger and his associates, I suppose I ought to hold no grudge against them in view of the unenviable predicament in which they are in themselves.

WHILE OVER THERE HE GETS DIPLOMA OVER HERE

Knoxville, Tenn.—Although Clay Barber, Knoxville lad, is "over there," a formal presentation of a diploma to him as the only boy graduate of the Carter High school occurred here. Patrons attending the school's exercises beheld the seat of the only boy graduate draped with Old Glory.

OLD RAILWAY IS DISMANTLED

Rails Once Used for Carrying Freight in Mine District are Sold for Junk.

Redding, Cal.—The railroad from Cuargo on the Southern Pacific to the Quartz Hill mine on the east side of the river, near the Old Diggins, four and one-half miles long, has been sold as old junk by the Mammoth Copper Company of Kennett which built in 1907 at a cost of \$200,000. The mine was shut down in 1915, for then the Mammoth Copper company was able to get the fluxing ore at a better profit elsewhere. The bridge across the river, made of steel, is 900 feet long.

The wrecking company bought the railroad steel, ties, bunkers, trestles and bridge. Acetylene gas will be used to cut down the steel bridge.

The railroad was in active service for seven years. The Mammoth company took 70,000 tons of ore from the Quartz Hill mine in a single year and made use of 800,000 tons of ore in all.

The Quartz Hill mine, a great body of low grade quartz, is owned by a company composed of Polish priests in Chicago. The Pope was said to be a large stockholder.

TAXICAB DRIVERS KNIT BUT THEY ARE WOMEN

Cleveland, O.—One of the least surprising things to be seen on the streets of Cleveland now is a taxicab driver calmly sitting in a taxi at its stand, purling and dropping, while sox and sweaters develop before your eyes. But the drivers are girls, for Cleveland is rapidly getting a large proportion of its day drivers from the other sex.

"NO CHILDREN" RULE BANNED

Landlords in Seattle Are Appealed to to Remove Signs From Their Buildings.

Seattle, Wash.—"No Children Allowed" signs must be removed by Seattle landlords from their properties, according to J. W. Spangler, vice president of the Seattle chamber of commerce. He has issued an appeal to rooming house proprietors, hotel men and owners of rental properties, declaring that owing to the scarcity of quarters for shipyard-workers and others engaged in war work the situation in this city is becoming alarming.

CURBSTONE GLEANINGS

BUDGET OF OPINION "JUST BETWEEN YOU AND ME."

EVEN THE GATE POST NOT IN IT

A CHIEF IS AMONG YE TAKING NOTES AND FAITH. "HE'LL PRENT 'EM"---SO SAYS SAUNTERER.

Friendship
You can buy, if you're got the money
All you need to eat and drink;
You can pay for bread and honey
and can keep your palate sweet;
But when trouble comes to fret you
and when sorrow comes your way
For the gentle hand and friendship
that you need you cannot pay.
You can buy with gold and silver
things you're got to have to wear;
You can purchase all that's needful
when your skies are bright and fair;
But when clouds begin to gather
and when trouble rules the day
Your money doesn't lure a friend
worth while to come your way.
For the hand that's warm and gripping,
and the heart that's tender, too
Are what all men living sigh for
when they're sorrowful and blue.
For there's nothing, that's so soothing
and so comforting right then
As the gladly given friendship of a
fellow's fellowmen.
A hand upon your shoulder and a
whispered word of cheer
Are the things that keep you going
when your trouble time is here;
And you'll hate the gold you've gathered
and the buildings that you own.
If you have to bear your troubles
your sorrows all alone.
If you've served a golden idol you
get 'as your reward
All the luxuries of living that the
world can afford
But you'll be the poorest mortal and
the saddest in the end,
When the clouds of trouble gather--
and you're hungry for a friend.
--Detroit Free Press.
The latest news from the
front is glorious news and it makes
the blood of all real Americans

tingle. And how can any young
man refuse to go to war now?
There are several slackers here who
are hiding behind the exemption
and they are flimsy exemptions
at that. These slackers should
be ostracised from society. How
can any girl have anything
to do with a slacker? In some
places the girls have cut them out
entirely. We should have no use
for the slacker now and after the
war. You know who I mean
don't you? Or shall their
names be published as one of
Sanford's young ladies asked me
to do?
I note that the barbers of Stuart
are about to raise their rates for
scraping and clipping to a point be-
yond the shave and get shaved
point. In the olden days there was
a charge made of a dime for a shave
and two bits for a hair trim; and
then there came a hump where
there was a 50 per cent. raise for
the smooth-facer and a trimmer of
hair pulled down 35 cents for
manipulating the shears and some-
times, when the scissors didn't track
a fellow could get some of the hair
pulled out for nothing--barring a lit-
tle pain. And now it is stated on
authority that the prices are to go to
two bits for a shave and twice that
sum for a haircut. The same trick
was tried in this city a year ago with
disastrous results--and many a man
commenced to do his own shaving.
With a good implement and good
material a shave cost a man about one
cent, where he does the work him-
self--and he never has to lose
waiting his turn; and so far as a
haircut is concerned a couple of
cuts a year will avoid having to do
up his locks in curl-papers or having
it hang all over his manly shoulders.
So what's the use? Those Stuart
barbers should start nothing they
will be unable to finish; and if
they are to make a raise in rates I
think it ought to be one dollar for
anything that is done to the man in

the chair. This will lessen the crowd
in waiting, allow the barber to have
some leisure, and urge all men to
handle their work at home. Let us
soap the craft will have too much
sense to try and scrape more cents
from a trusting and trying public
for it is sure that trying to razor
price beyond the limit is simply a
lathering loss. Yassum.--Thorn in
P. B. Post.

"I wish," wrote a boy "over there"
to a pal in the U. S. A. "that you'd
drop around and see mother once in
a while. She writes fine smiling let-
ters, but somehow or other I have
a feeling in me that she's hiding a
lot of tears. Tell her I'm all right--
and make her believe it."

After publishing the above, an
exchange very truthfully says that
not a few of our wonderful fighters
standing there in the bomb and
bayonet line are worrying more about
their mothers they have left be-
hind them than they are about the
Boches in front of them. And, too
many of these mothers are hiding
tears behind "smiling letters."

It would be mighty fine and of
incalculable assistance in waging this
war to lessen the soldiers' son's
worry and dry the soldiers' mother's
tears. We ought to make every boy
"over there" feel sure that he
is getting plenty of help sympathy
and sunshine of love from we who
stay at home. That done, he will
worry less, and fewer mother tears
will dampen the letters she writes
to him.

This is the supreme purpose of
the war mothers of America, and by
doing that these mothers go far
toward bringing final victory home
to America. But this is not all the
war mothers' organizations hope to
accomplish. They want to bring to
bear upon all war work the great
force of their united strength,
conservation, in Liberty Loan drives
boosting wartime thrift and saving
and aiding all those war charities
so necessary to relieve suffering and
save life in our war camps, among
the people with whom we stand in
democracy's war

No person can help a war mother
as much, nor sympathize with her so
sincerely nor drive away her war
clouds as well as another war
mother.

Germany wants to know what the
United States is fighting for. She
thinks the sinking of neutral ships
without warning isn't enough to
bring us in.

All right! Let's tell her!
We're going to fight for outraged
women!

We're going to fight for crucified
nuns!

We're going to fight for little chil-
dren with hands and arms missing!

We're going to fight for namelessly
mutilated soldiers!

We're going to fight for innocent
thousands stewn upon the bottom of
the sea!

We're going to fight for Belgium--
outraged and desecrated as no nation
in the previous history of the world
has ever been.

We're going to fight for France--
that magnificent nation of heroes--
bled white defending civilization
against the Power of the Beast!

We're going to fight for England--
which chose the path of honor black
tinted with despair--when the nation
she had sworn to defend was set
upon as by a wild beast!

We're going to fight for Italy--
which took up the cause of Right
against the power of Wrong--terrible
though she knew the cost must be!

We're going to fight in defense
of these principles of human liberty
which were laid down nineteen cen-
turies ago by that first great teacher
and preacher of human rights--the
Man of Galilee!
Every iota of the philosophy and

creed of hate, and blood, and
and bestiality, and blood cruelty
and the human enslavement that
mark every footstep of the kaiser
and his cohorts of hell--are in di-
rect and damnable opposition to
every thought, word, and deed, of
the Man of Galilee!

This is therefore no fight of De-
mocracy against autocracy!

It is a titanic struggle between
right and wrong; between the phil-
osophy of Jesus Christ and th
of evil, through the earthly defend-
ers of each!

And we're going to fight--fight--
fight side by side with our fellows in
the cause of humanity, until there is
no vestige left on all this great earth
of the powers that--defying God and
man--precipitated this cataclysm ov
blood and tears.

