# Smoke a FRESH Cigarette!

Cigarettes in prime condition have a moisture content of about 10% with 50% loss by the Pittsburgh Testing Laboratory Chart that cigarettes in the ordinary wrapped package lose more than half of their total moisture in thirty days and that only the Camel Humidor Pack delivers cigarettes to you in prime condition.

THE whole country is talking about the throat-easy mildness and the prime freshness of Camel Cigarettes in the new Humidor Pack.

The above chart prepared by the Pittsburgh Testing Laboratory tells you why. Please examine it carefully. It is an unerring guide to cigarette selection and enjoyment.

As you can quickly see by the three upper curves on this interesting chart, cigarettes that lack the protection of the Humidor Pack lose their moisture rapidly from the day they are manufactured.

And day by day as this moisture disappears, the smoke from these cigarettes becomes harsher, hotter, more unkind to the smoker's throat.

Not so with Camels! The Humidor Pack is moisture proof and sealed air-tight at every point. It protects the rich, flavorful aroma of the

choice Turkish and Domestic tobaccos of which Camels are blended.

### Make these tests yourself

It is so easy to tell the difference between parched dry cigarettes and fresh prime Camels that it is no wonder everybody is reaching for a fresh cigarette today.

Your fingers identify stale, dried-out tobaccos at once. While a Camel is flexible and pliant.

Your ears can tell the difference too. For a dust-dry cigarette crackles under pressure.

But the real test is taste and there is simply no comparison between the rich mildness of a Camel and the hot, brackish smoke from a stale, dry cigarette.

Switch to Camels just for today (then leave them tomorrow) if you can.

# CAMELS

Artificial heat in tobacco and unperfected curing are the main cause of cigarette moisture loss. In the search for a moisture-proof, air-tight container, the Humidor Pack was developed. It is the only one that keeps the moisture in the tobacco and the flavor in the smoke.
