Only Buick has an engine Vibrationless beyond belief

BUICK'S remarkable freedom from vibration is due primarily to three vitally important factors. First-the inherent smoothness of the Buick Valve-in-Head six-cylinder engine. Second rubber engine mountings, front and rear. And third-the scientific and almost perfect balance of the entire Buick crankshaft assembly.

Only Buick enjoys these advantages. And only Buick provides the silken performance-the unvarying smoothness at all speeds - the longer life and greater serviceability of an engine vibrationless beyond belief.