There is only one sentiment in
this whole broad land today, and the
man who does not recognize it must
be deaf, dumb, and blind; and that
sentiment is a dogged determination
deep down in the very bowels of
every man that we are going to
fight until we have justified Italy;
saved England! Swept immortal
France free of the Hun; liberated
Belgium! Avenged so far as in the
human power the countless crimes
of Germany against civilization;
broken the Hindenburg line and
swept the army of the beast as chaff
before the wind; humbled the em-
pire of hell; and--please God--
rid the earth of the kaiser and all
his fell breed!

If anyone asks you, tell them that
is what we're fighting for!

Care for Seed Corn

The same day that seed corn is
gathered from standing stalks in the
field the husked ears should be put
in a dry place where there is a free
circulation of air, and so placed that
the ears do not touch one another.

This is the only safe way, accord-
ing to the University of Florida ex-
tension division, which says that
much good seed has been ruined be-
cause it was thought to be dry
enough when scattered. Many farm-
ers think that their autumns are so
dry that these precautions are not
necessary, yet there is no locality
where the corn will not be bettered
by a thorough drying treatment. If
corn is left in the husk it may sprout
or mildew during warm wet weath-
er, and it is more likely to become
infested with weevils.

The vitality of seed may be re-
duced by leaving it in a sack or pile
for even a day after it has been
gathered. During warm fall days
with some moisture in the cobs and
kernels, the ears heat or mildew in
a remarkably short time.

One of the best and the cheapest
treatment immediately after the ears
are husked is to tie the ears singly
on coarse twine at about 8-inch in-
tervals, the twine being looped about
the middle of the ears so that they
hang balanced and horizontal. Get
twine heavy enough to support from
15 to 20 ears.

Wire racks are cheaper in the long
run and more convenient. A good
form is made from welded or woven
wire fencing, the upright wires be-
ing used as supports for the in-
dividual ears. The lateral wires,
about 3 inches long on either side of
the main upright, are thrust into the
butt end of the cob. These racks
will last for several years and are
easily stored when not in use.

Wooden seed racks, in which the
ears are stored in rows on separate
shelves, are convenient dryers, and
have no drawbacks in a dry, breezy
place, altho the air cannot circulate
freely on all sides and dampness may
be held where the row of kernels
rests on the wood.

Only during unusually damp
weather at seed-gathering time will a
fire be necessary to help the drying.
Yet if heat is applied in a poorly
ventilated place, it will do more
harm than good. If used, the fire should
be slow and long-continued. It
should be below the ears with plenty
of good ventilation above them.

Fumigate Seeds in Flour Barrel

When corn and cowpeas are gath-
ered there are often thousands of
weevils in them, and everyone knows
the destructive habits of these in-
sects. R. L. Clute, extension special-
ist on stored grains, to the U
of Florida says we are not truly pa-
triotic if we allow these destructive
insects that are so easily killed to
continue their ravages of our foods.

If one has a few bushels of seed or
a small quantity of meal, flour or
grits there is no better container for
fumigation than an ordinary tight
barrel. If a barrel and a bottle of
carbon disulphide are kept han
properly used there is no excuse to
sustain losses occasioned by insects
destroying seeds that a farmer wish-
es to keep over or that are stored for
food. Seeds or foodstuffs so fumi-
gated should be exposed to the air
just as soon as the insects are killed,
and if care is exercised in doing this
they will not have the taste or odor

of the gas.
One pair of weevils will produce 54
pairs in 12 weeks. These 54 pairs
will produce 2900 pairs in 12 more
weeks. In 36 weeks these will have
produced more than a fourth of a
million weevils. If corn is the crop
attacked why not fumigate the grain
when it is first placed in the crib
and kill the first pair? To do this
properly will require a tight crib.
Anyone needing carbon disulphide
in quantity should ask the county
agent, as he can direct the applicant
to a liberal supply at a fair price.

Points in Silo Filling

The important point to keep in
mind in filling a silo is to see that
the ensilage cutter is working prop-
erly. By this is meant that it must
be run at a certain speed so as to
blow the silage into the silo. If the
engine and cutter are not running at
a high enough speed the blower will
not elevate the cut silage into the
silo. In other words, there will be
trouble with the delivery pipes be-
coming choked.

Another point to keep in mind is
to see that the machine is set so as
to cut the ensilage into short pieces.
The pieces should be 1/2 to 3/4 inch
in length.

Another important point is to have
a sufficient number of men inside the
silo to tramp the silage thoroly.
If the silo is as much as 14 or 16 feet
in diameter, it would be advisable to
keep three men in the silo during the
process of filling. Most of the tramp-
ing should be done around the edges
or the wall of the silo.

It is also important to keep the sil-
age in the silo practically level dur-
ing the process of filling, altho per-
haps better results might be had
if the outer edges be kept a little
higher than the center.

If the silage is at all dry it will
be necessary to add some water. This
can be done by running water
on the knives or in the fan case.
When the water is applied in
there is a more even distribution of
water through the entire mass of sil-
age. Some people run a hose into the
silo and wet it down. This is not
very satisfactory for the reason that
it is difficult to get a uniform or even
distribution of water through the
mass of silage. It is almost impos-
sible to tell how much water to use
as this will depend entirely on the
condition of the crop when it is put
into the silo. However, the silage as
it enters the silo from the delivery
pipe should be quite moist, but there
should not be enough water used so
that it will drip from the delivery
pipe.

SHERM'S DOTS

THE DOTS SOMEWHERE IN FRANCE.
By Clifford Leon Sherman.

Dear Folks—There is nothing to it—this is the life for me. You won't know me when I get back. We are all working as hard as we can aboard ship, and I can just feel my muscles grow. But you mustn't think we are working every minute we are awake. The officers are doing all they can to furnish us with amusement, so we won't get homesick. Of course, we haven't room enough to play baseball, but we indulge in other sports in our leisure moments. There is one thing the officers especially encourage, and that is for us to go in for.....
To complete the picture, draw a line from dot 1 to dot 2, then from dot 2 to dot 3, and so on.

TREAT CAPTIVE GERMANS KINDLY

French Generous to Prisoners Despite Brutal Course of Enemy.

ARE GLAD TO BE OUT OF IT

Sight of Long American Columns Destroyed Hun Hopes of Victory—Live Like Happy Family in Prison Camp.

With the American Forces in France, France knows that her prisoners in Germany are treated badly, but German prisoners are treated humanely and even generously in French prisons just the same, writes Don Martin in the New York Herald. I asked an officer in charge of a French prison camp why this is, and he shrugged his shoulders and said merely: "Ah!"

Unless one could see the gesture accompanying the monosyllable he would hardly know what meaning to attach to it. It really meant: "Oh, what's the use of being brutal to individuals just because some one else is? We wish we could, but we can't." I have inspected several prisons, some large and some small, and in every one I have found the Germans treated quite as well as civil prisoners in normal times and in many instances better. Officers are not humiliated in any way. In fact they receive better treatment, a stranger would think, than they are really entitled to. Prisoners Live Happily.

On a low hill about 1,000 feet from a main road of France stands a prison—five low wooden buildings surrounded by two barbed wire fences, with armed pickets always patrolling outside. Here are 200 Germans, many of them prisoners taken in the early battle of the Somme, but some taken more recently. They are all private and constitute as happy a family as one could find where personal liberty is the one thing desired and denied.

The Germans stood at their barbed fences hours at a time and watched the endless line of soldiers. When it was the blue of France that was moving past the Germans were not particularly interested. They had seen that for years. They know France always has had an endless line of everything needed for war. But when they saw the khaki of America filing or rolling by for a whole day and then for another, and heard the muddy shuffle of feet through the night, there was a change in the dull expression of those German eyes. It was at this time that I went to the prison to learn what they thought of what they had seen. First it should be stated that these prisoners see little of recent developments in the war. They must form their opinions from such fragments of conversation as they hear from their keepers and from what they see, as, for instance, from the long, long line of Americans, the first they had seen.

In this particular prison the newcomers had brought the news situation up to early spring, but as for the big offensive the prisoners knew only that there probably would be one.

Americans Surprise Germans. When I asked if there was a German among the two hundred who could speak English, a good looking young man, with a typical Teutonic mustache, red cheeks, a glow of health, was called out. He stepped into my presence like an automaton, clicked his heels together and saluted the French captain. He told me he was a private; that he has a home in Lucerne, Switzerland; that he fought eight months, but was never wounded; that he is in the wholesale dry goods business in Berlin, and that he does business with John Wamaker, Marshall Field and Stern Brothers.

"What do you think of all the Americans you have seen parading here recently?" I asked him. "I have seen many Americans," he said. "I was surprised that you have so many in France." Another prisoner, less prepossessing in appearance than the first, was asked about things in general. He spoke English poorly. "I live in Berlin and work in a bank, but was in the war for two years. When the war is over I am going to Switzerland to live. I would go to America, but they don't like Germans over there any more."

"Why are you going to leave Germany?" For an answer there was a shrug of shoulders and a half smile, half grimace. "Are you satisfied here?" "It's a lot better than being in a grave where a lot of them are."

KEEPSAKE GOES FOR BONDS

Oklahoma Man Gives Up Gold Piece He Has Carried for Thirty-Seven Years.

Tulsa, Okla.—I have carried this gold piece with me for thirty-seven years, and I have resisted hunger and temptation to spend it, and have always kept it as a treasure. However, Uncle Sam needs it now, and I willingly let it go so it will help to bring victory to the American arms. This was the statement of W. H. Martin of this city as he deposited a \$10 gold piece at the post office window and asked for some baby bonds.

RED MEN WILL SAVE FOOD

Ask for Expert to Teach Squaws How to Save Wheat by Using Substitutes.

Omaha, Neb.—Indians are not one whit behind the white man when it comes to food conservation. They want their squaws to have a "food matron" just like their white brethren. Fifty leaders of the Omaha Indian tribe called on State Food Administrator G. W. Wattles and asked him to intercede with the "great white father" at Washington to have Food Administrator Hoover appoint a matron to explain to the squaws how to save the wheat by using substitutes. In the past nothing but wheat has ever been used on the reservation, but the Indians have not only sent their boys to fight for Uncle Sam, but they want to do their bit at home.

OPEN EMERGENCY HOMES FOR WIVES OF SOLDIERS

Des Moines, Ia.—Two emergency homes which will care for the wives of soldiers after leaving a maternity hospital have been established here by the civilian relief department of the Red Cross.

The plan is to keep the mothers in the homes until they have regained their strength. They will be taught to care for their babies and for themselves. After leaving, an effort will be made to see that they are located in homes.

PRICES SOAR IN LONDON

Saloon Keepers Make Up for Profiteering Brake on Whisky and Spirits.

London.—The whisky and spirit prices have limited the power of the saloon keeper to profiteer in these articles, with the result that the prices of wines have gone up with a run. A glass of port, which at one time was 8 cents, is now 24 cents. Mixed vermouth has risen to 24 cents a glass, or even to 36 cents in some West End establishments.

By the bottle prices have been increased in the case of Italian vermouth from 40 cents the litre to as much as \$1.80, and the price of inferior French vermouth is \$2. Other wines are double or treble pre-war prices.

TAKE SHRAPNEL FROM HEART

Remarkable Operation Performed on a British Soldier Proves Successful.

London.—A remarkable operation has been performed on a soldier at Leeds Infirmary. A piece of shrapnel weighing 61 grains was extracted from the anterior walls of the heart.

The patient is Private John Britland, who was wounded at Arras on April 11 last year. After receiving treatment in several hospitals he was taken to Leeds Infirmary, where a radiograph established the fact that he had a piece of metal in the wall of the heart itself. He is making steady progress to recovery.

Coal Flows Like Water.

In a great steel works at Pittsburgh powdered coal flows like water through 1,500 feet of four-inch pipe under a pressure of 40 pounds the square inch, and flows so rapidly that four tons have been put through a 500-foot line in five minutes.

LESSONS FOR THE Home Embroiderer

Specially prepared for this Newspaper by Pictorial Review.

Alphabet in Japanese Design and a New Sailor Collar for Dresses and Waists.

By KATHRYN MUTTERER. Collars are accessories that the well-dressed woman finds indispensable. They do so much to smarten up a suit or frock that everyone should have at least two collars in different styles. The broad collar pictured is suitable for wear with almost any garment, slit lace insertion and edging being combined with the embroidery. Batiste, chiff-

forts. One point about the shaping of a collar is that it should be cut straight and wide across the back of the neck; this obviates the "poke" in the center back and makes the collar meet at the right angle in the front. The embroidery should be done with a fine working cotton. The design is exceedingly simple and is quite easily done in stitches well-known to every needlewoman. To fit the collar properly, use a bias strip and be careful not to get the binding on full. A great deal in the fit depends upon the proper binding on the neck.

No. 12381—A New Sailor Collar. No. 11929—Japanese Alphabet.

Since the Japanese and Chinese influence is felt everywhere this season, it is only natural that it should evidence itself in embroideries. The letters of the alphabet pictured are of Japanese design and are to be worked in solid satin stitch. Besides being appropriate for handkerchiefs and personal linens, they make effective markings for napkins, table cloths, luncheon sets, dollies and other decorative linens.

Pictorial Review Embroidery No. 11929—Japanese style initials. The pattern contains 27 letters each 1/2 and 1 1/2 inch high. Transfer pattern, 15 cents. Embroidery Transfer pattern No. 12381, blue, 20 cents. Two styles of sailor collars are given in this pattern. A and B. Style "A" is arranged for lace insertion and edging. No. 12381—A—Stamped on white handkerchief linen, with white embroidery cotton, 50 cents. Pictorial Review patterns on sale at local agents.

Little Rock, Ark.—The girls may continue to wear \$90 gowns, \$25 boots and hose that cost more than a pair of shoes did a generation ago, but in this town they will not flirt among the round tables in the soda joints, sipping soft drinks at the expense of soldier boys or loving swains. The state food administration has knocked these good times on the head. The girls must learn that the country is at war. No more, according to the order of the food administration, shall soft drink stands serve iced tea, sherbet and water ices. An order has also been issued denying manufacturers of soft drinks who have used their 1918 sugar

allotment more sugar for the remainder of the year. Eagle Attacks Woman. Franklin, Va.—A bald eagle that has made frequent excursions into this part of the country made a vicious attack on Mrs. Anna Simmons while she was walking to her home near this city. Three deep wounds were made in her face where the eagle's talons had gouged into the flesh. Will Hatterman, who ran to her assistance, was also attacked and forced to seek shelter. Words and Music. So that singers can use phonographs to play their accompaniments, an attachment has been invented that displays the words of songs on a reel of paper as a record is being played.

WOULD GUARD STATUES

Paris Protests Against Neglect of Art Treasures.

Allowed to Stand Exposed to Air Raids—Promises of Aid Falls.

Paris.—Protest has arisen in many quarters here against the deliberate neglect of many of the priceless statues and works of art in Paris, which have been permitted to stand unprotected against possible damage from enemy air raids and bombardments. The special commission charged with the duty of providing protection for public monuments of art has been severely criticized.

Last year when the danger of air raids seemed comparatively remote a dozen or more monuments and statues were ordered to be protected with sandbags. Some time afterward "loaded" sacks were placed at a distance from the monuments or statues waiting to be put in place. There they were allowed to remain, nothing further being done. The bags lay about the statues for weeks.

In the meanwhile there were several air raids. Fortunately no monument or statue was hit. On the initiative of a group of citizens work on the protection of some of the masterpieces was begun, and many historic pieces like the Vendome Column, the Obelisk, the Strasbourg Monument and the art works in the Luxembourg gardens were given some adequate protection. Street urchins anxious to play "in the trenches" climbed up among the bags, causing a loose one to slip, with the result that thousands of bags fell in an avalanche about many of the statues. It was thereupon found that the bags were filled with stones or clinkers.

Art lovers protested and called the attention of the commission to the fact that stones and clinkers afforded no protection against German bombs. The Paris municipal council is now taking measures to remedy the present condition and promises that every valuable piece of statuary and historical art will be reasonably protected.

Courtesy. One of the properties of God, who gives his sun and rain to the just and the unjust by courtesy; and courtesy is the sister of charity, by which hatred is extinguished and love is cherished.—St. Francis of Assisi.

Easy and Practical Home Dressmaking Lessons

Prepared Specially for this Newspaper by Pictorial Review. How to Dress a Girl Becomingly.

holed in blue cotton. The back of the waist and skirt are cut in one, the front and side gores being attached to the front of the waist under the belt. At the front there is a plait, to the left of which the adjustment is effected. The waist closes in front. Twelve-year size requires 3 yards 36-inch gingham with 1/2 yard 36-inch pique for trimming.

The simplest way of cutting the dress properly is as shown in the guide. Section "L" containing the

back of the waist and back gore is placed so that the triple "TTT" perforations rest along the lengthwise fold. The side gore comes next, with large "O" perforations along a lengthwise thread. In the space opposite these two sections the belt is laid, with "TTT" perforation on a crosswise thread of the material. The front gore of the skirt and the collar must be placed with "TTT" perforations along the lengthwise fold of material. The remaining sections consisting of the front of the waist, pocket, cuff and sleeve, are laid on the gingham with large "O" perforations resting on a lengthwise thread.

Girls' frock in check gingham, with collar and cuffs of embroidered linen. It is not always an easy matter to dress a girl becomingly, because girls vary so greatly in size according to their ages. Of all difficult ages, the years from 11 to 16 are most puzzling to dress. The model shown here is appropriate for any age between six and sixteen and is pretty made of check gingham with collar and cuffs of white pique with scallops button.

Pictorial Review Dress No. 7740. Sizes, 6 to 16 years. Price, 30 cents.

FLORIDA CITRUS EXCHANGE

Grapefruit failed to show as great strength as oranges this year because fewer people know how good the former are.

With the increased production now coming on, grapefruit are likely to sell for much lower prices in a few years' time unless the American people are taught their food and health value, thus popularizing them.

The Florida Citrus Exchange has undertaken to do this work in anticipation of the enlarged production of Florida grapefruit groves and this season will conduct educational campaigns in a number of important cities in the North and West.

"Sealdsweet" grapefruit, that marketed by members of the Exchange, will chiefly benefit by this effort. If you grow grapefruit good enough to be sold under this trademark, join the Exchange and assure a market for it. For full particulars address the Florida Citrus Exchange, Citizens Bank Building, Tampa, or call on

L. A. HAKES, Manager Orange County Citrus Sub-Exchange Orlando, Fla.

THE SANFORD HERALD

R. J. HOLLY, Editor

Office: Herald Building Telephone No. 148

"I pledge allegiance to my flag and the Republic for which it stands; one nation indivisible, with Liberty and justice to all."

We are all economizing now and we fail to see why the girls at the beach should not economize on bathing suits

Sanford is arranging to establish a Dehydrating plant to conserve her perishable crops. This is not the first time Sanford has taken a place in the front ranks of progress.—Kissimmee Gazette.

"Somewhere in Kentucky" a drafted man appeared for physical examination. "Rejected" was the medical verdict. "You have flat feet and cannot march." "Ain't that hell!" moaned the would-be soldier. "I've tramped 48 miles over the mountains since last night and now I've got to walk back."

Because the nation's reserve has been depleted by the calling of literally thousands of graduate nurses for service in military and naval hospitals, it is absolutely necessary immediately to call 25,000 student nurses for training in American hospitals. These young women are to be enrolled in the United States Student Nurse Reserve. The enrollment began yesterday.

Manatee and Seminole the two celery growing counties of the state, have organized truck growers' associations and have meetings with directors from each association, where the problems of marketing, shipping and advertising their vegetables commodities for the coming season are handled with greater success than each association working by itself. This is a co-operative spirit that will benefit both counties.—Sarasota

An upstate newspaper tells us of a novel contribution basket for churches invented by an Oklahoma man. If a person drops in a quarter or more in the box there is silence; if he drops a dime in a bell ring, a nickel sounds a whistle and a penny fires a blank cartridge. If

Cico Liquid Paste

one pretends to be asleep when the box is passed, it awakens him with a watchman's rattle, and a kodak takes his picture. Unfortunately the name of the inventor are not given. There are a number of church stewards in this town who would like to get in communication with him.—Eustis Lake Region.

DEHYDRATE POTATOES
A dispatch from Stockholm says "there have been no potatoes in Germany for more than a week. The new crop is selling for \$1.20 a quart or \$9.60 a peck."

In Florida there has been left in the fields to spoil thousands of bushels, because the product on the market would not bring the cost of getting it there, and still we are urged to plant big crops.

Potatoes can be worked in dehydrating plants so they may be used years after going through the process. While the Government is forced to pay jobbers high prices for storage products it may as well try putting them up, thereby cutting out a big profit in the middle man and giving more cash to the patriotic farmer who has heeded his country's call for more food stuffs.—Reporter-Star.

AMERICAN SOLDIERS THINK
You will like the explanation that Arthur Brisbane gives of the superiority of the American soldier. He says the reason there is every hope of a great and decisive victory for American arms is because the young men of the United States are taught to THINK.

"This country teaches young men to think for themselves in the public schools, where all are equal," says Brisbane. "In the struggle for success, where Schwab, the day laborer, who thinks, goes to the top and Thaw, the millionaire son, who doesn't think, goes to the insane asylum."

"This individual thinking is reflected in the cables that tell about fighting. For instance Fred Brown and Oscar Willcoxon, young American sergeants, were taken prisoners after their last cartridge was fired. They were taken to the rear to be questioned under guard of a German officer and a soldier.

"An hour later they walked into the American lines, bringing prisoners with them. On the walk back toward the German rear, they had knocked down their guards, taking their revolvers, and made their jailors prisoners.

"The young American thinks for himself, and once in it he WANTS TO FIGHT.

"They 'kill or are killed' as a German officer is said to have reported to the Crown Prince.

"Alexander won his battles against considerable odds because his father hired Aristotle, the greatest thinker in his day to teach young Alexander the science of thinking.

"The young American has his defects, being human. But he is first of all a thinker in his own way. It is safe to say that every American boy in France has his own theory as to how the war should be won. Prussia will never beat the young men that this country is sending over to defeat her."

A Big Time Coming
On August 8th, the Geneva Branch of Seminole County Chapter will give a basket picnic at Lake Harney, at which hot coffee, soft drinks, ice cream and other good things will be sold for the benefit of the Red Cross, but that is only half the tale, for a joyous good time is promised everybody who attends. The big dinner will not be served until 1:30 p. m. to give the Sanford business people and the rest of the county a chance to be on hand when the curtain rises on the "eats"

Everyone is expected to carry a lunch—there will be no free lunches—but compensation will come in fishing and swimming and all the rest of woodland delights.

Thursday, August 8—Don't forget the date. An invitation has been extended the Seminole County Guards which it is hoped by the Geneva contingent will be accepted.

"Over There" and Over Here
For the part you are playing in this war you are answering not alone to yourself and to your government and your fellow citizens but you are answering as well to one all-important other—the American soldier "over there." And be sure that he knows and will remember the part you are playing just as surely as you know what he has done at Chateau Thierry and at Cantigny and on the Marne.

There is abundant testimony that the eyes of the American Expeditionary Force in France are on America with all the searching eagerness that the eyes of America are on France. They look for every letter

and newspaper from home and they read them threadbare.

Captain Robert Warwick who was a movie actor before he went to France with Pershing, tells us that the favorite pictures with the boys are those showing war activities at home. As you cheer the film showing American lads trudging down a muddy road in Picardy, so those same lads cheer the pictures of Red Cross work and shipbuilding and Liberty Loan parades "over here."

Some day these lads are coming home—the greater part of them, we all hope. And when they do they will not ask you, "What did you do while I was fighting for you?" They will not have to ask. They will know.—Atlanta Journal.

In many communities patriotic women and girls are "boycotting" the slackers—the man with the yellow streak down his back, while men sneer and jeer the coward.

New Sugar Ruling in Effect August 1st.

Rule 1.—Persons residing in the State of Florida are entitled to not more than two pounds of sugar per person per month, based on the number of people in the family, and no purchases of more than two pounds at one time, shall be made by any person or family, when such person or family resides in the city or close to the point of purchase and in the event that the purchaser resides in the country (or five miles or more from available point of purchase) five pounds may be purchased; but in no event shall the amount so purchased exceed the monthly per capita allowance as stated above.

Rule 2.—Consumers requiring sugar for home canning and preserving are allowed not more than twenty-five pounds for such home canning or preserving, and in securing such allowance they must make regular application on forms authorized by the United States Food Administrator, such forms to be furnished by and to bear the signature or stamp of the County Food Administrator of the County in which the purchaser resides.

Rule 3.—No consumer securing sugar under these rules will be allowed to trade, exchange, or dispose of such purchases as they may make; either directly or indirectly to another person; nor shall any purchaser be allowed to make duplicate purchases at different stores.

Rule 4.—All private consumers or families will be subject to a strict observance of these rules, and in any event of discovery that any purchaser has violated these regulations and has secured more than their allotment of sugar, the County Food Administrator, or other representatives of the United States Food Administration, will be directed to immediately seize such surplus of sugar as may have been acquired and in cases where violation of the rulings is discovered, proceedings will be instituted against such violators under the Food Administration laws.

Prayer Meeting.
Attend prayer meeting at the Presbyterian Church, Wednesday night, at 8 o'clock. Mr. S. Runge will lead.

Killed in France
First Lieutenant Arthur Elmore nephew of H. L. Gibson of this city was killed July 16th in the first German drive.

MEAT RULES
For Restaurants, Hotels and Boarding Houses
Mondays noonday meal, rosb beef.
Wednesdays and Saturdays, noonday meal, stew or boiled.
Thursdays, noonday meal, steak or Hamburg.
These days were made uniform over the state of Florida. All sugar bowls must be removed from the table.

New Ruling on Potatoes
All potatoes must now be sold by the pound and not by dry measure as heretofore.

Six pounds per month per person is the new ruling on flour, calendar month. 98-11

Turks Have Quit.
According to later wires received Turkey has quit the game, and severed relations with Germany. What effect this will have on the war situation is problematical.

Construction work on the DeLand Daytona road will be resumed as the result of the action by the board of county commissioners in session last week. Akerman & Ellis, contractors, have been notified to proceed with the construction work. The road at present is in a deplorable condition, making it necessary for motorists to travel between the two cities by way of New Smyrna.

The "Dead Ones" Help

A doctor can't keep you well if he doesn't know what ails you. He dissects to correct. Look up the "Dead Ones" record and it will help you to survive. Look up the successful ones and you'll find that they SAVED MONEY.

(Continued from Page 1)

cans 3 minutes and process 25 minutes.

Cling Peaches
Sort the fruit, using firm, sound uniform peaches for canning. The peel may be removed by plunging the peaches in wire basket or cheese cloth square and immersing in boiling water until the skin slips easily. Remove, plunge for a minute into cold water and slip off skin. Pack in glass or tin and fill each jar or can with water and paddle carefully to remove the air bubbles. Exhaust number 3 cans 3 minutes, process 20 minutes. In glass, process quart jars 25 minutes and half gallon jars 40 minutes.

Kelifer Pears Preserved in Syrup
Peel, quarter and core pears. Boil or steam in clear water until easily pierced with a straw. Cover with cane syrup, diluted. Cook until the pears are tender. If syrup is not sufficiently thick when pears are tender, remove pears and cook syrup until of desired consistency.

Put pears in sterilized jars; pour boiling water over fruit, partly tighten covers to jars; process 25 minutes and seal.—Miss Genevieve Crawford, Tallahassee, Fla.

Water Melon Rind Preserved Without Sugar.
Cut water melon rind in one inch squares; cut out soft red part to firm white part, also the green outside. Cover with water, cook until tender. A steam pressure canner is of great assistance here as the rind cooked under pressure becomes tender in three minutes.

When tender drain, drop into boiling cane syrup, cook until transparent, season with spices and lemon juice; cook until transparent. This usually takes about one hour.

Drain the syrup from the rind after allowing it to stand over night. Pack the rind into sterilized jars. Bring syrup to boil and fill the jars. Seal and process 15 minutes.—Miss Genevieve Crawford, Tallahassee, Fla.

Directions for canning or drying and instructions on home made driers may be had on application to your County Home Demonstration Agent or by addressing Home Economics Department, Florida State College for Women, Tallahassee, Florida.

The following bulletins may be had on application to Home Economics Department, Florida State College for Women, Tallahassee, Florida:

Farmer's Bulletin No 853—Home Canning of Fruits and Vegetables.
Farmers Bulletin No 984—Farm and Home Drying of Fruits and Vegetables.

Agnes Ellen Harris Home Economics Director of Florida Food Adm.

C. O. D. Society.
After an adjournment of nine months the C. O. D. met Friday evening at the home of Miss Ruth Hand. Most of the evening was spent in talking about the various things which occurred since they last met.

Marion Gove was well posted on the happenings in Orlando, as she attended business college there; Annie Anderson talked about her two months training in the hospital in Jacksonville; Katherine Aycock of her six months travel. Lucille Rines, Ruth Hand and Ruth Kanner talked continually of the activities of Florida State College. Ruth Mettinger the only absent member, has been studying in Southern College. She is now living in Live Oak. After these exciting discussions, fruit sherbert and cake were served by the hostess. Just before adjournment an important business meeting was held.

POINTS IN SILO FILLING

(Continued from Page 2)

silage crops. However, the drier the crop the more water should be used, and the more tramping is necessary. There is one danger that should be looked out for and that is, not to put the crop into the silo until it is well matured. More poor silage is much by using immature crops than by using crops that are too ripe.

If corn is to be put into the silo do not harvest the crop until the ears are well past the roasting-ear stage. A good indication of when the crop is properly matured and ready for the silo is when the outer husks of the ears begin to turn brown.

If it is a crop of sorghum to be put into the silo the seed-heads should be practically mature.

If one wishes to use cowpeas, use them in connection with corn or sorghum, making a mixture of about 1-3 cowpeas and 2-3 corn or sorghum. The seed-pods on the cowpeas should be almost ripe, or in other words, they are ready to harvest about the time the seed-pods begin to turn brown.

JOHN M. SCOTT
Animal Industrialist,
Florida Experiment Station.

SANFORD FIRST COTTON

BRINGS FORTY CENTS A POUND IN SAVANNAH

SAVANNAH, Ga., July 29
The first bale of cotton received here this year was sold today for forty cents a pound, being bid at auction by B. Rosenthal & Co. It will be sent to New York and sold for a war charity. It was from Sanford, Fla. Another bale from Doerun, Ga., received was not sold at auction.

To The Grocers Of Seminole County.

Under the new ruling the granting of sugar certificates for canning and preserving has been discontinued. No one who has already purchased 25 pounds of sugar can procure any more except the monthly allowance. Make this plain to your customers and save much useless discussion.
R. J. Holly
Acting Food Adm.

Among The Scouts.

Boy Scouts of America, Troop 1, Sanford.

The weekly meeting of July 25th was called to order by Patrol Leader McAlexander at regular time.

Roll was called and dues collected. In the absence of Scribe, scout Bradbury took his place.

William Mallam qualified as Tenderfoot and then took his oath as a Boy Scout.

Minton Winne was voted in the Troop on three month's trial.

It was found out that we need only three more members to fill our Troop.

Meeting adjourned at 9:00 o'clock.
J. W. Musson, Scribe.

Band Concert Friday Night.

There will be a Band Concert in Central Park next Friday night.

St. Lucie county is preparing to vote on the cattle tick question and there is every indication that this progressive section will vote for the compulsory dipping of cattle with a big majority when it is submitted to the people. There are already many fine cattle in the county and many more would be purchased if the farmers could be assured that they would not be affected by the poisonous and destructive cattle tick which has been such a detriment to the development of the cattle industry in this state.

There is more ground prepared for planting rice than ever before in Pinellas county, but plantings are being delayed on account of rain.

Honor Mrs. Mettinger.

At the Methodist Church, Choir practice Friday evening last, the choir was surprised as they finished their work to see the church building suddenly lighted brilliantly and a number of friends come trooping in and seating themselves comfortably, and expectantly. The mystery was quickly and delightfully solved when, as the pastor, Dr. Hillburn, came in and took his seat, Mr. F. P. Forster arose and ascended the choir platform and began to tell them that he was there representing a large number of the choirs, members of the churches, and business men of Sanford, who desired him to express for them their high appreciation of and esteem for Mrs. J. K. Mettinger and their united regrets that she was so soon to leave our community, after having given so many years of useful service among us, having always been a neighbor to all and a friend in need and in deed. A woman whose splendid character had made such a deep impression upon those who were privileged to know her, by her untiring and unselfish zeal in all matters pertaining to the good of her church, its choir, its people and the whole of Sanford both in the churches and out of them, charming them by her rich and beautiful voice in song which ever revealed the deep genuine christian nature and principle of one whose greatest pleasure was to serve.

Mr. Forster then presented to

Mrs. Mettinger a beautiful cameo pin from all the friends as a token of their appreciation and regard. Mrs. Mettinger was greatly surprised and much pleased with the gift, remarking that she did not need this to make her remember Sanford and her many friends, but would accept it as a sealing of the bond. The meeting closed by singing "Blest Be The Tie That Binds" and wishing her a hearty, God Bless You!

Mrs. Herndon Entertained.

Lovely in every detail, was the affair given by Mrs. Claude Herndon at her attractive home on Magnolia Ave. on Monday evening in honor of Mrs. J. K. Mettinger, who is leaving Sanford for Jacksonville, where she will make her future home. Mrs. Mettinger rendered several vocal selections, and Mrs. Herndon and Mrs. Walter Morgan's charming voices added greatly to the occasion. The guest of honor received a lovely bronze fern dish, given by Mrs. Herndon, in token of their long and lasting friendship. The presentation was made by Mrs. W. W. Abernathy in her usual charming manner. Delicious refreshments were served.

Enjoying the gracious hospitality of Mrs. Herndon were a few friends of Mrs. Mettinger.

Notice

Bids will be received for transporting school children in District No. 1, on the following routes for a term of eight months beginning September 16, 1918:

Route No. 1—Celery avenue and Beardall avenue to Cameron City.

Death Of Mrs. Edward Cameron

The community was shocked last Friday morning to learn of the death of Mrs. Edward Cameron, who resided at the Cameron place near Cameron City. Mrs. Cameron and her husband had been home only a few days from Key West, where Mr. Cameron is in the naval reserves and Mrs. Cameron was taken ill Wednesday while visiting her father Mr. F. E. Gatchell and growing serious physicians were called in. The case proved to be acute appendicitis and it was thought best to take her to Orlando hospital. The operation was performed but on account of the condition of the appendix there was no hope for the patient and her death occurred Thursday.

The funeral, occurred from the Baptist Temple here Sunday afternoon, Dr. Collins officiating and the many who attended and the beautiful floral offerings attested to the love and esteem in which the deceased was held in this city and county. Interment was made in Lakeview.

Mrs. Cameron was formerly Miss Mary Gatchell, daughter of F. E. Gatchell, and spent her girlhood days here becoming the bride of Edward Cameron about two years ago, making their home with Mr. and Mrs. Joe Cameron where Ed was engaged in the cattle and farming business with his father. When the war broke out Ed volunteered in the naval reserves and thither went his faithful wife with him to be as long with him as his duty would permit. They were home on a short visit when she was taken ill and passed away.

The sympathy of their many goes out to the grief stricken husband and the families.

PREVENT HOG CHOLERA

The B. A. Thomas Hog Powder has a record of 95 per cent cures of Hog Cholera. If you feed your hogs as directed, you need never fear hog cholera or any other hog disease. And the directions are very simple, just about what you are doing, plus a few cents' worth of B. A. Thomas' hog Powder in the feed twice a week. Usually, though, Cholera gets in before we know it. Then it requires close attention to each hog—each hog must be dosed—and if you will dose them as directed, you will save better than 90 per cent. If you don't, the B. A. Thomas medicine costs you nothing. We—not some distant manufacturer—pay your money back.

L. Allen Seed Co. 91-Fri-4tc

TAKE SAVINGS OF LIFETIME

Sailor and Wife Did Not Know They Could Not Take Gold Out of Country.

San Francisco.—The savings of a lifetime of a sailor and his wife have been seized by federal officials because the couple did not know of President Wilson's order forbidding the taking of gold out of the country. Because Mrs. Ricardo Rodriguez feared banks, she persuaded her husband to carry their entire fortune, \$1,855, with him on a trip to Central America. The officers found it and took possession. Because of the nature of the case permission is to be asked of Secretary McAdoo to return the money.

DIDN'T KNOW ABOUT THE WAR

Miner Comes in With \$48,000 Stake, Invests It in Bonds and Goes Back to Work.

Reno, Nev.—For five years Charles McNeale has been working a placer claim in the mountains of the Powder River country in Oregon, happily unconscious of the fact that virtually the entire world was at war. McNeale came out of his mountain retreat with \$48,000 in gold. On learning the Kaiser had made the universe his enemy the prospector attempted to enlist. He was too old. He then invested the \$48,000 pike in Thrift stamps and Liberty bonds, ordered a grub stake and returned to the hills.

UNFEELING SERGEANT GETS HEAVY SENTENCE

Little Rock, Ark.—Here is how the United States protects her private soldiers. William L. Taylor, an enlisted man at Camp Pike, was ill and sent word to his sergeant, George W. Reubling. "I don't care, let him die," said Reubling. Reubling was tried by court-martial, convicted, sentenced to five years in military prison, forfeits all pay and allowances and is dishonorably discharged from the army.

Boy Named "Liberty Bond"

Moundsville, W. Va.—A male child, born to Mr. and Mrs. Alex Sletme, has been named "Liberty Bond Sletme."

One Advantage.

The fellow who tells all he knows has one good point—he will never do anything wrong if he tells about it before and after.—Farm Life.

RECORD MADE IN BUILDING THE WARD

This view shows the U. S. destroyer Ward, under construction at the Mare Island navy yard, California. 24 hours after the keel was laid. As such structural work as possible was prepared in advance, bulkheads, sections of the keel, deckhouses and bridge structure were riveted up ready for assembling in place on the ways. The Ward was launched 17 1/2 days from the date of laying of her keel. This is a new world's shipbuilding record.

Y.M.C.A. HUT IS THEIR HANG OUT

Yanks Travel Many Miles to Spend Evening in the Club.

SOMEBODY ALWAYS ON JOB

"Y' Guy" Can Be Depended Upon to Get Move On in Emergency—Men Made to Feel Perfectly Free and Unrestrained.

By CLARENCE BUDINGTON KEL-

LAND.

Paris.—Thirty sailors off an American war vessel hired a motor truck and drove nine miles to get to the Y. M. C. A. club in a famous French city. I asked them why. "Because it's a regular hangout," one of them said, and another added, "Because you get white bread with butter on it, and eggs fried on both sides had coffee with piano accompaniment."

As soon as I broke into the place I found why men would ride nine miles on a truck to loaf there from eight until eleven.

It wasn't the sort of place folks in the United States imagine a Y. M. C. A. to be. It was a swelteringly hot night, and the broad front steps were lined from end to end with men in khaki and men in navy blue. They were gassing and smoking until the place looked as if the captain had ordered a smoke screen to help him through the submarine zone.

From the street you could hear a piano doing business and a lot more men in uniform howling, "Joan of Arc." If the mothers of these boys could have heard that racket their hearts would have dropped off a pound of weight and increased their beat by ten to the second. They sang as if they were glad to be alive.

Right on the Job.

And then somebody busted up the game. A sailorman came in and made the announcement that the driver of their truck refused to take them back to quarters again, and it was a walk of nine miles on a hot night, or a stretch in the brig for them. Gloom descended. Then somebody turned around and followed, "Where's one of them 'Y' guys?"

A "Y" guy happened to be on the spot and in a second he was surrounded, not by a crowd of men who were angry or in a mood to demand something, but by fellows who were mighty courteous in an unpleasant situation. That was something worth remarking.

TAKES DAUGHTER TO CAMP

Virginia Drafted, Sells Support of Child, Carries Her With Him to Cantonment.

Camp Lee, Va.—A. W. Carpenter, a Virginia draftee, arrived at the camp with his three-and-a-half-year-old daughter. He claimed he was the sole support of the child and had brought her to camp, hoping to keep her with him. The nurses at the base hospital will "adopt" the child if the father gives his legal consent.

"OLIT WITTING THE HUN"

BY LIEUTENANT PAT O'BRIEN

STORY BY PAUL ALLEN COBBETT

SYNOPSIS.

CHAPTER I—Introductory. Pat O'Brien tells of his purpose in writing the story of his adventures.

CHAPTER II—Tells of his enlistment in the Royal Flying Corps, his training in Canada and his transfer to France for active duty.

CHAPTER III—Describes fights in which he brought down two German airplanes and his final flight in which he was brought down wounded within the German lines and was made a prisoner of war.

CHAPTER IV—Discovers that German hospital staff barbarously neglected the fatally wounded and devoted their energies to restoring those who might be returned to the firing lines. Witnesses death in flight of his best chum, Lieut. Paul Rainey.

CHAPTER V—He is taken to the officers' prison camp at Courtrai. There he begins planning his escape. By great sacrifice he manages to save and hide away two daily rations of bread.

CHAPTER VI—He confiscates a map of Germany and just half an hour later is put on a train bound for a prison camp in Germany. He leaps through a window while the train is traveling at a rate of 30 miles an hour.

CHAPTER VIII—For nine days more he struggles on in a weakened condition through Luxembourg in the direction of Belgium.

CHAPTER IX—He endures terrible hardships, swims rivers, while delirious from hunger, living like a hunted animal and on the eighteenth day after jumping from the train he crosses into Belgium.

CHAPTER X—When well on his way through Belgium he is befriended one night by a Flemish peasant, who feeds him and directs him to a man in a Belgian city who will help him to get a passport.

CHAPTER XIII.

Five Days in an Empty House.

The five days I spent in that house seemed to me like five years. During all that time I had very little to eat—less in fact than I had been getting in the fields. I did not feel it so bad, perhaps, because of the fact that I was no longer exposed to the other privations which before had combined to make my condition so wretched. I now had a good place to sleep, at any rate, and I did not wake every half hour or so as I had been accustomed to do in the fields and woods, and, of course, my hunger was not aggravated by the physical exertions which had been necessary before.

Nevertheless, perhaps because I had more time now to think of the hunger-pains which were gnawing at me all the time, I don't believe I was ever so miserable as I was at that period of my adventure. I felt so mean towards the world I would have committed murder, I think, with very little provocation.

German soldiers were passing the house at all hours of the day. I watched them hour after hour from the

keyhole of the door—to have shown myself at the window was out of the question because the house in which I was concealed was supposed to be untenanted.

Because of the fact that I was unable to speak either Flemish or German I could not go out and buy food, although I still had the money with which to do it. That was one of the things that galled me—the thought that I had the wherewithal in my jeans to buy all the food I needed and yet no way of getting it without endangering my liberty and life.

At night, however, after it was dark, I would steal quietly out of the house to see what I could pick up in the way of food. By that time, of course, the stores were closed, but I scoured the streets, the alleys and the byways for scraps of food and occasionally got up courage enough to appeal to Belgian peasants whom I met on the streets, and in that way I managed to keep body and soul together.

It was quite apparent to me, however, that I was worse off in the city than I had been in the fields, and I decided to get out of that house just as soon as I knew definitely that Huy-

liger had made up his mind to do nothing further for me.

When I was not at the keyhole of the door I spent most of my day on the top floor in a room which looked out on the street. By keeping well away from the window I could see much of what was going on without being seen myself. In my restlessness, I used to walk back and forth in that room and I kept it up so constantly that I believe I must have worn a path in the floor. It was nine steps from one wall to the other, and as I had little else to amuse me I figured out one day after I had been pacing up and down for several hours just how much distance I would have covered on my way to Holland if my footsteps had been taken in that direction instead of just up and down that old room. I was very much surprised to find that in three hours I crossed the room no less than 5,000 times and the distance covered was between nine and ten miles. It was not very gratifying to realize that, after walking all that distance I wasn't a step nearer my goal than when I started, but I had to do something while waiting for Huy-liger to help me, and pacing up and down was a natural outlet for my restlessness.

While looking out of the top floor window one day, I noticed a cat on a window ledge of the house across the street. I had a nice piece of a broken mirror which I had picked up in the house and I used it to amuse myself for an hour at a time shining it in the cat's eyes across the street. At first the animal was annoyed by the reflection and would move away, only to come back a few moments later. By and by, however, it seemed to get used to the glare and wouldn't budge no matter how strong the sunlight was. Playing with the cat in this way got me into the habit of watching her comings and goings and was indirectly the means of my getting food a day or two later—at a time when I was so famished that I was ready to do almost anything to appease my hunger.

It was about 7 o'clock in the evening. I was expecting Huy-liger at 8, but I hadn't the slightest hope that he would bring me food, as he had told me that he wouldn't take the risk of having food in his possession when calling on me. I was standing at the window in such a way that I could see what was going on in the street without being observed by those who passed by, when I noticed my friend, the cat, coming down the steps of the opposite house with something in his mouth. Without considering the risks I ran, I opened the front door, ran down the steps and across the street, and pounced on that cat before it could get away with its supper, for that, as I had imagined, was what I had seen in its mouth. It turned out to be a piece of stewed rabbit, which I confiscated eagerly and took back with me to the house.

Perhaps I felt a little sorry for the cat, but I certainly had no qualms about eating the animal's dinner. I was much too hungry to dwell upon niceties, and a piece of stewed rabbit was certainly too good for a cat to eat when a man was starving. I ate and enjoyed it and the incident suggested to me a way in which I might possibly obtain food again when all other avenues failed.

From my place of concealment I frequently saw huge carts being pushed through the streets gathering potato peelings, refuse of cabbage and similar food remnants, which, in America, are considered garbage and destroyed. In Belgium they were using this "garbage" to make their bread out of, and while the idea may sound revolting to us, the fact is that the Germans have brought these things down to such a science that the bread they make this way is really very good to eat. I know it would have been like cake to me when I was in need of food; indeed I would have eaten the "garbage" direct, let alone the bread.

Although, as I have said, I suffered greatly from hunger while occupying this house, there were one or two things I observed through the keyhole or from the windows which made me laugh, and some of the incidents that occurred during my voluntary imprisonment were really funny.

From the keyhole I could see, for instance, a shop window on the other side of the street, several houses down the block. All day long German soldiers would be passing in front of the house and I noticed that practically every one of them would stop in front of this store window and look in. Occasionally a soldier on duty bent would hurry past, but I think nine out of ten of them were sufficiently interested to spend at least a minute, and some of them three or four minutes gazing at whatever was being exhibited in that window, although I noticed that it failed to attract the Belgians.

I have a considerable streak of curiosity in me, and I couldn't help wondering what it could be in that window which almost without exception seemed to interest German soldiers but failed to hold the Belgians, and after conjuring my brains for a while on the problem I came to the conclusion that the shop must have been a book-shop and the window contained German magazines, which, naturally enough, would be of the greatest interest to the Germans but of none to the Belgians.

At any rate I resolved that as soon as night came I would go out and investigate the window. When I got the answer I laughed so loud that I was afraid for the moment I must have attracted the attention of the neighbors, but I couldn't help it. The window was filled with huge quantities of sausage! The store was a butcher shop and one of the principal things they sold apparently was sausage. The display they made, although it consisted merely of sausages piled in the

window, certainly had plenty of "pulling" power. It "pulled" nine Germans out of ten out of their course and indirectly "pulled" me right across the street! The idea of those Germans being so interested in that window display as to stand in front of the window for two, three or four minutes at a time, however, certainly seemed funny to me, and when I got back to the house I sat at the keyhole again and found just as much interest as before in watching the Germans stop in their tracks when they reached the window, even though I was now aware what the attraction was.

One of my chief occupations during these days was catching flies. I would catch a fly, put him in a spider's web (there were plenty of them in the old house), and sit down for the spider to come down and get him. But always I pictured myself in the same predicament and rescued the fly just as the spider was about to grab him. Several times when things were dull I was tempted to see the tragedy through, but perhaps the same Providence that guided me safely through all perils was guarding, too, the destiny of those flies, for I always weakened and the flies never did suffer from my lust for amusement.

The house was well supplied with books—in fact, one of the choicest libraries I think I ever saw—but they were all written either in Flemish or French. I could read no Flemish or very little French. I might have made a little headway with the latter, but the books all seemed too deep for me and I gave it up. There was one thing though, that I did read and reread from beginning to end; that was a New York Herald which must have arrived just about the time war was declared. Several things in this interested me, and particularly the baseball scores, which I studied with as much care as a real fan possibly could an up-to-date score. I couldn't refrain from laughing when I came to an account of Zimmerman (of the Cubs) being benched for some spat with the umpire, and it afforded me just as much interest three years after it had happened—perhaps more—than some current item of world-wide interest had at that time.

I rummaged the house many times from cellar to garret in my search for something to eat, but the harvest of three years of war had made any success along that line impossible. I was like the man out in the ocean in a boat and thirsty with water everywhere but not a drop to drink.

I was tempted while in the city to go to church one Sunday, but my better judgment told me it would be a useless risk. Of course, someone would surely say something to me and I didn't know how many Germans would be there or what might happen, so I gave up that idea.

During all the time I was concealed in this house I saw but one automobile and that was a German staff officer's. That same afternoon I had one of the frights of my young life.

I had been gazing out of the keyhole as usual when I heard coming down the street the measured tread of German soldiers. It didn't sound like very many, but there was no doubt in my mind that German soldiers were marching down the street. I went upstairs and peered through the window and sure enough a squad of German infantry was coming down the street accompanied by a military motor truck. I hadn't the slightest idea that they were coming after me, but still the possibilities of the situation gave me more or less alarm, and I considered how I could make my escape if by chance I was the man they were after. The idea of hiding in the wine cellar appealed to me as the most practical; there must have been

LESSONS FOR THE Home Embroiderer

Specially prepared for this Newspaper by Pictorial Review.

Novelties for Chair and Tray in Filet Crochet.

By KATHRYN MUTTERER.
The remarkable adaptability of filet crochet has made it worthy of universal acceptance by women who like needlework. It is so simple that even those who cannot be persuaded to do any other form of crochet take to it readily. In the first place, the designs, in most instances, are easy to follow and an absence of variety in stitches means no sacrifice of the beauty of a filet crochet piece.
The chair tidy illustrated is typical of the newest designs in filet crochet and it makes a charming decoration for cushions of denim and other materials in plain colors. The design is so simple in fact, that it even will not jar with ecrotone effects. There is nothing prettier for the summer cottage or even for the city home. In either white or ecru the tidy is attractive. In size it measures 11 1/2 inches and requires 1 ball of

No. 8—Filet Crochet Chair Tidy.

No. 68—Wild Rose Tray Cloth.

crochet cotton No. 80 and a steel hook No. 14. After the tidy is completed a dainty scallop is added all around.
Unusually handsome is the serving tray cloth because its shape is unique and its design one that is in great demand. The floral motifs show up especially well in filet crochet and the wild rose is a general favorite. The mahogany frame forms a suitable setting for the old rose background over which the filet cloth is laid. The crochet oval is attached to a center of white linen. If desired a monogram or initial may be embroidered in the linen.
The making of filet crochet is the most fascinating of all kinds of crochet as one can work the design without having to follow minute directions. For the woman who desires the beautiful things of life there is no better way by which the result can be accomplished with so little outlay of money as by making crochet pieces for the home or for gifts.
Filet Crochet Tray Cloth No. 68. Directions and working pattern, 10 cents.
Filet Crochet Chair Tidy No. 8. Directions and working patterns, 10 cents.
Pictorial Review patterns on sale at local agents.

AMERICAN MARINES DISTINGUISH THEMSELVES IN FRANCE

With great satisfaction the American public has read of the valorous conduct of the United States marines in the fighting in France. A large detachment of the men of the corps is here shown on its way to the fighting front.

"OUTWITTING THE HUN"

By

LIEUTENANT PAT O'BRIEN

Copyright, 1918, by Pat O'Brien

plenty of places among the wine kegs and cases where a man could conceal himself, but, as a matter of fact, I did not believe that any such contingency would arise.

The marching soldiers came nearer, I could hear them at the next house. In a moment I would see them pass the keyhole through which I was looking.

"Halt!" At the word of command shouted by a junior officer the squad came to attention right in front of the house!

I waited no longer. Running down the stairs I flew into the wine cellar and although it was almost pitch dark—the only light coming from a grating which led to the backyard—I soon found a satisfactory hiding place in the extreme rear of the cellar. I had had the presence of mind to leave the

door of the wine cellar ajar, figuring that if the soldiers found a closed door they would be more apt to search for a fugitive behind it than if the door were open.

My decision to get away from that front door had been made and carried out none too soon, for I had only just located myself between two big wine cases when I heard the tramp of soldiers' feet marching up the front stoop, a crash at the front door, a few hasty words of command which I did not understand, and then the noise of scurrying feet from room to room and such a banging and hammering and smashing and crashing that I could not make out what was going on.

If Huylliger had revealed my hiding place to the Huns, as I was now confident he had, I felt that there was little prospect of their overlooking me. They would search the house from top to bottom and, if necessary, raise it to the ground before they would give up the search. To escape from the house through the backyard through the iron grating, which I had no doubt I could force, seemed to be the logical thing to do, but the chances were that the Huns had thrown a cordon around the entire block before the squad was sent to the house. The Germans do these things in an efficient manner always. They take nothing for granted.

My one chance seemed to be to stand pat in the hope that the officer in charge might possibly come to the conclusion that he had arrived at the house too late—that the bird had flown.

My position in that wine cellar was anything but a comfortable one. Rats and mice were scurrying across the floor and the smashing and crashing

"I Figured I Could Put Up a Good Fight."

going on overhead was anything but promising. Evidently those soldiers imagined that I ought to be hiding in the walls, for it sounded as though they were tearing off the wainscoting, the picture molding and, in fact, everything that they could tear or pull apart.

Before very long they would finish their search upstairs and would come down to the basement. What they would do when they discovered the wine I had no idea. Perhaps they would let themselves loose on it and give me my chance. With a bottle of wine in each hand I figured I could put up a good fight in the dark, especially as I was becoming more and more accustomed to it and could begin to distinguish things here and there, whereas when they entered the pitchy darkness of the cellar, they would be as blind as bats in the sun.

Perhaps it was twenty minutes before I heard what sounded like my death-knell to me; the soldiers were coming down the cellar steps! I clutched a wine bottle in each hand and waited with bated breath.

Tramp! Tramp! Tramp! In a moment they would be in the cellar proper. I could almost hear my heart beating. The mice scurried across the floor by the scores, frightened no doubt by the vibration and noise made by the descending soldiers. Some of the creatures ran across me where I stood between two wine cases, but I was too much interested in bigger game to pay any attention to mice.

Tramp! Tramp! Tramp! Again an order was given in German, and although I did not understand it I am willing to bless every word of it, because it resulted in the soldiers turning right about face, marching up the stairs again, through the hall and out of the front door and away!

I could hardly believe my ears. It seemed almost too good to be true that they could have given up the search just as they were about to come upon their quarry, but unless my ears deceived me that was what they had done.

The possibility that the whole thing might be a German ruse did not escape me, and I remained in the cellar for nearly an hour after they had apparently departed before I ventured to move, listening intently in the meanwhile for the slightest sound which would reveal the presence of a sentry upstairs.

I't hearing a sound I began to feel that they had indeed given up the hunt, for I did not believe that a German officer would be so considerate of his men as to try to trap me rather than carry the cellar by force if they had the slightest idea that I was there.

I took off my shoes and crept softly and glowly to the cellar steps and then

step by step, placing my weight down gradually so as to prevent the steps from creaking. I climbed to the top. The sight that met my eyes as I glanced into the kitchen told me the whole story. The water faucets had been ripped from the sinks, the water pipes having been torn off, and gas fixtures, cooking utensils and everything else which contained even the smallest proportion of the metals the Germans so badly needed had been taken from the kitchen. I walked upstairs now with more confidence, feeling tolerably assured that the soldiers hadn't been after me at all, but had been merely collecting metal and other materials which they expected an elaborate dwelling house like the one in which I was concealed to yield.

Later I heard that the Germans have taken practically every ounce of brass, copper and wool they could lay their hands on in Belgium. Even the brass out of pianos has been ruthlessly removed, the serious damage done to valuable property by the removal of only an insignificant proportion of metal never being taken into consideration. I learned, too, that all dogs over fourteen inches high had been seized by the Germans. This furnished lots of speculation among the Belgians as to what use the Germans were putting the animals to, the general impression apparently being that they were being used for food!

This, however, seemed much less likely to me than that they were being employed as dispatch dogs in the trenches, the same as we use them on our side of the line. They might possibly kill the dogs and use their skins for leather and their carcasses for tallow, but I feel quite sure that the Huns are by no means so short of food that they have to eat dogs yet awhile.

Indeed, I want to repeat here what I have mentioned before; if anyone has the idea that this war can be won by starving the Huns, he hasn't the slightest idea how well provided the Germans are in that respect. They have considered their food needs in connection with their resources for several years to come and they have gone at it in such a methodical, systematic way, taking into consideration every possible contingency, that provided there is not an absolute crop failure, there isn't the slightest doubt in my mind that they can last for years, and the worst of it is they are very cocksure about it themselves.

It is true that the German soldiers want peace. As I watched them through the keyhole in the door I thought how unfavorably they compared with our men. They marched along the street without laughter, without joking, without singing. It was quite apparent that the war is telling on them. I don't believe I saw a single German soldier who didn't look as if he had lost his best friend—and he probably had.

At the same time there is a big difference—certainly a difference of several years—between wishing the war was over and giving up, and I don't believe the German rank and file any more than their leaders have the slightest idea at this time of giving up at all.

But to return to my experience while concealed in the house. After the visit of the soldiers, which left the house in a wretched condition, I decided that I would continue my journey towards the frontier, particularly as I had gotten all I could out of Huylliger, or rather he had gotten all he was going to get out of me.

During my concealment in the house I had made various sorties into the city at night, and I was beginning to feel more comfortable even when German soldiers were about. Through the keyhole I had studied very closely the gait of the Belgians, the slovenly droop that characterized most of them, and their general appearance, and I felt that in my own dirty and unshaven condition I must have looked as much like the average poor Belgian as a man could. The only thing that was against me was my height. I was several inches taller than even the tallest Belgians. I had often thought that red hair would have gone good with my name, but now, of course, I was mighty glad that I was not so endowed, for red-haired Belgians are as scarce as rare as German charity.

There are many, no doubt, who will wonder why I did not get more help than I did at this time. It is easily answered. When a man is in hourly fear of his life and the country is full of spies, as Belgium certainly was, he is not going to help just anyone that comes along seeking aid. One of the German's most successful ways of trapping the Belgians has been to pose as an English or French prisoner who has escaped, appeal to them for aid, implicate as many as possible, and then turn the whole German police force loose on them. As I look back on those days I think it remarkable that I received as much help as I did, but when people are starving under the conditions now forced upon those unfortunate people, it is a great temptation to surrender these escaped prisoners to German authorities and receive the handsome rewards offered for them—or for alien spies, as I was classed at that time.

The passport which I had described me as a Spanish sailor, but I was very dubious about its value. If I could have spoken Spanish fluently it might have been worth something to me, but the few words I knew of the language would not have carried me very far if I had been confronted with a Spanish interpreter. I decided to use the passport only as a last resort, preferring to act the part of a deaf and dumb Belgian peasant as far as it would carry me.

Before I finally left the house I had a remarkable experience which I shall remember as long as I live.

LESSONS FOR THE Home Embroiderer
 Specially prepared for this Newspaper by Pictorial Review.

For Luncheon there is First-Cloth and Napkins.

Now that King Sol is once again such a big factor in preparing the daily menus and exceptional delicacies is required to entice appetites, attractive table linen is even more essential than when the weather is cooler. Especially is this the case at the tea or luncheon hour when one deviates from the severity of the

No. 91—Luncheon Set in Linen and Flax.

net crochet finished with a pleated edging surrounds both cloth and napkins. The linen edges may be finished either with a rolled hem or with a very narrow hemstitched hem, as preferred. Though the latter takes somewhat longer to do it really gives a finish which the other lacks. Only a single hemstitch should be used as the more elaborate stitches detract from the crochet which is really the chief decoration.

Pictorial Review Crochet Design No. 91 and two other designs—15 cents and a stamped self-addressed envelope.
